5000 Watt

Dumont Television Transmitter

DuMont 5000 watt Master series low-band television transmitter. Daily operation only since July 1, 1950 by Television Station #106. Surpassed all FCC proof of performance requirements and fully licensed. Dependable and economical operation. Exceptional fine performance record. Tube cost and replacement parts negligible. Modern, compact air-cooled units. Transmitter maintained under direction registered professional engineer with frequent checks by Dumont engineers. Complete factory and station record of performance available and apparatus available for immediate physical inspection and off-the-air observation. Transmitter reasonably priced and will save approximately twenty to thirty thousand dollars without sacrifice of performance for the prospective television station operator targetting for early fall. Reason for sal is due to power increase CP for 100 kw operation. Priority in accordance with arrival of inquiries.

TRANSMISSION LINE and FITTINGS

at a fraction of their cost

Because the FCC assigned us a UHF-TV frequency, we have a quantity of Communication Products Company's type 506 and 505, 50.5 ohm transmission line, originally installed for VHF which had to be replaced. It has never been in use and is in top condition, other than having weathered on the tower during the "freeze". Some of it is brand new, never out of the boxes. It's complete with "O" rings, bolts, connectors, etc. Clean as a whistle inside, carefully boxed for shipment and ready to go. We'll sell the lot at 50% of today's list price.

540 feet 3⅛" Type 101-506 (27-20 ft. lengths)
40 feet 1⅝" Type 114-505 (2-20 ft. lengths)
2-45° 3⅛" Type 73-506 Elbows
3-90° 3⅛" Type 72-506 Elbows

Football Fumble

AN EXPERIENCED voice—the only voice that can speak with the authority of 11 years of background in telecasting college football—a few days ago sounded a prophetic warning to the money-minded men who determine the TV sports policy of the nation's top colleges.

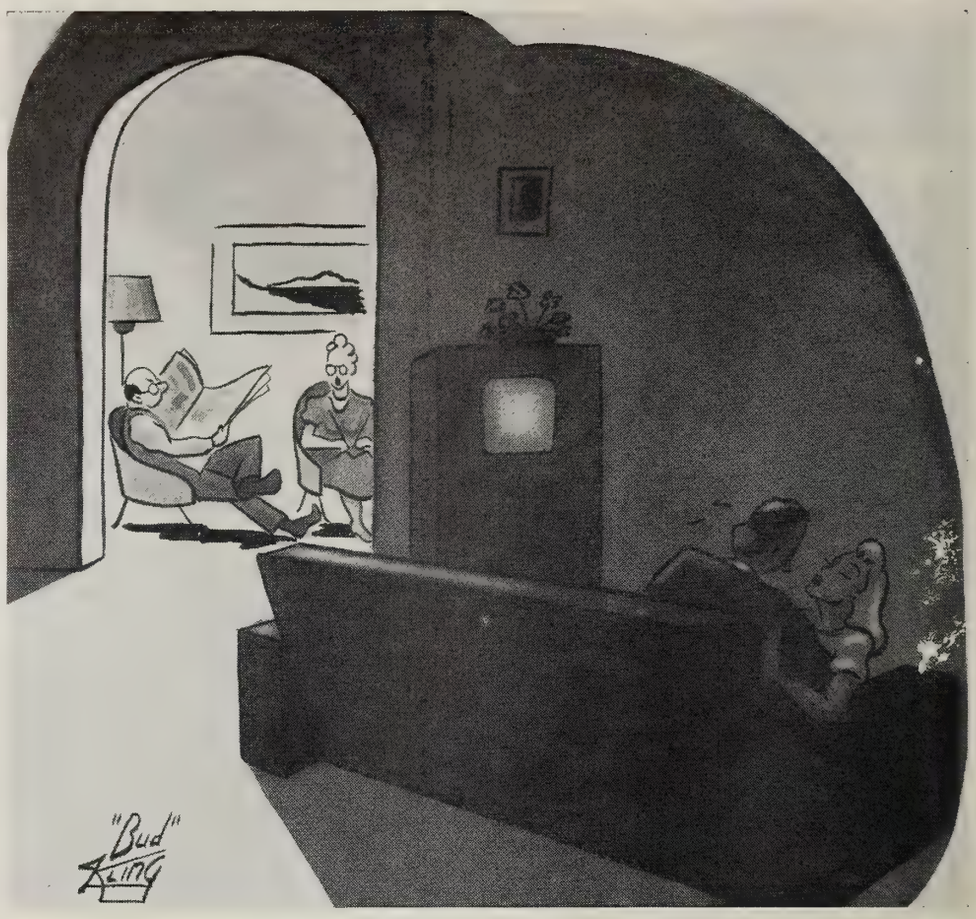
Said Francis Murray, U. of Pennsylvania athletic director:

"In a short time you'll all be struggling to get on TV."

Despite his warning, 172 delegates of the National Collegiate Athletic Assn. voted to continue a policy of collusive restraint that in effect allows only one college football game to be broadcast each Saturday. Only 13 delegates voted against a policy of doubtful legality and questionable morality.

Curious, isn't it, that a group of college officials should cling stubbornly to a monopolistic approach to a service whose purported goals are healthy competition and the development of youthful character.

Assuming the question of TV's impact on college football's exchequer is moot, the best answer must be sought in (1) available research and (2) actual experience over a long period.



Even NCAA's ardent monopoly advocates will concede privately that available research justifies no firm conclusions that TV ruins the football gate. As to the long-time record, Mr. Murray offers conclusive evidence that 11 years of football TV in the Philadelphia area have not hurt gate receipts.

While colleges tremble over fancied fears that unlimited TV might build up video monopolies at institutions with strong teams, they apparently overlook the fact that only 24 teams took part in the 1952 network schedule contrasted to 96 teams on a four-network basis and a possible several hundred teams if regional and local games were telecast.

The net result is that barely a tenth of the 250 NCAA colleges were allowed access to television. This negative policy deprives nine-tenths of colleges of the chance to demonstrate their sports and educational programs in action. It denies them a sales force that could build many new fans.

In the long run the nation's educators will learn—and they will learn the hard way—that the American way of telecasting and the American principle of free competition will permit no such compromise with the public interest. They will learn that a wholesome sports policy eventually must emerge. They will learn that the enticing lures of metered and theatre service, violative of the democratic principle that programs should be available to all, may permanently damage a sport that already is suffering from overcommercialism.

The pros were first to heed the pointed finger raised by the Dept. of Justice. Both football and baseball club owners, who direct strictly business enterprises, have softened concerted TV and radio controls. Amateurs should be the first to keep their ethics in good repute. Having missed that opportunity they should be willing to learn from the professionals.

Drawn for BROADCASTING • TELECASTING by Bud Kling

"Have you noticed how popular she is since we bought our television set?"

Both Ends of Penna. Ave

RADIO AND television lived another memorable milestone last week. A Government changed hands. And a whole nation witnessed the enthralling spectacle. There were almost as many workers in the radio and television inaugural vineyard as there were spectators a generation ago.

That was the task performed by free American broadcasting as the electronic chronicler of events as they occur. It was possible because in the United States there is free radio and television. In this interplay of competition, 150 million Americans could hear or see and hear what transpired on historic Pennsylvania Avenue. They had a choice.

In other nations — where Government monopolies control broadcasting—there is no choice.

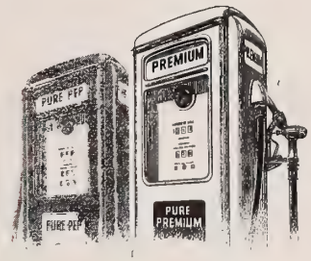
Broadcasters did this job as their duty. They want to do more. Opportunities may be ahead. President Eisenhower is pondering a monthly "news conference" broadcast, presumably patterned on the FDR fireside chat. The House ban has been rescinded by GOP Speaker Martin. The Senate allows pickups in the discretion of Committee chairmen. The day of the radio and TV floor debates may not be distant.

Meanwhile, some 3,000 radio and television broadcasters are awaiting anxiously word from the new occupant of 1600 Penna. Ave. on the new composition of the FCC. They hope fervently that the new appointees will be wise administrators, and not political has-beens.

Cloud Dispelled

PERHAPS the final official act of outgoing Attorney General James P. McGranery last Monday—a day before the change of administration—was the correction of a great injustice foisted upon the electronics industry. He announced revocation of the grand jury authorization, issued just a year before, which had been stimulated from within the FCC largely as a result of the color-TV fight.

In these columns on Dec. 8, 1952 we sought to call Mr. McGranery's attention to the circumstances surrounding this case, placing 20 corporations in radio, television and electronics under the stigma of criminal prosecutions. This, at a time when Mr. McGranery's task was to root out corruption in the Department, and when the defense program calls for maximum output of our electronics industries.



We are gratified over Mr. McGranery's action. The grand jury now may continue its investigation under civil, rather than the criminal process.

Chances are the whole matter will be dropped, now that it has been determined that, to use the retiring Attorney General's words, there was no finding of "use of force, strong arm tactics or activities of similar nature."

With this cloud dispelled, we can now expect to see the nation's multi-billion-dollar electronics industry stride forward. The next development: Obviously color television and within the next year or two.

THE PURE OIL COMPANY DOES A COMPLETE JOB...

SO DO HAVENS AND MARTIN, Inc. STATIONS

WMBG
WCOD
WTVR

The Pure Oil Company is active in all phases of petroleum—from exploration in search of oil to distribution to the consumer. The blue and white Pure sign identifies more than 12,000 friendly dealers, from Minnesota to Florida. Pure's own story of their "complete job" is well expressed in their well known slogan "Be sure with Pure."

Havens & Martin, Inc. Stations could logically use the same phrase of confidence, for listeners and advertisers alike *know* they always receive complete, interested service from WMBG, WCOD and WTVR. They comprise Richmond's one and only complete broadcast institution. These First Stations of Virginia reach and sell the people in the rich markets around Richmond! For you?

FIRST STATIONS OF VIRGINIA

WTVR represented nationally by Blair TV, Inc.
WMBG represented nationally by The Bolling Co.

Business is

in Detroit

MARKET-wise, Detroit is the sweetest sales-territory in the U.S.A. That was true in '52 . . . *and it'll continue to be in '53.* The rhythmic music of machinery in action, of men at work, of cars and trucks and tanks rolling off production lines, of money changing hands, of clinking coins and ringing tills . . . all blend into a "hum sweet hum" of 4½ billion dollars retail business annually . . . in a market where hourly and weekly earnings of factory workers are at an all-time peak.

MEDIA-wise, you can make your sales hum in this market by spotting or programming your campaign on WWJ, Detroit's NBC affiliate. For 33 years, WWJ has been *first* in programming, in public services, and in getting results for its advertisers.

MONEY-wise, you can buy WWJ for 14.5% LESS than the average cost-per-thousand listeners for radio time in Detroit.

MERCHANDISING-wise, WWJ offers a follow-through service, from distributor to dealer levels, to help keep everyone humming about your advertising program on WWJ.

MAKE '53 a humdinger. Put more "*sell*" into your Detroit campaign by putting more of your ad money into WWJ.

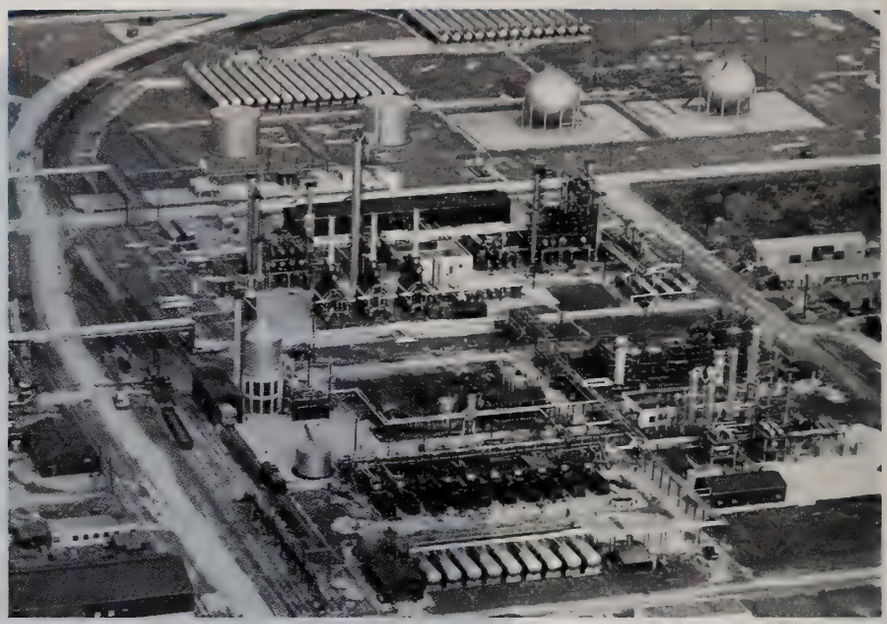
THE NEWSWEEKLY OF RADIO AND TV

Like bass go for minnows

Yes! Bass go for minnows—and local merchants go for W-I-T-H in Baltimore! W-I-T-H carries the advertising of twice as many of them as any other station in town.

Here's why: W-I-T-H delivers more listeners-per-dollar than any other radio or TV station in Baltimore. And that means low-cost results.

W-I-T-H can do it for you too. Let your Forjoe man give you the whole story.



IN BALTIMORE

WITH

TOM TINSLEY, PRESIDENT • REPRESENTED BY FORJOE AND COMPANY

Go where there's GROWTH...

Gasoline and Gobblers

As one of the pioneer producers of petroleum, Kentucky's petroleum industry today is rapidly expanding its production of high test gasolines. An example is the new $17,000,000 plant of the Mathieson Hydro-Carbon Chemical Corp. at Brandenburg. Planned expansions of this plant are expected to exceed $35,000,000, with an annual payroll of over $1,500,000.

Keeping in step with Kentucky's growing income is the growth of Kentucky's turkey farms. 1951 production of turkeys totaled $3,864,000— a 10 year increase of 387%.

Go where there's GROWTH..

GO WHAS! No other station—or group of stations—in this market can match the audience delivered by WHAS seven days a week; morning, afternoon and night.

IF PRESIDENT EISENHOWER follows original plan, there will be barbed comments about slow functioning of administrative agencies in his State of Union message to be delivered to Congress today (Monday). He's received complaints, with FCC included, and it wouldn't surprise some observers to have him comment specifically on snail's pace in licensing new TV stations in underserved markets.

★ ★ ★

MOST STATIONS have been quoting half of 20-second announcement rate for those midget segments of time—four and eight seconds—being sought in "filler" time (at station's discretion) for projected Rinso spot campaign by Hewitt, Ogilvy, Benson & Mather [B•T, Jan. 26]. Agency had been hoping to get 25 or 33% rate for "midgets."

★ ★ ★

NEW NAMES continue to crop up as candidates for prospective vacancies on FCC aside from those of several lame-duck Congressmen. Latest heard: Edward L. Scheuffler, 55, Kansas City attorney, active in GOP councils in Missouri since 1924, and Deneen Watson, 48, Chicago attorney and official of Illinois Bar Assn., likewise active in GOP circles.

★ ★ ★

IF FCC approves Macon merger plan (expected shortly by split vote) look for flood gates to open on literally scores of proposed mergers to expedite licensing of new TV stations in many application-blocked markets. Although several such projects have been pending, Macon deal is first at bat, will establish "marriage" precedent.

★ ★ ★

ANNOUNCEMENT is likely shortly that Stanley R. Pratt, president of WSOO Sault Ste. Marie, Mich., will continue as assistant to chairman of Republican National Committee in Washington for next six months to year. He held same status with Chairman (now Postmaster-General) Arthur E. Summerfield prior to and during campaign and will continue in same capacity under Chairman Wesley Roberts. Mr. Pratt is an NARTB radio director and will attend sessions this week at Belleair, Fla.

★ ★ ★

BUCHANAN & CO. AGENCY has indicated it plans to maintain Chicago branch. Possibility of merger with existing Chicago agency dismissed at this time. Firm expected to reorganize branch in next fortnight after top-level New York meeting and appointment of vice president to head Chicago office to succeed Robert E. Potter Sr., who resigned to form own agency.

★ ★ ★

FULTON LEWIS, provocative Washington commentator with biggest commercial network of all (334 stations) is contemplating network or syndicated TV program. Negotiations reportedly in progress last week, through William B. Dolph, business head of Lewis' operations, for either live network or film release, latter probably through United Television Programs.

QUIZZICAL eyebrows raised at White House last week when Col. Ed Kirby left office of news secretary James C. Hagerty, but was non-committal. Col. Kirby, Army radio-TV chief and former public relations director of NARTB, may have been there on official Army business. Or it could have been in connection with White House plan to name radio-TV figure on Hagerty staff, notably for President Ike's contemplated monthly radio-TV "Report to Nation" following news conference pattern.

★ ★ ★

KLING STUDIOS INC., Chicago, TV film packager, which has mushroomed phenomenally past few years, has confirmed active negotiation for Charlie Chaplin film studios in Hollywood. Kling president Robert Eirinberg has been dickering with Mr. Chaplin in Switzerland.

★ ★ ★

AT LEAST one important top policy executive of Democratic administration is carrying over in similar vein on advisory basis under President Eisenhower. Gordon Gray, owner of WSJS Winston-Salem and president of U. of North Carolina, is one of top group of nine named to new President's Committee on International Information Activities which will consider vital role radio plays in cold war. During past decade Mr. Gray has served as Secretary of Army and Special Assistant to President on European economic problems.

★ ★ ★

DESPITE apparent futility of his cause, Comr. Eugene H. Merrill clings doggedly to hope of Senate confirmation of his appointment to FCC by former President Truman. It's reported he is soliciting support on Capitol Hill but it's taken for granted that new administration will want to swing to Republican majority by naming two new GOP disciples to replace Chmn. Paul A. Walker and Mr. Merrill. FCC associates admire Mr. Merrill for his never-say-die attitude and diligence with which he pursues his FCC work as if nothing were to happen.

★ ★ ★

WASHINGTON becomes hub of top level radio activity all this week. Aside from activities of FCC and Congress, not to mention possibility that White House will move on FCC appointments, these events are scheduled: Federal Communication Bar Assn. annual meeting; annual dinner of Radio Correspondents Assn.; gala cocktail party for Frank White to introduce NBC's new president to Washington brass; probable meeting of Clear Channel Broadcasting Service.

★ ★ ★

WHILE ENGINEERS generally are elated over results of uhf operations, they're reserving judgment until spring-summer, when trees begin to sprout. Military and other experiments in uhf range heretofore conducted developed baffling condition wherein signals wouldn't penetrate foliage, virtually blacking out reception in heavily wooded areas.

9.7 Million Radios, 6 Million TV in '52

SET manufacturers produced 9.7 million radios and over 6 million TV receivers in 1952, according to final figures announced Feb. 1 by Radio-Television Mfrs. Assn.

Radio output in 1951 had totaled 12,627,362 sets, with 5,384,798 TV receivers produced during that year. These figures show radio production down about one-fourth, with TV up about one-eighth.

TV production last December, six-week reporting period, totaled 921,086 sets, with 1,325,158 radios produced. These figures compare with 467,108 TV sets and 868,100 radios in same month of 1951, five-week reporting period.

RTMA found that 94,185 TV sets with circuits tuning FM band were turned out last year, along with another 409,678 home radios containing FM facilities. This brings year's total FM set output to 503,863 home receivers.

RTMA's revised radio and TV set production figures by months for 1952 follow:

	Television	Home sets	Portables	Auto	Clock	Total Radio
Jan.	404,932	288,724	68,433	195,147	80,151	632,455
Feb.	409,337	312,705	72,866	267,779	106,103	759,453
Mar. (5 wks)	510,561	357,689	99,720	343,314	175,169	975,892
April	322,878	286,164	110,529	275,250	176,003	847,946
May	309,375	288,927	128,351	215,478	115,588	748,344
June (5 wks)	361,152	297,669	205,186	246,909	124,489	874,253
July	198,921	203,868	81,353	95,220	61,295	441,736
Aug.	397,769	235,728	105,006	94,315	108,753	543,802

Ike on Radio-TV

ALL RADIO and television networks will carry President Dwight D. Eisenhower's State of Union message to Congress today (Monday). Program will begin at 12:15 p.m. EST and last until about 1:15 p.m. EST.

New TV Applications

FOUR new TV station applications tendered late Friday at FCC. They are:

El Centro, Calif.—Valley Empire Telecasters, uhf Ch. 16, ERP 21.9 kw visual, antenna 266 ft. above average terrain. Construction $161,000, operating $180,000, revenue $215,000. Applicant is trustee for KPRO Riverside, KROP Brawley, KREO Indio and KYOR Blythe, all Calif.

Bloomington, Ill.—Cecil W. Roberts, uhf Ch. 15, ERP 17.95 kw visual, antenna 325 ft. Construction $110,572, operating $108,000, revenue $120,000. Applicant is licensee of KREI Farmington, Mo.

Indianapolis—Empire Coil Co. (WXEL Cleveland), uhf Ch. 26, ERP 105 kw visual, antenna 520 ft. Construction $280,000, operating $450,000, revenue $600,000. Applicant also is TV permittee at Portland, Ore., Denver and Kansas City.

Seattle, Wash.—Puget Sound Bcstg. Co. (KVI), vhf Ch. 7, ERP 200 kw visual, antenna 1,350 ft. Construction $390,690, operating $400,000, revenue $540,000.

• BUSINESS BRIEFLY

NINE-WEEK DRIVE ● Procter & Gamble, Cincinnati (Cheer), through Young & Rubicam, N. Y., preparing special nine-week radio spot announcement campaign to start March 2. Evening chain breaks will be used in at least 75 markets.

CHEMICAL SPRAY SPOTS ● du Pont Products (Fermate and Parzate, chemical sprays for tobacco molds), placing radio spot campaign with staggered starting dates (some in February, some in May) for six weeks in tobacco-growing markets. BBDO, N. Y., agency.

LEVER IN 20 MARKETS ● Lever Bros. (Swan toilet soap), through BBDO, N. Y., planning four-week spot announcement campaign to start Feb. 16 in 20 radio markets.

AGENCY FOR ZIG-ZAG ● Consolidated Sewing Machine & Supply Co., N. Y. (Viking Zig-Zag machines), names Olian and Bronner, Chicago, to handle advertising for that product. Multi-level ad campaign, including TV, being projected.

HOUR OF NEWSCASTS ● Wine Corp. of America, Chicago (Mogen David wine), signs for sponsorship of full hour of newscasts weekly on ABC Radio, starting Feb. 9 for 52 weeks using 198 stations for *News of Tomorrow,* Mon. through Thurs., 10-10:15 p.m. EST. Program features newsman Gordon Frazer from New York and pickups from ABC correspondents throughout world. Agency: Weiss & Geller, Chicago.

JOHNSON CAMPAIGN ● Johnson Candy Co., N. Y., lining up availabilities for radio spot announcements campaign in eight non-TV markets. Actual date not yet set. Agency: Franklin Bruck, N. Y.

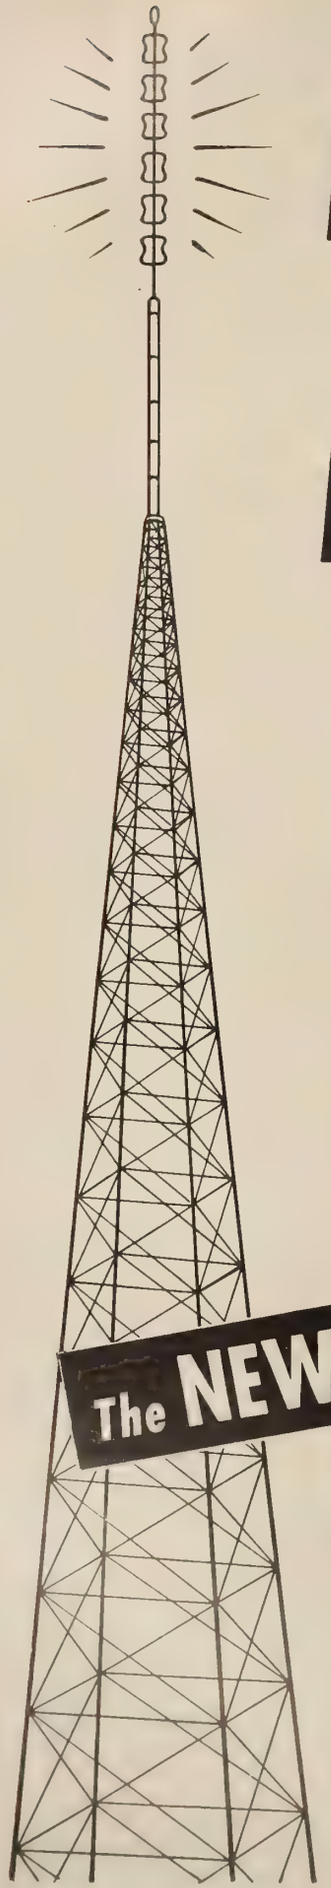
8-TO-13 WEEK DRIVE ● Glamorene Rug Co., N. Y., through Ruthrauff & Ryan, also N. Y., placing 8-to-13 week radio campaign, starting March 9 in 75 markets.

Fischer AFM Representative

PHIL FISCHER, vice president of Local 47, Musicians Union, L. A., appointed international representative in charge of motion pictures and television for American Federation of Musicians at executive board meeting in New York, it was announced Friday. He succeeds Justin W. Gillette, who died several months ago. With headquarters in Hollywood Mr. Fischer will represent AFM in all activities touching on TV and motion pictures.

5-STATION LIMIT APPLIED TO APPLICATIONS

MAXIMUM LIMIT of five TV stations to same owner was extended, in effect, to all pending TV applications by FCC Friday through memorandum opinion and order withholding all action on applications in conflict with those of Storer Broadcasting Co. for vhf Ch. 10 at Miami and vhf Ch. 9 at Wheeling-Steubenville for 30 days while Storer elects which bid it wishes Commission to consider.



FCC ruled that when applicant already owns four TV stations, as does Storer, it cannot file for more than one additional outlet. Any additional bids would be conflicting and inconsistent with spirit of multiple ownership rule, FCC said in what is considered precedent opinion.

To rule contrary, FCC said, "would permit applicants to flood this Commission's processing line and its hearing docket with multiple applications many of which could not be granted under the rules."

Since Storer is party to long-pending proceeding inquiring into proposals to relax rules limiting multiple ownership, FCC decided to give 30 days period for decision by Storer, which owns WAGA-TV Atlanta, WJBK-TV Detroit, KEYL (TV) San Antonio and WSPD-TV Toledo.

Ruling stems from protest by WSTV Steubenville, competitor for Ch. 9 at Wheeling-Steubenville.

Observers feel ruling means Commission may soon call upon other multiple applicants to elect which bids they wish to prosecute. These may include: CBS—licensee of WCBS-TV New York and KNXT (TV) Los Angeles, 47% owner WCCO-TV Minneapolis, 45% owner WTOP-TV Washington, applicant to buy WBKB (TV) Chicago and new station applicant at St. Louis; Meredith Pub. Co.—owner WHEN (TV) Syracuse, WOW-TV Omaha and KPHO-TV Phoenix, applicant at Rochester, Minneapolis and St. Louis; Crosley Broadcasting Corp.—operator WLWT (TV) Cincinnati, WLWC (TV) Columbus and WLWD (TV) Dayton, newly-approved purchaser of WLTV (TV) Atlanta (see story page 27) and applicant at Toledo and Indianapolis; Polan Industries—permittee of WPTV (TV) Ashland, Ky., and WUTV (TV) Youngstown, Ohio, applicant for Wheeling, Roanoke, Parkersburg and Terre Haute; Edward Lamb—owner WICU (TV) Erie, Pa., and WTVN (TV) Columbus (sold to Taft family of Cincinnati subject to FCC approval), permittee of WMAC-TV Massillon, Ohio, and applicant at Toledo, Portsmouth, Ohio, and Orlando, Fla.

MORE TOWER
and
MORE POWER

The NEW **WJBK-TV**

is on its way!

It won't be long now! Soon . . . just as soon as tower construction can be rushed to completion, the station that's tops with metropolitan Detroit listeners offers even *greater* coverage . . . vastly *better* coverage. New effective radiated power of 100,000 watts and a new 1,057 foot tower will blanket every TV home within 100 miles of Detroit.

Coverage not only in Detroit, but in Flint, Bay City, Port Huron and Jackson! A better-than-ever reason why your best TV buy is the new WJBK-TV.

The NEW **WJBK-TV**

Theatre TV Proponents Asked to Clarify Points

FCC FRIDAY called on theatre TV proponents to clear up inconsistencies in testimony, tell what it wants. Commission threatened to call off proceedings unless Motion Picture Assn. of America and National Exhibitors Theatre TV Committee satisfactorily answered series of eight questions mainly concerned with use of common carrier frequencies and how theatre TV services would be set up.

Theatre TV attorneys feel inconsistencies are more apparent than real, that it will be no difficult task to answer questions. Hearings resume today and Tuesday with direct testimony by AT&T, Western Union, Independent Telephone Assn., petroleum and bus groups. Following completion of direct testimony, Commission will hear MPAA and NETTC attorneys.

NARTB Names Labor Group To Study TV Problems

NEW NARTB committee announced Friday by President Harold E. Fellows at direction of NARTB TV Board to work on employe-employer relations. Titled Television Labor Advisory Committee, it is headed by Robert D. Swezey, WDSU-TV New Orleans, also director of NARTB TV Board. Other members: Mort Weinbach, ABC; Frank Faulknor, CBS; Donald H. McGannon, DuMont; Joseph McDonald, NBC; Donald W. Thornburgh, WCAU-TV Philadelphia; Leslie C. Johnson, WHBF-TV Rock Island, Ill.; Edward Wheeler, WWJ-TV Detroit; Philip J. Lasky, KPIX (TV) San Francisco; Richard A. Moore, KTTV (TV) Los Angeles. Advising with committee will be Thad Brown, NARTB TV manager and TV Board counsel; Richard P. Doherty, employe-employer relations director, and President Fellows.

American Forum Sponsor

GENERAL BRONZE CORP. will sponsor *American Forum of the Air* (Sundays, 2.30-3 p.m. EST), NBC co-op show, on WNBT (TV) New York and WPTZ (TV) Philadelphia, effective March 15. Agency: Wildrick & Miller, N. Y.

New TV Stations on Air

LATEST word from new TV grantees late Friday indicated following should be on air by today (Monday):

WABI-TV Bangor, Me., due to begin commercial programming last Saturday.

KOPO-TV Tucson, Ariz., due to begin yesterday.

WLVA-TV Lynchburg, Va., due to begin test operations today.

Meanwhile, WROV-TV Roanoke wired that its transmitter and filterplexer had arrived, and plans test patterns this week. (Other grantees' target dates, page 92.)

Increase Spots

BROWN & WILLIAMSON TOBACCO Co., Louisville (Kool cigarettes), through Ted Bates Inc., N. Y., increases frequency of its spot announcements in 27 major radio markets effective today (Monday). In some instances advertiser is using new stations.

Expanded Program of Services Before NARTB Boards

EXPANDED program of industry services to be considered by NARTB Radio and Television Boards at separate and joint meetings opening Wednesday at Clearwater, Fla. Preliminary finance committee meetings and group discussions to be held today (Monday) and tomorrow.

Radio Board will meet Thursday. It will review results of one of NARTB's outstanding victories in recent years—revision of FCC rules on operator requirements and remote control of transmitters (see story page 54). It will go into copyright matters and hear progress report on series of special management studies along with Dept. of Justice antitrust suit against National Football League (see story page 56).

Legislative and regulatory matters affecting TV field will be taken up Wednesday by TV Board. Industrywide regulatory-legislative reports will be heard by joint board. Special TV problems include preliminary study of TV circulation measurement techniques and progress of TV code. John E. Fetzer, WKZO-TV Kalamazoo, TV code board chairman, and Edward Bronson, code affairs director, will be present.

Increased budget will be reviewed after committee study. Association affairs are described as "very solvent" with membership at highest point since temporary post-war peak. AM membership now approaching 1,100 stations, net increase of over 100 in less than year.

Uhf Coverage Proof

UNIQUE PROOF of uhf coverage even with low power was afforded WKAB-TV Mobile, Ala., Ch. 48 station reported Friday, through plotting viewers' addresses on map. At 6 p.m. Thursday film cameras fizzled, staff jumped in to program live remaining five hours. Telecast plea for local talent to come in and help soon flooded huge parking lot of suburban station. Spontaneous March of Dimes plugs for phone contributions from 8-11 p.m. drew $1,100 from 408 callers—and supplied map plottings of coverage. WKAB-TV now uses 12.5 kw ERP, goes to 265 kw in March.

PEOPLE

FRANK STANTON, CBS president, elected chairman of board of directors of new group appointed by board of Ford Foundation to administer program for advanced study in social relations and human behavior, called Center for Advanced Study in Behavioral Sciences, Ford Foundation President Paul G. Hoffman was to announce over weekend.

ZANGWILL GOLOBE, WOR New York account executive, has resigned to join Forjoe & Co., station representation firm, as executive vice president. He will be in charge of sales for various Forjoe offices and help plan expansion of facilities to service company's increasing TV activities. Member of "Million-Dollar Club" while at WOR, Mr. Golobe also has served with Frederic W. Ziv Co.

HAROLD G. COWGILL, attorney with law firm of Segal, Smith & Hennessey since 1944, has resigned effective Feb. 1 to take over management of new TV station WTVP (TV) Decatur, Ill., in which he holds 10%. He is former FCC attorney-accountant.

SYLVAN TAPLINGER, talent and program buyer, Kenyon & Eckhardt, N. Y., expected to join Hirshon-Garfield, also N. Y., as director of radio and television department, effective Feb. 4.

DON SARACENO, ABC central division sales officer, appointed account executive in Chicago office of Blair-TV Inc., TV station representative, effective March 4. Mr. Saraceno has been with ABC central division since 1948.

Television Actions

FCC BROADCAST BUREAU late last week took following television actions:

WEEK-TV Peoria, Ill., granted special temporary authorization for commercial operation, transmitter output 100 w visual, 60 w aural, antenna height above average terrain 550 ft.; from Jan. 27 to July 27.

KMJ-TV Fresno, Calif., granted STA for commercial operation, trans. output 1 kw visual, 600 w aural; Jan. 27 to July 27.

KGUL-TV Galveston, Tex., granted change to ERP 235 kw visual, 125 kw aural, antenna 550 ft.

WHYN-TV Holyoke, Mass., granted change to ERP 180 kw visual, 91 kw aural, antenna 990 ft.

WKZO Kalamazoo, Mich., granted change to 81 kw visual, 41 kw aural, antenna 500 ft.; change not to be made until WTMJ-TV Milwaukee moves from Ch. 3.

(For earlier actions, see page 93.)

ABC Affiliations

AFFILIATION of four AM and two new TV stations with ABC's radio and TV networks announced Friday by Alfred R. Beckman, national director of ABC's radio and television station relations departments. KFDA-TV Amarillo and WILK-TV Wilkes-Barre will join ABC-TV April 1. New radio outlets are KSLO Opelausas, La.; KTIP Porterville, Calif., effective Feb. 15; WTAC Flint and WVVW Fairmont, W. Va., both effective March 15.

DuMont Affiliates

DuMONT Television Network Friday announced signing of four new affiliates: WFBG-TV Altoona, effective yesterday (Sunday); KVTV (TV) Sioux City, starting March 29; KOPO-TV Tucson, effective yesterday, and WABI-TV Bangor, starting last Saturday.

Solution to the troublesome *new* Program Clearance Problem facing *every* Radio and TV Station

New Law

The new amendment to the Copyright Law provides that, effective January 1, 1953, **every** broadcast of a non-dramatic (as well as dramatic) reading of a copyrighted poem, story or other literary work requires a **license,** or the station commits a copyright infringement.

New Problem

Whether you are a radio or TV station, your programming makes only occasional and infrequent use of this material. However little it is, you **do** use **some,** and each item must be cleared. Your station does not have the bibliographical and other research data, the know-how, or the time, to clear most of this material for broadcast. There is no service which even attempts to fill this need.

Solution

Literary Clearance Inc. (LCI) has been organized primarily to answer this problem, and to perform the services required, for radio and TV stations.

LCI is your research and clearance service for non-dramatic literary rights.

LCI is your agent to obtain the licenses you need.

LCI can perform both of these services:

More efficiently
In less time
More accurately
At less cost

than your station can possibly do itself!

THIS IS A COMPARATIVELY SMALL FIELD (as contrasted to music clearance and news services) AND WE ARE THE ONLY ONES IN IT.

How & How Much

The Basic Service Each time you have a poem, story or article which requires a license (or when you're not sure if you need one) for non-dramatic use, you fill out a simple form (we furnish them free) with title, author, etc., and send it to LCI. LCI will promptly, with rare exceptions, advise you **either** that the work is free for broadcasting, **or** that a license is required. If a license is required, LCI will give you the name and address of the licensor, and the price, if available, for your use. **LCI service charge is only $3.00 per poem, story or article.**

The Optional Service For each poem, story or article which **requires** a license for non-dramatic use, LCI will, **if you request,** act as your agent to obtain the license. LCI service charge for this is an additional $2.00, making a total of only $5.00 per poem, story or article.

There is a minimum $25.00 per station, which will be credited against service charges incurred through December 31, 1953.

Please fill out all blanks in the coupon.

LITERARY CLEARANCE INC.

CITY HOSPITAL

Alternate Tuesdays, 9-9:30 p.m. on CBS-TV.
Sponsor: Carter Products Inc.
Agency: Sullivan, Stauffer, Colwell & Bayles.
Producer: Walter Selden.
Director: Cort Steen.
Writers: Julian Funt, Robert Newman.
Star: Melville Ruick.

MELVILLE RUICK
The commercials need doctoring

AS TV drama, *City Hospital* is an undistinguished example of those middle-quality shows that are to television what the B picture was and is to movies. It features an omniscient, kindly, properly-graying-at-the-temples doctor who solves the extraordinary psychological dilemmas that bedevil the various patients that wander through the cast.

City Hospital, however, is more noticeable than other programs of its kind because it is the bi-weekly vehicle for some of the most objectionable commercials to be found on the air.

The sponsor of this program is Carter Products Inc., which specializes in the manufacture of products that people use but don't talk about much. The opening commercial on the show under observation was for Carter's Little Liver Pills, which promote regular elimination. The middle commercial was for Nair, a depilatory cream. The closing commercial was for Arrid, a deodorant.

It is theoretically possible to advertise these products on television without offending any but the most sensitive members of the audience. Carter, unfortuately, is not putting theory to work.

The opening commercial featured an interview between a "doctor" and his "patient," a middle-aged woman tormented by "the laxative habit" and praying for a cure. The doctor prescribed Carter's Little Liver Pills and additionally dwelt upon the virtues of achieving natural regularity. To say that this was the least offensive of the three commercials that night is to speak ill indeed of the others.

The middle commerical came at a point in the drama when a mother was getting her first look at her new-born child. There was a poignant close-up of her face and then a jolting cut to a closer close-up of the words "BRIAR PATCH LEGS," drawn to suggest forests of hair stubble sprouting from every letter. The accompanying audio featured an announcer describing the social ostracism that girls may expect to face if they fail to remove leg hair with Nair.

The closing commercial featured the Arrid theme, "Don't be half-safe," which points to the advantages of stopping unpleasant smells by stopping their source, perspiration. As a sample of the absolute extreme in graphic illustration, the close-up of a sweaty armpit in this commercial should be preserved in the trophy room of the Television Code Committee.

Taken individually, any of these commercials would be bothersome enough, but presented as a group within a single half-hour program, they were beyond defense. If self-restraint is to be practiced by television, a good place to begin the practice is here.

* * *

JO STAFFORD SHOW

Mon.-Fri., 7:30-7:45 p.m. on CBS Radio.
Producer-Director: Bill Brennan.
Announcer: John Jacobs.
Music by Page Cavanaugh Trio.
Writer: Glenn Wheaton.
Star: Jo Stafford.
Special Guest: Johnny Mercer.

JO STAFFORD
The listening is easy

THIS recent entry in the CBS Radio early evening schedule handsomely proves that in the field of music radio need never take second place to television. Miss Stafford's new venture may not revolutionize radio or popular music styles, but it is wonderfully easy listening.

Singers need not be seen to set feet tapping. The presence of voice is quite enough, without the presence of form as well, to provide enjoyable musical entertainment, particularly when the voice is as professional as Miss Stafford's and the accompaniment as skillful as the work of the Page Cavanaugh Trio.

The production of this show is unpretentious as compared with network radio programming of only a few years ago or with television programming now. The quarter-hour presentation requires a comparatively modest number of performers and hence involves comparatively modest expense. Even the canniest sponsor ought to be satisfied with the returns this show could bring with so relatively slight an investment.

Last week Johnny Mercer helped out as a guest and fitted in perfectly. Mr. Mercer, a

thoroughly relaxed performer, sang a thoroughly relaxed duet with Miss Stafford, the tune being his own composition, "Blues in the Night." Another recommendation of the performance of Miss Stafford and Mr. Mercer was that they avoided getting into the kind of forced and frothy dialogue that singers are too often obliged to mouth on shows of this kind. They just talked, probably not unlike the way they would talk without a script. What is more, they talked very little.

But they sang quite a lot, and sang well. As good a word as any to use in describing this program is "pleasant."

BOOKS

BASIC ELECTRONIC TEST INSTRUMENTS, by Rufus P. Turner. Rinehart Books Inc., 232 Madison Ave., N. Y. 16. 254 pp. $4.

THIS book discusses the construction, operation and use of basic television, radio and electrical testing and measuring instruments employed by the technician, the radio and TV service man, the hobbyist and the engineer.

It abandons emphasis on the constructional viewpoint treated in an earlier work, *Radio Test Instruments,* by the author, who is a registered professional engineer. *Basic Electronic Test Instruments* is well illustrated with charts, diagrams and photographs.

* * *

SEVEN COPYRIGHT PROBLEMS ANALYZED. Presentations delivered before the Copyright Institute of the Federal Bar Assn. of New York, New Jersey and Connecticut, Oct. 15 to Dec. 10, 1951. Commercial Clearing House, 214 N. Michigan Ave., Chicago 1. 184 pp. $3.

IN this paper-bound booklet legal experts discuss seven aspects of the law of copyright and developments up to the date the presentations were made. Three of the discussions include: "The Law of Broadcasting" by Joseph A. McDonald, NBC treasurer and former ABC vice president and general attorney; "Public Performance Rights in Music and Performance Right Societies," by Herman Finkelstein, ASCAP general attorney; "Business Practices in the Copyright Field," by Robert J. Burton, BMI vice president and counsel.

A TELEVISION POLICY FOR EDUCATION, edited by Carrol V. Newsom, Associate Commissioner for Higher Education of New York State. American Council on Education, 1785 Massachusetts Ave. N. W., Washington 6, D. C. 285 pp. $3.50.

THIS volume is a compilation of the proceedings of the Television Programs Institute held April 21-24, 1952, at Pennsylvania State College under the auspices of the American Council on Education.

UHF pylons

Adjustable Beam, High-Gain TV Antennas

Check these 9 features

Any power to 1000 KW

RCA UHF Pylons have ratings suitable for any transmitter power up to 50 kw... and for an ERP (Effective Radiated Power) up to 1000 kw.

Power gains up to 27

RCA UHF Pylons can be furnished with gains in the order of 3, 6, 9, 12, 21, 24 and 27.

Adjustable beam tilt

The "Beam Tilt" of the RCA UHF Pylon is a "built-in" feature. Easily adjusted in the field, you are assured of best possible coverage and maximum vertical pattern reinforcement. Mechanical "beam tilt" by leveling plates—electrical "umbrella" effect by sliding transmission line fitting.

Near perfect circularity

With the RCA UHF Pylon, you get equal signal in all directions. The measured and theoretical patterns are within 1% of a perfect circle!

No protruding elements

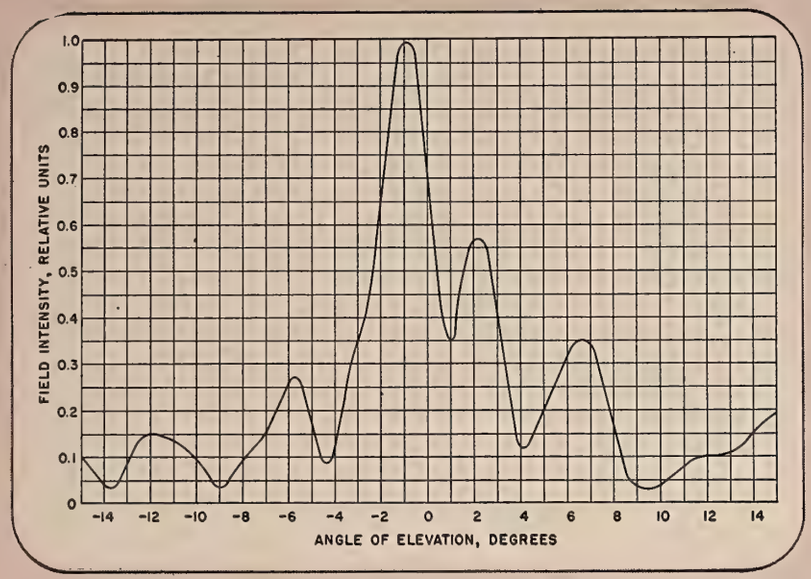
Nothing "sticks out" from the RCA Pylon. The smooth surface of the pipe itself is the radiator. There's nothing to bend or break under ice or wind load.

No tuning adjustments

The RCA UHF Pylon is "custom tuned" for your frequency—in the RCA plant. You put it up, connect the line, and throw the switch! Absolutely no tuning required.

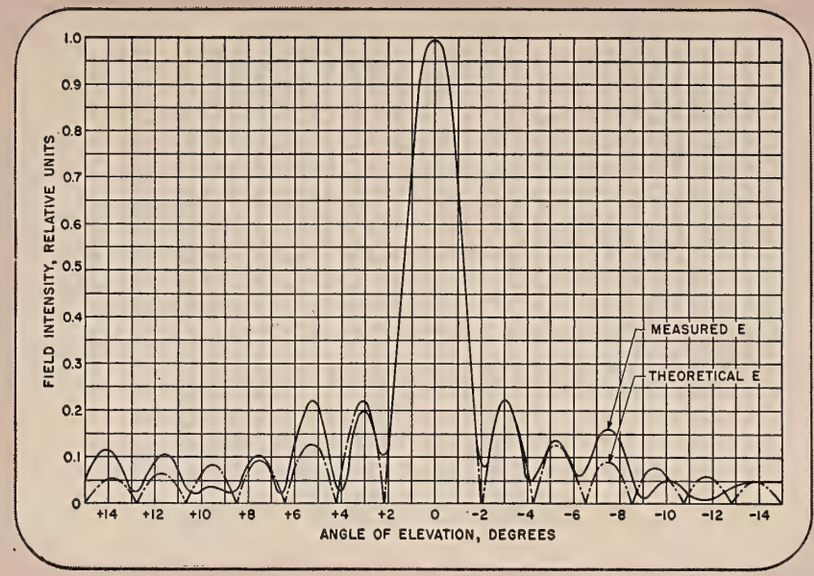
Null fill-in

High-gain antenna measurements show the first null filled in about 10%—satisfactory for all except unusual mountain top locations. See the curves below.



Special matched transmission line

No UHF antenna will function properly unless the transmission line closely matches the antenna. RCA supplies *specially designed* lines, not available anywhere else. Factory tests on this line show VSWR better than 1.05 to 1.0.



Complete accessories available

RCA can supply transmission line fittings, towers, directional couplers, signal demodulators, UHF loads, wattmeters, filterplexers—all *specifically designed* to work with the UHF Pylon.

REMEMBER! *Only* by having *everything matched* from transmitter to antenna can you be sure of results. Why take a chance? Call your RCA Broadcast Sales Representative.

Typical measured vertical field pattern of a UHF Pylon. Phasing adjusted for 0.92° pattern tilt.

Typical calculated and measured vertical field pattern of a UHF Pylon. Channel 75 (838 Mc).

our respects

to JOSEPH A. OUIMET

JUST 20 years before Canada began telecasting, in 1932, Montreal saw its first video when 10,000 persons filed by a demonstration set at a large department store.

The man who staged the show was Joseph Alphonse Ouimet, a young graduate electrical engineer. Mr. Ouimet was largely responsible for telecasting's start in September 1952 at Montreal and Toronto. He has been general manager of the Canadian Broadcasting Corp. since Jan. 1.

Mr. Ouimet at 44 is the fourth and youngest man to head CBC, publicly-owned broadcasting organization. He joined CBC when it was created in 1936, succeeding Canadian Radio Broadcasting Commission, which Mr. Ouimet joined in 1934.

As CBC general manager he also will deal with all other broadcasting and telecasting, since CBC regulates the industry. He was assistant general manager for a year before succeeding Donald Manson in the top CBC post.

Science Interest

Born in Montreal June 12, 1908, Al Ouimet at an early age began devouring books on science and kept a laboratory at his home during high school. At McGill U. he studied electrical engineering because it was claimed to be the toughest course, and headed his class upon graduation at 24.

The young Mr. Ouimet, largely because of his brilliant college record in engineering studies, was one of only three in his graduating class of 19 who managed to get a job upon leaving college during depression-ridden 1932.

In this critical year he joined Canadian Television Ltd., which staged the department store TV demonstration, resulting in orders for 100 sets. But the firm's resources were limited and he lost his job when the company disappeared.

When CRBC was set up in 1933 to nationalize Canadian broadcasting, he was hired as a research engineer and went along with the change to CBC in 1936.

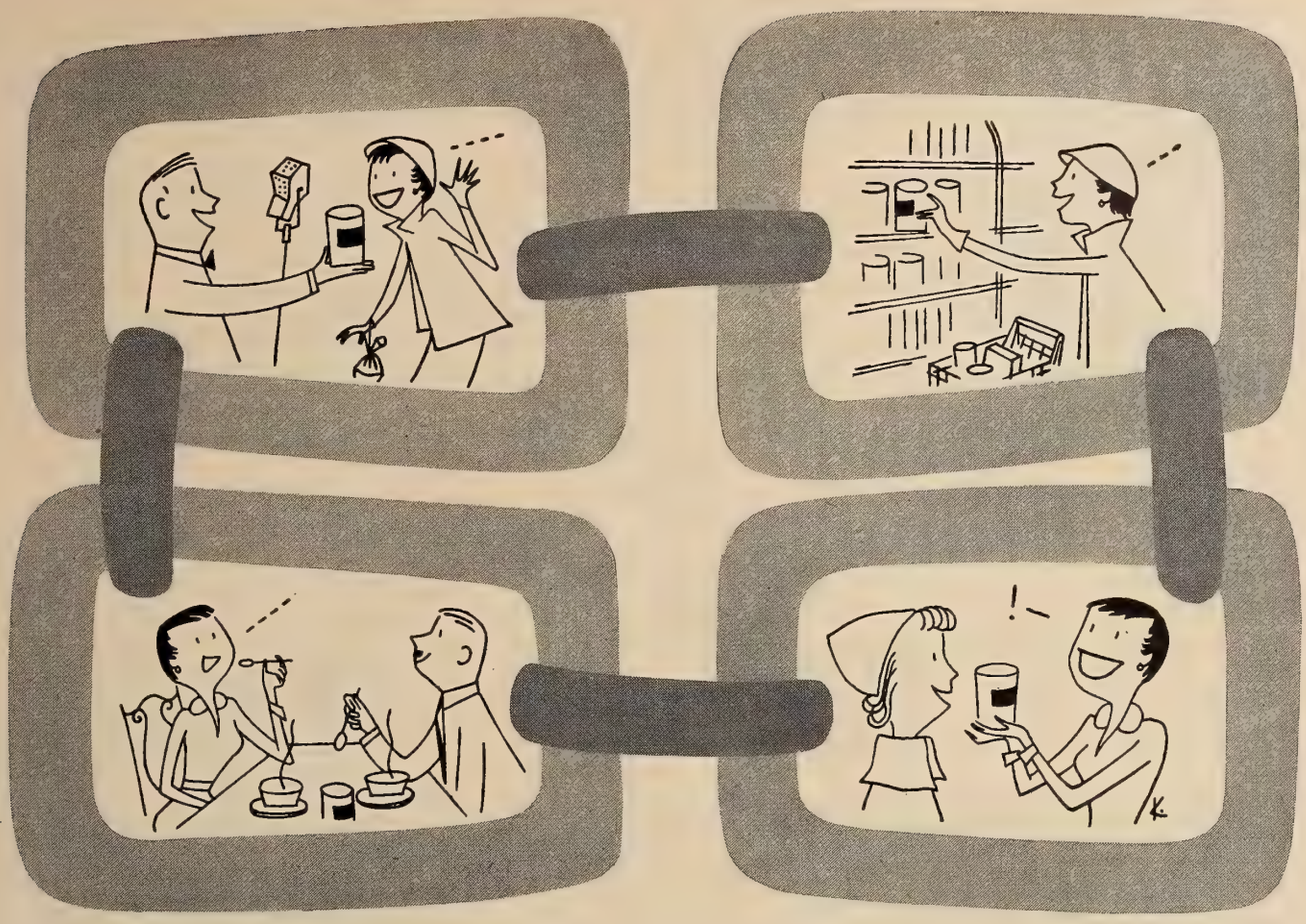
He was promoted in 1937 to operations engineer in charge of technical operations and maintenance. When in 1939 the late King George VI and Queen Elizabeth visited Canada, Mr. Ouimet had the job of arranging technical details for broadcasting during the tour across Canada and to Washington.

CBC in the meantime had grown to a number of 50 kw stations and was planning more such stations in key areas to give national coverage.

In 1941 he became supervising engineer, overseeing during the next eight years the expansion of the CBC stations and construction of repeater stations in remote areas.

He also looked into FM possibilities and after the war investigated TV, becoming chief engineer and co-ordinator of television in 1949. When the government decided only CBC would operate TV stations in the beginning, he lined up major city stations and production centers and staffs.

Faces TV Decisions



TV will be one of Al Ouimet's major problems, for the government is lending CBC $5 million to build TV outlets at Winnipeg, Halifax, Ottawa and Vancouver. Government policy also calls for privately-owned stations, when they begin, to use a percentage of CBC national programs. The big building program should please Mr. Ouimet's engineering skill, but he also will be called upon to draft regulations on programming and advertising content for independent TV stations, and he must see that CBC develops national programs for the independent stations.

When Mr. Ouimet is not busy with radio and TV he spends time with his wife, the former Jeanne Provost, whom he married in 1935, and their daughter, Denise, 14. In the Laurentian Mountains north of Montreal is his summer home, built by the family, and which is equipped with a TV set and antenna so he can keep check on CBFT (TV) Montreal. He likes to play a game of tennis when he gets the time.

Speaks Both Languages

Al Ouimet is bilingual, equally at home when speaking English or French. He makes friends easily, is soft-spoken and is a hard worker. He is the Canadian member of the International Television Committee established in the U. S. to set up standards for TV receivers and antennas.

He also is vice president of ITC's social and cultural study committee. He belongs to the Institute of Radio Engineers, Engineering Institute of Canada, Corporation of Professional Engineers of Quebec and Canadian Radio Technical Planning Board.

Restyling (Cont.)

[EDITOR'S NOTE: Comments on the restyling of BROADCASTING • TELECASTING have continued to arrive in such gratifying abundance that the editors feel justified in publishing a few more. The editors wish to thank all who have written, wired or telephoned.]

* * *

EDITOR:

I have just read with great interest your first copy of BROADCASTING • TELECASTING and hasten to congratulate you on a very nice job. Especially do I like the new typographic format where you tone down headlines and give a lot more spot news . . .

Arthur J. Kemp
Vice President
McCann-Erickson
New York

* * *

EDITOR:

After skimming through a copy of the "new" BROADCASTING • TELECASTING, I feel moved to tell you that it's an even better book than ever. I find the visual format appealing and the new arrangement of editorial matter much more rewarding . . .

Murray Firestone
Director of Radio and Television
Ernest William Greenfield Adv.
Philadelphia

* * *

EDITOR:

The first issue of your restyled BROADCASTING • TELECASTING has been thoroughly "thumbed through" and read from cover to cover.

Congratulations! I hesitated to tell you before that I didn't quite think your previous format was orderly. I do so now because you have accomplished the very things that I would have wished you to do. I am sort of a crank on advertising layouts and type. These fetishisms of mine are no less true for magazines than for other forms of printing. And so I thought I ought to write you just how I feel.

This little letter is simply to tell you that I like your new dress. Let's put it at the head of the "Ten Best Dressed Magazines of the Year."

Edward J. Noble
Chairman of the Board
ABC, New York.

* * *

EDITOR:

Your January 19th issue of BROADCASTING • TELECASTING arrived Wednesday and I read it from cover to cover Wednesday night. I liked everything about it including the editorials (which is unusual for me) except the statement on page 3 over your signature, ". . . It is as new as the transistor."

If I remember correctly, the transistor was a development of the Bell Laboratories about 1945. I suspect that the new type face used in printing your magazine is newer than the transistor. Perhaps the type face isn't as new as the recent promotion the transistor has been getting in some quarters.

Wayne Coy
President
KOB-AM-TV Albuquerque, N. M.

EDITOR:

. . . As an amateur typographer please accept my congratulations on the new BROADCASTING • TELECASTING. Bold, neat, tremendous impact visually, and a real modern tendency to make the page scan. (Who taught your printers to justify? And space? Almost "hand set" stuff!)

I was particularly pleased with your page 27, which has the simplicity and right hand margin "coolness" (my word for it) that in my own work I have tried to achieve. Your publication is the first effective use of this I have seen in a commercial magazine.

Editorially it is a better presented piece, with some ingeniously arranged sectionalizing: your readers won't get lost in the amazing amount of information you have given them. . . .

Don V. R. Drenner
Engineer
KGGF Coffeyville, Kan.

* * *

EDITOR:

My heartiest congratulations on the splendid job you have done in "face lifting" the format of BROADCASTING • TELECASTING magazine. It is splendid. I haven't a single complaint or suggestion. It's an excellent presentation of the news of the industry from all angles.

I shall now, more than ever, look forward to my Monday morning mail.

John H. Mitchell
General Manager
WBKB (TV) Chicago

* * *

EDITOR:

. . . It's an excellent job of up-to-the-minute editorial design—with very legible text type arranged in easy-to-read column widths. Am sure the change will result in more thorough readership, thereby giving your advertisers a worth while bonus.

One adverse comment—but constructive, I hope. I note your main heads are much bolder much better, too—than you showed in your specimen issue. Page 9 is excellent. But moving over to your regular news pages—Page 27 and beyond—there is still room for more wallop, either in those main headings or in the little summary that precedes each article. I don't mean bigger size of type—just bolder, thicker letter. . . .

Robert Ames
Capitol Airlines Liaison Exec.
Lewis Edwin Ryan Adv. Agency
Washington, D. C.

* * *

EDITOR:

The new BROADCASTING • TELECASTING format is terrific. Just as smart and modern and effective as the Industry it represents.

Smartest looking trade paper on the shelf.

John Esau
Vice President
KTUL Tulsa

* * *

EDITOR:

Congratulations! The new format is in keeping with BROADCASTING • TELECASTING's best tradition in reporting the news just as quickly as it happens.

Harry W. Witt
Western General Manager
Calkins & Holden Carlock-McClinton & Smith
Los Angeles

EDITOR:

The new format and styling of BROADCASTING • TELECASTING is even better than you indicated it would be. Again I feel the need to express my personal appreciation for the outstanding service you and your staff are rendering to our industry.

George M. Burbach
General Manager
KSD-AM-TV St. Louis

* * *

EDITOR:

Greatly disappointed with the new make-up of BROADCASTING • TELECASTING, my favorite mag.

Find that it is now difficult to read. Hope I am in the minority.

R. P. Adams
President
KUTE Glendale, Calif.

Marion Parsonnet

on all accounts

TWO strongly held convictions set Marion Parsonnet, president, general manager and director of Parsonnet TV Film Studios, apart from many of his fellow TV producers.

They are:

(1) New York is the best potential TV film area and

(2) All dramatic shows for television eventually must go on film.

"We're learning each day, both from the film industry and from predecessors in TV," Mr. Parsonnet says. "The two media are definitely not the same. The camera angle is the big difference in TV."

As to the advantages of New York over other locations for making movies for television, Mr. Parsonnet says: "We can get better performers here, and staging costs, outside of on-location shooting, are about 15% lower than on the West Coast. Eventually most of the filming will be done by big Hollywood producers, but the quality work will still come from the East."

Born in Newark 47 years ago, Mr. Parsonnet was graduated from Newark Academy, then attended Harvard and New York U., where he received first his BA and, in 1929, his law degree.

In 1932, Mr. Parsonnet entered radio as a program director with CBS, shifting a year later to Lennen & Mitchell as director of the radio department. Here he supervised *Dangerous Paradise,* one of the first radio serials.

In 1936, Metro-Goldwyn-Mayer lured Mr. Parsonnet into motion pictures as a writer.

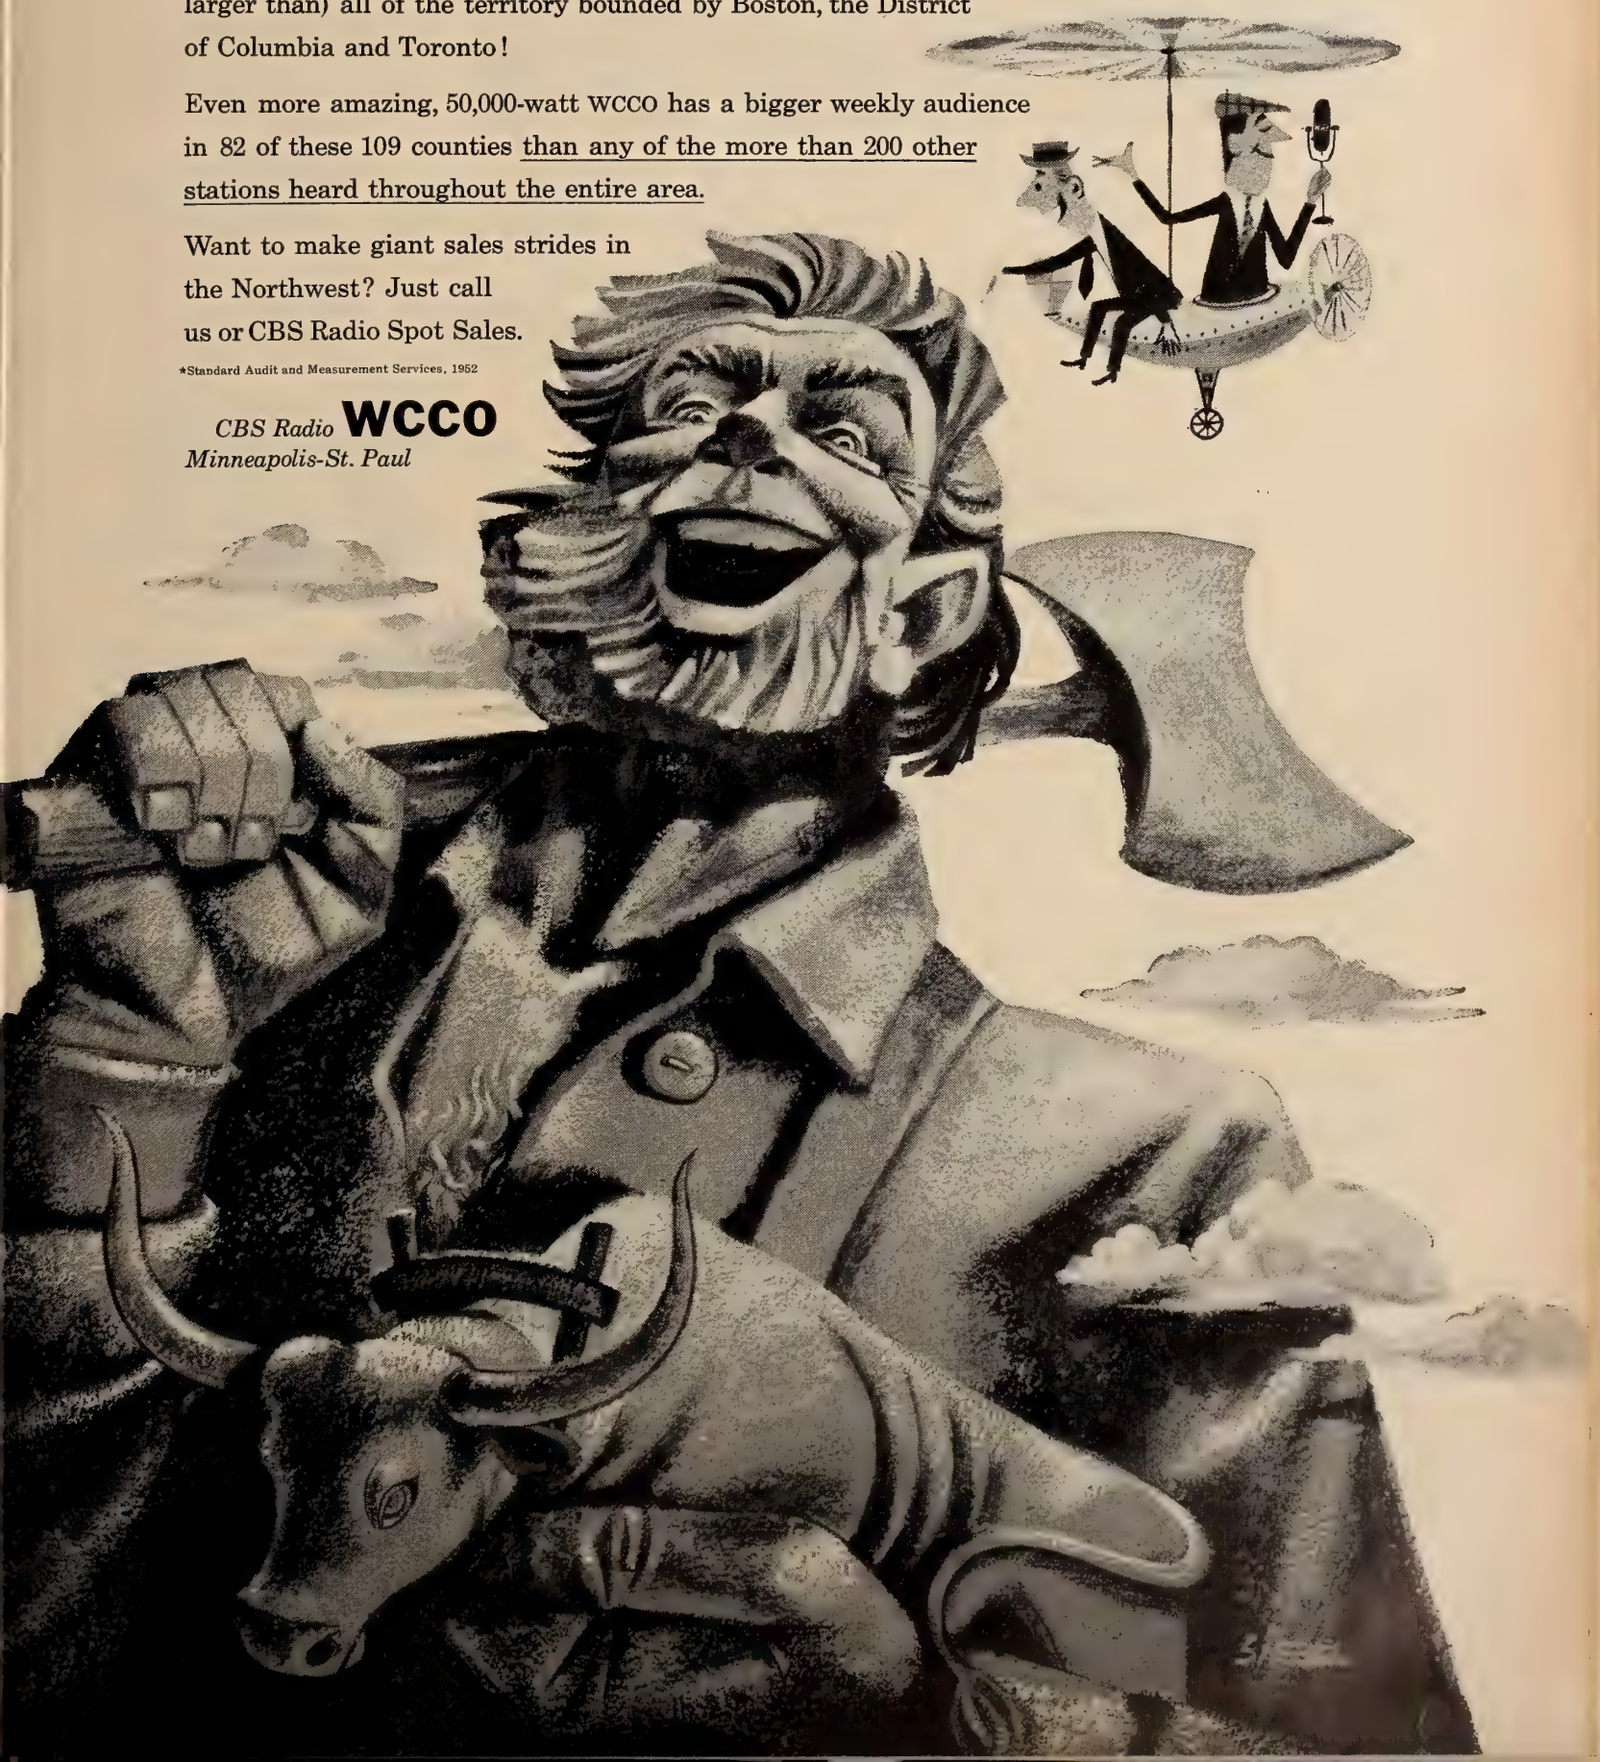
Two years ago, Mr. Parsonnet returned to New York and advertising as consultant to the advertising department of Pepsi Cola. This led to television and the Faye Emerson show, then a 15-minute program, for which he persuaded the sponsor to secure its own film studio, in Long Island City, arguing the company would get its money back within a year. It did.

Asking to take over filming, then being done by March of Time, Mr. Parsonnet so integrated Miss Emerson with the commercials that she became inextricably identified in the public mind with Pepsi Cola. The same personality-product identification, a Parsonnet precept, also is being applied to *The Doctor,* which Mr. Parsonnet now is filming for Camay.

Today he supervises a production staff of 35 on a full schedule, in addition to *The Doctor,* producing *Hollywood Offbeat* with Melvyn Douglas and *American Wit and Humor* with Thomas Mitchell. This series, now starting its second 13-week cycle, is being filmed in partnership with March of Time.

What's bigger than Bunyan?

Legend of the Northwest has it that Paul Bunyan was so big he covered 24 counties in one stride... easy!



But with even greater ease (proven by the recently-released SAMS study*), WCCO covers all of 109 Northwest counties... an area comparable to (but larger than) all of the territory bounded by Boston, the District of Columbia and Toronto!

Even more amazing, 50,000-watt WCCO has a bigger weekly audience in 82 of these 109 counties than any of the more than 200 other stations heard throughout the entire area.

Want to make giant sales strides in the Northwest? Just call us or CBS Radio Spot Sales.

$7½ MILLION MARK PASSED IN BUMPER TRANSFER CROP

Climaxed by sale of KFMB-AM-TV for $3.15 million, last week saw negotiations and FCC approval of transfers involving more than $7½ million. This included Commission sanction of the $2.47 million WMBR-AM-FM-TV and $1.5 million WLTV (TV) transactions.

SOME $7.6 million in radio and TV station properties were involved last week in transfers approved by FCC or newly sold, subject to Commission approval.

Biggest transaction was the sale of KFMB-AM-TV San Diego, Calif., by John A. Kennedy for $3.15 million to J. D. Wrather Jr. and Helen M. Alvarez, owners of KOTV (TV) Tulsa. The contract, signed Jan. 24, will be tendered for Commission approval within the next fortnight.

Topping the station transfers granted by FCC last week were the following:

Sale of WMBR-AM-FM-TV Jacksonville, Fla., by Ed Norton, Frank M. King and Glenn Marshall Jr. for $2.47 million to *The Washington Post*, majority owner of WTOP-AM-FM-TV Washington.

Purchase of WLTV (TV) Atlanta, Ga., by Crosley Broadcasting Corp. for $1.5 million from John O. Chiles and other Atlanta businessmen. Crosley operates WLW Cincinnati and associated TV outlets WLWT (TV) Cincinnati and WLWC (TV) Columbus and WLWD (TV) Dayton, all Ohio, as well as WINS New York.

WMBD Stockholding

Increase in General Manager Charles C. Caley's holding in WMBD-AM-FM Peoria, Ill., from 25% to 66.67%, with John E. Fetzer acquiring other 33.33% interest from Carl P. Slane and associates, for $262,500. Mr. Fetzer is majority owner of WKZO-AM-TV Kalamazoo and WJEF-AF-FM Grand Rapids, both Mich.

Relinquishment of Howard E. Pill's 25% interest in WSFA Montgomery, Ala., for $100,000, giving negative control to R. F. Hudson, R. F. Hudson Jr. and Sebrie B. Smith.

Other transfers approved by the Commission included WOOF Dothan, Ala.; WKRG Mobile, Ala.; KCLV Clovis, N. M.; WRXO Roxboro, N. C.; KLIQ Portland, Ore.; WLCM Lancaster, S. C., and WHAP Hopewell, Va., WINL (FM) Lebanon, Ind.; WRJW Picayune, Miss.; WGIV Charlotte, N. C. (see ACTIONS OF THE FCC, page 93).

Formal applications for both the WLTV (TV) and WMBR-AM-FM-TV transfers have been before the Commission for only about a month. The WLTV (TV) bid was tendered on Dec. 24 while the WMBR request was filed Dec. 29.

Mr. Kennedy, who purchased KFMB-AM-TV about two years ago from Jack Gross for around $1 million, plans to withdraw from the broadcasting field because of his health. Previously, he disposed of the *San Diego Journal*, now merged with the *San Diego Union-Tribune*, a Copley Press property. Mr. Kennedy had been ill for some time and was under treatment, it was reported.

Both KFMB and KFMB-TV are CBS affiliates. They are housed in the newly-remodeled KFMB Bldg., a five-story structure in downtown San Diego which includes a TV theatre studio. This building, previously occupied by the *Journal*, plus adjacent property owned and under lease covering about a full block, are included in the transaction. Value is given as $1.09 million.

Included also in the $3.15 million total consideration is a $150,000 retainer to Mr. Kennedy for management consultation to the new owners during the next five years. It will be paid in equal sums during the period.

The transaction called for payment of $200,000 cash in escrow at time of signing, plus an additional $400,000 cash at time of settlement following FCC approval. The remaining $2.4 million will be paid at the rate of $20,000 per month, the balance bearing 4% interest.

It is understood that KFMB-TV grossed about $2 million during 1952.

Howard L. Chernoff, vice president and general manager of the KFMB properties, has been requested to continue management of the stations, it was reported, and all other personnel have been asked to continue with the stations. No programming changes have been planned, it was stated.

Formal application for assignment of the licenses of KFMB-AM-TV from Kennedy Broadcasting Co. to a new corporation, Wrather-Alvarez Broadcasting Co., to be equally owned by Mr. Wrather and Mrs. Alvarez, is being prepared in Washington by Leonard Marks of Cohn & Marks, radio law firm representing both buyer and seller.

The KFMB sale was handled by Blackburn-Hamilton Co., station brokerage firm. It is understood several parties other than Mr. Wrather and Mrs. Alvarez had expressed "interest" in the property, including Time Inc., which shares ownership of KOB-AM-TV Albuquerque with ex-FCC Chairman Wayne Coy.

KFMB is on 550 kc with 1 kw directional. Application is pending for 540 kc. KFMB-TV, on vhf Ch. 8, is operating with effective radiated power of 27.4 kw visual and 13.7 kw aural. KFMB-TV began operation May 1, 1949. KFMB was founded in 1941. National representative is Branham Co.

Kennedy Broadcasting Co., according to FCC records, has outstanding 2,670 shares, held as follows: Mrs. Kennedy, 1,335 shares; Mr. Kennedy, 1,150 shares; Melva Chernoff, wife of Howard Chernoff, 50 shares, and estate of J. A. Bloch, 135 shares.

Mrs. Alvarez, general manager of KOTV, has held an interest in that outlet since the time when the majority ownership was held by George E. Cameron, principal stockholder, and John B. Hill. Messrs. Cameron and Hill sold their 85% last year for $1.6 million to Mr. Wrather and his mother, Mrs. Mazie Wrather. However, Mrs. Alvarez now owns 50% and Mr. Wrather and his mother hold the other 50%.

Mr. Wrather is an independent oil operator and maintains a business office in Dallas although his home is in Beverly Hills. He is married to movie actress Bonita Granville. Mr. Wrather also has produced several independent motion pictures and heads Wrather Television Productions, Hollywood, which filmed *Boss Lady*, summer replacement for

John A. Kennedy J. D. Wrather Jr. Helen M. Alvarez

Key figures in the $3.15 million purchase of KFMB-AM-TV

Fireside Theatre, sponsored by Procter & Gamble on NBC-TV.

Mr. Wrather and Mrs. Alvarez have pending a new TV application for vhf Ch. 11 at Little Rock, Ark., and hold 50% interest in Superior Television Inc., applicant for vhf Ch. 10 at Corpus Christi, Tex. Mr. Wrather personally has filed for uhf Ch. 44 at Boston and Mrs. Alvarez has an application pending at Sacramento, Calif., for uhf Ch. 40.

Most recent financial statement for Kennedy Broadcasting Co., including both KFMB and KFMB-TV, is dated May 31, 1952, and is contained in the license renewal file of KFMB-TV at FCC. Assets are totaled at $1,453,354.45 while liabilities are listed at $557,636.80. Capital stock included $160,000 in 7% cumulative preferred and $16,576.26 in common stock. Earned surplus was given as $269,017.90 while a gain on sale of assets was listed at $450,123.49.

Mr. Graham

The gain on sale of assets resulted from the sale of the Kennedy 48% holdings in WSAZ-AM-TV Huntington, W. Va. FCC records show that in March 1952 they sold 185 shares in WSAZ Inc. for $385,416.67 to Huntington Pub. Co., now principal owner of the station, and 55 shares for $114,583.33 to Florine Katz of New York, wife of Eugene Katz, head of the Katz Agency, national representative for WSAZ.

The May 1952 balance sheet for Kennedy Broadcasting showed cash on hand and in the bank, $25,711.06; accounts receivable, less reserve for doubtful accounts, $187,039.17; other accounts receivable, $3,693.70; cash surrender value of life insurance on lives of corporation officers, $76,784.98.

Fixed assets were listed as follows: Land, $83,014.96; AM transmitter and equipment, $53,810; FM transmitter and equipment, $9,000; AM studio equipment, $9,368.06; AM building, $15,178; TV building, $40,328.55; TV transmitter and towers, $291,260.75; TV studio and technical equipment, $148,791.52; studio and office furniture and fixtures, $18,-811.83; TV truck, $4,245; autos, $9,476.95; sprinkler system, $20,000; KFMB-AM-TV sign, $960.27; leasehold improvements, $227,-882.89. From the total of all but land, an amount in the sum of $152,343.91 was deducted as reserve for depreciation and amortization.

Investment Cited

Other investments were cited as $2,200 and radio and TV network contracts totaled $291,-666.35. Deferred charges listed were: Unexpired insurance, $37,379.76; insurance on lives of officers, $17,362.25; prepaid rent, $10,871.99; prepaid expense, $20,860.32.

Current liabilities included notes payable, $303,372.49; accounts payable, trade, $67,-216,47; payroll taxes, $7,220.98. Accrued liabilities listed were payroll, $8,368.89; payroll taxes, $2,579.87; personal property taxes, $900; federal and state income taxes (tentative), $105,326.98; interest, $4,547.24; commissions, $28,790.91; ASCAP and BMI fees, $27,962.97; expenses, $1,350.

In addition to Cohn & Marks, Kennedy Broadcasting also was represented in the transaction by the Beverly Hills law firm of Desser, Rau-Christensen-Hoffman while Wrather-Alvarez Broadcasting also was represented by the Hollywood law firm of Kaplan, Livingston, Goodwin & Berkowitz and by Ray King, Wichita Falls.

The Washington Post's purchase of WMBR-AM-FM-TV, approved by the Commission last Wednesday, is for $2.47 million cash. *The Post* is borrowing $2 million from the Riggs National Bank of Washington to effect the transaction. The newspaper owns 55% of WTOP Inc. and Publisher Philip L. Graham, son-in-law of Chairman of the Board Eugene Meyer, votes the remaining 45%, owned by CBS.

Norton's Interests

Mr. Norton held 51% interest in Florida Broadcasting Co., licensee of the Jacksonville outlets, while Mr. Marshall owned 31% and Mr. King 18%. Upon consummation of the transfer of all stock in Florida Broadcasting to *The Post*. Mr. Marshall, manager of WMBR-TV, will become president of the licensee and will direct both radio and TV operations.

Mr. Norton, former Federal Reserve Board member, has varied interests in the South, including presidency of the Coosa River Newsprint Co. and principal ownership of WAPI and WAFM-TV Birmingham. Mr. King has been among those supported from time to time for an FCC post and is an "Eisenhower Democrat."

It is believed that the Jacksonville outlets later will become a division of the Washington Post Co. with John S. Hayes responsible for the direction of general policy for all *The Post* radio and TV operations. Mr. Hayes is president of WTOP Inc., general manager of the WTOP radio and TV outlets and vice president of the Washington Post Co.

WMBR is a CBS affiliate and operates on 1460 kc with 5 kw. It was founded in 1927. WMBR-TV, assigned vhf Ch. 4, is the only TV outlet operating in Jacksonville and therefore airs all four TV networks. It began operation in October 1949. Boost in ERP from 14.8 kw to 100 kw visual was granted by FCC in mid-December.

The WMBR transfer application also showed that WMBR-TV grossed $954,591 in 1951 while AM-FM sales totaled $383,225. TV expenses amounted to $346,422 while expenses for AM-FM totaled $325,335. Net operating profit on the combined operations for 1951 was $282,833 while profit after taxes was $96,066.

In the nine months of 1952 ending Sept. 30, the application disclosed sales for WMBR-TV totaled $650,073 while AM-FM sales were $286,261. TV expenses were $327,595 and AM-FM expenses $192,284. Net operating profit on the combined operations, as of last Sept. 30, was $332,387 with profit after taxes $104,527.

WLTV (TV) is the third station in Atlanta and the last of the pre-freeze stations to begin operation, on Oct. 1, 1951. In its 13th month of operation, WLTV reported it had gone into the black [B•T, Nov. 17, 1952]. Licensee is Broadcasting Inc.

WLTV is an ABC affiliate and operates on vhf Ch. 8 with ERP of 23.8 visual. It has received a permit to boost ERP to full 316 kw, but is awaiting clearance from the Civil Aeronautics Administration respecting a new antenna site.

Howard E. Stark of New York, and the Robinson-Humphrey Co. of Atlanta, negotiated the Crosley purchase. Handling for Crosley was James D. Shouse, board chairman and vice president of Avco Mfg. Co., Crosley parent.

WLTV's Finances

WLTV's financial statement, dated Nov. 30, 1952, reported a net loss from operations for the year in the amount of nearly $127,000 but no monthly breakdown was given in the transfer request. Crosley's three-station TV division, for the 11-month fiscal year period ended Oct. 31, 1952, reported gross sales in excess of $4.4 million. During the same period, gross of $3 million was reported for WLW and $730,000 for WINS [B•T, Jan. 12].

William T. Lane, vice president, general manager and one of the former local stockholders in WLTV, will continue with the station as operating head.

RADIO'S second generation is moving in at KFEL-AM-TV Denver. Three sons of Manager Gene O'Fallon are on the job along with a son of the late Raymond Clapper, late radio-newspaper commentator, and two sons of John J. Gillin Jr., revered president of WOW Omaha who died in 1950. Front row, l to r: Pete Clapper, KFEL newsman; Gene O'Fallon Jr., KFEL-AM-FM-TV publicity and promotion director; Martin O'Fallon, KFEL salesman. Back row, Bill Gillin, KFEL-TV cameraman; Charles O'Fallon, recently released from Air Force and planning to return to college, in charge of KFEL-TV mail room; Johnnie Gillin, KFEL-TV camera and audio man.

ADVERTISING'S ROLE IN ECONOMY DETAILED BY JWT'S ARNO JOHNSON

Debunking fears of a recession, Arno H. Johnson, J. Walter Thompson Co. vice president, tells Washington businessmen America can, with aggressive advertising and selling to create the demand, produce a third more than at present.

ADVERTISING and aggressive selling are the answers to the problem of maintaining an expanding national economy and a higher standard of living for Americans. Only imaginative and continual selling can expand consumer markets to balance a declining economy caused by reduction of government expenditure for defense and unemployment.

These precepts were expounded last Tuesday in Washington by two authorities on marketing and selling. They are Arno H. Johnson, vice president and director of media and research for J. Walter Thompson Co., New York, and Benjamin H. Namm, president of Namm-Loeser's store in Brooklyn and former president of the National Retail Dry Goods Assn. They spoke at a day-long session at the Shoreham Hotel sponsored by the Washington Board of Trade on the general business outlook.

Mr. Johnson noted a lag between actual production and what can be produced. Setting a goal of one-third higher production, Mr. Johnson said the country can enjoy a 10% increase in both standard of living and production of goods even while meeting 1953 defense requirements.

Expanding Economy Predicted

The speaker detailed six pressures, described as "largely hidden," and nearing "explosive strength," which are forming to force an expanding economy:

1. People now have 53% of their income, after taxes, to dispose of as they will, whereas in 1940 the figure was 35%.
2. A "public outcry" is imminent against the teacher shortage, inadequate school facilities and inferior housing accommodations, provoked by increased birth rate.
3. Demands are rising for higher living standards.
4. Demands are increasing for new housing.
5. Some 72% more cars, trucks and buses are on the streets now than in 1940, putting added pressure on roads, streets, garages and parking facilities.
6. A drop of 7½ million farm workers since 1940 and a total shift of about 14 million to the non-farm group will necessitate a high level of non-agricultural production and employment.

Only "courageous advances in advertising and selling pressure" can create the consumer demand which can drain off an advancing supply of consumer goods and services, Mr. Johnson said.

Advertising and selling create human wants, upon which the American economy is "largely" based. Needs or necessities assume a secondary function as the overall standard of living increases, Mr. Johnson said.

Mr. Namm, drawing the same conclusion as Mr. Johnson, saw a need for positive rather than negative thinking and action. He told Washington businessmen advertising in all media can bring disposable purchasing power from passive to active.

Money can no longer be attracted by the "old-line" advertising methods, Mr. Namm asserted, defining old line methods as those which seemed to be sufficient when they moved goods to the consumer.

"Now we must move the people to the goods," he said, urging retailers to "develop our own jet propulsion."

Mr. Johnson and Mr. Namm participated in a panel discussion before luncheon with Hulbert T. Bisselle Jr., executive vice president of Riggs National Bank; Frank E. Weakly, president, Washington Properties Inc.; George Burrus, president, Peoples Drug Stores Inc.; Philip M. Talbott, senior vice president, Woodward & Lothrop Inc., and Frank A. Bell, B. F. Saul Co., all of Washington.

The luncheon session concerned government and its effect on retailing, with Clem D. Johnston, vice president of the Chamber of Commerce of the U. S., Southeastern Div., talking on government's effect on retailing, after an introduction by E. D. Merrill, WBT president.

The morning session was moderated by Lofton S. Wesley, conference general chairman, while Hathaway Watson Jr., program committee chairman, presided over the afternoon meeting.

The afternoon session featured a talk by Dr. Homer Hoyt, president of Homer Hoyt & Assoc. William A. Zeckendorf, president of Webb & Knapp, made the concluding talk.

D. C. Seminar Set Feb. 11

ADVERTISING Club of Washington, D. C., will sponsor separate seminars on radio, television, newspapers and direct mail, with the radio seminar set from 7-10 p.m. Feb. 11 at the Washington Gas Light Co. auditorium, according to Clayton R. Sanders, club president. Joseph L. Brechner, radio seminar chairman, will announce themes and speakers later. Date and details of the television seminar also are scheduled for later announcement.

LUGGAGE going-away gift is presented to Arnold Johnson (l), NBC Central Div. radio-TV service manager, who becomes radio facilities manager at Needham, Louis & Brorby Inc. Edward Hitz (c), the network division's radio-TV sales manager, and Thomas Lauer, Mr. Johnson's successor, wish him well.

Hess Sales Formula

INDEPENDENT retailers can boost their sales substantially in 1953 by increasing radio and television advertising at least 10%, according to Max Hess Jr., president of Hess Bros., Allentown, Pa., department store.

He told an audience at the Smaller Stores dinner meeting of the National Retail Dry Goods Assn. convention in New York last month that use of radio and TV on the community level can be an effective sales tool if the retailer "finds the right way of telling his story." Mr. Hess said he had experimented with a TV show in Philadelphia and that it had produced "results beyond anything we had hoped for."

Servel Schedules Spots For Major Markets

A RADIO-TV spot campaign in 80 leading markets, plus a million-dollar roadshow, are being combined by Servel Inc., Evansville, Ind., to show its new 1953 appliance line. Plans have been announced by W. Paul Jones, Servel president.

The company plans a $6 million advertising budget for this year, using radio, television, trade journals, magazines, newspapers and billboards. No estimate was available on the amount to be allocated to the broadcast media, but the campaign (Jan. 21 through Feb. 20) will include more than 5,000 radio-TV spots in key markets.

Two road companies are currently taking Servel's "1953 Show of Stars" to 30 cities.

Ekco Renews 'Travelers'; '53 Ad Budget Set

BROADCAST media is expected to receive about $175,000 of an estimated $1-million-plus 1953 advertising budget set by Ekco Products Co. Included are a renewal of its alternating sponsorship of NBC-TV *Welcome Travelers* for 26 weeks, and five-minute newscasts and a spot schedule on KFWB Los Angeles on a 13-week test basis.

Last year, when Ekco became the first company to set aside a million-dollar budget for housewares, it sponsored at one time or another *Welcome Travelers, The Goldbergs* and the *Frank Sinatra Show.*

Agency is Dancer-Fitzgerald-Sample, Chicago.

Crisp Details Techniques

TECHNIQUES in the study of television and printed commercials were discussed last Wednesday at a meeting of the American Marketing Assn. in Chicago.

Richard D. Crisp of Tatham-Laird illustrated his talk with slides. He reported that tests are currently underway to compare TV and newspaper techniques with respect to research.

Dave Robinson of Price, Robinson & Frank, commented on the strength and weaknesses of current approaches and opportunities for advertising research.

HOME SET PATTERN HELD AS RADIO AID

BAB's Sweeney tells retail ad conference addition of radios in the home has helped to offset TV inroads.

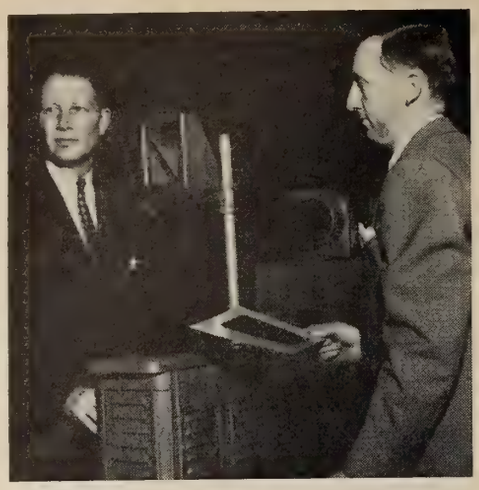
RADIO has not lost out advertising-wise to daytime television. On the contrary, its use has increased because of the growth of multiple-set homes, Kevin Sweeney, vice president, Broadcast Advertising Bureau, reports.

Addressing a two-day retail advertising conference at the Hotel Sheraton, Chicago, Jan. 24-25, Mr. Sweeney said that during 1952 retailers used more radio for advertising than ever before. He explained changing patterns auguring for less living-room but more other-room listening. Two-thirds of all homes have two or more receivers, he added.

Mr. Sweeney also noted that half of all homes have kitchen and bedroom radios, and the number of auto sets is rising. There were more than two-and-one-half times more radios than telephones. More than 70% of all homes are radio-equipped, with 80% recorded for metropolitan areas. He predicted that within 24 months, 92.4% of all cars will have sets.

The BAB executive urged retailers to match the radio audience with the merchandise, to select carefully the type of radio, use salable copy and enough radio to do the complete job.

Panel Leads Talks



A panel of radio, TV, newspaper and ad agency executives from 20 states led talks on the retail dollar. The conference concluded with a meeting in studios of WGN Chicago. Ted Weber, WGN sales manager, and J. E. Faraghan, WGN-TV program director, reviewed aspects of the TV department store dollar. Feature films were recommended for local stores because of their flexibility for commercials. Also suggested were quiz, shopping and prestige programs.

Speakers suggested entertainment shows for competitive multiple station areas, and use of local talent in "single station markets with a guaranteed audience."

Radio's pulling power was affirmed by Larry Fowler, advertising manager of Bretts store, Mankato, Minn., who reported on radio sales for ready-to-wear merchandise.

Edward D. Burgeson, retail department director, Bureau of Advertising, American Newspaper Publishers Assn., sees 1953 as a year for a "whale of opportunity, but noted the need for sound buying, merchandising and advertising to take advantage of it."

The conference will be held as an annual event. Co-directors were Budd Gore, retail advertising counselor, and Ralph Heineman, former account executive at Ruthrauff & Ryan, Chicago.

SLIDE equipment is used by Kevin Sweeney (r), BAB vice president, and Gale Blocki, manager of BAB's Chicago office, to demonstrate radio's pulling power at the retail advertising level to the Chicago ad conference.

* * *

Sweeney Asserts Advertising Is Purchasing Stimulant

DEFENDING advertising as a medium that stimulates consumer purchases, BAB Vice President Kevin B. Sweeney criticized "poor planning and inept sales training of many advertisers." He spoke last Thursday to the fifth advertising seminar sponsored jointly by the Advertising Club of Baltimore and the Women's Advertising Club of Baltimore.

Mr. Sweeney challenged the recently published statement of a general sales manager of a large automobile manufacturer who said his firm could not trace direct sales to its advertising and asserted:

"We who sell advertising—particularly media representatives and ad agency people—had better start accumulating facts, showing this $6 billion annual investment business makes each year in advertising, actually sells merchandise, often despite the advertiser and his retailer. Too many advertisers still have the pre-Civil War attitude that all advertising does is 'keep their name in front of the public.'"

Westinghouse Promotes Myers To Ad and Sales Promotion Post

SHELDON F. MYERS, sales promotion manager of Westinghouse Electric Corp.'s Consumer Products Div., Mid-Atlantic District, last week was named advertising and sales promotion manager of the Westinghouse Television-Radio Division, effective March 1. Harold S. Boxer, formerly with Freed-Eisman Co. of New York, was appointed assistant to the advertising manager.

Sales Manager J. F. Walsh, who announced the appointments, said Earl L. Hadley will continue with the division and supervise all national advertising, with particular responsibility for national television, newspaper and magazine advertising. Fred S. McCarthy remains sales promotion manager.

Westinghouse has announced this year's advertising budget will be the largest in the history of the television-radio division.

'How' Technique Ads Urged

"NUTS and bolts" selling technique utilized by some advertisers to demonstrate their products has proved "extremely effective" in TV commercials and registers high audience response, an official of Schwerin Research Corp., New York, reported last week.

Don McCollum, manager of the firm's client relations division, said the technique of demonstrating how products are developed and manufactured ranks high in Schwerin qualitative studies on remembrance, belief and acceptability to the viewer.

Mr. McCollum cited automotive, food and other advertisers as claimants to effective TV commercials because they show televiewers how products are made or tested.

PAPERS WARNED ON OTHER MEDIA

NAEA told current ad dollars of newspapers could be whittled away by others.

OTHER advertising media—printed and broadcast—will intensify their efforts to "chisel and chip away" at the ad monies that newspapers are receiving from advertisers," newspaper executives were told last week.

The warning was sounded by Stuart M. Chambers, treasurer of the St. Louis *Post-Dispatch*, at the annual meeting of the Newspaper Advertising Executives Assn. in Chicago last week. Three-day sessions were held at the Edgewater Beach Hotel Monday through Wednesday.

Warning advertising managers to be on the alert for concentrated efforts by other media to win the advertiser's dollar, Mr. Chambers called on them to drive home the contention that newspapers are "the only single medium" reaching virtually all customers of a product. Mr. Chambers is chairman of NAEA's Bureau of Advertising.

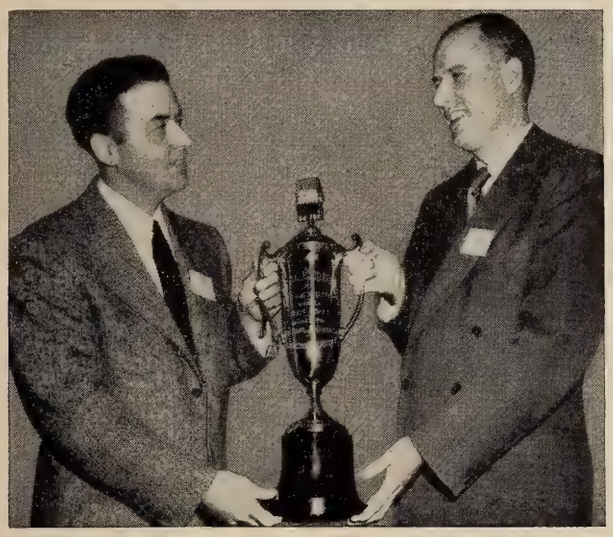
Other speakers at the meeting were Eric Johnston, president of the Motion Picture Assn. of America, and Carlyle Emery, vice president of Ruthrauff & Ryan. Theme of the conference was "sharper selling in '53."

Mr. Emery called for a multi-media campaign designed to impress upon Americans the real nature of the "free man's way of life." He suggested the use of radio, television, newspapers, magazines, motion pictures and billboards for indoctrination purposes.

Cake Mix Success

SATURATION radio spots on a market-by-market basis, supplemented later with television, have helped Duncan Hines Cake Mixes gain 10% of the national market. This was reported in Philadelphia by J. Allan Mactier, vice president of the Nebraska Consolidated Mills Co., Omaha, to members of the Poor Richard Club.

Nebraska Consolidated Mills, which is licensed to manufacture and distribute Duncan Hines cake mixes and buttermilk pancake mixes by Hines-Park Foods Inc., has gained distribution in 30 states comprising 35% of the national population in only 19 months.



When the initial advertising campaign was placed by Gardner Adv., St. Louis, at that time, total budget allowed was $25,000. Since then, advertising expenditures over the 19-month period have totaled more than $1 million, with radio and television counted in regularly with other media.

The mixes, white, yellow and devil's food, have sold successfully because Duncan Hines is a "wonderful brand," advertising and promotion have been aggressive, the product is good and the price is the same as offered by major competitors, said Mr. Mactier.

Future advertising will follow distribution growth. The company plans to open up new markets to gain national distribution and to introduce additional mixes in established markets on a city-by-city basis. Sales volume now totals about $10 million yearly, he said.

WHO ACCLAIMED NATION'S BEST RADIO NEWS OPERATION, FOR SECOND CONSECUTIVE YEAR

BY NATIONAL ASSOCIATION OF RADIO NEWS DIRECTORS

At recent convention of National Association of Radio News Directors, Baskett Mosse, chairman of committee judges, said: "The Medill School of Journalism of Northwestern University is happy to announce tonight that radio station WHO, Des Moines, Iowa, was selected as the outstanding radio news operation in the United States for 1952".

In presenting the award Mosse said: **"This is the first time in the history of the National Association of Radio News Directors that the awards committee has selected a radio station as the outstanding radio news operation in the country for the *second consecutive year*. I think this is an unusual honor and I know that you are proud of it and we are really proud to give it to you. Not to take anything away from the other entries in this contest, but I would like to say that your particular entry won this award by unanimous vote. Every judge on our awards committee voted for WHO as the outstanding radio news operation — 1952".**

BEST EQUIPMENT, VETERAN STAFF, BIG BUDGET

The WHO News Bureau has an impressive physical plant: six leased-wire machines; a portable battery-operated tape recorder; a telephone recorder; three short-wave monitors for state and city police and fire department broadcasts; a number of subscription services; and a library which includes several specialized news encyclopedias.

The six leased-wire machines include two Associated Press, two United Press and two International News Service machines. WHO's leased-wire service exceeds the facilities used by many of the country's leading daily newspapers; and is unsurpassed by any radio station in this section of the country. Only two of the six machines are "radio" wires — the other four bring in detailed stories known as "press" wire service. Press wire service gives lengthy accounts and the three news services bring in three different versions of the big stories around the world. This necessitates constant boiling down, rewriting and sifting of details, playing up news of local interest — all tailored to fit a split-second time period.

NINE VETERAN REPORTERS EDIT AND BROADCAST NEWS

Proud as we are of this award, we are more proud of the people on our staff who helped us win it. The WHO News Bureau is headed by veteran Jack Shelley, and includes eight other full-time men and a secretary. Eight of the men are college-trained reporters, rewriters and broadcasters, *all of whom are heard regularly on the air.* The ninth man is a specialist in political reporting. The ten people on the staff represent a total of 100 years' experience in news work. Five of the News Bureau staff have been with WHO ten or more years.

In addition to the regular full-time staff, the WHO News Bureau maintains a staff of 70 correspondents — or part-time reporters — throughout Iowa and in Southern Minnesota and Northern Missouri, heavy WHO listening areas.

TELEPHONE USED EXTENSIVELY

The WHO News Bureau uses the local and long-distance telephone extensively to supplement and verify the regular news services' coverage. Staff members check directly with peace officers and hospitals each morning to get accident reports and accident victims' conditions which may have changed since the late night news reports. In many instances, the leased-wire services do not clear this type of information until too late for a 7:30 a.m. — or even an 8:45 a.m. — newscast. Telephone checks also minimize the possibility of loss of news when events take place in remote areas, distant from a news service reporter.

STAFF WORKS TWO SHIFTS

The WHO News Bureau maintains a morning and a night shift. There is a certain amount of specialization within each shift in that one man may be assigned Washington and foreign news, another Iowa news, and a third miscellaneous human-interest stories. Whatever the assignment, the reporter stays on it for an indefinite period, building up a background for that specific job, and becoming a specialized reporter on that shift. Each shift writes its news copy especially for the men who will be airing it.

$100,000 ANNUAL BUDGET

To operate its award-winning News Bureau and to provide Iowa-Plus listeners with unexcelled news coverage, WHO spends more than $100,000 annually. This figure is believed to be one of the highest figures in the Nation.

PUBLIC SERVICE EXTRAS

In addition to its regular news services, the WHO News Bureau provides its listeners with a variety of public-service extras. These include free announcements regarding public and private meetings during periods of extreme weather conditions, up-to-the-minute reports on road and weather conditions and emergency calls on newscasts to locate families or members of families who are traveling or are visiting away from home, etc. The News Bureau has also developed a system whereby a copy of each newscast mentioning an Iowa serviceman is sent to the next of kin. This service has required the cooperation of local postmasters in many cases because of the lack of a street address or the name of the next of kin. **Management at WHO considers the public service aspect . . . the many extra "little things" that WHO does for its listening public . . . to be the difference between a routine news operation and one that is contributing to the welfare of the community. This — then — is the difference between a good news operation and the "Best Radio News Operation in the United States".**

BETTER NEWS — BETTER AUDIENCES

The leadership of WHO's News Service is only one of many reasons why WHO is *Iowa's greatest advertising values.* The 1952 Iowa Radio Audience Survey, accepted by leading advertisers and agencies as a completely authoritative analysis of listening habits in this state, shows that WHO is by far the "most-listened-to" station in Iowa. Write for your copy, or ask Free & Peters.

paying cable charges for your filmed TV program?

you can do better with SPOT—*much better*

If your TV program is on film, why pay cable charges when you can build custom-tailored coverage for your show on a Spot basis? The picture quality, of course, is constant—thanks to film. The savings in Spot time charges are enough to cover film prints, their distribution and other costs. But with Spot, you choose only the markets you want—and find that stations clear time more readily for Spot.

Get the full details from your Katz representative.

488 MADISON AVENUE, NEW YORK 22, NEW YORK • CHICAGO • LOS ANGELES • SAN FRANCISCO • ATLANTA • DALLAS • KANSAS CITY • DETROIT

PRESENTATIONS of top three advertising clubs which helped most to get out the vote last fall are reviewed by the judges: Seated, Thomas D'Arcy Brophy, chairman, Kenyon & Eckhardt; standing (l to r), Clyde M. Vandeburg, executive director, American Heritage Foundation; Louis A. Novins, vice president, Paramount Pictures Corp., and Frank J. Reynolds, president, Albert Frank-Guenther Law, New York. Winners of the drive, conducted by the Advertising Federation of America and American Heritage Foundation, were: First place, Advertising Club of Boston Inc.; second, Women's Advertising Club of Chicago, and, third, Roanoke Advertising Club.

Admiral, Peter Pan to Spot Joint Promotion

DETAILS of a multi-million-dollar advertising campaign tieing in with Walt Disney's "Peter Pan" cartoon feature were announced by Admiral Corp., Chicago, last Tuesday, with radio and television playing key roles. Firm will use tie-ins with Derby Foods (Peter Pan peanut butter) under the plan.

Admiral will start the program at premieres of the picture in New York, Chicago and Washington, D. C., during February. Giveaway products will be highlighted initially in a two-page *Life* magazine ad and followed with radio-TV spots, newspaper space and dealer ads. Under the tie-in merchandising program, dealers will buy radio and TV announcements on local stations in their areas. Spots also will be aired on DuMont TV Network's Bishop Sheen program, *Life Is Worth Living*.

Derby Foods will have displays in over 20,000 grocery stores calling attention to the Admiral promotion. Peter Pan characters will be used in all advertising.

As the movie reaches peak distribution, Admiral dealers will present toy TV studios to children who bring their parents into stores for demonstrations. The play sets will include the setting, announcer and miniature models for an Admiral commercial.

D. C. Ad Council Lunch

THEODORE REPPLIER, Advertising Council president, conducted an informal luncheon session in Washington Wednesday, explaining to representatives of business groups in Washington affiliated with the council the work of the group as related to advertising, government and welfare projects. Among those attending were Harold Fellows, president, NARTB; Ralph Hardy, director, government relations, NARTB; Earl Gammons, CBS; Frank Russell, NBC; Robert Hinckley, ABC; Walter Compton, DuMont; George Wheeler, NBC.

Agency Shorts

Herbert W. Cohen Co. relocates at 18 E. 41st St., N. Y.

Roy S. Durstine Inc., S. F., moves to 156 Montgomery St.

Ayers & Assoc., Lincoln, Neb., has opened offices at 309 KFEQ Bldg., St. Joseph, Mo. Account executives in new office are **Roderick W. Fletcher** and **David P. Hornaday.**

Southern California Adv. Agencies Assn. will hold third annual conference at Hotel Del Coronado, Coronado, Calif., May 21-23.

NEW BUSINESS

Spot

Cremo Mfg Co., Phila. (marshmallow topping and spread), signs to sponsor 15-minute segment of *Howdy Doody* on WPTZ (TV) and one spot daily on WCAU-TV, both Philadelphia. Agency: Gresh & Kramer, Phila.

Comision Estatal de Turismo, Monterrey, Mex. (tourist promotion organization), planning series of spot announcements on Texas radio-TV stations. Agency: Amyx Travel Productions, Tucson, Ariz.

Network

Sun Oil Co., Phila., has renewed *Three Star Extra* over NBC radio, Mon.-Fri., 6:45-7 p.m. EST for 52 weeks. Agency: Hewitt, Ogilvy, Benson & Mather, N. Y.

Lyon Van & Storage Co., L. A., starts 10-minute segment of *Lucky-U-Ranch* on Mutual-Don Lee Network, Fri., 4:30-5 p.m. EST, for 52 weeks from Feb. 6. Agency: Smalley, Levitt & Smith, L. A.

Murine Co., Chicago (eye lotion), starts Tues. and Thurs. news broadcasts of *Sam Hayes* on Don Lee Network, 4:45-5 p.m. PST, for 16 weeks from Feb. 17. Agency: BBDO, Chicago.

Wildroot Co., N. Y., starts five-minute segment on *Jimmy Wakely Show* on 22 Columbia Pacific Radio Network stations, Mon. through Fri., 4:10-4:30 p.m. PST, for 52 weeks from today (Feb. 2). Agency: BBDO, N. Y.

General Products Corp., L. A. (Looz dietary supplement), renews *Stuart Craig Show* on 17 Columbia Pacific Radio Network stations, Sun., 10:30-10:45 p.m. PST, for 13 weeks from Feb. 8. Agency: Dean Simmons Adv., L. A.

TV, RADIO MOST IMPRESSIVE MEDIA IN BOSTON, COLLEGE SURVEY FINDS

Of advertisements liked and disliked by 2,500 persons interviewed by Boston College students, 81.6% of those liked were on TV, 9.5% were on radio, with poor showing by ads in other media. But among ads disliked, 67.3% also were on TV, 24.3% on radio.

TELEVISION and radio advertising, in that order, were cited as making the strongest impression on some 2,500 persons interviewed in Boston by students of Boston College's School of Business Administration.

Results of the survey have been incorporated into a booklet titled "Boston Views Modern Advertising," published by the Boston College Press. The field work was carried on by 120 college marketing students and the report written by Joseph D. O'Brien and Henry P. McDonald.

The survey showed that, among the advertisements chosen as favorably impressing the interviewees, 81.6% were TV ads; 9.5% were radio; 4.4%, magazines; 3%, newspapers, and 1.5%, in other media. On the other hand, among ads cited as disliked ("other than cigarette advertising"), 67.3% were on TV; 24.3%, radio; 3.3%, magazines; 4.2%, newspapers, and 0.9% in other media.

"This shows," the report commented, "that the medium which has the combined capacity of animated illustration plus the spoken message appeals to more senses and makes the greatest impression."

On the basis of the survey findings, the authors recommended that advertisers should give "serious consideration to television." They pointed out a sponsor can use TV "with sound assurance that he is channeling his message through the medium which consumers themselves testify more clearly and definitely impresses them."

Results of the survey, however, underscored a lack of belief in most advertising in general. Less than 30% told interviewers they pinned their faith in advertising, with the majority considering "most advertising statements to be an assortment of exaggerations."

Analysis of replies, according to the survey, showed women are less critical than men although they cited advertising of shampoos, toothpastes and beer as exaggerated. The men decried the advertising of soap products, auto-

mobiles and toothpastes.

As a consequence, the study noted, less than 25% of those interviewed expressed the opinion that advertising should not be subject to any form of censorship or control. Some 57% declared that censorship to curb exaggerations should come from the government, the industry itself, or an impartial board representing the public, in that order.

Less than one-third of the subjects felt that testimonial advertising emanating from prominent personalities was spontaneous or sincere. Mentioned in the favorable category were Arthur Godfrey, Kate Smith, Dennis James, Perry Como and Ed Sullivan.

Basing conclusions on the survey, the authors recommended advertising stress more factual information about products; be wary of testimonial advertising in general; "keep one eye on the consumer rather than both eyes on the competition," and encourage any organized effort "to strengthen the ethical character of advertising as a major step in substituting confidence for doubt."

Preliminary work on the survey began in January 1952 and actual interviewing covered the last week of April and first week of May 1952.

Cubs' Owner Defends TV

PHILIP K. WRIGLEY, whose Chicago Cubs have signed with WGN-TV for a 77-game telecast this year [B•T, Jan. 26], last week quoted U. S. Chamber of Commerce statistics in a survey he made to bolster his claim TV has not hurt baseball receipts.

The Cubs' owner said slumping attendance was caused by 44% fewer single persons from 18 to 30 than in 1940 and predicted the number of youths in the 18 to 20 bracket would decrease. He also blamed night baseball, which he said kept older people away. He will submit his report to Baseball Commissioner Ford Frick and the two major leagues.

Rorabaugh TV Report

NATIONAL and regional advertisers using spot television in the fourth quarter of 1952 are listed in the latest Rorabaugh report with the markets and types of commercials used. Period reported on covers October, November and December campaigns.

Majors and Minors

DECISION to conduct a survey on the effects of radio and television broadcasts of major league baseball games on attendance in the minor leagues was made at a meeting of a committee representing the major and minor leagues last week.

Frank J. Shaughnessy, president of the International League and a member of the committee, said a firm will be hired to conduct the survey. He added that its findings will be placed before a joint meeting of the major leagues, scheduled for July 14 at the time of the All Star game in Boston.

Baseball Comr. Ford C. Frick set up the six-man committee Dec. 30 to make an "intensive survey of the radio-television picture" [B•T, Jan. 5].

Benny Is No. 1 In Nielsen's AM Ratings

LEADING radio shows in number of homes reached for the week of Dec. 21-27 have been released by the A. C. Nielsen Co. Jack Benny's program again heads the evening, once-a-week list as it did for the two weeks previous [B•T, Jan. 26]. Weekday lead went to Arthur Godfrey. Complete ratings follow:

NATIONAL NIELSEN RATINGS

TOP RADIO PROGRAMS—Regular Week Dec. 21-27, 1952 Nielsen-Rating*

Rank	Program	Homes Reached (000)

'Lucy' First in Hooperade

FOR THE THIRD time in 1952, *I Love Lucy* (CBS-TV) took first place in all six cities covered in C. E. Hooper Inc.'s "Hooperade of Stars" for December, released last week. Five other shows placed among the top 15 programs in the six cities for that month: *Dragnet, You Bet Your Life, Colgate Comedy Hour* with Bob Hope, and *Your Show of Shows*, all on NBC-TV, and *Our Miss Brooks* on CBS-TV. Cities covered by Hooperade are New York, Chicago, Los Angeles, Philadelphia, Boston, and Detroit.

Comedy-Variety Tops Multipulse Ratings

COMEDY VARIETY programs received highest average ratings in the Multipulse network television program trends for December 1952, released by The Pulse last week. The Pulse noted that quiz-audience participation shows were the most common network program type as compared with daytime variety in Dec. 1951. Top 10 program types:

	AVG. RATING
Comedy Variety	29.6
Football	26.6
Talent	23.2
Comedy Situation	19.9
Drama & Mysteries	19.5
Boxing	18.4
Western & Serials	14.3
Music	13.6
Musical Variety	12.8
Sport News	12.2

H & R Daytime Survey

HILTON & RIGGIO, New York advertising agency, announced last week in its "What's New" bulletin that it had conducted an independent audience survey of daytime viewing in the metropolitan New York area for a client using a mid-afternoon television program.

The results of the several hundred women interviewed showed viewing as follows at these hours: 9-10:30 a.m., 21.97%; 10:30-12 noon, 34.43%; 12 noon-1 p.m., 35.16%; 1-3 p.m., 62.63%, and 3-5 p.m., 50.18%.

Of the respondents, 84.61% were married; 51% were apartment dwellers; 20.14% worked outside of the home.

Protests Subside As JWT Defines TV Study Aims

Top markets estimates were not intended as coverage data, Dibert says.

WHAT HAD SEEMED to be an incipient round of protests against J. Walter Thompson Co.'s new estimates of TV sets in major markets [B•T, Jan. 26] appeared to have dissipated last week with the realization—backed by reassurance—that the figures were never intended to be taken as coverage data.

George Dibert, media vice president of the agency, under whose supervision the survey was conducted, said that when it appeared some industry members misconstrued the purpose of the figures, a paragraph which had been deleted from the original reports—because it seemed "unnecessary to say what the estimates are not"—was restored in subsequent printings. That paragraph:

It should be noted that this report concerns itself only with locating in terms of marketing areas the present ownership of television receivers. Since in many areas television signals are received from transmitters located in two or more different cities, no effort has been made at this time to present this data in terms of TV service area coverage.

Only Three Complaints

Mr. Dibert said he received only three specific complaints about the report: one complaining the estimate of sets in Milwaukee was too low; one making a similar protest with respect to the Norfolk estimate, and one which contended the estimate for Atlantic City was too high. The agency is making or will make investigations in each case and then will change its estimates if changes are indicated.

The JWT study estimated sets in each of the top 162 U. S. markets as defined in "Population and Its Distribution," compiled by the agency and published by McGraw-Hill. It estimates the first 162 markets, consisting of 180 counties, had 17,414,037 TV sets (or 82.924% of the U. S. total) as of Jan. 1. Additionally, it was estimated that there are 3,180,766 sets in other markets which individually have 500 or more receivers, and 405,197 sets in markets which individually have less than 500 sets. Total for the U. S. is placed at 21 million.

Here is Youngstown's FIRST TELEVISION PICTURE

As it appeared from Youngstown's FIRST TV station

WKBN-TV Test Pattern went on the air January 6, 1953 at 5:27 A.M.—the first UHF station in Ohio, the sixth in the United States.

WKBN-TV inaugurated live studio programs with a Newscast, January 11, 1953.

WKBN-TV began transmitting network programs, January 20, 1953.

P & G SPENDS $1 MILLION ON NOVEMBER NETWORK RADIO

Sterling Drug ranks second in top 10, with food advertisers outranking all network radio product groups. PIB data is incomplete because political convention and election return time charges were not computed.

THREE SOAP COMPANIES, four drug and toilet goods firms, two food products producers and one cigarette manufacturer comprise the top 10 radio network advertisers for November (Table I), as computed from figures on individual network program gross time charges reported by Publishers Information Bureau. As usual, Procter & Gamble Co. heads the list, as the only advertiser to purchase more than $1 million worth of radio network time (at gross rates) during the month. It spent more than twice as much as Sterling Drug, second ranking radio network client.

Tables Incomplete

Figures in Tables II (showing the leading advertiser in each category of network business) and Table III (expenditures of each category for one-month and 11-month periods) are incomplete, because of difficulty in determining gross costs of sponsored time devoted to covering the national political conventions and the election returns. These figures are therefore omitted from the tables. Addition of these time purchases will increase 1952 figures, so until they are available, care should be exercised in making comparisons between 1952 and 1951 network time purchases, particularly in the household equipment and radio receiver categories.

As product groups now stand, food advertising is the most important (dollarwise) radio network category, with toiletries second, followed by drugs, soaps, tobaccos and household equipment, in that order. This is true for both November and for January - November 1952. Automotive advertising ranked seventh in November against tenth for the 11-month period, changing places with confectionary, which stood seventh for the year-to-date but tenth in November. Miscellaneous ranked eighth in November, ninth for the year, just the reverse of gasoline, which was ninth in November, eighth for the 11-month period.

Political Advertising

Political advertising ranked 11th in November, with network radio time purchases during the three November days before election amounting to $303,785 or 17.9% of all political radio network time purchases for the entire campaign period. In the January-November period, politics was the 15th-ranking radio network client class.

* * *

TABLE I

Top Ten Radio Network Advertisers in November 1952

1	Procter & Gamble Co.	$1,336,005
2	Sterling Drug	558,593
3	Miles Labs	539,843
4	General Foods Corp.	533,983
5	General Mills	513,622
6	Gillette Co.	418,614
7	Lever Brothers Co.	365,783
8	R. J. Reynolds Tobacco Co.	360,133
9	Colgate-Palmolive-Peet Co.	330,659
10	American Home Products Corp.	323,057

McCollum Makes Study Of Filmed Commercials

FILM commercials do not have less sales effectiveness than live announcements, in the opinion of Don McCollum, manager of the client relations division of Schwerin Research Corp., New York, who reported a fortnight ago on comparison studies of both.

Noting a growing tendency among major television advertisers to use filmed sales messages, Mr. McCollum said his staff attempted to contrast film and live on such points as remembrance, belief and liking.

Results show that outside factors, apart from the live or film characteristic, are "much more important" in determining the commercial's success, he said.

Film Advantages

Citing advantages of film, he said it (1) enables sponsor and agency to get the message delivered exactly as they want it, (2) makes possible more polish because of "greater production capabilities," reshooting and elimination of fluffs, (3) is more adaptable for use within a program or as spots, and (4) makes demonstrations seem quicker and simpler than when handled live.

Despite the advantages of film, however, Mr. McCollum noted that filming can be overly-complicated and cluttered, resulting in loss of sales effectiveness.

New Beer TV Series

GENERAL Display Products Co., St. Louis, long a producer of merchandising and point-of-sale materials for regional brewers, has announced its entry into the television beer commercial field.

It is introducing its new video film commercial series designed for purchase on a co-operative buying plan.

Series was created by General Display and produced by Five-Star Productions, Hollywood, under the direction of Harry McMahan.

TABLE II

Leading Radio Network Advertiser of Each Product Category for November 1952

Here's the REAL pitch on radio, in Kentucky!

When you strip it of all the fancy talk, the Kentucky radio story boils down to this:

55.3% of the State's total retail sales are made in Metropolitan Louisville and its satellite markets — a concentrated area covered daily by WAVE, alone!

With 5000 watts *(and 5000-watt rates!)*, WAVE gives you this important majority, plus a big hunk of Southern Indiana with another quarter billion dollars in effective buying income!

The show's going on, *now.* Join the other smart advertisers — step right up and get a front-row seat with WAVE!

UTP Reports 17 Sales, Renewals of TV Films

UNITED Television Programs last week reported a heavy schedule of new sales and renewals on *Heart of the City, Double Play* and *Old American Barn Dance.*

UTP said *Heart of the City* is the second-run title of the film, which was produced as *Big Town* by Gross-Krasne, with which UTP recently merged. The feature film has been sold to WENR-TV Chicago; WHAM-TV Rochester; WJTV(TV) Jackson, Miss.; KRLD-TV Dallas; KHQ-TV Spokane; KDYL-TV Salt Lake City; KCBD-TV Lubbock; KGNC-TV Amarillo; and KKTV(TV) Colorado Springs. Renewals include KING-TV Seattle and WTVJ(TV) Miami.

Sales on *Double Play,* starring Laraine Day and Leo Durocher, have been to WDTV(TV) Pittsburgh; KCSJ-TV Pueblo; KPIX-TV San Francisco; KHJ-TV Hollywood; WKNB-TV New Britain and KGNC-TV Amarillo.

NBC Files Suit Against Jerry Fairbanks

FORECLOSURE of a chattel mortgage and public sale of a block of TV films is requested in a suit filed by NBC in Los Angeles Superior Court last Tuesday against Jerry Fairbanks, Hollywood producer.

Named also as defendants are Jerry Fairbanks Inc., Walter E. Heller & Co., investment brokers, and Republic Pictures, owners of Consolidated Labs., where the negatives are stored. The suit charges that Fairbanks gave NBC 20 promissory notes totaling $175,000 in February 1952, and that he has made only three of the agreed-upon monthly payments of $8,000.

NBC wants the court to appoint an officer to sell the TV films, which include 26 (20-minute) *Public Prosecutor,* 195 (5-minute) *Crusader Rabbit* cartoon shorts, 26 (half-hour) *Uncle George,* and 13 (half-hour) *Jackson and Jill.*

Loew's Asks $500,000 In Film Contract Suit

LOEW'S Inc. has filed a $500,000 breach of contract and injunction suit in Los Angeles Superior Court to halt telecasting of 18 Harmon-Ising cartoon shorts originally made for M-G-M and theatrical release.

Defendants are Harmon-Ising Productions, Hugh Harmon, Rudolf Ising, Sterling Television Co. Inc., Cornell Films, KTTV (TV) Hollywood and Paramount Television Productions Inc., operators of KTLA (TV) there.

Contending the cartoon company made the shorts for M-G-M during 1934-35-36, and the studio still controls all rights, the suit asks the court to determine damages under an infringement of copyright claim.

Complaint cites that the films, through undisclosed means, were turned over to Cornell Films, which gave distribution rights to Sterling Television Co. Telecasts of films were made on the stations involved, the suit charges.

Offers German Films

CATALOG of more than 4,000 German motion pictures over which the Attorney General of the U. S. has jurisdiction has been published by the Office of Alien Property of the Dept. of Justice.

Pictures may be licensed on royalty basis for television, theatre and other exhibition upon application to the Office of Alien Property.

OIL portraits and watches go to 25-year members of The Jam Handy Organization, Detroit, from Jamison Handy (l), president of the film company. Those cited at a special anniversary program last week were (facing Mr. Handy, l to r) Walter Wilhelm, motion picture film librarian; Hal F. Connelly, non-theatrical supervisor of Chicago distribution; Frank A. Gauntt, account executive, and William G. Luther, vice president in charge of automotive.

Sales

Purity Biscuit Co., Salt Lake City, has signed a 26-week contract with **United Television Programs** to sponsor **Bing Crosby Enterprises'** half-hour dramatic *Counterpoint,* in Salt Lake City, Tucson and Phoenix.

* * *

Luer Packing Co., Vernon, Calif., has started half-hour weekly *Luer Theatre* on KNBH (TV) Hollywood for 26 weeks from Jan. 29. The series was filmed by **Bing Crosby Enterprises.** The agency is **Dan B. Miner Co.,** Los Angeles.

* * *

Pickwick Pictures, Hollywood, 1350 N. Highland Ave., has been formed by partners **Arthur Piantadosi Jr.** and **Tom Armistead,** formerly producer and director, respectively, with Bing Crosby Enterprises. The firm, in which **Al Schatz,** industrial film producer, also is a partner, will produce TV commercials and announcements for industrial and education markets.

* * *

Already completed are four one-minute films shot in 35 mm Ansco Color for **Kerr Glass Mfg. Co.,** Los Angeles, featuring radio actors **Mel Blanc** and **Hy Averback,** and six spot film announcements, for **Greene-Haldeman Co.,** Los Angeles Chrysler-Plymouth distributors, to be used on KNBH (TV) Hollywood *Dangerous Assignment.* Agency on both accounts is **Creamer & Co.,** Los Angeles.

Distribution

Major Television Productions Inc., film distribution firm, has transferred its sales headquarters from Culver City to New York, at 1270 Avenue of the Americas. **Robert Guggenheim,** general manager, has resigned.

Availabilities

CBS-TV Film Sales has acquired the national and syndication rights to *Annie Oakley and Tagg,* new half-hour TV film series produced by **Flying A Productions Inc.,** Hollywood. The pilot film already has been completed.

Production

Victor Kayfetz Productions, New York, has completed the first two of 13 TV films on recreational boating for the **National Assn. of Engine & Boat Manufacturers.** They will be released for television within the next 30 days.

* * *

Cosman Productions, Hollywood, starts production on a second group of 13 half-hour films in *I Am the Law* TV series this week at Motion Picture Center. The series stars **George Raft** and is sponsored on a regional basis.

* * *

Filmcraft Productions, Hollywood, has signed **Robert Nathan,** novelist and motion picture writer, to write the scripts for *Mark Twain Television Theatre,* a half-hour prestige film series scheduled to go into production this month.

* * *

Robert S. Howard Productions, Hollywood, formed by **George Fisher** and **Robert S. Howard,** owner of Howard Manor, Palm Springs (resort hotel).

Random Shots

Farquhar & Co., Utica, N. Y., is producing a series of five-minute television films which explain in a layman's language the theory of investments, using simple visual explanations. Tomorrow (Tuesday) the program starts on **WKTV (TV)** Utica, N. Y., where it will be a weekly feature. Sponsor is **Philipson & Co.,** Utica investment securities firm.

* * *

Frank Tashlin Co., Hollywood, has been formed to produce films for TV with **Mr. Tashlin,** motion picture director-writer, as president; **Lester Linsk,** Hollywood talent agent, vice president, and **Charles E. Trezona,** business manager, secretary-treasurer.

* * *

General Service Studios, Hollywood, is readying construction plans for three additional sound stages with completion expected within two months, according to **James Nasser,** co-manager.

Film People

E. M. Loew, motion picture theatre executive, has been named vice president and elected to the board of directors of **Les Hafner & Co.,** New York, which has acquired television, motion picture and radio rights to the Mark Hellinger story properties.

* * *

Rudolph Monter and **Edward M. Gray,** president and vice president, respectively, of **Mutual Television Productions,** Hollywood, who were recently brought into **Sovereign Productions** on a partnership basis to handle the firm's business administration, also will head the management board. Also named was **Stuart Reynolds,** president of Sovereign, who is in charge of sales and distribution. **Gil Ralston** and **Arthur Ripley** continue in charge of production activities.

NARTB Copyright Group Studies Record Firms' Plans

Recommendations go to the board in March on disc firms' petition for monthly fee.

BROADCASTERS are not going to submit easily to efforts of some record manufacturers to charge them fees for "free" phonograph records, judging by industry reaction last week.

The fee movement came out into the open after disclosure that Capitol Records Inc. and other companies were sending form letters to stations on a no-fee-no-records basis [B•T, Jan. 26]. NARTB entered the scene when its Copyright Committee held a two-day session at which the fee problem was a major topic.

The NARTB group, headed by Edward Breen, KVFD Fort Dodge, Ia., issued a reminder that recordings do not carry with them inherent performance rights. The committee's statement follows:

Mr. Breen

"Broadcasters are not obligated to pay anything to record manufacturers for use of such records for broadcast. It has been established by the courts that there is no performance right in a recording. As a matter of fact, since broadcasters—through playing such records—promote their sale to the general public, there is some justification in the contention of many operators that the record companies should pay the broadcasters at regular card rates. This is the practice among some stations."

The committee remarked that broadcasters have made records popular by performing them on the air, with record manufacturers making it a practice to give their product to stations. The proposed fees in some cases are described as covering the cost or part of the cost of packaging and delivery.

Howard Stanley, general and sales manager of WEAM Arlington, Va., independent, last week wrote George A. Svendberg, of Columbia Records advertising department, that the company's special service charge "will kill the goose that has laid a golden egg for many record companies."

Sees Future Dangers

He described the fee as a "dangerous precedent that others might unwisely follow," pointing to the danger of a united front. WEAM has asked record companies to stop personal service to individual disc jockeys, he said, urging them to reduce their "free list" so they can "have enough platters for legitimate distribution directly to station librarians." He opposed the practice of entertaining disc jockeys or giving them "special treatment."

Richard Lewin, general manager of KTRE Lufkin, Tex., said Capitol records "tried to put the same thing into effect here at KTRE a year ago. Capitol did stop shipments and KTRE no longer plays Capitol records." He said that RCA Victor stopped shipments to KTRE in the fall of 1952, without explanation. Later, he said, he learned from the Houston distributor the records would be offered on a charge basis.

"I think it is most interesting to note that while we agreed to the Victor charge for records we have not yet received a shipment even on this cash basis," he continued. "Our policy is to give record label credits only to those companies supplying us records free of charge. We are now receiving records on this basis from Columbia, Decca, MGM, Mercury and most of the other independent label companies."

L. O. Fitzgibbons, vice president of WBEL Beloit, Wis., said the practice is not new. "Our battle was with RCA, which we won through application of pressure, and with Columbia, on which the pressure is now being applied," he said. Some managers are "reluctant" to discuss the subject, he said, possibly "because they were ashamed of the fact that they had accepted the record company's terms."

Record Firm's Comments

Capitol Records says that in the past year it has been charging the fee described in B•T, Jan 26, to some 250 stations in so-called "fringe areas"—"stations adjoining large city stations—and to some in isolated communities." Dick Linke, publicity director, pointed out Capitol still sends records free to some 1,600 disc jockeys at stations throughout the country.

He said it was not economically feasible or practicable to send records free to stations 40 or 50 miles away from a big city station where the records would not get sufficient coverage. Capitol gives a great deal of credit to radio for stimulating interest in records, but companies must be realistic, he said, adding that Capitol spends some $200,000 a year on records sent free to stations. Though there have been "a few complaints," he said that most small stations in the cut-off category paid the fee without complaint.

At Columbia Records, Lloyd Leipzig, publicity director, said for the past year it has supplied records "at cost" to stations in small communities where, for instance, there is only one music store. He said they amounted to only a few hundred of an estimated 2,000 disc jockeys who still receive the records free. He said the company had not received complaints because stations understand the company's position.

At Decca Records a spokesman said the station services all disc jockeys—an estimated 2,000—with free records, does not charge any fee and does not plan any such move at present.

MGM Okays Limited TV

BREAKING a hard and fast rule, M-G-M will permit its contract actors to appear on TV as long as they exploit the movie studio's product. Actors under contract to the studio are still barred from acting or making any other guest appearances on video.

Success of the Jan. 18 telecast of CBS' *Toast of the Town* on which film clips from "Above and Beyond" were accompanied by personal promotion from the film's stars, Robert Taylor and Eleanor Parker, is reported responsible for the policy switch.

Studio is readying plans for the premiere of "The Naked Spur" Friday in Denver, with day-long festivities covered by TV and radio.

Bing Crosby Plans Monthly TV Show

BING CROSBY, radio-motion picture singing star, long a video holdout, will do a monthly CBS-TV filmed show for his radio sponsor, General Electric Co., with Young & Rubicam Inc., agency servicing the account, aiming at a starting date in May.

The format is yet to be worked out. Whether it will be musical or follow along the lines of his CBS Radio weekly variety program is still undetermined. Series will be filmed at the Hal Roach Studios, Culver City, with Bill Morrow, producer-writer of the radio show, probably in charge of production for Bing Crosby Enterprises Inc.

Mr. Crosby has made but two TV appearances. The first was to m.c. with Bob Hope a pooled network telethon. He did a surprise guest shot recently on NBC-TV's *Colgate Comedy Hour* with Bob Hope.

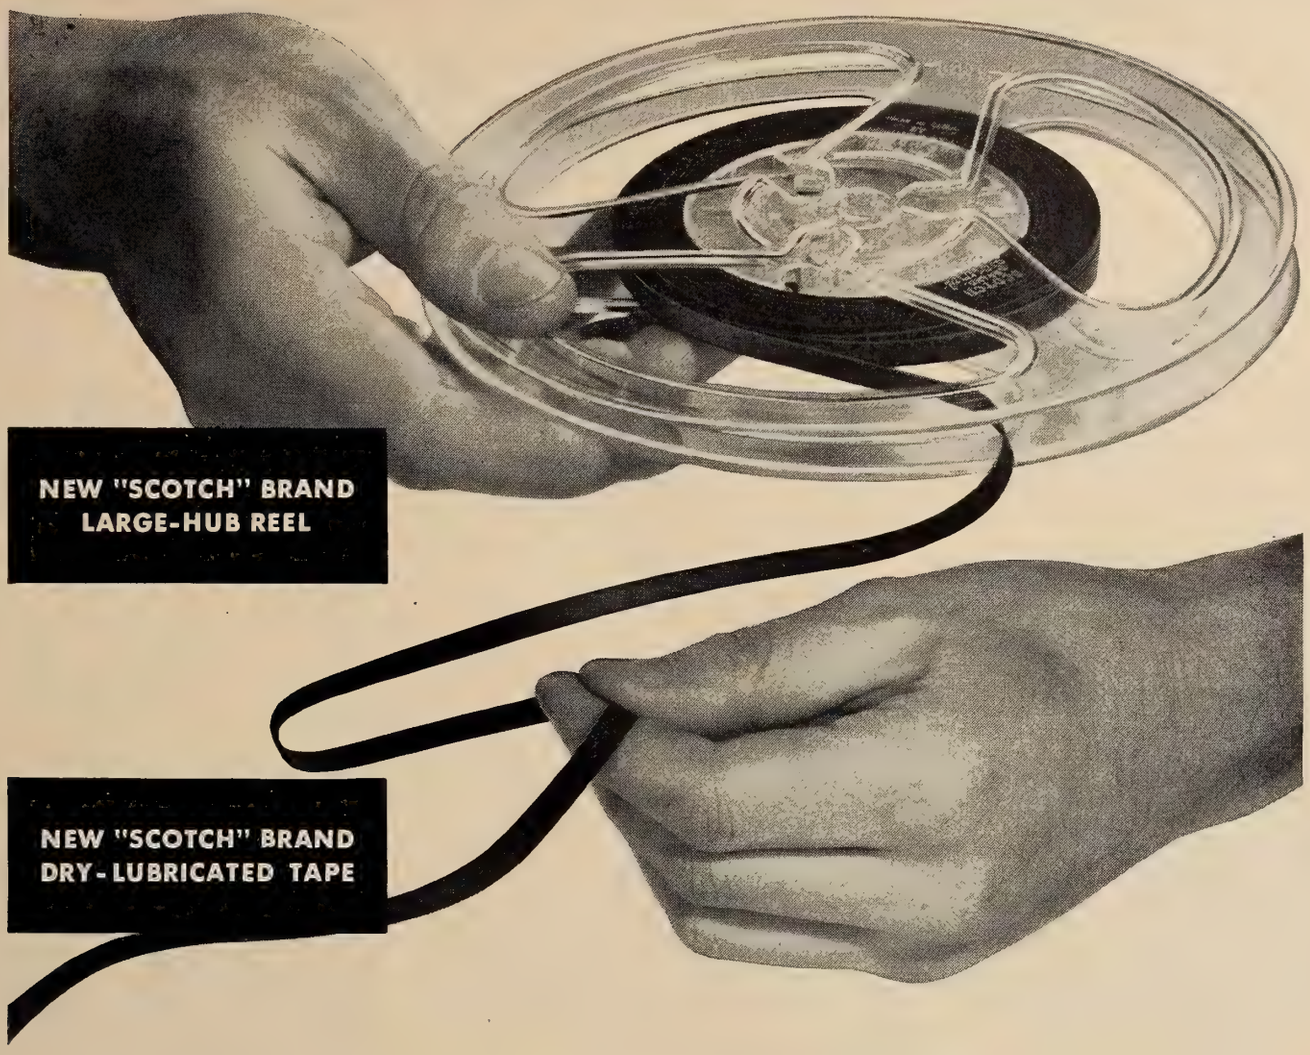
Closed-Circuit TV Co. Formed for Theatre-TV

NEW theatre-TV firm to produce and serve TV-equipped theatres has been announced by Harold Azine, former TV chief of the Federal Civil Defense Administration. Name of the new company is Closed-Circuit Television Co., 20 E. 53d St., New York.

While with FCDA, Mr. Azine helped pioneer the use of theatre TV for civil defense instruction.

Closed-Circuit Television Co. will concentrate on "off-hours" commercial use of theatres, Mr. Azine said. Evening hour box-office attractions later are a possibility, he said.

Kagran Corp. Adds to Staff, Acquires More Office Space



ADDITION of five persons to the staff of Kagran Corp., New York, radio-TV program production firm, has been announced by Martin Stone, president. He noted that the company has rented additional office space at the Park Chambers Hotel.

New personnel includes: Milton P. Kayle, formerly a White House special assistant, as executive assistant; Murray Benson, previously staff producer-director for WNBC New York, as publicity and promotion director and production supervisor of the *Jackie Robinson Show;* North Jacobs, formerly with Unity Television Corp., New York, as manager of sales and development for new packages; Edwin L. Justin, attorney, as office manager, and Phyllis Adams, formerly producer for WNBT (TV) New York, as production supervisor of *Author Meets the Critics.*

Singer Sues Producer

BREACH of contract suit for $17,550 against producer John J. Franklin and Franklin Television Productions was filed last week by Hawaiian singer Alfred Apaka. Discovered by Bob Hope, Mr. Apaka now is under contract to Decca Records.

Mr. Apaka claims he signed a year's contract on Oct. 20, 1951, for his services in a series of 52 half-hour TV film titled *Hawaiian Paradise* for which he was to be paid $450 each. Even though the last 39 shows never were filmed, he said, the defendants owe him back salary for them under the contract.

You need *both* to reduce timing errors!

You have an extra weapon against timing errors with the new "Scotch" Brand 7-inch Professional Reel. The specially-formulated tape available *only* on this new reel is treated with a revolutionary dry lubricant. It slides over heads without gumming or sticking, eliminates the flutter that contributes to timing errors. This also allows sustained tones to come through clearly, without annoying changes in pitch. And the dry lubricant is unaffected by humid weather . . . does a top-notch job all year round, even in tropical climates!

The new larger hub on this improved reel does its part in combatting timing errors, but remember . . . for split-second accuracy and flawless reproduction every time, you need the *extra* advantage of "Scotch" Brand *Dry-Lubricated* Magnetic Tape!

See Your Distributor for a Supply of 7-inch Professional Reels and *Dry-Lubricated* Tape!

CHECK THESE FEATURES of the new "Scotch" Brand 7-inch Professional Reel

- **NEW LARGER HUB** measures 2¾ " compared to the 1¾ " of standard reels
- **SINGLE THREADING SLOT** minimizes distortion of lower tape layers
- **DRY-LUBRICATED TAPE** practically eliminates sticking, squealing, cupping
- **100% SPLICE-FREE.** All "Scotch" Brand Magnetic Tape (up to 2400 foot reels) is guaranteed to be free of splices

WILL FCC APPROVAL OF ABC-UPT MERGER COME THIS WEEK?

Observers see only one all-out dissent—from Comr. Hennock—with other commissioners concurring on initial decision of Examiner Resnick as to merger. But it's a different story on Paramount control of DuMont and on transfers of WBKB (TV) and KTLA (TV), which may bring a sharply divided vote either way.

FCC Friday grappled with final phases of its consideration of the hot ABC-United Paramount Theatres Inc. merger case, with the prospect that announcement will be forthcoming within a week or ten days.

There were no developments that argued any change in the outcome of the merger itself—with a substantial majority evidently favoring the fusion of the motion picture exhibition company and the Noble-controlled networks, applications for which were filed in mid-1951. But it appeared to be an entirely different story on some of the related issues, with the prospect of perhaps several different concurring or dissenting opinions.

Only dissent to merger approval will be, it is understood, from Comr. Frieda B. Hennock. Miss Hennock made no attempt to hide her disapproval of the merger during the one-day oral argument held before the FCC *en banc* Jan. 5 [B•T, Jan. 12].

Miss Hennock

Her thesis tended to be that of the Broadcast Bureau's—that the merged company would be monopolistic, might discriminate against TV to protect its theatre holdings, and that its weight in the picture buying market would be unfair to other TV chains attempting to purchase films for telecasting. She reportedly has a 90-page document.

Most Follow Resnick

The other six commissioners take the position, it can be presumed, that no such thing will eventuate and if it does the Commission still has the power to rectify it. This was the approach taken by Hearing Examiner Leo Resnick in his initial decision last November favoring the merger [B•T, Nov. 17, 1952].

There were indications that Comrs. Edward M. Webster and Eugene H. Merrill would go along with Comr. Hennock—but in separate opinions—on the Paramount control issue and on the purported "illegal" transfer cases. Thus, a switch of a single vote, on these points, could transform Miss Hennock's minority opinion to a majority opinion. Question seemed to be whether Chairman Paul A. Walker would waver on this point.

Such a turn of events would not preclude merger approval. It could result in further hearing on the transfer issues, however. The FCC functions on the basis that no action is "final" until it becomes a public notice, and much can happen from the time a "tentative" vote is taken to final approval.

The Paramount issue is premised on the contention that 25% ownership of DuMont by Paramount Pictures constitutes effective control. Opposition to the transfer cases is based on the contention that the old Paramount company should have secured FCC approval before making the changes. The companies argued, however, that a higher Federal authority—the courts—had decreed these transfers.

General Approval

Commission majority's approach, it was understood, is general approval of Examiner Resnick's initial decision. It will run, it is believed, about five pages, in order to take care of exceptions filed against the Resnick order by the Broadcast Bureau and DuMont.

Miss Hennock's 90-page dissent was submitted to the Commission Friday. Late last week it was being studied by the majority to ensure that no points were raised that were unanswered in the majority opinion.

Mechanical processing was expected to take a few days before the Commission's final decision was ready for issuance.

Although Sen. Charles W. Tobey (R-N.H.), chairman of the Senate Interstate & Foreign Commerce Committee, intervened for the second time early last month [B•T, Jan. 12], he has done nothing further on the ABC-UPT case itself. He did, two weeks ago, introduce a bill (S 538) which would prohibit the FCC from granting station licenses to those convicted of anti-trust violations, unless no such violations had occurred for the previous five years [B•T, Jan. 26].

Sen. Tobey had declared that he would hold hearings on that subject, but no such plans have been announced as yet.

Gleeson Renews Damages Bid In FCC Deletion of TV Ch. 1

COMPENSATION to William L. Gleeson for damages resulting from the FCC's deletion of TV Ch. 1 (44-50 mc) in 1947 again was asked in a private bill (HR 1693) submitted to the 83d Congress last week by Rep. George P. Miller (D-Calif.). The bill asks recompense of $149,401.78 to Mr. Gleeson, the same amount requested in the last Congress.

TV grant for Ch. 1 at Riverside, Calif., was made by the FCC to Mr. Gleeson's Broadcasting Corp. of America in December 1946. In 1947 the Commission determined the share arrangement between TV and non-government mobile and fixed radio services which would not work out, and eliminated TV Ch. 1. Mr. Gleeson was the only grantee for Ch. 1 at the time. Broadcasting Corp. of America (KPRO Riverside, KREO Indio, KYOR Blythe, KROP

The Gavel Is Gone But The Veep Goes On

ALBEN W. BARKLEY, with assistance of commentator Earl Godwin, debuted his television show yesterday (Sunday) from NBC Washington in a new studio featuring a concealed camera, and containing an audience of 40 persons.

Although the show is being offered for commercial sponsorship, under restrictions imposed by former Vice President Barkley, "The Veep" began his new venture on a sustaining basis from the Wardman Park Hotel. *Meet the Veep*, aired Sunday 5:30-5:45 p.m. EST, is packaged and owned by Louis G. Cowan, a friend of Mr. Barkley and his television counsel.

NBC and "The Veep" declined to reveal show costs or performing fees, but a network spokesman said an estimate that Mr. Barkley would get some $2,500 weekly was incorrect.

Mr. Barkley, in outlining at a news conference earlier in the week his objectives and proposed methods, said conversation with Mr. Godwin and guests will be informal and adlib, although the general subject to be discussed will be planned in advance.

Mr. Barkley, now that he is a commentator, will receive privileges in the Capitol radio correspondents gallery, as he was approved unanimously for membership last week by the Radio-Television Correspondents Assn.

An NBC spokesman said the company had gone to "moderate" expense to equip and rent a television studio exclusively for presentation of the new show. The network has contracted for use of the Wardman Park's Madison Room, originally a banquet room, which has furnishings of a dignity in keeping with the video "star's" standing. The

move was made also because Washington studios are crowded Sunday afternoons, with three back-to-back network originations.

NBC is using three cameras, one concealed behind a door and focused on the Veep's right eye. A control room and switching center were installed hastily in an adjacent room, the Hamilton suite. Network also purchased a zoomar lens, which it uses on one of the two stationary cameras.

Some 40 guests will be admitted to each show. Overall production is being supervised by William R. McAndrew, NBC director of news and special events, with direction by Ted Ayers, who, like Mr. Barkley, is a Kentuckian.

Vice President Richard Nixon indicated in a congratulatory telegram that he considered the title, " The Veep," the exclusive property of Mr. Barkley.

Brawley, all California) at present is under trusteeship in bankruptcy.

In response to a request for comments from the House Judiciary Committee, which has jurisdiction over private bills, the FCC last December argued it would be unfair to compensate Mr. Gleeson for any losses because deletion of Ch. 1 was dictated by engineering requirements. It also said he was eligible to apply for one of two uhf channels presently allocated to Riverside.

Mr. Gleeson replied last week, saying he had been given to understand if Ch. 1 was dropped, he would be given Ch. 6 as a substitute in Riverside. He also called attention to his application in 1948 for Ch. 13, which at that time had been granted KLAC Los Angeles. He said his business losses and damages from withdrawal of the 44-50 mc frequency were above $750,000.

Radio-Ad Trio to Serve On Psycho Warfare Group

THREE persons well-known in the radio and advertising industries were among eight named last week by President Eisenhower to serve on a newly created committee to study psychological warfare.

They are Gordon Gray, president of the Piedmont Publishing Co., publisher Winston-Salem (N. C.) *Journal* and *Twin City Sentinel*, operator of WSJS Winston-Salem, and president of the U. of North Carolina; Sigurd Larmon, president, Young & Rubicam, New York, and C. D. Jackson, publisher, *Fortune* magazine, who has served the past year as president of the National Committee for a Free Europe, which operates Radio Free Europe.

Mr. Gray

Secretary of Defense Charles E. Wilson will name a ninth person to complete the board, which will study and recommend methods to improve and accelerate U. S. psychological warfare. The board is directed by William H. Jackson of Princeton, N. J., partner in a New York investment firm.

Mr. Gray was the first director of the Psychological Strategy Board, now the President's Committee on International Information Activities. Mr. Larmon is a director of the Scarsdale National Bank and Trust Co. and the Rumford Press, a trustee of Dartmouth College and a member of the executive committee, Council of U. S. Assn. of the International Chamber of Commerce.

Mr. Larmon

Mr. Jackson of *Fortune* was deputy chief of psychological warfare during the war at Allied headquarters in North Africa and at Supreme Headquarters of the Allied Expeditionary Force in Europe. He joined Radio Free Europe in February 1951 on a one-year leave.

TV AUTHORIZATIONS REACH TOTAL OF 328

FCC awarded new grantees in the less than 30,000 population category cities last week as it authorized seven more stations; 220 stations now have been authorized since the freeze lift.

CITIES with less than 30,000 population were awarded grants for new television stations last week along with Memphis, which already has one pre-freeze station, WMCT (TV), serving its nearly-400,000 population.

Dropping down farther on the Group A-2 city priority line (cities without television service), the FCC authorized seven more stations in this category. One Group B grant and three noncommercial educational grants raised the total grants for last week to 11. Seven are for uhf stations.

This boosts to 328 the number of U. S. TV stations authorized, of which 14 are noncommercial educational outlets. There have been 220 stations authorized since the lifting of the freeze last April.

Number of stations on the air is now 129. Of these, 21 stations are post-freeze grants.

There were 24 mutually exclusive applications passed over by the Commission last week, following its policy of not processing such applications in order to speed up the granting of uncontested applications.

New Hampshire, Vermont, Alaska and the Virgin Islands have yet to be awarded TV stations.

Fort Dodge, Iowa, which had a 1950 population of 25,115, is the smallest city to receive a post-freeze grant. Within a fortnight the Commission probably will be granting applications for cities of under 25,000 population.

Last Thursday's grants were:

Salem, Ore. (City priority Group A-2, No. 99)—Lawrence A. Harvey, granted construction permit for uhf Ch. 24, effective radiated power of 105 kw visual and 56 kw aural, antenna height above average terrain 990 ft.

Tyler, Tex. (Group A-2, No. 109)—Jacob A. Newborn Jr., granted uhf Ch. 19, ERP 2.4 kw visual and 1.3 kw aural, antenna 350 ft.

Johnson City, Tenn. (Group A-2, No. 185)—WJHL Inc. (WJHL), granted vhf Ch. 11, ERP 105 kw visual and 54 kw aural, antenna height above average terrain 720 ft.

Charlottesville, Va. (Group A-2, No. 196)—Barham & Barham (WCHV), granted uhf Ch. 64, ERP 120 kw visual and 66 kw aural, antenna 780 ft.

Roswell, N. M. (Group A-2, No. 199)—John A. Barnett (KSWS), granted vhf Ch. 8, ERP 110 kw visual and 55 kw aural, antenna 900 ft.

Temple, Tex. (Group A-2, No. 200)—Bell Publishing Co. (KTEM), granted vhf Ch. 6, ERP 13 kw visual and 6.5 kw aural, antenna 460 ft.

Fort Dodge, Iowa (Group A-2, No. 202)—Northwest Television Co. (KVFD), granted uhf Ch. 21, ERP 23 kw visual and 12.5 kw aural, antenna 510 ft.

Memphis, Tenn. (Group B-4, No. 188)—Harding College (WHBQ), granted vhf Ch. 13, ERP 240 kw visual and 120 kw aural, antenna 500 ft. Operating: WMCT (TV), vhf Ch. 5.

Hartford, Conn.—Connecticut State Board of Education, granted uhf Ch. *24, ERP 235 kw visual and 120 kw aural, antenna 780 ft. (Noncommercial educational.)

Bridgeport, Conn.—Connecticut State Board of Education, granted uhf Ch. *71, ERP 220 kw visual and 110 kw aural, antenna 610 ft. (Noncommercial educational.)

Norwich, Conn.—Connecticut State Board of Education, granted uhf Ch. *63, ERP 215 kw visual and 110 kw aural, antenna 590 ft. (Noncommercial educational.) Comr. Rosel H. Hyde voted to defer action on above three applications and Comr. Edward M. Webster favored a letter requesting additional information.

In other TV actions last week, the Commission by memorandum opinion and order scheduled oral argument Feb. 16 on the further petition of Hearst Corp.'s WISN Milwaukee for reconsideration of the Sixth Report and Order. Filed last Dec. 17, the WISN petition asked FCC to review its opinion of Nov. 17 which denied the station's original plea for review of the Sixth Report respecting vhf Ch. 10 there.

The final allocation plan reserved Ch. 10 for noncommercial, educational use rather than commercial use. WISN went through competitive hearing for Chs. 6, 8 and 10 (then available) in 1948 but the freeze, imposed Sept. 30, 1948, prevented issuance of a decision in that proceeding. Before the freeze, however, one of four applicants withdrew, thus leaving three contestants for three facilities, and a petition for immediate grant had been filed.

FCC posed the following issue for the oral argument:

To determine whether the pending application of Hearst Radio Inc., for a new commercial TV station in Milwaukee, Wis., on Channel 10, a channel reserved for educational use by Section 3.606 of the Rules, should, in light of the provisions of Section 1.387 (b) (3) of the Rules and the prior proceedings with respect to such application, be dismissed in accordance with the requirements of Section 3.607 and footnote 10, Section 1.371 of the Rules.

Hearing Examiner J. D. Bond continued without date the hearing scheduled to commence today (Monday) on the competitive applications of WLAN Lancaster, Pa., and WGAL-TV there for vhf Ch. 8. WLAN requested the continuance pending action by the Commission upon its petition to enlarge and change the issues in the hearing.

Appeals Court Denial

Earlier, the U. S. Court of Appeals denied WLAN's request for a stay order to prevent WGAL-TV from changing from Ch. 4 to Ch. 8 pursuant to FCC's conditional grant for the switch.

The Commission's Sixth Report deleted Ch. 4 from Lancaster and substituted Ch. 8. It included a show cause order requiring WGAL-TV to change facilities. WLAN has contested the proceeding, claiming its Ch. 8 bid has equal standing.

WGAL-TV is now operating on Ch. 8 with limited power, conditional upon outcome of the comparative hearing with WLAN's application. FCC last week also modified power increase grants to NBC's Channel 4 stations WNBW (TV) Washington and WNBT (TV) New York to make the grants conditional upon outcome of the Lancaster proceeding.

In another memorandum opinion and order last week the Commission denied a joint petition by WHBC and WCMW Canton, Ohio, competitors for uhf 29 there, requesting waiver of the one-year ban on amendment of the table of channel allocations in order to add either uhf Chs. 71, 77 or 83 to Canton. This would break the deadlock, they contended, and make unnecessary the lengthy comparative hearing now set for Feb. 18.

Comr. Rosel H. Hyde dissented from the majority ruling while Comr. George E. Sterling issued a separate concurring opinion and Comr. Eugene H. Merrill concurred in part.

FCC last week also proposed to add vhf Ch. 4 to Fayetteville, N. C., and uhf Ch. 18 to Burnsville, N. C. Comments are due Feb. 27.

"MOVING THE GOODS" IN THE Memphis Market

Nine railroad systems are on the move supplying the growing Memphis Market with one-line direct service from 56% of the nation. WREC—Memphis No. 1 station—supplies the greatest audience to keep the goods moving! The latest Standard Audit and Measurement Report and Hooper ratings show you why WREC delivers the "better half" of the listeners in 76 rich counties at the lowest cost. Retailers appreciate the importance of a WREC schedule . . . Leading advertisers have proved the value of this one-station coverage for both metropolitan and rural selling. And, WREC rates are 10% lower per thousand listeners than in 1946.

FCC REVISES OPERATOR RULES; ALLOWS REMOTE TRANSMITTERS

Decade-long campaign of NARTB for modernizing of Commission regulations to conform to progress in equipment standards leads to changes affecting non-directional stations of 10 kw or less.

FCC rules governing the type of operating personnel at stations have been adjusted to meet modern technical and economic trends. In addition, the Commission has opened the way for remote operation of transmitters.

These changes are limited in general to non-directional broadcast stations of 10 kw power, or less, and specify that a fulltime first-class ticket holder be employed by each station. (For text see FOR THE RECORD, page 99.)

The FCC action was taken at the suggestion of NARTB. It followed a decade of wartime operation by broadcast stations along with extensive study by the industry's trade association.

NARTB's frequent contacts with the Commission in the last decade culminated Feb. 1, 1952, with a petition asking amendment of Part 3 and 13 of its rules covering licensed operator requirements and remote operation. Originally NARTB had specified 5 kw as maximum power for affected stations, but this was increased to a 10 kw maximum last May 9.

One NARTB point was not granted. The association proposed that each station be required to employ a minimum of one first-class operator as its chief engineer or technical supervisor and be on call and reasonably available to fulfill his specified duties. FCC specified, however, that one first-class operator must be a fulltime employe of each station.

Rule-making procedure got underway last June 4. The Commission received nearly 2,000 comments.

Voting for the new rules were Chairman Paul A. Walker and Comrs. Rosel Hyde, E. M. Webster and Robert T. Bartley. Comr. Eugene Merrill concurred but favored oral argument. Comr. Frieda B. Hennock voted for oral argument. Comr. George E. Sterling, an engineer, did not participate in the decision.

The Commission majority would not go along with the suggestion that oral argument be held, in view of the exhaustive comments it had received. It noted that most of the "conflicts engendered by these comments are based on opinion, surmise or prognostication," thus precluding the need of further oral presentation.

Technical Progress Noted

The announcement of the decision carried this observation, "Factors such as the marked improvement and reliability of transmitter equipment, the satisfactory utilization of lesser grade operators during World War II and on a temporary basis at a number of broadcast stations since January 1951, the successful operation by non-technical personnel of many electronic devices of a complex nature and upon which the safety of life and property is often dependent, and the extensive reliance of stations on their chief engineers for significant repair work, were considered by the Commission in reaching its decision."

The safety question is not serious in the case of modern equipment, the FCC noted after reviewing accident records. It found that temporary use of low-grade personnel during World War II had not brought an increase in transmission difficulties. Loss of air time at the average broadcast station, it said, is only 0.14% of total air time and up to 90% of this loss is due to power and tube failure.

As to the Conelrad equipment for emergency service in case of enemy attack, FCC found that practically all of the operations have been reduced to simple push-button activitation, clip moving or dial twisting. FCC ruled that lesser grade operators be given adequate Conelrad instruction by a station's regular first-class ticket holder.

Careful attention was given the question of remote control of stations, with a finding that outages of transmitters from all causes including remote control amounted to less than 1%. This portion of the NARTB was fought bitterly by labor organizations. Licensees using remote gear submitted detailed reports on their successful operation.

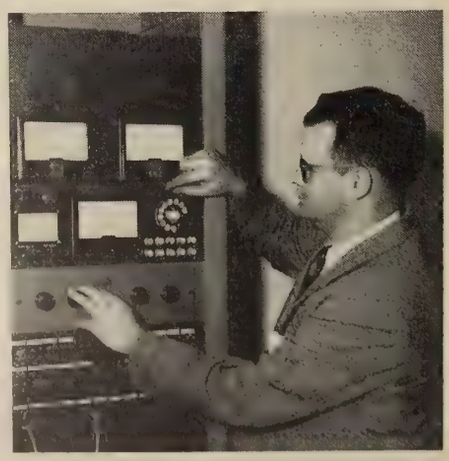
FM stations of 10 kw power or less are covered by the operator and remote control provisions. At noncommercial education FM stations of 1 kw or less but above 10 w the operator may be a second-class ticket holder, FCC said.

In the case of station licensees using remote control, the required technical personnel must be on duty at the place where remote equipment is located instead of the transmitter site.

Nine Months of Tests at KEAR Point Up Remote Operations Procedure

AN FCC-AUTHORIZED experiment in automatic remote control operation of a transmitter is working out successfully in San Mateo, Calif., where KEAR was off the air only one minute in the first week of testing last month.

FCC, meanwhile, last week ruled that remote operations were acceptable to the Commission, for the first time since the war years when engineering manpower was in short supply. (See adjacent story.)



The new system, which eliminates engineering personnel from checking operations at the transmitter site and enables a thorough dial-check on transmission facilities, includes two synchronized units, one at the transmitter and another at the studio two miles away. Equipment, a pilot model designed and manufactured by Rust Industrial Engineering Co., Manchester, N. H., is connected by two ordinary telephone lines.

The transmitter control section, Model RI-1081, is installed in a speech rack at the transmitter. This section connects with transmitter control circuits, which, in turn, connect with studios via telephone lines.

The studio unit, Model RI-108, serves as the control center two miles away, and has a two-section panel. One section has frequency deviation and percentage of modulation meters, and the other includes a telephone dial, circuit signal lights and the primary meter which records data required by FCC in its technical regulations. Each takes about 12 inches of rack space.

In addition to standard meter readings, FCC requires KEAR to take the transmitter off the air in case of power failure, shorts, grounds or any installation difficulty, and to turn on, apply and remove plate voltage to the final stage, adjust the output coupling and turn the tower lights on and off.

Meter values on the standard Raytheon transmitter meters and the General Radio monitors were calibrated against the new Rust equipment.

REMOTE CONTROL equipment is adjusted two miles away by D. F. Mariska.

Actual remote control operation begins with the turn of a switch, which puts the transmitter on and illuminates a red light. Dial equipment, when actuated, shows a reading on the primary meter of all transmitter activity. Readings are available for these currents and voltages: plate, antenna and filament, in addition to tower light control, frequency deviation and per cent of modulation.

The experimental equipment, installed early in January under supervision of KEAR Chief Engineer D. F. Mariska, will be reported on in detail to the trade. A brochure, with pictures, will be sent by S. A. Cisler, station owner, to broadcasters sending postage.

Commenting on the success of similar installations in Canada and Britain, Mr. Cisler said the remote control system can be used to advantage by American stations for reasons "ranging from economic circumstance to lack of personnel." KEAR engineers, all combination men, now work at the studios, and no unlicensed personnel is permitted to touch the unit or make readings. It is understood that costs for the unit were around $3,000 for the 1,000 w station.

GOVT. GROUNDWORK BEGUN IN NFL CASE; STATIONS CITE 'MONOPOLY' INJURY

The Justice Dept.'s suit against the professional football league gathered steam last week with government attorneys assembling evidence in court to prove its antitrust charge. Involved in limiting of radio-TV coverage of the National League's games.

THE government's antitrust case against the National Football League, entering its second week today (Monday), already has produced evidence showing the league has gone beyond its own rules in banning game telecasts.

At stake in the civil suit filed by the Dept. of Justice is the curtailment of radio-TV coverage of sporting events by both professional and amateur organizations. The case is being heard by Judge Alan K. Grim, of U. S. District Court, Philadelphia.

Much of the government's case last week was devoted to laying of economic and technical groundwork by W. Perry Epes, heading Dept. of Justice trial counsel. The hearing involves such problems as the right of the public to have open telecasting and broadcasting of professional football. Defense counsel contends the public has no right to such service and is not interfered with in business operations.

Chief government witnesses last week were Clair R. McCollough, WGAL-TV Lancaster, Pa.; Herbert S. Stewart, former general manager of WICU (TV) Erie, Pa., and now executive vice president and general manager of Orange Television Broadcasting Co., Tampa, Fla., and Charles Mallory, KSJO San Jose, Calif.

Mr. McCollough testified WGAL-TV in 1949 publicized signing of a contract to cover a full schedule of 13 professional games. After the third game, he said, five home games were cancelled. The station couldn't explain to everybody that the games had been cancelled because of reasons beyond its control, he continued, and neither the Eagles nor the NFL made any effort to explain their reasons for cancellation.

Cites Sapping of Confidence

"That makes the station look like it doesn't know what it's doing," Mr. McCollough testified. "If things like this happen enough times you destroy public confidence," he said.

He added that games again were cancelled in 1950 and 1951. In the latter year WGAL-TV had professional games scheduled every Sunday but some games were cancelled because of the proximity (75-mile) rule when the Philadelphia Eagles played at home. Explanation given the station was that NFL had ruled WGAL-TV was one mile inside the 75-mile protective radius.

Mr. Mallory testified KSJO lost about $6,000 during the 1950 football season because it was denied permission to broadcast NFL games.

James W. Seiler, owner-director of American Research Bureau, cited figures showing on TV audiences, with special attention to specific football games. Judge Grim directed much of the questioning to Mr. Seiler, indicating deep interest in both TV and sports.

Basic economic data on radio-TV homes, networks, advertisers, agencies and facilities were introduced by the government through a series of exhibits of BROADCASTING • TELECASTING magazine and the two associated YEARBOOKS. A B•T tabulation showing the estimated number of radio homes in every county in the U. S., as published in the magazine's Jan. 7, 1952, issue, was introduced along with maps. J. Frank Beatty, associate editor, was questioned at length Wednesday by John A. Skiles, Dept. of Justice antitrust attorney, with Judge Grim also asking many questions.

Admits Testimony

The court asked for detailed information when the witness cited magazine and FCC figures showing radio revenue has been increasing during the period of television's growth.

Judge Grim admitted all of the BROADCASTING • TELECASTING exhibits and testimony, overruling numerous objections by Bernard Nordlinger of Washington, chief league counsel, and his associated counsel.

Sol Schildhause, chief of the FCC Renewals Branch, was questioned on TV relay connections. Hugh Beville, NBC director of research and planning, was questioned briefly on TV set circulation as was Martin Codel, *TV Digest*.

Mr. Stewart testified WICU (TV) was denied permission to telecast two games of the Cleveland team despite the fact that the station was 15 miles outside the league's 75-mile protective radius. The games were Dec. 3, 1950 (Cleveland-Philadelphia) and the national championship Dec. 24, 1950 (Cleveland-Los Angeles), he testified, claiming Bert Bell, NFL commissioner, had denied permission to carry the network telecast.

The witness said he protested that Erie was 90 miles from Cleveland, drawing from Mr. Bell the explanation that a special train was going to bring Erie fans to the game. Actually, Mr. Stewart said, only 25 spectators from Erie went to the game by train, according to his check. He added that he offered to pay NFL a $2,500 bonus to carry the second contest but again was refused by the commissioner on the ground the sum was "too small."

'WEEKS' SEEN BEFORE FCC CHOICES

President Eisenhower, who insists on talking personally to "policy" appointees in government, including those at FCC, may take "several weeks" to name his choices because he is pressed with more urgent world and domestic problems, GOP sources claim.

QUESTS as to when President Eisenhower might name new members to the FCC is drawing blanks as the new administration finds itself preoccupied with more urgent national and international problems.

It was learned in Republican councils that "several weeks" might elapse before the administrative agency level, which embraces the FCC, is reached by the top screening echelon. This would be preparatory to discussion on the appointments with President Eisenhower.

It is understood that a list of two dozen names for the two FCC vacancies has accumulated at Republican National Committee headquarters with varying degrees of endorsement. Practically all those who previously have been mentioned in BROADCASTING • TELECASTING are on the list, plus a number of additional ones.

Greatest interest continued to center on the chairmanship. Supporters of Vice Chairman Rosel H. Hyde, who espouse his elevation to the chairmanship as logical, are highly optimistic. There has been no letup in endorsements received, it was learned.

Simultaneously, it was stated in usually well informed quarters that the boomlet that started a fortnight ago for the drafting of former Comr. Robert F. Jones, Ohio Republican, persists. It is openly stated that Mr. Jones' appointment would be well received by many of his former colleagues on Capitol Hill, where he served in the house for a decade as Congressman from the Lima, Ohio, district. On the other hand, industry support for Comr. Jones' appointment —even for a contemplated temporary tenure— has not approached the unaninimity of that behind Mr. Hyde.

As far as the impending two vacancies are concerned, reports vary almost daily. If the call should come for Comr. Jones, there would be only one remaining vacancy to be filled from the outside. The unexpired portion of the original Jones term, now filled by Democratic Comr. Eugene H. Merrill, runs until June 30, 1954. The remainder of Chairman Paul A. Walker's term runs until June 30 of this year. He is serving under executive order, however, and hence the balance of his tenure can be picked up by President Eisenhower at his pleasure.

There are roughly 900 policy jobs in the administration on which no processing has begun, it was learned. Of these, there are perhaps a dozen or more in the FCC, including the commissionerships, general counsel, secretary, the top positions in the Broadcast Bureau and other bureaus, and in the rank and file of the law department.

FCC Total 50

The FCC total has been estimated at as high as 50.

Whereas it originally had been planned to fill these positions promptly, it was pointed out that complications in connection with some of the higher level posts resulted in delay. With the cabinet positions all filled, emphasis now is being placed upon sub-cabinet appointees so the new administration can take over down the line. President Eisenhower, it has developed, insists upon interviewing personally every appointee to a policy level post. With the tremendous weight of his normal duties, this constitutes an additional heavy burden at the outset of his tenure.

As for the independent agencies, the view is that they can continue functioning until the President completes the upper echelon assignments. Then, possibly in several weeks, if the present pace is maintained, he can turn his hand to the administrative group which includes the Interstate Commerce Commission, Federal Trade Commission, Federal Housing Administration and Securities & Exchange Commission, in addition to the FCC.

FCC RECAPS PENDING REQUESTS

In conformance with McFarland Act, FCC tells Congress there are nearly a thousand broadcasting applications 90 days old or more on which final action has not come.

AT the end of 1952, 1,000 broadcast applications were pending before the FCC on which final action had not been taken and which were three months old or older.

This was shown in a complete listing of all pending cases, 90 days old or more in a 101-page document submitted last week to Congress by the FCC.

The report was made in line with the revised Communications Act requirement that the Commission report on all non-hearing cases 90 days or older and on all hearing cases six months old or older following end of hearings on which no final action had been taken. This was a provision of the McFarland Act, signed into law by President Truman in July 1952.

Oldest of the non-hearing broadcast applications was that of KARM Fresno, Calif., which in 1944 asked permission to change from 1430 to 1030 kc. It is one of the 77 applications held in abeyance pending outcome of the seven-year-old Clear Channel and Daytime Skywave case.

Plans Monthly Report

A monthly report of pending cases, under the new Communications Act requirement, is planned hereafter by the FCC.

It was impossible to estimate just how many unreported broadcast applications are pending before the Commission, but one FCC source tentatively estimated "far less" than half the 1,000 reported.

In the roundup on broadcast hearing cases, the report showed 89 applications with hearings completed six months or more before the beginning of 1953 on which no final action had been taken. Of the 89, initial decisions were rendered on 77.

Oldest of the hearing cases was that of WOWO Ft. Wayne, Ind., which is seeking 50 kw with directional antenna. Hearing was completed in 1947 and a proposed decision issued in 1950. Contributing to the delay in final determination, the report stated, is an anti-trust investigation of the licensee, Westinghouse Radio Stations Inc., owned by Westinghouse Electric Corp. At present, the Commission is looking into the air hazard aspects of WOWO's proposed antenna structures.

Non-Hearing List

In the non-hearing listing, the report showed 273 AM applications on which no action had been taken and are three months old or older. Of these, 237 were for new stations or involved power and/or frequency changes.

In addition to the 77 tied up by the Clear Channel case, 72 have never been processed, 10 are awaiting action on other cases, five request facilities not specifically provided for in Commission Rules, 16 have received "McFarland letters," nine involve NARBA conflicts, and four are miscellaneous.

In FM there are only 32 applications 90 days or older on which final action has not been taken, the FCC report said.

Of the 45 applications for renewals and transfers in all areas of broadcasting (AM, FM and TV), seven involve stations in receivership, eight involve maladjustments of directional an-

TV processing began June 2, 1952—following the principles enunciated in the Commission's April 14 Sixth Report and Order. Required to be reported to Congress were 248 applications for new stations still not processed, 30 existing stations seeking changes in wavelengths, 140 applications which have been sent "MacFarland letters" advising that their requests are in conflict with other applications, 191 other mutually exclusive applications on which "MacFarland letters" have not yet been sent, and 26 passed for a variety of other reasons.

AT&T Next on FCC Movie-TV Hearing

AT&T gets its chance this week to show the FCC that it can provide theatre-TV service at reasonable cost. Its testimony, to come from three witnesses, starts this morning, and is expected to take one and a half to two days.

Today will be the first time the commissioners will have heard from other than proponents of an exclusive 360 mc theatre-TV band in the 5925 to 6875 mc portion of the spectrum. Hearing began last Oct. 20 with engineering and accounting witnesses asserting that exclusive theatre-TV allocations were necessary. Proponents requested (1) video channel 10 mc wide, (2) radio frequency channel 30 mc wide, (3) two channels for a single system, and (4) six systems to ensure competition [B•T, Oct. 27, 1952].

Theatre-TV technical and accounting testimony wound up in a day and a half when the hearings resumed last week. Principal witness was Manfred K. Toeppen, cost consultant from Los Angeles, who introduced cost accounting data indicating that a New York to Washington, six-program theatre-TV microwave service would cost about $58 million to construct—an average of $42,000 for each of the 1,376 theatres served. These 1,376 theatres are located in nine "service areas": New York, Philadelphia, Baltimore, Washington, Wilmington, Atlantic City, Trenton, Allentown, and Reading.

Exclusive frequency proponents, in presenting their technical and accounting testimony, used the New York to Washington system as a sample to illustrate how theatre-TV service could be rendered anywhere in the country. The nine service areas encompassing 1,376 theatres have a total of 1,512,738 seats. Program sources would be available in New York, Philadelphia, Baltimore, Washington, and Atlantic City. The six-program system indicated that a theatre-goer could conceivably have a choice from six different presentations at any one time. The accounting tables presented by Mr. Toeppen showed that the transmission system would cost from an average of two cents per day per seat to as much as five cents, depending upon hours of programming per day, number of programs presented, etc.

FTC November Ad Study

MORE than 1,000 radio and black-and-white ads were assigned to divisions of the Federal Trade Commission during November for analysis in the group's continuing study of current advertising. Of the 1,019 ads, 796 were referred to the Bureau of Antideceptive Practices, with 78 ads scheduled for litigation and 718 for investigation. Antideceptive Practices Bureau handled 549 cases that month.

NARTB CONVENTION: 'GOLD RUSH'

Convention Committee sets motif of "53 Gold Rush to California" in shaping plans for Los Angeles sessions this spring.

IT'LL BE a "Gold Rush" at Los Angeles April 28-May 1, NARTB's Convention Committee is telling radio and TV broadcasters and affiliated interests, as promotion gets underway for the annual industry convention.

Again the convention will be split into two divisions—management and engineering. All delegates will participate, however, in the annual exhibition of equipment and services.

Clair R. McCollough, WGAL-AM-TV Lancaster, Pa., chairman of the convention arrangement group, said the official motif is a "'53 Gold Rush to California."

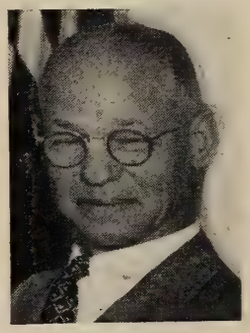
This theme, he said "is designed to emphasize that the 'gold' of increased profits and greater savings in broadcasting can be gained through the 'mine' of tested experience and practical operating procedures which the NARTB convention and continuing association membership provide."

'Go West' Brochure

NARTB issued a brochure last week urging radio and television "prospectors" to pack their saddle bags and head west. The Management Conference will bring first results of a management study now being conducted in four typical areas by the NARTB Research Dept. This study is expected to show how stations are successfully meeting current economic and operating problems—a clinic in broadcast management.

Management sessions will be in the Biltmore Theatre, a wing of the convention hotel, the Biltmore. Sessions were held there at the 1948 convention. Engineering meetings will be held in Burdette Hall of Philharmonic Auditorium, adjacent to the hotel.

On the Engineering Conference program are such topics as remote control of transmitters, a timely topic in view of the FCC action last week permitting such operation (story page 54); developments in uhf television engineering, proof of performance and the possibilities of transistors.



Official forms for pre-registration and hotel reservations will be mailed Feb. 20 from NARTB headquarters. NARTB board policy limits registration for both management and engineering sessions to active and associate members and persons or firms in related fields who are not eligible for NARTB membership.

C. E. Arney Jr., NARTB secretary-treasurer, is convention manager. Arthur C. Stringer is in charge of equipment and service booths and displays at the convention exposition.

The official convention proceedings will open Wednesday, April 29.

UBA Elects Madsen

NEW president of the Utah Broadcasters Assn. is Arch L. Madsen, general manager of KOVO Provo. George C. Hatch, board chairman of the Intermountain Network and president of KALL Salt Lake City, was elected vice president and Arch G. Webb, president and general - commercial manager of KVOG Ogden, was re-elected secretary-treasurer. S. John Schile, retiring president and commercial manager of KUTA Salt Lake City, and general managers Reed Bullen, KVNU Logan; Frank Peacock, KSVC Richfield, and Arthur L. Higbee, KSUB Cedar City, have been named to the board of directors.

Mr. Madsen

NARTB Auxiliaries Stand

NARTB'S claim that proposed reduction of channel spacing for TV auxiliary stations would be premature at this time has received strong support, according to Thad Brown, NARTB television manager. The FCC proposes to amend its rules covering TV auxiliary services [B•T, Jan. 26].

Mr. Brown said complete support also had been found for the FCC position that more channels should be supplied. He added that no support could be found for the use of crossed-polarization as a definitive means of eliminating interference with reduced channel spacing.

Possibility of diplexing aural and visual information might be prohibited if lesser channel spacing is required, he added, in reviewing comments by NBC, Raytheon, AT&T and Federal. NARTB contends many areas will become crowded as TV broadcasting grows.

Complaints to Box 1711

TV VIEWERS now have a place to write when they want to comment on what they see and hear. NARTB last week completed revision of the NARTB Seal of Good Program Practice, displayed by stations subscribing to the Code.

John E. Fetzer, WKZO-TV Kalamazoo, Mich., chairman of the NARTB TV Code Review Board, said the new seal will be displayed for the first time Sunday, Feb. 8, by subscribing stations. The new design has been modified mainly by insertion of a post office box number—Box 1711, Washington 4, D. C.

Public response to NARTB's video code has not been large since it went into effect March 1, 1952, though 95 TV stations and four networks are subscribers and frequently display the seal.

The words "Television Code Board" have been inserted in the seal. The word "culture" has been deleted, since the three other words descriptive of industry service cover the ground, it was felt.

HUGGINS, BAUDINO GET TOP WRS JOBS

Westinghouse President Price announces Assistant AF Secretary Huggins to return as Westinghouse Radio Stations president; General Manager Baudino, as vice president, to head all WRS operations.

E. W. HUGGINS, Assistant Secretary of the U. S. Air Force, has been elected president of Westinghouse Radio Stations Inc. and Joseph E. Baudino, WRS general manager, has been elected vice president in charge of all operations, according to an announcement by Gwilym A. Price, president of Westinghouse Electric Corp., WRS parent company.

Mr. Huggins also has been elected to a new position in the parent company, vice president of corporate affairs. He has been with the U. S. Air Force since 1951, with general supervision over its worldwide installations, overseas and offshore procurement program and relationships with civil aviation. He had resigned as executive vice president of Westinghouse Electric International Co. to take the military assignment.

Mr. Huggins

As vice president of corporate affairs, Mr. Huggins will be responsible for wholly owned subsidiaries now reporting to Mr. Price. His responsibilities include the corporate secretary's office of the parent Westinghouse company and executive liaison with associated companies in which Westinghouse has substantial interests.

Mr. Baudino is a Westinghouse career man of 25 years service. He has risen from an engineering post to the WRS executive vice presidency. He joined Westinghouse after graduation from the U. of Illinois and has been associated with broadcast activities since that time.

Mr. Baudino

Mr. Huggins will assume his new position as soon as he is released from government service. He is a native of Madison, Wis., and a graduate of Yale.

He was with the New York law firm of Cravath, Swaine & Moore, later joining the Westinghouse law department at Baltimore in 1943. From 1945 to 1951 he was in charge of the company's law department in New York, becoming executive vice president of the international subsidiary in 1951. He served as parent company secretary from 1948 to 1951.

27 Stations-Advertisers Cop BAB's 'Radio Results' Awards

Chosen from among 300 radio station entries, winners who used radio successfully will receive wall plaques. Others receive honorable mention.

ANNOUNCEMENT of 27 winners in BAB's second annual "Radio Gets Results" contest was made Wednesday by BAB President William B. Ryan.

Winners of awards for first, second and third places in nine categories were selected from more than 300 radio station entries. For the first time, duplicate awards will be presented to advertisers for their effective use of the medium. Winning stations and advertisers will receive wall plaques, while hand-lettered scrolls will be distributed for honorable mention listings.

The range of entries included radio success stories for such varied advertisers as a baseball team, a nursing school, a cattle dealer, and for such items as $40,000 estates and cold storage lockers.

Based on Results

Awards were based on actual results achieved by advertisers through radio advertising as well as on the amount and type of radio used. Judges were: Edward Kruspak, advertising manager of *Automotive News;* G. Edwin Heming, manager, advertising department of the American Bankers Assn.; Dr. Robert L. Swain, editor of *Drug Topics* and *Drug Trade News;* Walter B. Bruce, advertising manager of the Grand Union Co., representing the Supermarket Institute, and Paul Penfield, president of Public Utilities Adv. Assn.

The awards follow:

Apparel—First: WIP Philadelphia (Krass Bros.); second: WNOE New Orleans (Southern Tailoring Co.); third: KLX Oakland (Bond Clothes). Honorable mention: KIT Yakima (Hartfields); WMT Cedar Rapids (Yager's); KSWO Lawton, Okla. (Franklin's); WOR New York (Peter Chambers Inc.); KEX Portland (Hermanek's).

Automotive—First: KSWO Lawton (Green-Phillips Chevrolet Co.); second: WICC Bridgeport (Dayton & Edwards); third: KLAC Hollywood (Eddie Nelson Dodge-Plymouth Dealer). Honorable mention: KXOB Stockton (Braley's); KCBS San Francisco (Doherty Bros.); WBUD Trenton (U. S. Motors); KOPO Tucson (Curley-Moffatt).

Department Stores—First: WTBO Cumberland, Md. (Rosenbaum Bros.); second: WJTN Jamestown, N. Y. (Bigelow's); third: KOIL Omaha (Philips). Honorable mention: WTTM Trenton (Hurley-Tobin Co.); WHIZ Zanesville (H. Weber & Sons Co.); WHOP Hopkinsville, Ky. (Cayce-Yost Co.); WLCS Baton Rouge (Joy's Dept. Store).

Financial—First: WIBX Utica (Mohawk Valley Investing Co.); second: KDYL Salt Lake City (Utah Hospital & Surgical Insurance Co.); third: WRBL Columbus, Ga. (Reavis Insurance Agency). Honorable mention: KCBQ San Diego (Home Federal Savings & Loan Assoc.); WCPA Clearfield, Pa. (Workers Loan Co.); KYW Philadelphia (Bache Investment Co.); KFOR Lincoln, Neb. (National Bank of Commerce); WTTS Bloomington, Ind. (Workingmen's Federal Savings & Loan Assn.).

Food and Grocery Products—First: WIRE Indianapolis (Kingan & Co.); second: WNBC New York (Jacob Ruppert); third: KSWO Lawton (Lawton Meat Supply). Honorable mention: WOWO Fort Wayne, Ind. (Tidy House Products Co.); KCBS San Francisco (Ocoma Food Co.); WMBD Peoria (Peoria Service Co.); WCBS New York (Ferrara Confectionary Co.).

Food and Grocery Stores—First: WKZO Kalamazoo (Market Basket Stores); second: KYAK Yakima (Gerritsens Markets); third: KEX Portland (Schumackers Meats). Honorable mention: KNCM Moberly, Mo. (Davis Supermarket); WIRY Plattsburg, N. Y. (Morris' Market).

Home Furnishings — First: KFBI Wichita (Yowse Furniture Co.); second: WIND Chicago (Homer Bros.); third: KONO San Antonio (Montgomery Ward Catalogue Office). Honorable mention: KSTL St. Louis (Lazar & Sons); WIP Philadelphia (N. Horowitz & Sons); WKNE Keene, N. H. (Parker Pines Wayside Furniture); KOIL Omaha (Murray Wall Paper & Paint Co.); WIRY Plattsburg (Ginsberg Furniture Store).

Miscellaneous: First: WCBS New York (Durham-Enders Razor Corp.); second: WJOY Burlington, Vt. (Colonial Airlines); third: KCBS San Francisco (Affiliated Gas Equipment Inc.). Honorable mention: WIP Philadelphia (Bonafide Construction Co.); WKNE Keene (Wimon's Jewelers); KOPO Tucson (Grunewald & Adams); KDKA Pittsburgh (Don A. Atkin Co.); KNBC San Francisco (Scott Co.); WOC Davenport, Ia. (Pioneer Central Div., Bendix Aviation Corp.); WXLW Indianapolis (Rothkopf Pharmacy).

Specialized Service—First: KBMY Billings, Mont. (Big-Boy Drive Inns); second: KYAK Yakima (Wally Edwards Flowers); third: WJTN Jamestown (Mode Laundry & Dry Cleaning Co.). Honorable mention: WIND Chicago (Gingiss Bros. Men's Clothing Rental); WIP Philadelphia (Henry Ford Plumbing & Heating Co.); KGHL Billings (Your Food Bank, Cold Storage Locker); WORZ Orlando (Spar Service Station).

SELECTING winners for BAB's 1952 "Radio Gets Results" contest are three of judges (l to r): Edward Kruspak, advertising manager of *Automotive News;* G. Edwin Heming, manager, advertising department of American Bankers Assn.; and Dr. Robert L. Swain, editor of *Drug Topics* and *Drug Trade News.*

Cotton Belt Changes

DIVISION of management within the four-state Cotton Belt group of radio stations in Texas, Arkansas, Mississippi and Missouri has been announced, effective April 1, by David M. Segal, general manager.

Mr. Segal, who owns or controls all the stations, will assume active management of KUDL Kansas City, Mo., expected to go on the air May 1 with 1 kw on 1380 kc; KDKD Clinton, Mo., and a new station at Warrensburg, Mo. Regional linking of the three Missouri stations, to be fed out of Kansas City, is expected eventually.

Operation of the Segal southern properties will be supervised by Floyd Bell, now at KTFS Texarkana, Tex. He will be business manager of KTFS, KDMS El Dorado, Ark., KDAS Malvern, Ark., and WGVM Greenville, Miss. Thomas Alford, commercial manager of KTFS, also will supervise sales of KDAS and KDMS, with Les Eugene continuing as KTFS program manager.

Broadcaster's Main Problem: It's Personnel, Say Experts

Fellows, Menser, tell Georgia Radio and Television Institute that broadcasting and telecasting personnel, well trained and willing to work, can cure most media headaches.

MOST problems of radio and television can be cured by personnel well qualified and willing to work, in the opinion of two speakers at the opening day session of the eighth annual Georgia Radio & Television Institute.

Speaking Wednesday at the first of three day-long seminars conducted by the Henry Grady School of Journalism at the U. of Georgia in Athens, the two seemed to agree problems of higher-quality programming and production can be solved only by the finding and employment of qualified persons.

The basic problem in all programming is personnel, said Clarence L. Menser, general manager of WJBS Deland, Fla., and former program manager for NBC. "Precision that begins and ends with the design of the console or the transmitter cabinet leaves much to be desired," he said. Programming also should be "precision work," he added.

"Programming has been treated too often as the ugly sister doing a lion's share of the work but seldom getting dressed up for the party. She should have put on the glass slipper long ago," he declared.

NARTB President Harold Fellows recommended colleges and universities give as much attention to television education as to educational television. Estimating an employment figure of 40,000 for 1,000 television stations, Mr. Fellows suggested training of students with "intensity" so they will be "employable."

Maturity within the television industry, like education, is "a long, tedious process," he said.

Cahn to A-K in L. A.

EDWIN CAHN, veteran advertising agency executive for more than 20 years, has been appointed manager of the Los Angeles office of Avery - Knodel Inc., national radio-TV station representative firm, effective Feb. 1. Mr. Cahn was executive vice president of the George H. Hartman Co., Chicago advertising agency, for 21 years before resigning and selling his interest last spring. He went to the West Coast, where he became Pacific manager for Boyar International Labs. (cosmetics).

Mr. Cahn

NW School Buys WBOK

WBOK Waterloo, Iowa, has been sold to the Northwestern Theological Seminary and Bible Training School, Minneapolis, it was reported last week. Northwestern School plans to make the station noncommercial, subject to usual FCC approval. Sale price was $56,000, according to John M. Printup, general manager of the station. Buyer also owns KTIF Minneapolis.

Full Senators Schedule Has 14 TV Road Games

TWO-YEAR exclusive broadcast rights sold to National Brewing Co., Baltimore, and the Phillips radio-TV appliances chain by the Washington Senators cover a total of 154 games split between home and road [B•T, Jan. 26].

For the first time, the sponsors are organizing a full schedule of road games which will be telecast, with the total estimated at 14 or more. Total games to be televised on WTTG (TV) Washington and probably in Baltimore is 24.

Both home and road games broadcast will also be aired on a network covering D. C. and four nearby states. The 20 cities are being selected to avoid conflict with schedules of minor league games in those areas. National, through Kenyon & Eckhardt, New York, is sponsoring one-half the broadcasts and all the telecasts. Phillips' agency is Cohen & Miller, Washington.

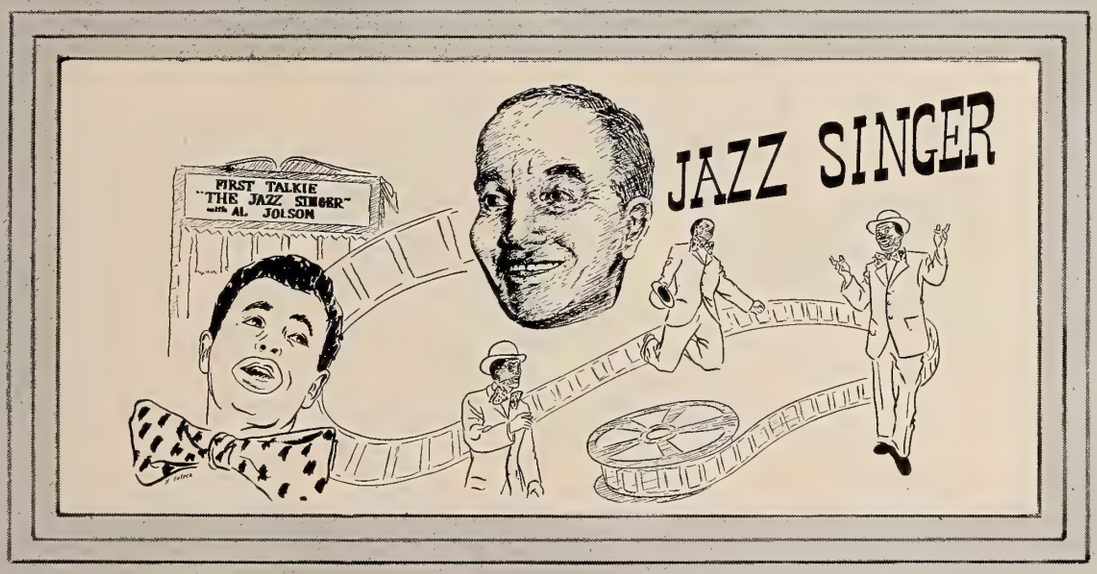
Cost of the exclusive rights is understood to be in excess of $175,000.

'Burberry Award'

WBNS-TV Columbus, Ohio, reports it is the recipient for the third straight year of the "Burberry Award," for "producing the finest in TV programs, both in its studios and from the CBS network," in central Ohio.

The citation is presented by Robert Burberry of Lancaster, Ohio, who makes the award because he feels he is an "average viewer" and because he has been "a constant fan" for the past four years.

Mr. Burberry claims he writes down "hundreds of notes on all types of programs" during the year, considering production, lighting, camera work and personalities. He praised especially WBNS-TV's five-a-week merchandise series, *Look to Lazarus,* presented by F. & R. Lazarus department store.



WPIX (TV) Will Telecast 24 Yankees, Giants Road Games

HIGHLIGHT of 1953 baseball coverage by WPIX (TV) New York will be the telecasting of 24 Yankees and Giants road games. Starting April 13, WPIX (TV) will cover a total of 158 Yankee and Giant games.

Chesterfield cigarettes will sponsor all Giants games, covered by Russ Hodges and Ernie Harwell. Ballantine Beer and Ale will sponsor Yankees telecasts except third and seventh innings (White Owl Cigars).

KSWO-TV Full Power Start

KSWO-TV Lawton, Okla., plans to begin operating about March 1 with full authorized power of 10 kw visual, 5 kw aural, antenna height 500 ft., according to the station's representative, O. L. Taylor Co., New York. B•T reported Jan. 26 that the station planned to begin operating with lower power.

25th ANNIVERSARY

DO YOU REMEMBER ?

When theatre marquees heralded the most revolutionary step of the century . . . talking pictures. Al Jolson's "Jazz Singers" brought that vibrant personality to the eyes and ears of the nation. Yes . . . do you remember? We do . . . for that was the year WWNC was born. During the quarter-century since, WWNC has become a radio station — PLUS.

The plus is the place it has EARNED in the Asheville area . . . the reputation it has gained because it has been operated by the same key people. The key personnel of WWNC, whose experience totals 166 years of radio in one community, constitute a group who KNOW their area—the WWNC area.

YOU KNOW YOU REACH THE PEOPLE WHEN YOU USE WWNC . . .

WJZ Change to WABC

THE FCC last week, rejecting opposition by Allen B. DuMont Labs., granted a request by ABC to change the call letters of its o&o WJZ-AM-FM-TV New York to WABC-AM-FM-TV.

Harold Burke to Direct First WCEE (TV) Airing

APPOINTMENT of Harold C. Burke, former vice president and director of Hearst Radio Inc., as coordinating director of WCEE (TV) Asbury Park, N. J., new uhf station on Ch. 58, was announced last week by the Atlantic Video Corp., operator of the station.

Mr. Burke

Mr. Burke will complete plans to put the station on the air, according to Walter Reade Jr., theatre circuit executive and Atlantic Video Corp. president. Target date for WCEE (TV) is late 1953.

Since resigning from Hearst Radio in January 1952, Mr. Burke has been in business for himself as a TV consultant, specializing in getting stations on the air. He was in charge of WBAL Baltimore from 1938, and of WBAL-TV, which went on the air in 1948. He also managed Hearst Radio properties in Milwaukee and San Antonio and performed special assignments for the Hearst stations in Los Angeles, San Francisco and New York.

Ripley Returns to WGAR

FRED RIPLEY, radio veteran since 1922, has returned to WGAR-AM-FM Cleveland, which he put on the air in 1930, to handle a nightly quarter-hour "man-about-town" series. Mr. Ripley was assistant to the general manager there in 1930, and subsequently was a news commentator, program director, vice president and general manager of a regional network comprised of WSYR Syracuse, WTRY Troy, WJTN Jamestown, all New York and WKNE Keene, N. H. He also has held executive positions at WPRO Providence and WARC Rochester, N. Y.

CHICAGO COUNCIL BANS RADIO-TV

Aldermen again veto broadcast newsmen from public crime meets in a move that arouses further opposition.

RADIO-TV newsmen were literally relegated to pencil-and-paper status last week in Chicago as broadcasters lost another battle in their continuing fight for equal access to coverage of public proceedings.

A freshly-invoked ban by the City Council on all broadcast coverage, particularly television, drew criticism from stations and their commentators. Council voted 27-16 to reject petitions for permission to air coverage of local crime investigating committee sessions.

The fight for free access to the public proceedings was led by WGN-TV, which asked the council for authority to televise hearings live. Similar requests were filed by WBBM (CBS) and WMAQ (AM) and WNBQ (NBC-TV) and WENR-TV (ABC), which wanted to make tape recordings and film clips.

Frank Schreiber, general manager of WGN-AM-TV, said the stations will "continue to pursue this question in the public interest." WGN-TV was prepared to install technical facilities in council chambers without causing inconvenience or interference with normal processes.

A broadcast ban has been in force in Chicago since May, when similar petitions were rejected. The vote was better last week than the 40-3 tally recorded last year.

Hearings opened Tuesday with radio-TV newsmen-commentators armed only with paper and pencil. Late in the week they held out hope that council would allow tape recordings.

Protesting the council decision, WBBM's John Harrington, NBC's Clifton Utley and Bill Ray, among others, stressed that hearings were public but that broadcasters were denied equal coverage access.

Alderman Freeman led the council fight for TV. Alderman Wagner denounced the proposal to admit TV, charging that the "right of privacy . . . is stronger than the right of the public to be entertained." Commenting on the WGN-TV petition, Mr. Schreiber said "We should have the same access and privileges to the hearings as is traditionally provided for the press and other news media."

Help for Handicapped

STATIONS donated almost $1 million worth of time promoting National Employ the Physically Handicapped Week in October, making more than 13 million radio and TV impressions.

William R. McAndrew, information chairman on the President's employ-the-handicapped committee, who also manages news and special events for NBC, said a total of 63,410 programs and spots, worth $913,000, were donated the week of Oct. 5-11.

Radio and TV coverage was increased 50% over the previous year, he said. He commended 3,000 broadcasters for their cooperation. Terming their work an "exceptional display." He said, "I have rarely seen anything like it."

Tucson Papers Herald TV

SPECIAL television editions of both Tucson newspapers, *The Arizona Daily Star* and *Tucson Daily Citizen,* heralded the coming of TV to that Southwestern city yesterday (Sunday) when KOPO-TV was to begin programming. The *Star,* in a 36-page TV section last month, covered both the technical and entertainment sides of TV. The *Citizen,* in its television edition, also devoted 36 pages to the medium. There are three TV grantees in Tucson, but only KOPO-TV is ready for operation. KVOA-TV expects to go on the air in a few months and KCNA-TV has not announced its plans, the *Citizen* reported.

STATION REPRESENTATIVES

Branham Co. Boosts Executives

BRANHAM Co., station representative firm, announced last week Monroe H. Long, president, had been elected vice board chairman by the company's directors.

Eugene P. Corcoran, executive vice president, was chosen as president, and Joseph F. Timlin, vice president, as executive vice president. John Petrie continues as the Branham Co.'s chairman of the board.

Representative Shorts

John E. Pearson Television Inc. appointed national representative for KFSA-TV Ft. Smith, Ark.

CBS Adds 6 New TV Outlets to Network

ADDITION of five new TV stations to CBS-TV was announced Wednesday by Herbert V. Akerberg, CBS-TV vice president in charge of station relations. They are as follows:

WKNB-TV New Britain, primary, supplementary, interconnected affiliate operating on Ch. 30, effective last Saturday. Owned and operated by New Britain Broadcasting Co. Peter B. Kenney is general manager.

WBRE-TV Wilkes-Barre, primary, supplementary, interconnected affiliate operating on Ch. 28, effective immediately. Owned and operated by Louis G. Baltimore. David Baltimore is general manager.

KFEQ-TV St. Joseph, primary, supplementary, interconnected affiliate on Ch. 2, effective Apr. 1. Owned and operated by KFEQ Inc. B. Pitts is general manager.

WHP-TV Harrisburg, primary, supplementary, interconnected affiliate on Ch. 55, effective March 15. Owned and operated by WHP Inc. A. K. Redmond is vice president and general manager.

WCOV-TV Montgomery, Ala., primary, supplementary, non-interconnected on Ch. 20, effective March 1. Owned by Capitol Broadcasting Co. Hugh M. Smith is general manager.

KOPO-TV Tucson, effective yesterday (Sunday), as a primary, supplementary, non-interconnected affiliate on Ch. 13. Owned and operated by Old Pueblo Broadcasting Co. E. S. Mittendorf is general manager.

No Plans Seen by MBS To Replace Fineshriber

THOMAS F. O'NEIL, president and board chairman of Mutual, said last week that "present plans do not include a replacement in the post of executive vice president" in the wake of William H. Fineshriber Jr.'s departure from that office to become vice president and general manager of the NBC radio-TV networks [B•T, Jan. 19].

Indicating his intention to continue and intensify his own activities in directing Mutual affairs, Mr. O'Neil's statement was prompted by speculation that a key aide was being sought to assist him, either with or without the title Mr. Fineshriber is vacating [B•T, Jan. 26]. Text of the statement:

"Our present plans do not include a replacement in the post of executive vice president.

"In order to maintain the closest possible touch with the officers of Mutual, I shall work directly with them.

"Mutual's vice presidents and secretary-treasurer have been with the network an average of more than 12 years, and form a very solid base for continuing Mutual's sales increases, which, in 1952, were the largest in the industry, and which are already following this same pattern in the first quarter of 1953."

Mr. Fineshriber is slated to join NBC late this month.

ABC-TV Adds KFOR-TV

KFOR-TV Lincoln, Neb., new outlet expected to begin commercial telecasting about April 1, has affiliated with ABC-TV, Alfred R. Beckman, national director of radio and TV station relations, announced last week. Addition of KFOR-TV brings the ABC-TV affiliates total to 79.

Owned by Cornbelt Broadcasting Co., the station will operate on vhf Ch. 10. George Smith is general manager.

ALEXANDER SALES FORCE: There is a specially trained Alexander representative in your area . . . ready to give you personal assistance with your film commercial plans.

ALEXANDER STAGE: Housing 32 large sets, the Alexander Stage offers every facility for reproduction of authentic scenes and locations. Seven complete camera crews are maintained.

ALEXANDER ART DEPT: More than 75 skilled artists, including a complete department for cartoon animations, do the art work for Alexander productions.

ALEXANDER SERVICE DEPT: Film storage in constant temperature vaults keeps film in top condition while awaiting shipment to TV stations.

ABC ADOPTS SINGLE RATE POLICY FOR ITS FIVE OWNED STATIONS

Trend to a single rate for day and night radio was very much in evidence last week as ABC announced that policy for its owned stations. KXOK St. Louis also joined the single raters. Question still open is whether this is the start of a wholesale change in ABC's network rate structure.

RADIO'S single-rate apostles last week received the strongest boost they've yet had as ABC announced adoption of the policy for all five of its owned radio stations [CLOSED CIRCUIT, Jan. 26].

One-rate structures for both day and evening time were announced for the network's WJZ New York, WENR Chicago and WXYZ Detroit, respectively, effective yesterday (Sunday), and officials said KECA Los Angeles and KGO San Francisco, also ABC-owned, would follow suit shortly. March 1 is the target date for KECA and KGO.

In a separate move, which some observers felt might mark the start of a trend among ABC radio affiliates, KXOK St. Louis, the network's outlet there, announced that it also was going on the single-rate plan effective yesterday.

Foreshadows Network Revision?

Whether the ABC action with respect to its owned stations—which applied only to spot and local advertising rate of each station—was a harbinger of similar changes in the ABC network rate structure could not be determined. It is known that top officials have advocated adoption of the single-rate plan on a network basis, and that, although they encountered some resistance in broaching it to affiliates last fall, they did not abandon it altogether.

In the case of WJZ and WXYZ, the new structure establishes the former daytime or Class B base hourly rate—$720 at WJZ and $350 at WXYZ—as the base hourly rate for both day and evening time, while in the case of WENR, where the situation is complicated by the fact that the station shares the 890 kc frequency with WLS, the new single rate was set at $450, one-half of the old Class A base rate of $900. Different rates are provided for late-evening times, and early-morning rates are increased.

Ted Oberfelder, ABC vice president in charge of owned radio stations, who announced the changes, noted that the stations' respective discount structures had been revised downward somewhat, but said that even so, evening advertisers would receive considerable savings. He said that on WJZ, for example, this saving would range between 20 and 40% in the 6-10:30 p.m. period.

The changes also encompass reductions in one-minute and station break announcement rates.

Advertisers get the benefit of rate reductions effective immediately, while present sponsors are protected against the increase features for six months.

Mr. Oberfelder said:

"The advisability of placing into effect a single rate policy on the ABC-owned radio stations has been under consideration and deliberation for quite some time, and after prolonged study of the radio rate structure, it was decided that a new approach with regard to radio rates was necessary.

"The expediency of a simpified rate card is immediately apparent and the ABC is taking the initiative among the owned radio stations of the major networks in launching the single rate policy. . . .

"ABC has seen fit to equalize the radio rates of its owned stations so as to be of utmost benefit to the advertiser. Under the new rate structure, purchasers of nighttime radio will find it as efficient a buy as daytime purchases."

Highlights of the changes, which include the cutting of higher Sunday afternoon rates back to the level of other times, are as follows, station by station:

WJZ New York

New gross hourly rate of $720 applies from 8 a.m. to 10:30 p.m. From 10:30 p.m. to midnight, the rate is $400 gross per hour; from midnight to 7 a.m., $200 gross per hour. This replaces a structure in which the gross hourly rates were $720 between 8:15 a.m. and 6 p.m.; $900 between 6-7 p.m., and $1,200 between 7 p.m. and 10:30 p.m.

The new one-minute announcement rate is $95; new station-break announcements rate is $70. Formerly, both one-minute and station-break announcements sold at $200 in the 7-10:30 p.m. period, $150 between 6-7 p.m., and $108 between 8:15 a.m. and 6 p.m.

But rates for participations in early-morning periods are revised upward: On the 6-6:30 a.m. farm show, the rate goes from a flat $45 per announcement to a flat $50 per; on the 6:30-8 a.m. disc jockey show, the rate goes from a flat $70 per participation to a flat $80 per.

Except for these hours, the 8-9 a.m. period and the 1-2 p.m. Mary Margaret McBride Show, the rates in participation programs are now equalized throughout the day, ranging from a flat $120 per participation one time weekly to $80 per participation on a five-times-a-week basis.

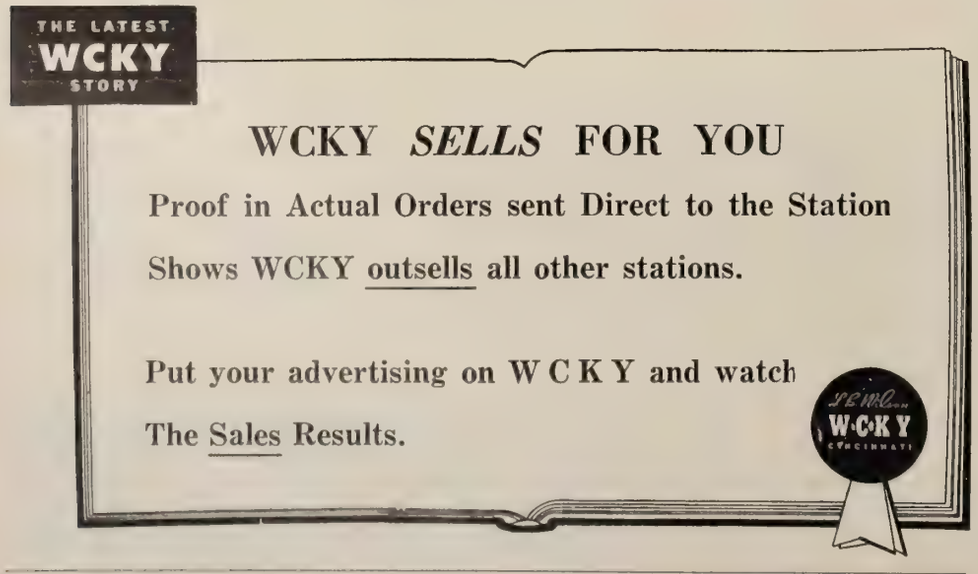
For the first time, WJZ is offering special announcement packages. Rate for one-minute announcement packages range from $350 a week for a package of five, to $1,575 a week for a package of 30; for station-break packages, the range is from $250 a week for five, to $1,125 a week for thirty.

Changes in discount structure include lowering of maximum discount from 30% to 25%, and putting the starting discount on a 26-time rather than 13-time basis.

WXYZ Detroit

In changes similar to those adopted for WJZ, ABC's WXYZ Detroit now has a gross hourly rate of $350 which is applicable from 7 a.m. to 11 p.m., with $200 the gross hourly rate between 11 p.m. and 7 a.m. The old rates included: $350 gross per hour between 9 a.m. and 6 p.m.; $550 per hour between 6 p.m. and 10:30 p.m., and $200 hourly between 7 a.m. and 9 a.m.

Discounts were reduced in accordance with the WJZ formula.



New announcement rate of $42 each, before discounts, applies from 7 a.m. to 11 p.m., except in certain programs, and is the same as the old daytime announcement rate. The former $12 rate for announcements between 6-7 a.m. is doubled to $24, before discounts.

WENR Chicago

Under its share-time arrangement with WLS, WENR generally signs on at 3 p.m., does not operate on Saturdays. Its rate structure is complex. Where its former Class A rate was $900 per hour, applicable between 8 and 10 p.m. Monday through Friday, the new base hourly rate is $450 and is applicable between sign-on and 10:30 p.m. From 10:30 p.m. to sign-off, the base hourly rate is $300. The former nighttime announcement rate of $150 (before discounts) has been cut in half to form a new rate of $75 per announcement (before discounts) which applies from sign-on to 10:30 p.m.

KGO and KECA

New rate cards are now being prepared. Network officials hope they can go into effect March 1.

Friendly's ABC Post

EDWIN S. FRIENDLY Jr., ABC national television sales director, has been relieved of all administrative duties—at his own request—in order to concentrate on top-level sales, spokesmen said last week. The administrative duties which he formerly handled are being taken over by Charles Abry, Eastern Sales Manager.

CBS AFFILIATES PLAN NEW GROUP

STEPS toward possible formation of a single, independent group to represent CBS Radio affiliates in all business matters of mutual concern to stations and network were taken last week by a subcommittee of the affiliates' so-called "Rate Committee" and of representatives of the Columbia Affiliates Advisory Board (CAAB).

Meeting in New York, members of the two groups chose a three-man joint committee to draft plans and prepare a proposed constitution and bylaws for such an independent group. The joint committee includes Hulbert Taft Jr. of WKRC Cincinnati, a member of both the "Rate Committee" and the CAAB; Lee Wailes of Storer Broadcasting Co., a member of the "Rate" group, and Joseph Bernard of KOMA Oklahoma City, secretary of CAAB.

John E. Fetzer of WJEF Grand Rapids and WKZO Kalamazoo, and who heads the "Rate Committee" formed last summer by CBS Radio affiliates when the last round of network rate cuts became imminent, said he hopes the three-man joint planning group will have a plan for an independent affiliates' committee ready to submit to the affiliates by the time his committee's term expires Aug. 25.

Members of the CAAB, it was understood, took a private poll among themselves during a recent meeting in Los Angeles and concluded it should operate as an independent body rather than under the aegis of the network.

At last week's meeting, spokesmen said, it was decided a merger of CAAB and the "Rate Committee" should not be considered at that time, because of uncertainty as to affiliates' wishes, plus the fact that the rate group's term does not expire until August.

CBS officials, acquainted with the proposal for a single independent committee to represent affiliates, were said to have indicated approval.

Meanwhile, representatives of the "Rate Committee" voted to change its name—to CBS Business Standards Committee.

Attending last week's meeting were:

Mr. Fetzer, chairman of the "Rate" or Business Standards Committee; I. R. Lounsberry of WGR Buffalo, CAAB chairman; Messrs. Bernard, Taft, and Wailes; Victor A. Sholis, WHAS Louisville; Kenyon Brown, KWFT Wichita Falls, Tex.; and Ray Herndon, KTRH Houston, a member of the Business Standards Committee but not of the subcommittee.

50-Kw KTHS Signs For CBS in June

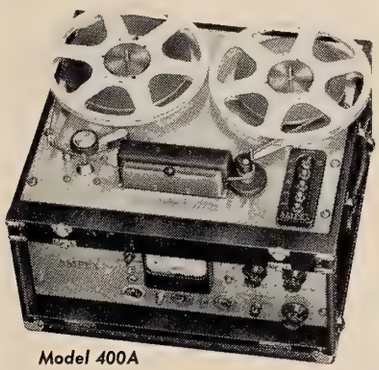
KTHS Little Rock, which is expected to start a 50-kw operation on 1090 kc in mid-March, has been signed as an affiliate of CBS Radio effective June 15, William A. Schudt Jr., national director of station relations for the network, announced last week. He said it will bring the number of 50-kw stations on the CBS Radio network to 26, exceeding the total of any other network in Continental U. S.

KTHS currently is affiliated with ABC, and spokesmen for that network said plans for its replacement had not been completed. KLRA is CBS Radio's present affiliate in Little Rock.

KTHS, formerly at Hot Springs, is owned by Radio Broadcasting Inc. B. G. Robertson is general manager.

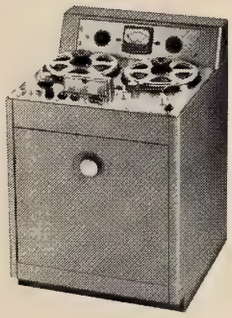
W. V. Hutt, general manager of KLRA, said that he had no comment on the change.

in this room...



there's no room for doubt

There can be no room for doubt in the continuity and fidelity of your broadcast. You demand — and get — the best in transmitting and studio equipment.



Nor should you compromise with quality in the tape recorder you select.

AMPEX Recorders are engineered to the highest *professional* standards of reliability and performance.

AMPEX brings you these cost-saving operating advantages:

Model 400A

Model 300

• **UNINTERRUPTED SERVICE**
Under the demand of heavy-duty programming, AMPEX Recorders deliver thousands of hours of unbroken service. Recently a set of AMPEX heads was returned from Honolulu for routine replacement after 11,000 hours continuous use, 17 hours a day. The heads were still within AMPEX specifications for new heads and had several thousand more hours of use remaining.

• **MINIMUM "DOWN TIME"**
AMPEX Recorders are designed for thousands of hours of continuous operation with minimum down time, resulting in low maintenance costs and protection from sudden broadcast failures.

• **ACCURATE TIMING**
AMPEX split-second timing accuracy protects your programs and commercials from embarrassing time overlaps.

• **HIGHEST FIDELITY**
Even when programs are repeatedly transcribed from one tape to another, there is no noticeable build-up of noise level, "wow" or distortion.

• **LONG LIFE**
AMPEX Recorders are designed and built for years of service dependability. Its recordings match established NARTB standards. When you have an AMPEX, you have a machine built for years-ahead performance.

If you plan for tomorrow, buy an AMPEX today

CBS RADIO SIGNS $850,000 NEW SALES; REPORTS RENEWALS BY TEN SPONSORS

As CBS Radio disclosed its "checkerboard" sales plans for the 7-7:45 p.m. EST period, the network announced new signings and renewals. John Karol found new proof that radio is the "No. 1 advertising medium."

IN A RADIO sales flurry, CBS Radio signed up an estimated $850,000 in new business last week, reported renewals representing $11.7 million in gross annual billings, and unveiled plans for a new "checkerboard" pattern of radio selling.

Ten current sponsors and 18 programs were represented in the renewals, which John Karol, vice president in charge of network sales, said had been signed since Jan. 1.

They include six Procter & Gamble daytime serials, three Lever Bros. and two Wm. Wrigley Jr. Co. programs, and one each of seven other advertisers.

Mr. Karol cited the renewals as evidence that "in their re-examination of advertising dollars [the country's timebuyers] are continuing to find that radio is the No. 1 advertising medium.

Signs C-P-P Extension

New business included the signing of Colgate-Palmolive-Peet Co. to extend its Tuesday night Louella Parsons commentary, now heard 10-10:05 p.m., to a full quarter-hour, 10-10:15, effective March 31, through Lennen & Newell, New York; the purchase by Nescafe (coffee) of the third and last available participating sponsorship on the three Power Plan shows, effective April 1 through Sherman & Marquette, New York, and the signing of Ferry-Morse Seed Co., Detroit, for sponsorship—for its ninth straight year—of the *Garden Gate Show* (Sat., 9:30-45 a.m. EST) for 14 weeks starting Feb. 21 through MacManus, John & Adams, Detroit.

The new "checkerboard" plan of selling, outlined Tuesday by Dudley Faust, eastern sales manager for CBS Radio, was described as "completely new to network radio." It encompasses the three quarter-hour strips in the 7-7:45 p.m. EST period recently vacated by Procter & Gamble and Campbell Soup Co.

Under the plan, advertisers may buy three quarter-hours a week or two quarter-hours a week—but either way each sponsor gets a different time period and different program each night he is on. The plan will accommodate three three-times-a-week advertisers and three twice-a-week sponsors. It works this way:

Three-times-a-week users—One advertiser may sponsor *Beulah* at 7-7:15 p.m. Mondays, *Junior Miss* at 7:15-7:30 p.m. Wednesdays, and Jo Stafford at 7:30-7:45 p.m. Fridays. A second advertiser may have *Junior Miss* on Mondays, *Jo Stafford Show* on Wednesdays, and *Beulah* show on Fridays. The third may sponsor Miss Stafford on Mondays, *Beulah* on Wednesdays, and *Junior Miss* on Fridays.

Twice-a-week users—One advertiser may sponsor *Beulah* on Tuesdays and *Junior Miss* on Thursdays; a second, *Junior Miss* on Tuesdays and Miss Stafford on Thursdays; a third, Miss Stafford on Tuesdays and *Beulah* on Thursdays.

This plan, Mr. Faust asserted, combines the values of "multiple-night frequency in strategically staggered time periods for maximum sponsor program identification." It is being offered in cycles of 13 weeks.

The cost: Approximately $20,900 a week for time and talent on the three-a-week plan; approximately $14,300 a week for time and talent on the two-a-week schedule.

Mr. Faust cited Nielsen figures to show that the three-a-week checkerboard sponsor would reach an unduplicated audience of 13,923,000 listeners a week (average for the three combinations), as against 11,510,000 for a Monday-Wednesday-Friday advertiser occupying the same period each night (the 7:30-7:45 p.m. portion when it was sponsored three nights a week by Campbell).

The twice-a-week sponsor on the checkerboard plan, Mr. Faust said, would reach 10,963,000 a week as compared to 9,648,000 for the average Tuesday-Thursday sponsor occupying a constant time period (the 7:30-45 p.m. period when it was sponsored Tuesdays and Thursdays by Oldsmobile).

Cost-per-thousand on the three-a-week checkerboard plan was placed at $1.27 and on the twice-a-week staggered plan at $1.30, compared with $1.40 per thousand, average of 50 sponsored daytime strips.

As a possible variation, Mr. Faust said, two advertisers could "team up," alternating the thrice-weekly and twice-weekly sponsorships so that each would average two and a half quarter-hours a week.

The checkerboard pattern will be offered to advertisers and agencies in the immediate future, Mr. Faust said.

Meanwhile, the renewed business signed by CBS Radio since the first of the year was listed as follows:

Procter & Gamble—*Brighter Day, Guiding Light, Young Dr. Malone, Ma Perkins, Road of Life,* and *Rosemary,* all daytime serials.

Lever Bros.—Thomas J. Lipton Div. for *Arthur Godfrey's Talent Scouts,* and Lever Bros. for *Lux Radio Theatre* and the Monday, Wednesday and alternate Friday 10:30-10:45 a.m. EST segment of *Arthur Godfrey Time.*

Wm. Wrigley Jr. Co.—*Gene Autry Show* and *Life With Luigi.*

Carter Products—*City Hospital.*

Longines-Wittnauer Watch Co.—*Symphonette.*

Metropolitan Life Insurance Co.—*Allan Jackson and the News.* (Also *Dave Vaile and the News* on the CBS Pacific Radio Network.)

Campana Sales Co.—*Bill Shadel and the News.*

Mars Inc.—*People Are Funny.*

Toni Co.—*Fun for All.*

General Foods—*Renfro Valley—Sunday Morning Gathering.*

NBC Promotes Dietrich

APPOINTMENT of George S. Dietrich as eastern sales manager of NBC's radio spot sales was announced last week by William N. Davidson, national sales manager for the department. Mr. Dietrich succeeds Joseph W. Goodfellow who recently was appointed director of sales for WRC-AM-FM and WNBW (TV) Washington.

Mr. Dietrich

A member of NBC's radio spot sales staff since December 1950, Mr. Dietrich served previously as general sales manager for Radio Time Inc.

TOTAL '52 NETWORK GROSS UP 13.7%

Combined radio-TV network gross for 1952 hit $344,248,242, compared to 1951's $302,708,307, Publishers Information Bureau figures reveal.

COMBINED gross time charges of the radio and TV national networks for 1952 totaled $344,248,242, a gain of 13.7% over the 1951 combined network gross of $302,708,307, according to figures released last week by Publishers Information Bureau.

Unlike earlier PIC computations, these annual totals include gross time charges for the sponsored broadcasts and telecasts of the national political conventions and of election returns.

For radio alone, the four-network 1952 gross was $163,453,462, down 6.4% from the 1951's $174,718,594. The decrease is due at least in part to the 10% cut in gross rates effected in July 1951 by NBC and CBS. Changes in discount structure, made at that time by ABC and MBS, are not reflected in the PIB data, which are figured on a one-time, before-discount basis. For that reason, PIB figures do not show effects of the 25% reduction in time charges adopted by the networks in the fall, since these all were effected by changes in discounts rather than as straight rate cuts.

For TV alone, the four networks increased gross billings in 1952 over the previous year by 41.3%, rising from $127,989,713 in 1951 to $180,794,780 in 1952.

For December, national network radio gross time charges totaled $14,925,095, slightly (2.1%) ahead of the December 1951 gross of $14,619,048, while the national TV network gross rose 21.9%, from $14,247,061 in the last month of 1951 to $17,462,216 in the same month of 1952. Combined, the radio-TV network gross was $32,387,311 in December 1952, up 12.2% from the December 1951 gross of $28,866,109. PIB tabulations follow:

NETWORK RADIO

	December 1952	December 1951	Jan.-Dec. 1952	Jan.-Dec. 1951

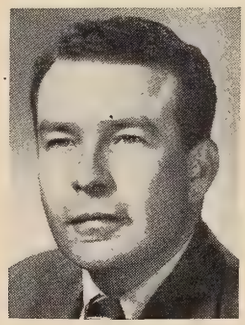
Three New TV Stations Sign NBC Contracts

THREE new TV stations have signed affiliation agreements with NBC, Harry Bannister, NBC vice president in charge of station relations, announced Wednesday. Stations are WSBT-TV South Bend, WFBG-TV Altoona and WLEV (TV) Allentown.



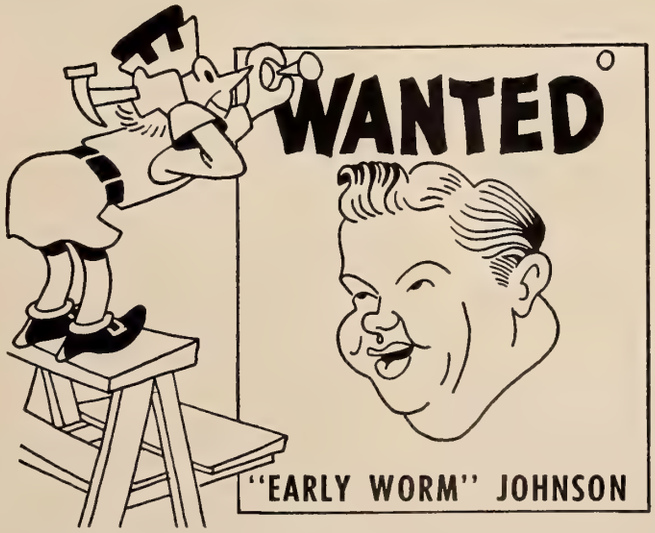
WSBT-TV, already on the air, operates on uhf Ch. 34. It is owned by the *South Bend Tribune*, which also operates WSBT-AM.

Scheduled to go on the air this week, WFBG-TV will operate on Ch. 11. The owner is Gable Broadcasting Co., operator of WFBG-AM, NBC's radio affiliate..

WLEV (TV) expects to begin operations on uhf Ch. 51 about March 15. It is owned by the Associated Broadcasters Inc.

CBS Radio and TV Split In Spot Is Completed

SEPARATION of CBS spot radio and spot TV divisions was completed last week when two distinct units were established in Los Angeles. George E. (Buck) Hurst will direct the spot radio office and Edward Larkin the spot TV office, effective immediately.



Mr. Hurst

In announcing the move, J. Kelly Smith, administrative vice president of CBS Radio, and Merle S. Jones, CBS-TV vice president in charge of CBS-owned stations and general services, noted division of CBS spot operations in other major cities.

Mr. Hurst joined CBS in July 1951 as a national advertising representative in KCBS San Francisco's sales department and manager of merchandising for the Housewives Protective League in the San Francisco area.

Mr. Larkin, who becomes manager of the Los Angeles office of CBS-TV sales, has been with CBS since 1938.

The "Early Worm" never gets the bird from sponsors who want results. Irwin Johnson's "Early Worm" program has top listenership throughout the 24-county, Central Ohio area reached by WBNS . . . starts the day right for loyal WBNS listeners. They stay with WBNS to hear top local and CBS network shows . . . including *all* the top 20-rated programs!

Stockholders to Vote On Emerson-Webster Merger

PROPOSED merger of Emerson Radio & Phonograph Corp. and Webster-Chicago Corp. hit a snag last week, with consolidation hinging on stockholders' meeting next Wednesday.

The proposal was held up by Martin C. Remer, president of Remer, Mitchell & Reitzel, Chicago investment house. He attacked the proposal as contrary to the best interests of stockholders and called for proxies, to be used at the meeting this week when a vote will be taken. Directors of Emerson (radio-TV sets) and Webster (record-changers, wire recorders) have authorized the plan.

Proxy statement sent by merger proponents, including Benjamin Abrams, Emerson president, and R. F. Blash, head of Webster-Chicago, gives reasons for the merger. The principal objective, it was explained, is to combine both firms in a single company with larger resources and more diversified products.

The plan calls for Emerson to issue 337,500 shares of common stock in exchange for 450,000 shares of Webster-Chicago common at the rate of three-fourths of one Emerson share for each full share of Webster-Chicago stock [B•T, Dec. 22, 1952].

'Double Rhombic' Antenna

SPECIAL "double rhombic antenna" which "reradiates" video impulses from a loftier position to TV set antennas in mountainous areas, at a cost of only a few dollars, has been developed by Dr. Richard C. Webb, electronics engineer, and Col. Victor C. Huffsmith, assistant director of the Denver Research Institute of the U. of Denver.

The two university staff members developed the antenna, rhombic shaped and 200 ft. long, and placed it on a peak overlooking Col. Huffsmith's home after the latter experienced trouble receiving TV signals on his set. Result was that not only Col. Huffsmith, but surrounding neighbors, reported better TV reception.

Instructions for building and installing the double-rhombic antenna, which the two report costs only a few dollars to build if the TV set owner is handy with tools, are available free from the Publications Office, Denver Research Institute, U. of Denver, Denver 10, Col.

Science Award to Sarnoff

BRIG. GEN. DAVID SARNOFF, RCA board chairman, last Thursday was presented with the annual Engineering and Science Award of the Federation of Engineering Societies of the Drexel Institute of Technology for his pioneering work in radio and television.

The citation referred to Gen. Sarnoff's "epochal contributions to the development of the science and art of radio communications in all its phases, from its crude beginnings in the days of damped wave telegraphy to its culmination in the highly refined instruments of modern television."

Guthrie Transfers

FRED P. GUTHRIE, assistant vice president and Washington district manager of RCA Communications, transfers to the Washington office of the RCA Frequency Bureau on Feb. 1. He is succeeded as district manager by Stephen H. Simpson Jr., traffic engineer for RCA Communications at New York and for the past month assistant district manager in Washington. Mr. Guthrie has been with RCA for nearly 30 years and from 1923-28 was in charge of WRC Washington, now owned by NBC.

AP rewrite man Paul Gocke receives on-the-spot coverage from reporter participating in Presidential Inauguration parade, using lightweight walkie-talkie developed by RCA Victor for the U. S. Army Signal Corps.

New Recording Tape

RECORDING engineers, using a new magnetic tape, can either increase their output level without increasing distortion or reduce distortion at present output levels, according to Minnesota Mining & Manufacturing Co. of St. Paul. The tape, trademarked "Scotch No. 120 High Output", is stated to produce at least 8 db more output at a given distortion level than any other magnetic tape over the entire range of the audio spectrum. It will have special significance in high quality recording fields, such as recording of symphonic and other types of music, it was explained.

Edwin A. Nicholas Dies; Was Mfg. Industry Leader

EDWIN AUGUST NICHOLAS, 59, former president of the Farnsworth Radio & Television Corp. and long-time leader in radio-TV-phonograph manufacturing, died Wednesday in Fort Wayne, Ind., after a four-months illness.

Mr. Nicholas served as president of Farnsworth from 1938 to 1949, and at one time was a member of the board. When he died, he was director of the patent contract department of International Telephone & Telegraph Corp., manufacturer of TV, radio and phonographs as well as other equipment. He joined IT&T when it absorbed Farnsworth in 1949.

He worked 14 years for RCA, joining the company in New York in 1924 as assistant to the vice president and general manager.

Gates Construction Plans

PLANS for erecting four new units on a seven-acre plot at Quincy, Ill., have been announced by Gates Radio Co., manufacturing engineers located in that city.

First of the four buildings is expected to be ready for occupancy sometime in April [B•T, Jan. 19]. This unit, exclusive of machinery or interior fittings, will cost about $225,000, according to P. S. Gates, company president.

GE Slide Projector Debuts

GENERAL Electric is introducing a new video dual slide projector with a single lens and accessories which the company says simplify use of special effects. The narrow light beam of the one lens enables the unit to operate with one or two projectors grouped around a single film camera, GE says.

PERSONNEL RELATIONS

SWG to Ask Repayment Plan On Movie Films Let to TV

SCREEN Writers Guild will demand a repayment plan for writers on theatrical films released to television when negotiations open in mid-February for a new working contract with eight studio members of the Assn. of Motion Picture Producers.

The plan, already submitted to the studios, seeks an agreement similar to that with Alliance of Television Film Producers. By mutual agreement, however, that phase may be tabled and a plan worked out with each major studio when it enters TV film production, it was said.

Thus, SWG might negotiate immediately for a separate contract with Columbia Pictures, now producing the TV filmed *Ford Theatre* series through its subsidiary, Screen Gems Inc.

The guild's repayment plan for motion pictures released to TV, it is understood, calls for the writers to receive a percentage of writing costs on the feature, with an average base pay figure per production set in negotiations.

Money thus derived through lease of the film to TV would go to the guild, which would determine the method of distribution among the writers.

Although there is no cutoff-date in SWG's proposal comparable to the Aug. 1, 1948, date in Screen Actors Guild's agreement with the producers, one will be sought in the new negotiations.

SAG-Producers Stumble On TV Film Re-Issue Clause

STUMBLING-BLOCK in the Screen Actors Guild-Film Producers' Assn. negotiations was reported last week to be the framing of a clause in the contract on payment for re-issue of TV film commercials. SAG's insistence upon this proposal led to the strike last December [B•T, Dec. 1, 1952].

As the producers and the union called a recess in the three-week-old talks last Wednesday in order to report to their respective groups, a joint statement was issued asserting "material progress has been made toward agreement on a collective bargaining contract covering rates and conditions in television film commercials."

Producers and SAG have agreed that advertising agencies will sign letters of adherence to a final contract. Agency representatives were observers at negotiation sessions.

DRUG MERCHANDISING PLAN

COOPERATIVE plan with 100 drugstore members of the Pharmaceutical Society of Hartford County has been worked out by WCCC Hartford, Conn. Station is presenting an intensive radio campaign to promote pharmacy, the retail druggist and drug products. Plan offers drug and related advertisers close association on the air with the druggists and additional merchandising by guaranteeing placement of point-of-sale displays in all cooperating drug stores.

WIP'S 'FIRE ALARM'

NEW series of daily five-minute programs to make listeners more conscious of the serious damages of fire and methods by which fire can be prevented is being aired by WIP Philadelphia. Planned in cooperation with Paul B. Hartenstein, deputy fire commissioner, *Fire Alarm* will concentrate on Philadelphia fire disasters and will be handled by Lt. J. E. Costello who has been with the fire department for 13 years.

POPULAR LAW SERIES

PROGRAM inaugurated last fall at WFOR Hattiesburg, Miss., has grown steadily until it is now one of the top shows in the area, station reports. Weekly broadcast titled *You and the Law* is presented in conjunction with Forrest County Bar Assn. Panel show highlights four lawyers each week and presents a topic of law in forum fashion. Letters and telephone questions are encouraged on the subject being discussed.

DIAPER PROMOTION

ONE diaper complete with safety pin, was distributed to the press last week as a reminder that the Mennen Co. had renewed its *Oh Baby* TV series and that the new set of films is in the process of being made. Grey Adv., N. Y., is the agency. The series is placed on a regional basis.

WBBB FARM SHOW

NEW farm commentator at WBBB Burlington, N. C., is ex-Governor W. Kerr Scott. His program will be aired at 6:45 a.m. three days weekly, E. Z. Jones, station's manager, has related. The former governor was at one time state agricultural commissioner. Programs will originate in Mr. Scott's home and will be taped for a repeat during the noon hour.

WLYN TO THE RESCUE

LOCAL Lynn, Mass., jeweler interested in selling trophies instead of usual jewelry items is off to a good start, according to WLYN that city. Larry Shane, station sales representative, came up with a tailor-made idea for Blessington Jewelers with *Trophy Time* show, a five-minute sports program which extends an invitation to local sports organizations to send in news they think would be of interest. Reception the program has enjoyed, station says, will keep it on the air for many weeks to come.

WINNERS GET WASHERS

CONTEST, involving $72,000 in Bendix Tumble Action automatic washing machines, started Jan. 26 on *Frank Hemingway* news program, sponsored by Los Angeles Soap Co., L. A. (White King soap), on Don Lee Network. With 40 machines to be given away weekly for six weeks, contestants must in 25 words or less, complete the sentence, "For washing clothes and dishes I prefer White King's real soap suds because . . ." and enclose the product's box top. All commercial time on the newscasts will be devoted to promoting the contest. Agency is Raymond R. Morgan Co., L. A.

CONTRACT CHART

A two-year contract chart for quick reckoning of contract periods on the 1953 and 1954 calendar has been distributed by S. W. Caldwell Ltd., Toronto advertising agency and radio-TV producer. The chart operates on a slide basis, with start and end of contract periods from 1 to 52 weeks being aligned with dates on calendar.

KFH EXTENDS INVITATION

KFH Wichita, Kan., applicant for a television channel in that city, has sent out invitations to various clubs to hold one of their meetings in the station's new Television Workshop. Purpose of the offer is to help business and civic leaders familiarize themselves with the new medium. To date, eight groups in the city have accepted the KFH invitation.

MUSICAL EXCHANGE

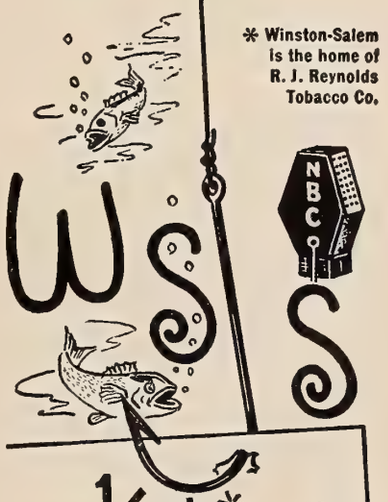
FIRST exchange of classical music radio programs between KEAR San Mateo and the Japan Bcstg. Corp., on a monthly series began Jan. 11 when KEAR presented the NHK Symphony. The exchange, effected through tape recordings flown to San Francisco from Tokyo, will be offset by recordings of the San Francisco Symphony which will be aired in Japan.

ATHLETIC TELECASTS

DIFFERENT Minnesota athlete will be honored each week on a new show which made its debut on KSTP-TV Minneapolis-St. Paul. *Hall of Fame* will present high school, college, professional or amateur athletes who will be chosen by a board made up of representatives from all athletic fields. Biographical sketch of the athlete will be given along with films and telephoto pictures. Guests will also be interviewed by Jack Horner, m.c. Sponsor of the telecasts is Juster Brothers, Minneapolis clothier.

GROCERY PROMOTION

AS PART of its merchandising program, KSFO San Francisco has mailed over 3,500 promotion pieces to grocers in northern California telling them that Superba products has begun a radio schedule on the station's Faye Stewart program. Station reports that this is the largest grocer's mailing list in the history of Bay Area radio. Included in the mailing was a letter from Faye Stewart assuring grocers of her best efforts on behalf of the product.



REED SHOW PROMOTION

PROMOTION piece plugging new WRC Washington personality Bob Reed has been sent to agencies and clients by the station. Mr. Reed airs a daily 6-9:30 a.m. show on the station. Piece features reprints from newspapers and trade publications announcing Mr. Reed's arrival in Washington in December 1952.

WHY do more RADIO STATIONS* advertise in "SALES MANAGEMENT" than in any other magazine in the sales and advertising field?

It's the same story year after year. SALES MANAGEMENT always leads. The one and only conclusion to this constant preference for SM is that radio and television stations believe this magazine does a better selling job for them.

Are *you* taking advantage of these big SALES MANAGEMENT "exclusives"? It's the only one of the sales-advertising magazines edited specifically for the man most concerned with markets and media—the Sales Executive. The only one that measures local markets . . . *throughout the year.* Only one to which *both* sales and advertising executives can turn for local market data. And the only one that offers radio and television stations a tie-in with statistical data about *their own* markets.

In fact, in the marketbook of your own magazine—"Broadcasting"—the retail sales figures for all states and counties are from SALES MANAGEMENT'S Survey of Buying Power.

Nowhere else can you get *every month* this combination of top advertising buyers and up-to-date local market statistics—plus editorial stress in articles on radio and television's pay-off role in national advertisers' sales campaigns.

FEBRUARY 16

is closing date for reserving space in the state-county-city section of the SURVEY OF BUYING POWER—on which the allocation of more than a billion advertising dollars is based. (Companies subscribing to the SURVEY account for 94% of national advertising.)

Make sure your story is there, throughout twelve months of dog-eared use, when national advertisers and their agencies are choosing markets and media with the Survey's help.

Leslie G. Kennon, former news editor, KDMO Carthage, Mo., assigned night manager of Kansas City UP bureau.

David Kaplan, 65, chief arranger for BMI, N. Y., died Jan. 14 at Memorial Hospital, N. Y.

Small Market TV Dominates MAB Meeting Discussions

Small market TV operators in Canada should get started soon before U. S. border stations wean away their market, Spence Caldwell, Toronto agency executive, tells MAB.

TELEVISION for the small market station featured the annual meeting of the Maritime Assn. of Broadcasters at Fort Cumberland Hotel, Amhurst, N. S., Jan. 26-27.

CANADA

Promotion, sales and programming in Canadian Atlantic Coast provinces also were discussed in panel and business sessions under chairmanship of E. Finlay MacDonald, CJCH Halifax, and MAB president.

Broadcasters were brought up-to-date on developments in radio legislation and regulation by J. T. Allard, general manager of the Canadian Assn. of Broadcasters, Ottawa, who came direct from a meeting on new broadcast regulations with the board of governors of Canadian Broadcasting Corp.

Spence Caldwell, Toronto agency executive, said broadcasters should get into TV quickly before area audiences become accustomed to American border stations. In southern Ontario it has been found hard for Canadian TV stations to wean viewers from looking at U. S. stations. He suggested that whether or not broadcasters make money in TV or how soon they get into TV will depend on themselves and government and CBC regulations. Regulations can make it too tough to operate TV stations in small markets with little local talent available, he said. Mr. Caldwell said he believed stations can make a profit after a few years in small market TV if regulations are not too stringent. He felt a station could start out with an expenditure of $200,000 using a low-power transmitter in the center of the town and foregoing expensive camera chains. He urged that such stations plow profits back several years to build up studio equipment and facilities gradually. He felt there was sufficient program material in Canada and the U. S. if local talent was at a minimum.

TV also was discussed by Bill Byles, radio-TV director of Young & Rubicam Ltd., Toronto, who analyzed TV's effect on AM radio as seen from an agency executive's viewpoint. Other speakers included Jack Davidson, Northern Broadcasting Co., Toronto, who talked on profitable small station operation; Ev Palmer, radio-TV director of McCann-Erickson Inc., Toronto; Gerald Redmond, CHNS Halifax, on sponsor problems, and Malcolm Neill, CFNB Fredericton, and chairman of CAB, who discussed the music copyright situation.

Canada to Study CBC

CANADIAN GOVERNMENT has appointed a committee of members of parliament to investigate the Canadian Broadcasting Corp. and its regulations at the present session of parliament. The committee will include 26 members and is expected to be headed by W. A. Robinson, Liberal member for Simcoe East, who was chairman of the Parliamentary Radio Committee in 1950. The committee, if it follows past precedent, will also hear views from independent broadcasters and others interested.

CANADA

Combats Proposed Rules

A COLLECTION of editorials and letters from newspapers objecting to the proposed new Canadian Broadcasting Corp. program content regulations, has been distributed by the Canadian Assn. of Broadcasters, Ottawa. The editorials assert culture cannot be dictated by the government, and that the new regulations requiring stations to have 30% to 48% Canadian program content will not stop listeners from switching to American stations. Hearings on the regulations were held at Ottawa Jan. 23 (see story, next page).

CANADA

Brazil TV Future Seen Good

BRAZIL soon will take its place among the key TV countries of the world, Carlos Lage, director of J. Walter Thompson Co.'s television and motion picture operation in Rio de Janeiro and Sao Paulo, has announced.

LATIN AMERICA

He said that although TV was started only two years ago in Brazil, today there are two stations in Sao Paulo with a third due this spring, and one in Rio de Janeiro with the second due this fall. He also forecast extremely good TV set sales this year since some large manufacturers, such as Philco and RCA Victor, will produce them locally, thus bringing the retail price down.

Mr. Lage is in New York to find adaptable films, spots and movies and to study "live" television.

UN Asked to Help Nations In TV Experimentation

UNITED Nations has been asked to furnish "advice, information and aid" to some 40 nations now experimenting with television because of wide interest in its educational, scientific and cultural uses.

UNITED NATIONS

This was revealed in an informal report of the U. S. delegation to the seventh session of the General Conference of UNESCO, held in Paris late last month. It was made public by the U. S. National Commission for UNESCO.

The conference of the United Nations Educational, Scientific & Cultural Organization also adopted a resolution requesting its member states to encourage use of television.

The American delegation, headed by Howland H. Sargeant, then Assistant Secretary of State for Public Affairs, recommended fewer feature radio programs and films and more basic services, such as unedited film footage for TV and newsreel use, as well as radio facts sheets. UNESCO studies will concentrate on use of radio for education and freedom of information in 1953-54, the report said.

Morris S. Novik, public service radio consultant and president of WLIB New York who was a delegation member, and David Apter, UNESCO relations staff, State Dept., worked on mass communications and publications during the conference. Clearing house services of UNESCO Mass Communications will be continued for collection and dissemination of information on communications techniques.

The report was the first official account of proceedings by the national commission since the conference ended last Dec. 11.

Groups Seek Change In CBS Proposals

Stations want leeway in program content and spots; petition for revamp of new rules.

CANADIAN broadcasters, labor unions, provincial governments and other interested groups have pointed out to the board of governors of Canadian Broadcasting Corp. changes which they seek in the proposed new CBC regulations. At public hearings in Ottawa Jan. 23, regulations on politics and program content, with emphasis on personal, social and moral problems, were singled out for the most discussion.

Some persons testifying said the proposed regulation which would bar such programs as discussion of personal problems without CBC permission, could result in removal of religious, political and union programs from the air. After hearing the various speakers, A. D. Dunton, CBC board chairman, said the regulation would be reconsidered and redrafted, as there was no intention of barring religious programs and forum discussions. Mr. Dunton pointed out that the regulation had been proposed to forbid broadcasts by unqualified persons who claimed to solve any personal problem.

CANADA

Canadian Assn. of Broadcasters presented the longest brief [B•T, Jan. 26], dealing largely with the right of radio to have as much freedom from regulations as other means of communication. It also dealt with individual proposed regulations. One, limiting four flash or spot announcements in a 15-minute period, was termed detrimental in case of public emergencies by J. T. Allard, CAB general manager. Mr. Dunton agreed with Mr. Allard, saying the regulation would be discussed with stations.

Commercials for such products as oil and mining stocks and patent medicines not approved by CBC or the Canadian health department were criticized also.

On the proposed regulations regarding program content, Mr. Dunton explained they were drafted to promote use of Canadian talent, and were aimed at the few Canadian stations which used their frequencies almost entirely to broadcast American programs. The proposal followed recommendations of the Massey Commission on Canadian talent.

Language in the CAB brief on program content was debated, with Frank Ryan, CFRA Ottawa, saying, "It is not always best to give the listeners what they want." He suggested that stations and CBC cooperate in drawing up regulations on program content, test them for a year and then revise them.

Briefs by the Alberta provincial government, presented by Gordon E. Taylor, minister of railways and telephone, pointed to CBC "trends toward bureaucracy, encroachment on affairs of private stations and threats to fundamental freedoms." Proposed regulations restricting appeals for funds on the air were singled out by the Alberta government brief, which stated they exceeded the powers given CBC by the Canadian Parliament. Restrictions on dramatized, panel and forum political programs were also discussed.

MICROWAVE relay system linking CBLT (TV) Toronto with U. S. TV networks was inaugurated Jan. 19 at ceremonies attended by (l to r) E. L. Bushnell, assistant general manager of CBC; Fergus Mutrie, CBC TV director at Toronto; C. E. Watson, Bell Telephone's western area general manager, and R. C. Scrivener, Bell division manager at Toronto.

Tijuana Station

XETV (TV) Tijuana, Mexico, serving Tijuana-San Diego market via vhf Ch. 6, was to begin test operation with regular commercial commencement date not set. U. S. representative is Edward Petry Co.

LATIN AMERICA

Sets-in-Use Report Covers Canadian Cities, Markets

THIRD and final 1952 report on sets-in-use has been issued for Canadian basic cities and for four major markets by Elliott-Haynes Ltd., Toronto. It covers September, October, November and December. It gives figures for sets-in-use in hourly periods from 9 a.m. to 9 p.m., and for six days on daytime programs and seven days on evening programs for each month.

CANADA

The report covers 24 cities where the survey firm takes monthly national program rating surveys. There is an individual breakdown for the Montreal-French and Montreal-English listeners, for Toronto, Winnipeg and Vancouver.

The average for all Canada, according to basic cities, shows 28% of sets-in-use at all hours during those four months. Daytime average for the period is 24.6% and for evening hours 35.1%.

CBC Promotes Engineers

THREE TOP executives in the engineering division of Canadian Broadcasting Corp. have been promoted. W. G. Richardson, transmission and development engineer, has been named assistant director of engineering. He has been with CBC and its predecessor since 1935, and attended many international radio conferences. J. E. Hayes, supervising engineer for CBC TV stations, has been promoted to chief engineer, succeeding J. A. Ouimet, who became CBC general manager on Jan. 1 (see Our Respects To, page 18). W. A. Nichols, with CBC since 1937, has been appointed acting assistant chief engineer.

CANADA

No Canada TV Bids at CBC

NO APPLICATIONS for TV stations have been received yet by the Canadian Broadcasting Corp., according to A. D. Dunton, CBC chairman, speaking at the Jan. 22 public hearings of the CBC board for AM station applications in Ottawa. Mr. Dunton made the statement after announcement by Frank Ryan, CFRA Ottawa, Roy Hofstetter, CKWS Kington, and G. E. Taylor, CKUA Edmonton (non-commercial), that they had applied for TV licenses.

G-E CONSOLIDATES TV EQUIPMENT IN MODERN, MINIATURE SYRACUSE STUDIO

Engineers Now Able to Demonstrate Equipment Under Actual Operating Conditions in Complete, Self-Sustaining Studio Capable of Programming.

A COMPLETE, miniature television studio has been established by General Electric in downtown Syracuse, N. Y., for the purpose of demonstration and instruction.

All of G-E's newest, most advanced TV equipment has been consolidated in this studio, allowing interested personnel from stations throughout the country to operate, examine, and learn about the technical operation, installation, and maintenance of General Electric television equipment under actual working conditions.

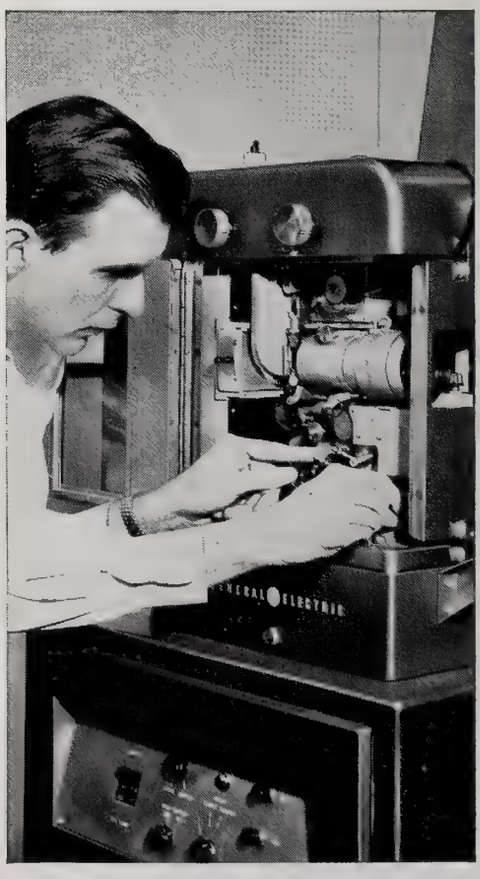
Studio Set-up

Lew Page, G-E field and application engineer, is responsible for the setting up of this studio. Page and his staff have divided the studio into four main parts. The first is a fully equipped control room where switching, special effects and operation of control panels can be demonstrated. Suggested arrangement of pieces of equipment in racks and their location is displayed.

The projection room is complete with a film camera channel, a slide projector, a Synchro-Lite film projector and G-E's two new, advanced mirror change-over designs.

In the studio proper, a live pick-up camera channel and the latest lighting arrangements with a master switchboard have been installed. The studio is set up for actual programming.

The whole studio is tastefully decorated and provision has been made for a conference room to discuss equipment from a technical standpoint.



It was set up in downtown Syracuse because it is more convenient both to the city's hotels and to the New York Central railroad station.

Seminars Planned

General Electric plans to hold a series of seminars during this year at its new TV studio for television broadcast personnel.

The plan is to invite TV station personnel, consulting engineers, station reps, educators and others to attend talks and discussions at the studio. They would also be allowed to inspect and to operate all of G-E's TV equipment in the studio.

Qualified engineers will be available to suggest arrangements, operation and maintenance of equipment. These men will be chosen from G-E's experienced engineering staff.

Lew Page, G-E field and application engineer responsible for consolidating modern, miniature studio, inspects a new General Electric Synchro-Lite Film Projector.

Engineers check control room equipment and demonstrate how studio can be used for actual programming. Studio includes complete lighting arrangement.

GENERAL ELECTRIC

Special effects men are the magicians of television, and some of their illusions would put a Houdini to shame. Here's a look into their bag of tricks used to add reality to TV.

They can put a city in your parlor

By Rufus Crater

TELEVISION is a fantastic liar, teeming with deceits and fabrications which its operators are gradually, thoughtfully—and fortunately for both telecaster and audience—elevating to the rank of a pure art form.

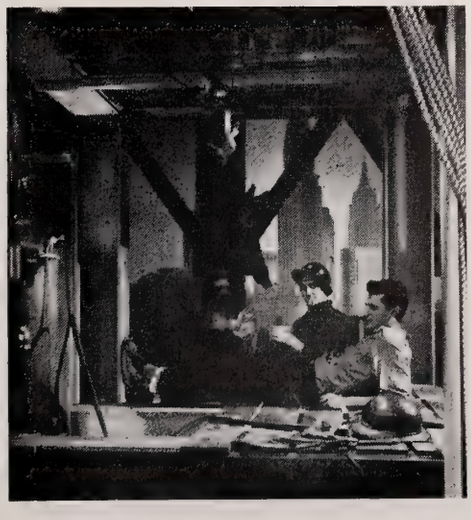
These deceptions are those of congenital necessity. They are illusion without which the scope and pliancy of live television production would be measurably limited or immeasurably more expensive, and probably both.

Representing a form of magic which enables the viewer to see what the producer wants him to see rather than that which actually exists, the hoodwinking devices and techniques used to perpetrate these illusions go under the uncolorful name of special effects. Like the motion picture industry before it, and radio in the area of sound effects, television is in constant search for new, easier, better and bigger ones.

Network Organization

CBS-TV has set up an "Effects Development Dept." which E. Carlton Winckler, production manager, Operations Dept., says is the only one of its kind among networks. Headed by Paul Wittlig, the unit is given a technical crew and studios one day each week for testing and developing the effects ideas they dream up. At NBC-TV the job is done under the direction of James A. Glenn, manager of staging services and special effects, and Ray S. Lyon, supervisor of special effects. Charles Holden, program production manager, is in charge of effects developments of ABC-TV, and Al Hollander, production facilities manager, supervises work in this field for DuMont.

The need or eminent desirability of special effects can crop up often, and in varied forms, on almost any live TV program.



One of the basic needs is for background shots, both outdoor and indoor. Clean-shaven Cowboy is in frantic pursuit of Mustachiod Villain on horseback, for example through woods, field, and stream, fire and flood. The standard studio answer is provided by a rear-screen projector to flash appropriate moving background upon a screen, in front of which the actors, amid realistic foreground props and scenery, go through the proper motions to make it appear that they, not the background, are in action.

The moving background technique is an old one in the motion picture industry. In television, it is done with motion picture film or with a new device which CBS-TV in particular considers preferable: The panoramic slide.

This slide, containing the desired background pictures, may be of glass or plastic, and of any length desired. It is moved past the camera lens by a motor drive speed may be adjusted to fit the action demanded in the script. If the fleeing villain chooses to "stop" to throw a frightened glance back at his pursuer, the slide is halted completely until he resumes flight.

The rear screen projector, with slides, is widely used for fixed background shots of all kinds. Boy and girl sitting on a studio bench become a pair of lovers in a flower garden when the garden scene is flashed onto the screen behind then. With the flick of a finger—the projectionist's—they may be transported to any setting desired, merely by the substitution of the appropriate background on the screen.

The adaptability—and economy—of the rear projection screen in the art of illusion was demonstrated forcefully in a recent thriller on NBC-TV. A man was shown crawling at night across the ledge of a skyscraper, high above the city lights. It was a tense time, with every indication that the actors' union was apt to lose a dues-paying member at any moment. In actuality the actor didn't need to give a thought to life insurance. He was crawling across a ledge-like arrangement of boards not more than two feet off the studio floor. The city lights which gave the scene its illusory danger were background provided by a slide in the rear screen projector.

THESE steelworkers are not idling 500 feet above busy city streets. They're on "steel" beams a few feet off the studio floor and the buildings in the background are fakes.

DuMont relies heavily upon rear screen projection in its use of special effects. On *Author Meets the Critics* for example, the background for the panel members is varied to show from time to time the jacket of the book under discussion, perhaps the author's picture, a scene taken from the book, etc. On *Meet the Boss,* as another example, scenes related to the company whose official is appearing are similarly used.

Split-Screen Trick

ABC-TV created a split-screen technique —the insertion of a small picture in the corner of another picture—with the aid of a "mechanism" which cost exactly as much as a paper cup. Troubled by the problem of presenting a dancer above the shoulder of an actor, effects men came up with the idea of punching a tiny hole in a paper cup fitted over a camera lens. Thus the lens was blanked out except for the small portion behind the hole in the cup, which was trained on the dancer. A second camera was trained on the actor, and by superimposing the two pictures the desired effect was achieved.

Matting is another technique for effective TV trickery. In general terms, this involves miniatures of scenes, or "goboes," through which the actors are shot in perspective, Thus to show a man as though he were standing on an ornate stage, for instance, a miniature of stage-front and sides may be built and set before the camera. The actor is beyond, at a distance placing him, in the camera's eye, in proper perspective to the "stage." To the TV viewer he *is* on the stage—at imagine what saving in "stage" construction costs.

There also is the "matting amplifier," an electronic device which can picture the subject in whatever size is desired and then insert it neatly into another picture, with remarkable results. Thus it was that CBS-TV

Here's rear screen projection in action. Projector at left throws image on screen behind man who is being shot by TV camera at right.

viewers were treated to a picture of a "tiny" man "inside" a refrigerator, wandering around among sponsored food products blown up to sizes which, in relation to his own seeming smallness, were tremendous, as befits sponsored products.

NBC-TV has developed a gadget called the "Flexitron" which distorts scenes electronically—and whose distortions can be controlled. (There also is a device whose unique function is to make things look normal.)

The Flexitron, like other distortion techniques in use, has a great variety of applications, many of which undoubtedly have not yet been thought of. It is used, for one thing, to give motion to the titles at the start of programs, and sometimes for transition scenes, and in comedy bits. It also can be used to give a man with a hangover the size and shape of head he thinks he has. For cases of extreme hangover or in other appropriate circumstances, it can make the head pulsate in extreme degrees.

Shrinking Heads

It also is possible, although this does not require the services of a Flexitron, to make the head go away completely. This form of decapitation, which can be extended as far forward as desired calls for the head and/or body to be sheathed in tight-fitting black clothing, over which is donned conventional clothing with, say, bandage-like wrappings about the head and face. The man stands on a black floor in front of a black cloth, and as he peels down to his black hood and black union suit, presto, he disappears from TV view.

Prismatic lenses are used to give many weird, artistic, or merely unbelievable effects. They can multiply images up to eight times, make the multiple images revolve or stack up, turn scenes upside-down, "enable" actors to walk and dance on walls and ceiling. And there is a gadget which NBC-TV developed and calls the "Separatron", which causes objects to appear to jump from one spot to another while other objects in the same scene, superimposed from another camera, remain fixed. The combination of prismatic or inversion lenses and the Separatron could present viewers, it would seem, with the prospect of total frustration.

The device for making things appear normal is called the "Periscope Mirror" by CBS-TV. Its value is that, where persons and objects of diverse sizes and shapes are to be shown, it trains the lens at each from the angle best suited to it, avoiding foreshortening, etc., so that on the TV screen all are in correct proportion.

Representation of the elements on television has demanded much work and ingenuity. A TV rainstorm should not involve much water, for reasons which any janitorial assistant can understand. Genuine snow is notoriously hard to preserve under studio lights. And fire departments instinctively object to fires, even small ones, not to mention those of a size which would seem necessary to gut tenements, destroy ships, and denude mountains. But TV's gimmick-makers have these meteorology problems pretty well under control, including fires.

How To Set Fires

Fires have been a long headache. Synthetic fires may be produced with lightweight silk or nylon gauze cut into flame shapes and attached to a diffusion chamber containing lights and blower. "Real" but controllable fire-place fires may be made with "logs" constructed of stove-pipes covered with plaster and asbestos and kindled with alcohol-soaked asbestos. There is also the trick of placing, just below the camera lens, a rack holding containers of "canned heat," in which case it is necessary to add chemicals to provide telegenic flames.

CBS-TV officials claim to have a system which "gave the Fire Dept. heart trouble en masse" at first sight but nevertheless provides fireproof fire. It employs lacapodium, a material widely used by magicians and which has a low flash point, explodes with a bright light instead of a flame, and is so harmless, according to CBS-TV, that a person can stand in it and not be harmed.

How To Make Rain

For small rains, watering cans may be emptied in front of cameras. If much rain must fall, a sprayer system may be installed over the set, the water falling into a tank under the floorboards and then being recirculated to the overhead sprayer by a pump. Or dry rain may be created by rapid rotation of a drum to which is attached emery paper or a strip of glamme, a cellophane-like plastic woven into cloth; one camera picks up the rain-like appearance of the whirling drum and the image is superimposed on another pickup of the actual scene.

Snow is made in several ways—tiny bits of paper, bleached corn flakes, powdered ice, or a plastic spray, among others. Most of these have some drawbacks. CBS-TV claims to have worked out a realistic system by which "snow flakes"—granulated Cellojell—that will stick to clothing and even crunch underfoot may be made to float down gently or roar in like a blizzard, as desired.

ABC-TV uses yet another method of making snow—a fish bowl filled with water, into which Borax is dropped. The camera then shoots through the bowl, and the flakes give the illusion of snow. In an adaptation of this method, ABC-TV has "shot through" a fish bowl, complete with fish, to present complete "underwater" scenes.

Fog-making, another problem, appears to have been solved by, among other approaches, the use of machines which atomize mineral oil, vaporize it with high heat, and then force it through a cold chamber and release it under low pressure. Aside from its fog-like appearance, this substance is said to be relatively easy to control with fans after its release—and to smell good, too. Or steam forced through dry ice may be used to produce a hovering kind of fog.

Bang, Bang

Gunshots are troublesome. The modern "blank" cartridge emits no smoke, and its roar will not be accepted—except as a *pffft*—by microphones. With the aid of the Winchester and Remington arms companies, however, "blanks" have been devised which make only a sharp finger snap noise in actuality but which to the home audience sound genuinely gunlike—and which, according to size, will emit any amount of smoke desired.

There are innumerable trick props—napkin containers which explode, for example, typewriters whose carriages fly across the room, lamps which blow up, all on cue. The number of such tricks may well be limitless. No hidden strings, built-in springs, or other mechanical wizardry would suffice, however, when one network set out to picture a plate of tomato soup for a commercial. On the TV screen, it just didn't photograph the way delicious tomato soup should look. This seeming impasse was solved by strictly unmechanical ingenuity. A plate of split pea soup was substituted—made by the same sponsor, of course—and to audiences across the country it looked like tomato soup of the finest quality.

MEET THE TWIN CITIES' GREATEST LOAFERS!

But ***LAZY?*** Don't you believe it!

MCA TV Ltd.

If the audience is abandoning radio to turn to TV, perhaps it's because radio programming needs polishing. Within the past year WSB Atlanta has completely overhauled its product, from station breaks to programs, with measurable results. Stations elsewhere may want to try . . .

removing the rust

By Elmo Ellis

ALL OF US have been reading reams of crying copy about the sad state of radio and the dark future it faces. This somewhat exaggerated pessimism especially bothers me because I am one of those rare individuals who deserted television, after five years of pioneering, and returned to the mother medium some 13 months ago to attempt to pump new life into a fine radio station that—like so many others—had been neglected because of TV. I am happy to say that this radio station is today a stronger programming outlet and a better dollar-for-dollar advertising buy than it was before television ever entered the broadcasting field.

Coming back to radio after a lengthy absence gives one a keen, objective insight into the shortcomings and potentialities of the industry. I recommend a similar vacation and subsequent return to service for others in the radio business.

Staying Powerful

For what they are worth, here are some conclusions reached about radio and what it should do to maintain its powerful position in the fields of entertainment and information.

1. Neither daytime nor nighttime radio will die. A multitude of people is still waiting to be entertained by "good radio." But only a cockeyed optimist would blithely conclude that radio is now going through a competitive period from which it will emerge unscathed and unchanged. Radio is suffering from the assaults of TV and, like it or not, it is undergoing a transformation. The regrettable fact is that the staffs of numerous radio stations are letting circumstances alone reshape their future. In many operations, salesmen are doing the programming, program directors are doing traffic, and the manager is doing the worrying. Proper teamwork could remedy this hapless condition.

2. A stock of records and a turntable do not make a radio program (nor a radio station), even though many broadcasters persist in that belief. But the simple addition of a sound format, a good script and capable production will turn a record show into a listenable and salable commodity. In other words, ingenuity is more important than dollars in building sound radio policies, and every broadcaster (including network and agency moguls) should learn this basic lesson.

3. A program director can't sit high in an ivory tower and decide arbitrarily what listeners want to hear and what is best for them. Why not consult the audience? Advertisers and agency men may not like to hear this, but the fact is that listeners know more about what a station should put on the air than most sponsors. Besides, the average listener likes the idea of being asked his program preferences and he is quick to cooperate by giving his opinions. Progressive stations are proving it. WSB's dominance in the Atlanta market is a direct result of giving the audience what it wants.

4. You can't obtain radio response by reviving old programs and older personalities.

5. You can't prosper by simply riding the coat-tails of a network. This job has to be done by you in your own backyard.

6. You can't snare an audience by imitating television or by presenting simulcasts.

7. You can't buy listeners by giving away autos and refrigerators or by hiring a Hollywood personality to headline on an otherwise dull and tasteless half-hour.

8. You can't build good shows with ad lib remarks (Godfreys are rare); nor can you present good newscasts by merely tearing copy off a teletype.

9. The future of radio does not lie in pursuance of the same programming methods that proved popular a decade or two ago.

The need now is to examine carefully just what radio has to offer the public—as compared with competitive media—and to develop a whole new concept of broadcasting. It can be done and it is being done in some quarters.

What radio is crying for is some logical reasoning about aural communication. Just as there has always been an audience for newspapers, magazines, movies, so will there be listeners receptive to "distinctive" radio. But radio must build its own destiny and start from the ground up. In broadcasting, too, it is "time for a change."

Face Lifting

At WSB we began a year ago to renovate our entire operation. Carefully but coldly we appraised our complete programming structure, analyzing methods and formats for every minute of the day. We discarded time-worn station identifications and began writing new ones on a daily basis, utilizing music, actors and sound effects. We startled housewives by putting in jokes, recipes, riddles and congratulatory announcements on station breaks. We changed sign-ons and sign-offs for shows; replaced musical themes; revised every sustaining format in the book and talked sponsors into making needed changes in their commercial programs.

Our motto was "we dare to be different," and listeners began calling and writing to tell us their reactions. Some were shocked. Some were displeased. Many were delighted. Best of all, local citizens got radio on their minds again. And to keep them interested we have busied ourselves ever since in creating new ideas that would attract those who never cared for radio and those who have strayed from it.

We haven't always aimed at the maximum audience, for in this vicinity, with a 50 kw station reaching out to far-flung rural areas, that would mean an overemphasis on farm fare, folk music and reli-

ABOUT THE AUTHOR

Mr. Ellis joined WSB Atlanta in 1940 as director of scripts and publicity, after graduating, with a Phi Beta Kappa key, from U. of Alabama. In World War II he was an Air Force captain, writing and directing service shows on all major networks. After the war he wrote and directed radio shows in New York, including a year's stint with *We The People*. When WSB-TV Atlanta went on the air, he became assistant production manager. He rejoined the radio station in December, 1951, and has since been its program director.

from radio programming

THIS looks like a big enough cast to present a full-length program, but it's really the production of a WSB station break. The Atlanta station emphasizes clever and show-wise station breaks to attract audiences. It's part of the general WSB overhaul.

gion. But every program attempts to offer the listener compensations that are unobtainable elsewhere.

Suppose we consider specific examples of our efforts to "remove the rust" from radio. We started with the simplest devices. For 30 years it had always been, "WSB, the Voice of the South." We first added "Radio" to our name. Then in keeping with the industrial rebirth of Dixie, we decided to become, "Spokesman for the New South —WSB Radio, Atlanta."

Dozens of other slogans followed: "America's Radio-Active Station," and "Measuring our popularity with Geiger counters." Every week or two we changed station breaks, taking advantage of holidays ("Having nothing better to do, Washington chopped the cherry tree. Too bad he couldn't amuse himself by listening to WSB"); weather conditions ("You can cool off in the bathtub and still listen to WSB Radio"); and any topical subject that came to mind ("Make the seven-day test. Discover new listening pleasure on WSB Radio.").

One time we rounded up a group of persons from foreign countries and recorded station breaks in a variety of languages, including Japanese, Portuguese and French. And once for a two week period we used only rhyming breaks, while inviting listeners to send in their samples. We received hundreds like this: "Early or late, the programs are great on WSB Radio."

In our efforts to hypo programs and revive their "pulse," we went directly to the people and asked them to write us, "What I want from radio." More than 5,000 replied, and their likes and dislikes brought about important changes. We noted a surprising sentiment for classical music, so we increased this type of program from 5 to 14 hours a week. At the opposite end of the musical pole, we uncovered a terrific demand for gospel music, a type distinctly different from hillbilly tunes. Today we have 11 gospel music periods a week, whereas a year ago we had none.

On occasion we have opened blocks of time, one to three hours in length, and invited listeners to phone their choice of six different program types available to them. The response has always been splendid, with thousands rushing to express a preference.

Research projects like these have supported our theory that radio's future rests not alone on news, music and mysteries, but also on any program that promotes a close relationship between itself and the average listener. Based on that premise, here are some shows we have developed.

You Name It challenges the audience to ask for anything from the world of recorded sound. Letters from 38 states have requested everything from the sound track of a 1937 western movie to the buzzing of a butterfly's wings. All have been answered with one exception. A practical joker in Des Moines asked for a giraffe's mating call, but the local zoo reported that giraffes are silent.

Hostess Party

Around Town originates daily in the living room of some Atlanta housewife. The hostess provides the guests and the station provides the quiz-party.

Answer Me This airs answers to any informational question, regardless of how tough it might be. The research department of the Atlanta Public Library cooperates on this one. This show not only made radio listeners but the library director, John Settelmayer, says it increased his book withdrawals 25% over the previous year.

Dateline Georgia and *Views of the News* cover local news by tape recorder and feature the voices that are of greatest interest to listeners—their own.

The Pastor's Study answers phone calls from persons with religious problems.

With such offerings we feel that our station is bringing radio to the people and the people to radio in a simple but effective manner that television can't touch.

Every program director might do well to examine closely his activities and ask these pertinent questions:

1. Are you playing the music your audience wants? Our close study of music has led us to play not what disc jockeys prefer, but what we have reason to believe listeners want at specific times. Every music show is built around an idea and the tunes are picked at least a day ahead of airing.

For example, *Listen Ladies* is a daily half-hour, featuring sweet music. But what makes the show different is an appeal to

the individual's desire and willingness to participate on the program. Our method is a simple series of yes-no and true-false games, which anyone can play with a postal card and a pencil. The first ten shows drew 3,148 entries, indicating that radio "ain't dead by a long shot."

2. Are you placing proper emphasis on your newscasts? At a time of general retrenchment, we have increased our news staff and revised news formats, to provide multiple voices for better news coverage, special sound and musical effects (a lusty, lunch-time whistle toots the introduction to our noon news), and carefully-integrated commercials. We cover beats, augment stories by phone, and spice up newscasts with interviews and locally-taped features.

3. Are you getting full benefit from radio's flexibility? Tapes and telephone lines give radio a big advantage of ease and speed over TV. We make full use of our direct reports from weather stations, Georgia farms and agricultural schools, the city hall and state capitol. Thanks also to tape, we have been able to block-program on an extensive scale, and to build first-rate features like *Calling All Cars,* an on-the-spot traffic safety series, and *Guard Report,* weekly visits to military encampments around the state.

Potential Magic

4. Are you selling radio short on glamor? There's still a lot of potential magic in words and voices. We attempt to sprinkle a bit of star dust with phrases: "Deep in the heart of Dixie" and "Broadcasting from high above historic Peachtree street," and in programs: *Atlanta Calling America* and *Singing Time in Dixie.*

5. Do you encourage steady listening? It may seem a small point to emphasize, but our station never says goodbye. We hope and expect our listeners to stay with us for many hours, during the day and night. (Five days a week we broadcast around the clock). Consequently, we conclude our show, not with an *adios,* but with a reminder to stay tuned for the next program following on the 750 spot.

And instead of merely mentioning the program that is to follow, we prepare for our announcers intriguing teaser lines. If the succeeding show is a popular record program, the announcer might end with something like: "Listen to the most popular song in America. It'll be played on the *Music Room,* coming up next on WSB Radio."

6. Do you promote and publicize your programs? No radio station should overlook the many ways it can publicize and promote its service other than over the air. At WSB Radio we frequently phone listeners at random to remind them of special programs coming their way. And we write numerous letters to persons whom we feel might be interested in special musical, dramatic or discussion programs. We also keep our eyes and ears open for stories that will make the daily papers and the trade press.

And, of course, we are always looking for new ways to promote our attractions on the air. One gimmick we have used successfully is to reverse the usual procedure of ballyhoo-ing shows in advance of their airing. We produced a series of dramatic spots, each of which was aired the day following a particular broadcast. The actors talked about how much they enjoyed the program and the listener was urged to catch the next program in the series coming up the following week.

It's all part of a coordinated effort that a station must make if it is to ride out the competitive storm successfully.

Many radio men no doubt wonder whether it's worth the effort to try revamping a radio station's operation. I contend that if changes—even in station breaks—will make listeners talk about you and listen to you, then the end result justifies the work.

And if you're wondering where you'll find the manpower and the original ideas, you might be surprised to discover the quantity and quality of constructive help forthcoming from staff members if the welcome mat is put out for their thoughts and assistance. We have tapped the reservoir and found that it does not run dry, but has continued to well up with innovations.

The end result is the important factor in any revamping operation, and for the record, here's what we've accomplished at WSB Radio. Today, one year after our revolution started, our audience is bigger and more responsive (latest audience surveys give us 27 of the 30 top rated radio shows in Atlanta), our staff is operating with increased efficiency and economy. And this section of the country—despite its three excellent TV stations—is once again becoming radio conscious. But the battle isn't over, and what's more, it'll never be. We're awake to the fact that radio has entered a new competitive era, and the future rests with those who get up and go.

Profit-sharing pays off for KITE

EVERYBODY'S a boss at KITE San Antonio, spurred by a profit-sharing plan that keeps the staff on its toes, induces contented cooperation and pays at the exchequer.

Last year the station's unique plan meant as much as six or seven weeks' extra pay to some of the older KITE employes. Profits are shared on a unit basis, with both seniority and salary as factors. Newcomers must have three months' experience on a fulltime basis before they become eligible.

As the workload indicates, salesmen become reporters, copy writers become news rewritemen and anyone is likely to go on the air with part of the story when something of bulletin importance breaks in San Antonio. Thus everyone is trained to function as part of the news department.

The principle, of course, is that everyone jumps in to do whatever has to be done. When an employe's birthday falls on a work day, the employe stays home and has a good time—with pay. A monthly cost-of-living check is based on the Labor Dept. index and there's hospitalization insurance, also, with KITE picking up most of the check.

Every employe is an efficiency expert. When office space became available next to the studios, the staff made a proposition to the front office: Rent the space and furnish a coffee bar; the staff will buy its own snacks and save the time normally spent in catching a cup of coffee at a nearby cafe.

Staff members donate a dollar a month for flowers and gifts, with money left over for station parties—a staff party for the front office, and another one vice versa. It's not socialism, but capitalism at its best, the staff believes. Since it means no profit sharing if there's no station profit, the employes are interested in KITE's business welfare. Their own committee administers the profit-sharing.

Does it pay? The management last Jan. 1 changed from individual ownership by President Charles W. Balthrope to a corporation, with 10% of stock earmarked for employes.

STAFF COMMITTEE at KITE San Antonio administers station's profit-sharing plan. Left to right: Stan Nelson, production director; Robert Ferrie, announcer; Pearl Brewer, office manager; Caesar Castiglioni, engineer; John Siercovich, chief engineer.

More than 900 youths and adults are getting college training in Traverse City because a broadcaster did something about the lack of higher education in the region.

RADIO BUILT THIS COLLEGE

By Harold Hopkins

A SHIRT-SLEEVED crusade, inspired and led by a public-spirited Michigan broadcaster, has brought higher education to the northwest part of Michigan's Lower Peninsula, giving that region's youth a chance they would not otherwise have had to go to college.

Watching the fruition of his efforts since 1941 to give his community and the surrounding area an educational institution of which they can be proud is mild-appearing, 41-year-old broadcaster Les Biederman, president and general manager of Midwestern Broadcasting Co., licensee of WTCM Traverse City, WATT Cadillac, WATZ Alpena, WMBN Petoskey and WATC Gaylord, all in the north Michigan area.

Last Thursday tribute was paid to Mr. Biederman's successful efforts by Cedric Foster, MBS commentator, who described to his nationwide audience the feat by the broadcaster and his community in establishing their own college. Mr. Foster originated his program from WTCM studios, spending more than half of the quarter-hour in praise of the community efforts.

Today some 150 students—and 760 adult night students—are enrolled in the new Northwestern Michigan College, which opened in September 1951 in temporary quarters at the Traverse City airport. And just over a mile from the center of town a group of three new buildings are going up on a 150-acre wooded tract as the first unit in an ambitious project designed eventually to accommodate 3,000 students.

One day back in February 1941, Mr. Biederman called a group of Traverse City's businessmen into his office. He was building WTCM in that city after organizing Midwestern Broadcasting Co. in 1939 and receiving his FCC permit in 1940.

Philadelphia-born Mr. Biederman, who had come west to look for a place to build his station, had selected Traverse City. After a survey looking over the area's possibilities, he was appalled at the lack of educational opportunities.

A large part of the youth in the five-county area around Traverse City couldn't afford to go downstate or upstate to college, he told the businessmen. And when they do go, he added, they don't come back.

He talked eloquently on a sore subject: There was no college in the whole north part of Michigan's Lower Peninsula, while the rest of the state—especially in southern Michigan—was dotted with colleges and universities.

The group listened and decided to do something about it. A series of four meetings was held. Then Pearl Harbor.

That ended it for the time, but after the war Mr. Biederman was back at the old stand. Then four years ago he was elected to the board of Traverse City's Chamber of Commerce, and at his own request was made chairman of a committee to establish a college in the city.

An outgrowth of the committee was Educational Fund Inc., which was organized about June 1951. Mr. Biederman was elected president, a job he still holds. He and the four other charter members immediately set out to raise funds to build a college at Traverse City.

Mr. Biederman and Educational Fund set as their goal the raising of $100,000 for initial establishment of the college. Individuals, firms and organizations were asked to contribute $100 each, for which they would become members of the college Founders Fund, with their names perpetuated on a bronze plaque on the campus.

The drive brought in $40,000 which was spent on school equipment and real estate. Most of the contributions came from the five-county area, but much came from unexpected sources. Frank Isbey, a Detroit businessman, gave $2,500.

WTCM entered the campaign "with every

The campus of Northwestern Michigan College may lack the Gothic splendor of older schools, but a college's importance is not measured by its architecture. The library, at left, has a respectable stock of books which is being steadily expanded.

LES BIEDERMAN

technique we know of," according to Mr. Biederman. The station gave honorable mention to contributors, ran announcements on meetings of groups who organized drives of their own. Announcements of the courses available at the college were made, including those for adults. Meetings were held in the station's studios and the station's secretarial staff was used to take care of correspondence necessary to the campaign.

But most of all, Mr. Biederman's energies were used in addressing groups. Besides presiding at Educational Fund meetings, he talked to civic, church, patriotic, business, and government groups. He estimates he has attended 400 meetings on behalf of the college, including addresses to 42 of the 62 village boards in the five-county area.

Mr. Biederman isn't the only broadcaster in the act. Foundation Fund members include WLAV Grand Rapids and WKMH Dearborn, while scholarships have been created by WKMH, WTCM, WSAM Saginaw and WBCK Battle Creek. Other stations also are considering creation of scholarships, Mr. Biederman says.

The college was scheduled to open in September 1951 and first classes were planned in a building at the Traverse City airport jointly owned by the city and Civil Aeronautics Administration.

The building was in need of repairs, so WTCM aired a call for volunteers. Some 218 responded—electricians, plumbers, painters, carpenters, and just plain people who helped the tradesmen—all giving their work free.

The school opened with an enrollment of 72 freshmen and a faculty of eight. Enrollment has climbed since then, and today there are 150 students and 760 adult night students, of whom 100 are taking college credit courses, with a day faculty of 15 and a night faculty of 65.

At present Educational Fund Inc. is in the midst of a drive to collect $150,000 of which $122,000 will be used to pay for the new buildings and the rest to finance deficits. The first building unit is being constructed of war assets materials bought from the Federal Security Administration. The

From where I sit
by Joe Marsh

Just a Little "Outdated"

Back in December we sent out our yearly calendar. It listed the last date for renewing drivers' licenses, and things like the dates for registering to vote, when the hunting and fishing seasons open—even suggested you note down the wife's birthday, too.

I figured dates like these were important to keep in mind—and this was a good way to do it. Unfortunately, it now turns out I never really paid close attention to my own calendar!

Not 'til today that is—so here I am, not able to drive the car this weekend until I get my driver's license renewed on Monday!

From where I sit, I guess good advice, like charity, should begin at home. I'm always advising all of you to worry less about your neighbors (what they do, or say, and whether or not they should enjoy a temperate glass of beer) and pay more attention to whether you yourself are doing the right thing. Guess I'll "make a note" to follow my own formula!

Joe Marsh

"We would pay a premium for these 50,000 Air Shipments yet we actually saved thousands of dollars!"

Robert S. Woolf, Mgr., Teletranscription Dept., Dumont Television Network

"When we ship TV film, we're interested in *service*. We can't afford to take any other attitude. We've bought program time all over the country, and those programs *must* be filled.

"We at Dumont use Air Express. It's the fastest. It has all-point coverage. Above all, it is DEPENDABLE.

"As to cost — Air Express costs Dumont *less* than other air services would, by thousands of dollars per year! For instance, on our regular shipments to Detroit, other services cost 37% to 337% *more* than Air Express. And we can't duplicate the service at any price!

"The Air Express people have carried upwards of 50,000 shipments for Dumont in the last four years. Their ability to trace shipments — especially when being shuttled between stations — is almost uncanny! It has helped us out in many an emergency.

"It pays to specify Air Express — in more ways than one!"

new buildings otherwise would have cost an estimated $350,000.

Some 500 workers—300 women and 200 men—all civic leaders, are working in behalf of the $150,000 fund goal. "They are covering every home in Traverse City door-to-door, and on a smaller scale in outlying towns," Mr. Biederman said.

Educational Fund Inc. envisions an eventual $11 million plant for the college over a 20-year period, of which $5 million will be in self-liquidating assets, plus a $1 million community auditorium.

Educational Fund's board of directors includes nine Traverse City citizens, four ex-officio, and seven from communities in the five counties pledged to support the college. It also is represented in the State Legislature and in the Michigan Conservation Department.

The college, owned and promoted by Educational Fund, is administered by the Traverse City Board of Education. During its first three years its two-year basic courses credits are acceptable only by U. of Michigan, Michigan State College and the state's four teachers colleges, with wider accreditation expected later.

The Traverse City college's ambitious planners expect eventually to extend studies to the full four years, but that is somewhere in the future, according to Mr. Biederman. "Other state institutions have worked closely with us in such things as releasing members of their faculties to us," says Mr. Biederman. "They also praise our efforts at educational meetings all over the state. They realize we are building a great college here—not a piddling little thing."

Mr. Biederman and his fellows are getting attention from higher up, too. Gov. G. Mennen Williams recently has been considering a resolution to be submitted for adoption by the state legislature commending the college-building group and the community.

And in June 1952, the U. of Michigan, in recognition of Mr. Biederman's contribution to his community's youth, made him an honorary alumnus.

All the hubbub in bringing a college to his area in Michigan has not slowed down Mr. Biederman's efforts for his community on other fronts. As president of the Traverse City Industrial Fund Inc., he has been instrumental in the financing of plants for three local manufacturing industries which employ more than 500 people.

MBS commentator Foster, who spent two days in Traverse City and addressed the student body of the new college, said on his Thursday broadcast that the efforts by Mr. Biederman and his community are "typically American."

Mr. Biederman, whose formal education extended only to the eighth grade, sees the whole program as one of a community helping itself. He believes the Traverse City educational venture will become one of the area's cornerstones, "because it was established by the people, because enrollment is growing" and because the pioneering educational enterprise "will keep our youngsters at home."

Northwestern Michigan College Choir

WHY do more RADIO STATIONS* advertise in "SALES MANAGEMENT" than in any other magazine in the sales and advertising field?

It's the same story year after year. SALES MANAGEMENT always leads. The one and only conclusion to this constant preference for SM is that radio and television stations believe this magazine does a better selling job for them.

Are *you* taking advantage of these big SALES MANAGEMENT "exclusives"? It's the only one of the sales-advertising magazines edited specifically for the man most concerned with markets and media—the Sales Executive. The only one that measures local markets . . . *throughout the year.* Only one to which *both* sales and advertising executives can turn for local market data. And the only one that offers radio and television stations a tie-in with statistical data about *their own* markets.

In fact, in the marketbook of your own magazine—"Broadcasting"—the retail sales figures for all states and counties are from SALES MANAGEMENT'S Survey of Buying Power.

Nowhere else can you get *every month* this combination of top advertising buyers and up-to-date local market statistics—plus editorial stress in articles on radio and television's pay-off role in national advertisers' sales campaigns.

FEBRUARY 16

is closing date for reserving space in the state-county-city section of the SURVEY OF BUYING POWER—on which the allocation of more than a billion advertising dollars is based. (Companies subscribing to the SURVEY account for 94% of national advertising.)

Make sure your story is there, throughout twelve months of dog-eared use, when national advertisers and their agencies are choosing markets and media with the Survey's help.

98% of all U. S. TV stations use Houston-Fearless equipment

Houston-Fearless TV Crane, Model TC-1, offers extreme versatility. Camera lens can be raised quietly, from 3' 6" to 9' 6" while dollying.

Model 22, H-F developer for 16mm reversal films. It is self-contained, easy to operate, entirely automatic daylight operating. Adaptable to negative, positive or 35mm films.

Smoother BETTER SHOWS

are produced with

HOUSTON-FEARLESS EQUIPMENT

Top flight television showmanship is dependent not only on capable writers, producers and cameramen, but also on reliable studio equipment that will produce any desired camera effect smoothly and quietly with a minimum of effort . . . and on efficient film processing equipment that opens vast new sources of program material. That's why 98% of all U.S. television stations, as well as motion picture studios in Hollywood and throughout the world, rely on Houston-Fearless for matchless quality, proved performance and absolute dependability

Model PD-3 H-F TV Camera Pedestal raises camera quickly, easily by lifting on steering wheel. Rolls smoothly for dolly shots. One man operation.

Houston-Fearless microwave parabola mounted on H-F tilt head and tripod. Also available in power-driven models operated by remote control.

In addition to building many models not shown here, Houston-Fearless offers extensive engineering and manufacturing facilities to produce special television and photographic equipment for your particular requirements. Write for information and catalogs.

H-F Panoram Dolly provides countless camera effects . . . raising, lowering, panning, tilting, and dollying. Smooth and steady.

Television's finest portable camera mount. Houston-Fearless friction head, all-metal tripod and tripod dolly. For studio or field use.

NEW N. Y. STUDY RELEASED BY NAEB

Increase in drama programs is noted in a survey prepared by Dr. Dallas W. Smythe. This type show in 1953 represents 47% of total time, it is claimed. Acts and threats of violence portrayed in drama are increasing steadily, according to the report.

STEADY increase in crime drama on television was noted in the third in a series of annual content analyses of New York area video programs by Dr. Dallas W. Smythe, director of studies, National Assn. of Educational Broadcasters [B•T, Jan. 26].

The study, conducted for NAEB, and announced Jan. 24, utilized 56 monitors drawn from Columbia U. and New York U. graduate students. The 1952 and 1953 surveys were financed by the Ford Foundation's Fund for Adult Education, which underwrote a similar study in the Chicago area [B•T, Jan. 19].

In book form under the title, "New York Television," the NAEB study incorporates results of programs broadcast by seven New York area stations the week of Jan. 4-10, plus a report analyzing data obtained in the comparable weeks of 1951-52.

Later Report Coming

NAEB said a later report will be issued, analyzing the study in detail and placing particular emphasis on "certain aspects of stereotyping in character portrayal in drama produced for television broadcast."

The study highlights a continuing increase in the amount of drama, led by crime drama, on TV. Acts and threats of violence (excluding sports, news, weather, public issues and public events) rose from 2,970 in the week in 1952 to 3,539 in the week in 1953, the report states.

"This is an increase of 19%," the study commented. "The number of acts and threats of violence in the children-hours rose by 10% from 1,278 to 1,412. In the remaining time segments, they increased by 24%, from 1,692 to 2,127."

Drama programs in 1953 represented 47% of the total time as compared with 42.4% in 1952, NAEB pointed out. News programs increased from 5.9% in 1952 to 6.6% in 1953; cooking, 2% to 2.8%; personal care from .5% to .8%; religion, 1% to 1.7% and pre-school entertainment, .1% to .5%.

The study included the following New York area stations: WCBS-TV, WNBT (TV), WABD (TV), WJZ-TV, WOR-TV, WPIX (TV), all New York, and WATV (TV) Newark.

The report on the first two years' studies was written by Dr. Smythe and contains an introduction by Prof. Robert K. Merton of Columbia U.

EQUIPMENT contract for what is claimed will be the first educational TV station in the U.S., at U. of Houston, Tex., is signed by Dr. W. W. Kemmerer (l), university president, with Graybar Electric Co.'s L. T. England, salesman. Equipment will be furnished by Federal Telecommunications Labs.

TV, Films Seen as Solution To Teacher Shortage

USE of educational television and instructional films to take over some of the classroom teacher's functions during the current teacher shortage was recommended last week in the annual report of the Educational Testing Service, Princeton, N. J.

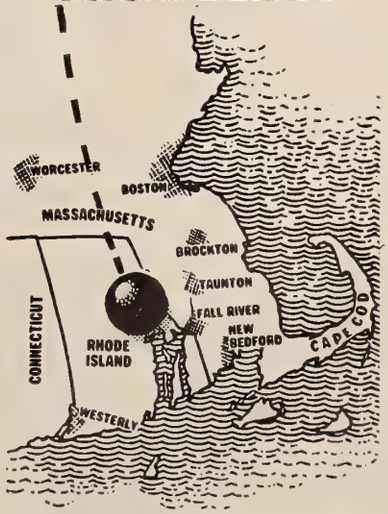
Dr. Henry Chauncey, president of the nonprofit group which develops and conducts test programs for educational and professional organizations, reported there is a shortage of 52,000 teachers in the U. S. With use of educational TV and films, he said, "it becomes possible to utilize the teacher's time and abilities more effectively, to provide more individualized instruction and to make teaching more attractive and challenging." He suggested reorganization of elementary techniques, with pupils and classes divided into "separate and more homogeneous groups."

"With suitable scheduling of films and TV class discussions, workbench and project lessons," Dr. Chauncey said, "the teacher is free to concentrate on his role as discussion leader, counselor, guide and mentor in the fullest sense."

U. of Miami to Use WGBS-FM

WGBS-AM-FM Miami, Fla., has made its FM transmitter available to the U. of Miami for broadcast of the institution's special events, according to a new plan which has been announced. WGBS will continue FM duplication of its AM programs when the university is not using the transmitter.

NSSR Offers Courses



SPRING term of the New School for Social Research, 66 W. 12th St., New York 11, which begins Feb. 9, will offer eight courses and workshops in public relations and nine in communications. Qualifying students may earn a certificate or a degree in public relations, the school reports. Among the courses is one on international communications and one on international broadcasting and television by Dr. Arno Huth.

MILESTONES

► TO MARK start of its 27th year of operation, WSIX Nashville, Tenn., signed a contract with local National Furniture Store for three across-the-board quarter-hour strips of local programming, all representing new business for the station and a new radio advertising policy for the store, according to Jim McKinney, WSIX program director.

► CELEBRATING its 20th year on the air last Friday was *The Lone Ranger* (ABC radio, Mon.-Wed.-Fri., 7:30-8 p.m. EST). Program is sponsored in 40 states by General Mills and in eight southern states by American Bakeries.

► SPECIAL anniversary dinner preceded the silver jubilee (25th) air celebration of *Chapel Echoes* on WICC Bridgeport, Conn., Jan. 18. Program was extended from usual half-hour to 60 minutes.

KOIN Portland, Ore.'s president, Howard Lane (l), pins Robert Hartzog, control room supervisor, and Board Chairman Ted Gamble congratulates Clyde Phillips (r), secretary-treasurer, for 20 years with the station in "10-20 Year Club" ceremonies. Honored for 10 years service were (not shown) Frances Pozzi, Margaret Mason and Gladys Johnson, orchestra musicians; Neck Taylor and Art White, technicians, and Ron Rule, announcer.

WHY do more RADIO STATIONS* advertise in "SALES MANAGEMENT" than in any other magazine in the sales and advertising field?

It's the same story year after year. SALES MANAGEMENT always leads. The one and only conclusion to this constant preference for SM is that radio and television stations believe this magazine does a better selling job for them.

Are *you* taking advantage of these big SALES MANAGEMENT "exclusives"? It's the only one of the sales-advertising magazines edited specifically for the man most concerned with markets and media—the Sales Executive. The only one that measures local markets . . . *throughout the year.* Only one to which *both* sales and advertising executives can turn for local market data. And the only one that offers radio and television stations a tie-in with statistical data about *their own* markets.

In fact, in the marketbook of your own magazine—"Broadcasting"—the retail sales figures for all states and counties are from SALES MANAGEMENT'S Survey of Buying Power.

Nowhere else can you get *every month* this combination of top advertising buyers and up-to-date local market statistics—plus editorial stress in articles on radio and television's pay-off role in national advertisers' sales campaigns.

FEBRUARY 16

is closing date for reserving space in the state-county-city section of the SURVEY OF BUYING POWER—on which the allocation of more than a billion advertising dollars is based. (Companies subscribing to the SURVEY account for 94% of national advertising.)

Make sure your story is there, throughout twelve months of dog-eared use, when national advertisers and their agencies are choosing markets and media with the Survey's help.

$5,000 for 25% interest. (BAL-1489, BALH-117.) Granted Jan. 28.

WSFA Montgomery, Ala.—Montgomery Bcstg. Co. Granted acquisition of negative control by R. F. Hudson, H. S. Durpen and D. E. Dunn for $100,000. Howard F. Pill sells 25% of his interest. (BTC-1437.) Granted Jan. 28.

WMBR-AM-FM-TV Jacksonville, Fla.—Florida Bcstg. Co. Granted transfer of control from Ed Norton, Frank M. King and Glenn Marshall Jr. to **The Washington Post Co.** for $2,470,000 cash. Principals in transferee include Chairman of the Board **Eugene Meyer,** President and Publisher **Philip L. Graham** and Vice President **John S. Hayes,** who also is president of WTOP Inc., licensee of WTOP-AM-FM-TV Washington (of which The Washington Post Co. owns 55% and CBS 45%). Transferee is publisher of *The Washington* (D. C.) *Post* (daily and Sunday morning newspaper), and is borrowing $2 million from Riggs National Bank, Washington, in order to effect cash purchase of Florida Bcstg. Co. (BTC-1433.) Granted Jan. 28.

WLTV (TV) Atlanta, Ga.—Broadcasting Inc. Granted transfer of control from John O. Chiles, et al., to **Crosley Bcstg. Corp.** through sale of 100,820 shares of common stock and 72,000 shares of preferred stock (100%) for $1,500,000. Principals of Crosley Bcstg. Corp. include Chairman of the Board **James D. Shouse,** President **R. E. Dunville,** Secretary **R. S. Pruitt,** Vice President and Treasurer **K. T. Murphy,** Vice President **R. J. Rockwell,** Vice President **William P. Robinson** and Vice President **John T. Murphy.** Sole owner of 100% stock of transferee is **Avco Mfg. Corp.,** New York. Transferee is licensee of WLW WLWT (TV) Cincinnati, WINS New York, WLWD (TV) Dayton and WLWC (TV) Columbus, and applicant for new TV stations in Indianapolis and Toledo. (BTC-1432.) Granted Jan. 28.

WMBD-AM-FM Peoria, Ill.—Peoria Bcstg. Co. Granted assignment of license to WMBD Inc. for $262,500. Principals in assignee are **Charles C. Caley** (66.67%), who before transfer had 25% interest in WMBD, and vice president and general manager of station, and **John E. Fetzer** (33.33%), president and 52% owner of WKZO-AM-TV Kalamazoo, Mich., and WJEF-AM-FM Grand Rapids, Mich. Assignors include Carl P. Slane, Frances P. Slane and Elizabeth P. Talbott. Assignee is applicant for new TV station in Peoria (TV Applications, B•T, Jan. 12). (BAL-1490, BALH-118.) Granted Jan. 28.

KCLV Clovis, N. M.—New-Tex Bcstg. Granted assignment of license from Wallace Simpson to **New-Tex Bcstg. Inc.,** of which Mr. Simpson is president and 68.6% stockholder. Transaction designed to reduce indebtedness of licensee. Consideration is $22,000. (BAL-1485.) Granted Jan. 28.

WRXO Roxboro, N. C.—Roxboro Bcstg. Co. Granted transfer of control from Philip L. Thomas, H. W. Winstead Jr., James W. Newman and A. E. Jackson to **Harold S. Taylor** for $3,500. Mr. Taylor is manager of WRXO. (BTC-1439.) Granted Jan. 28.

KLIQ Portland, Ore. — Mercury Bcstg. Co. Granted transfer of control from Gordon E. Bambrick and Harold Krieger to **Thomas P. Kelly** for $27,800. Mr. Kelly was commercial manager for KGAE Salem, Ore. (KLIQ formerly had call letters KBKO.) (BTC-1438.) Granted Jan. 28.

WLCM Lancaster, S. C. — Royal Bcstg. Co. Granted assignment of license from Arthur W. Davis, Morgan J. Craig and Milton D. Scarboro to **Royal Bcstg. Co. Inc.** for $36,000. Mr. Scarboro is president of transferee and his interest is increased from ⅓ to ⅔. (BAL-1492.)

WHAP Hopewell, Va. — Hopewell Bcstg. Co. Granted transfer of control from A. Robbins Jr., Charles M. Mark, John P. Mercer and R. E. Anthony Jr. to **Mortimer Hendrickson** for $40,000. Mr. Hendrickson until Dec. 1, 1952, was an information specialist with the U. S. Dept. of Agriculture in New York. (BTC-1442.) Granted Jan. 28.

Hearing Cases . . .

Actions by FCC

WLIN Wausau, Wis.—Alvin E. O'Konski. Commission dismissed protest filed Jan. 5 by WSAU Wausau, Wis., directed against Commission's action of Dec. 4, 1952, which granted application of WLIN (now WOSA) for power increase in move from Merrill to Wausau, Wis. (BPCT-8239.) Chairman Paul A. Walker voted for hearing. Memorandum opinion and order Jan. 26.

Flint, Mich.—Trebit Corp. and W. S. Butterfield Theatres Inc. Commission denied petitions requesting that Commission enter an order staying taking of further testimony in Flint proceeding (Dockets 10268 through 10270), pending Commission's action on petitioner's request for review of hearing examiner's ruling granting petition of WJR: The Goodwill Station Inc., Flint, for leave to amend its TV application to move transmitter site. Order Jan. 23.

Portland, Ore.—North Pacific Television Inc. Commission denied petition for review of hearing examiner's memorandum opinion and order of Dec. 19, 1952, which granted petitions by Cascade Television Co. for leave to amend its application for new Portland TV station on vhf Ch. 8, to reflect changes in stockholders, stock transactions and financial plans, and accepting the amendment (Docket 10324, BPCT-1235). Memorandum opinion and order Jan. 23.

Hearing Calendar . . .

Victor E. Bluedorn, Ex. Dir.
Sigma Delta Chi
35 E. Wacker Dr., Chicago 1.
Additional details on request

of Chief, FCC Broadcast Bureau to initial decision of Dec. 19, 1952, to grant renewal and transfer.

James Gerity Jr., Pontiac, Mich. New AM, 1460 kc (Docket 10346, BP-8651)—Petition to reconsider action of Nov. 12, 1952, setting application for consolidated hearing with two others, and to grant without hearing. Mr. Gerity, operator of WABJ Adrian and WGRO Bay City, Mich., notes other two applicants are no longer party to hearing. Concerning slight daytime interference to WCLC Flint and WSTR Sturgis, Mich., petitioner notes areas already are served by number of other stations.

WJR, The Goodwill Station Inc. (WJR Detroit), Flint, Mich., et al. (Docket 10268 and BPCT-967 et al). New TV, Ch. 12—WJR filed reply to petitions of Trebit Corp. and W. S. Butterfield Theatres Inc. on Jan. 19 seeking review of examiner's action of Jan. 14 granting WJR request to amend. (FCC denied petitions for review and hearing began Jan. 28 before Examiner Benito Gaguine.) Trebit Corp. on Jan. 26 filed reply to WJR reply.

Versluis Radio and Television Corp., Muskegon, Mich. CP new TV station (BPCT-1208)—Protest filed by Music Bcstg. Corp. (WGRD), Grand Rapids, charging economic injury from TV grant to Versluis [B•T, Jan. 26].

Pioneer Bcstrs. Inc. (KGW) and Mt. Hood Radio and Television Bcstg. Corp. (KOIN), Portland, Ore. New TV, Ch. 6 (Dockets 9136 and 10316; BPCT-431 and 1029)—Reply by Pioneer to reply of Mt. Hood on Jan. 15 to petition by Pioneer for rehearing of FCC action of Dec. 17, 1952, allowing Mt. Hood to amend its application. Mt. Hood on Jan. 26 filed further reply.

Penn Jersey Bcstg. Co., Bristol, Pa., et al. New AM, 1490 kc (Docket 10118 et al.)—Correction by WDAS Philadelphia of proposed findings of facts and conclusions filed Dec. 15, 1952.

January 23

Westinghouse Radio Stations Inc. (KEX), Portland, Ore., et al. New TV, Ch. 8 (Docket 9138 et al.)—Petition by Westinghouse to amend its application to make slight engineering changes.

WSTV Inc. (WSTV), Steubenville, Ohio. New TV, Ch. 9 (BPCT-1049)—Storer Bcstg. Co., also applicant for Ch. 9 at Wheeling-Steubenville (BPCT-360), filed reply to motion of WSTV tendered Jan. 9 requesting immediate action on its petition of July 25, 1952, which asked FCC to require Storer to elect which one of its TV applications it wished to prosecute. Pointing to precedents of other applicants who have had multiple requests pending which, if all were granted, would give them more than the lawful five stations, Storer asked dismissal of WSTV petitions.

KAKE Bcstg. Co. (KAKE), Wichita, Kan., et al. New TV, Ch. 10 (Docket 10263 et al.)—Petition filed by Mid-Continent Television Inc. to amend its application so as to correct mathematical computations and make other slight change.

January 26

WGAL-TV and Peoples Bcstg. Co. (WLAN), Lancaster, Pa. New TV, Ch. 8 (Dockets 10366 and 10365; BPCT-910 and 654)—Opposition filed by WGAL-TV to motion by Peoples on Jan. 16 to enlarge and change issues in comparative hearing set by FCC. (Hearing set Feb. 2 has been continued without date by Examiner J. D. Bond.)

Amendment of Sec. 3.606 of TV rules respecting Patchogue, N. Y. (Docket 10364)—Comments by American-Republican Inc. (WBKY), Waterbury, Conn., respecting FCC proposal to amend Sec. 3.606 so as to add Ch. 75 to Patchogue, N. Y. WBRY suggests Ch. 54 be allocated to Patchogue instead so Ch. 83 can be requested by WBRY for Waterbury. WBRY's earlier petition for amendment of Sec. 3.606 to add Ch. 83 at Waterbury was denied pending June 2 expiration of one-year amendment ban. Suffolk Bcstg. Corp. (WALK), Patchogue, seeks allocation of Ch. 75 or alternate facility there.

Head of the Lakes Bcstg. Co. (WEBC), Duluth, Minn., and Red River Bcstg. Co. (KDAL), Duluth, Minn. New TV, Ch. 3 (Dockets 10298, 10290; BPCT-621, 903)—Petition by WEBC for review by FCC of ruling by examiner on Jan. 23 denying its petition for continuance of hearing set Feb. 17 pending action by Commission on petitions by WEBC to enlarge issues and consolidate Chs. 3 and 6 hearings into one proceeding. KDAL on Jan. 27 filed opposition to further continuance of hearing.

Theatre Television; allocation of frequencies (Docket 9552) — Statement by Motion Picture Assn. of America and National Exhibitors Theatre Television Committee supporting petition of Western Union Telegraph Co. respecting interconnection issue [B•T, Jan. 26].

January 27

Jefferson Amusement Co., Beaumont, Tex. New TV, Ch. 4 (BPCT-1440)—Petition filed by Port Arthur College (KPAC), Port Arthur, Tex. (Docket 10285, BPCT-839) in reply to Jan. 19 opposition of Jefferson to Jan. 5 petition of KPAC requesting dismissal of Jefferson application. Jefferson seeks to be consolidated in hearing and is in effect successor to Lufkin Amusement Co., whose application was dismissed with prejudice by FCC on Dec. 16, 1952.

Feb. 9-10: BMI Board, Bellevue-Biltmore Hotel, Belleair, Fla.

Feb. 11: Radio seminar, Advertising Club of Washington, D. C., Washington Gas & Light Co. auditorium.

Text of FCC Order
On Operator Rules and Remote Control

In the Matter of
Amendment of Part 3 and Part 13 of the Rules and Regulations with respect to the licensed operator requirements of certain standard and FM broadcasting stations and for remote control operation of such stations.

Docket No. 10214

REPORT AND ORDER

BY THE COMMISSION:

Commissioner Sterling not participating; Commissioner Hennock voting for oral argument; Commissioner Merrill concurring in the result but voting for oral argument.

1. On June 4, 1952, the Commission released a Notice of Proposed Rule Making in the subject matter setting forth the request of the National Association of Radio and Television Broadcasters (hereinafter called petitioner) for amendment of the Commission's rules to permit:

(a) Persons holding restricted radiotelephone operator permits or higher class of licenses to stand the required regular transmitter watches at standard and FM broadcasting stations employing non-directional antennas and operating with powers of 10 kw or less;

(b) Remote control of such stations.

2. The amendments proposed by petitioner would compel each station affected to employ a minimum of one first-class operator "as its chief engineer or technical supervisor" and would permit the other operators required to be available for duty at the transmitter to be restricted permittees. The first-class operator is not required to be a full-time employee but only to be "on call and reasonably available to fulfill his specified duties." He would be the only operator authorized to undertake any internal tuning adjustments, major repairs, or overhaul, and similar endeavors, restricted permittees being allowed to perform only "minor" adjustments of transmitter supply voltages and tuned circuits.

3. In support of the requested changes petitioner asserts that the regular duties of transmitter operators could be performed by restricted permittees, provided that major repairs were made by first-class operators; and that the use of restricted operators would not result in any increase in outages or jeopardize the safety of the operators. Although it contends that technical reasons alone require that the Commission authorize the use of restricted permittees, petitioner points out that the basic need for the change is also justified by significant economic reasons. It alleges that most small stations must operate with a limited staff, and that effective utilization of this staff demands that those performing the nominal duties of transmitter operators be able to do many of the other more important and more difficult jobs required if the station is to offer a desirable service to the public. Petitioner concludes that the use of restricted operators, particularly in sparsely settled areas, would greatly enhance the possibilities of obtaining a staff with qualifications more suited to stations' needs. Also because of the resulting economies of operation, it argues that the use of restricted operators would increase the chances of survival of existing small stations, encourage the development of broadcast stations in "white areas" and in communities having no locally originated service, and aid existing stations to expand their hours of service.

4. Approximately 2,000 comments upon the proposal were received from the following sources: 1,136 individuals, most of them operators; 5 national labor unions; 52 labor union locals; 6 trade schools; 788 individual station managements; 28 regional associations of broadcasters; 1 national association of broadcasters, and 2 national networks. Almost all of the comments submitted by the operators, operator organizations and trade schools were opposed to the requested amendments. Conversely, almost all of the comments submitted by broadcasters and management organizations supported the requested amendments.

5. In the Notice of Proposed Rule Making issued in these proceedings the Commission posed a number of relevant questions and requested that interested parties direct their comments to these questions. One of the questions upon which comment was particularly desired was the extent to which a watch-standing operator requires significant technical training. In general, broadcasters are of the opinion that routine duties of periodic observations—reading meters and entering the readings in the station log, minor external adjustments of voltages and current, circuit tuning, and similar tasks, constitute all of the operators' transmitter duties during program periods; and that these duties can be performed without any appreciable technical training. Some expressed the further opinion that low-grade watch-operators should also be able to make such minor repairs as replacing defective plug-in tubes and fuses, because these activities do not require extensive training but only a certain amount of technical aptitude. On the other hand, the operators contend that the operator on transmitter duty must not only make the observations and readings called for by the rules but

must also observe numerous other matters and interpret what they see, hear and smell. The operators assert that, in this way, transmitter failure caused by the aging of certain components, over-heating of others, etc., can be anticipated, thereby avoiding outages and various other undesirable effects. Petitioner asserts that modern transmitters show remarkable reliability, and that, in the event of the rare loss of service due to transmitter breakdown, the general instructions in most stations are that the chief engineer is to be called. It also emphasized that preventive maintenance work is the principal means of avoiding breakdown. Many other station representatives expressed similar opinions and further asserted that it is not necessary to have maintenance work performed during a transmitter operator watch, it being sufficient to have periodic inspection and maintenance of the equipment performed while the station is off the air. From the comments it appears that it is the practice at the smaller stations to have such maintenance work discharged only by the chief engineer, and also to employ "combination" operators, with concurrent duties as announcers, many of whom have had little or no experience in the repair and maintenance of broadcast stations. With respect to the desirability and appropriateness of the proposed amendments at the various power levels, the comments received must be characterized as contradictory.

6. In summary, as to the important question whether there would be any change in the number of technical transmission difficulties with the utilization of restricted watch-operators, the comments were conflicting. A number contended that the proposed amendments, if adopted, would result in some increase in transmission difficulties because of the alleged inability of non-technical operators on duty to anticipate or recognize faults and either correct or report them; it was also pointed out that under petitioner's proposal, additional time might be needed for the first-class operator, who could be stationed somewhere else, to reach the faulty transmitting equipment. Comments submitted by operators estimated increases in technical transmission difficulties ranging from 100 to 300 per cent. On the other hand, some broadcasters believe that transmitter difficulties would decrease because they would have more money to spend on equipment, thus increasing the reliability of their technical plant. Other broadcasters cited experience with temporary use of low-grade operators in specific cases both recently and during the late war which showed no increase in transmission difficulties at those times. The Commission's records reveal that the loss of air time for the average broadcast station is only 0.14 per cent of total air time. In this connection several comments attributed as high as 90 per cent of outages to power and tube failure over which operators have little, if any, control.

7. As to the effect of the proposal upon the safety of operators, it is the prevailing opinion of the broadcasters that the duties of the lower grade operators, in connection with transmitting equipment, would be so limited as to preclude their coming into contact with dangerous voltages. It is pointed out that only minor, external adjustments would be made and that in the case of replacements of simple plug-in components the operator would be protected by interlock devices on access doors. There is little disagreement with this view but some individuals contend that in an emergency, regardless of their lack of technical competence, low grade operators would be under pressure to restore a defective transmitter to service, and because of their ignorance of transmitter circuits, would engage in unsafe activities. However, no factual basis was given for this prediction. Several broadcasters expressed the opinion that the intelligence and care with which the operator works determines his safety rather than the class of license he holds. In general, the Commission's standards prohibit lethal voltages with which there might be accidental contact in performing the limited duties proposed. However, there are exceptions to this in that (a) exposed 220-volt AC switching equipment is permitted on the front of a power control panel, and (b) potentials of 350 volts, or less, within enclosures, need not be disconnected by interlocks on access doors. It is believed that the standards in respect to these matters are exceeded in the case of most transmitting equipment of recent manufacture to the extent that all external controls are "dead" and there are no exposed voltages outside enclosures.

8. Petitioner cited statistics of the Bureau of Labor Statistics to show that with one or possibly two exceptions not necessarily involving the instant question, there were no fatalities or permanent injuries among some 400 broadcast stations in a sample survey taken from 1941 through 1949, and further, that no fatality nor permanent injury occurred during the war years when numerous low grade operators were employed. It also pointed out in the petition that the National Council on Compensation Insurance, which is the central actuarial source for compensation insurance companies, does not classify transmitter operators in a hazardous category and has no separate data with respect to them.

9. There were many comments that the proposed amendments would result in widespread unemployment among first-class operators. In this connection, however, several broadcasters asserted that displaced operators would be absorbed by growth in the television broadcasting field, and the experience of one national network was cited as an example in that connection.

10. With respect to the petitioner's specific proposals, several comments called attention to possible difficulties in their administration because of indefiniteness, typified by the phrases "reasonably available" used in connection with the first-class operator and "minor adjustments" as applicable to the allowable work area of the restricted permittees. Further, it was pointed out that minor adjustments by restricted permittees might result in misadjustment of transmitting equipment so as to produce undesirable external effects.

11. Consideration must also be given to the effect of petitioner's proposals on the CONELRAD Plan. This plan requires that, in case of an air raid alert, participating stations shall be able to change operating frequencies and, in some instances, power, on very short notice to predetermined and assigned values. The CONELRAD Plan has been approved in accordance with Executive Order No. 10312 and is for the purpose of:

(1) Minimizing the navigational aid that an attacking air force might obtain from our broadcast stations.

(2) Providing a radio service for dissemination of civil defense and other information to the public during periods of air attack.

The CONELRAD system of operation requires the voluntary participation of a large number of stations. A study made of the technical requirements for placing a broadcast station in CONELRAD system operation, revealed that practically all of the operations necessary at existing stations operating in the CONELRAD system fall into one or more of the following categories:

(1) Push-button activation to place an auxiliary transmitter in operation that has been pretuned to a CONELRAD frequency.

(2) Push-button operation to energize relays to effect the necessary changes.

(3) Moving dials to predetermined reading to tune the transmitter to a CONELRAD frequency.

(4) Manually throwing switches to change crystals, inductors, capacitors, antennas, etc.

(5) Moving clips or connectors to predetermined points to effect changes as in (4) above.

12. With respect to remote control operation petitioner requests a revision of the rules to permit the operator at the remote control point to turn the transmitter on and off and to perform all of the functions required by the Commission's rules and standards to be carried out by operators on duty at the transmitter in the absence of remote control. It argues that such remote control of broadcast transmitters is entirely feasible and points to the operations of the similar experimental remote control installations already authorized by the Commission. Reports have been received from licensees on the operation of eight of these installations over periods averaging a little more than three months, seven involving control of FM stations by wire circuits and one radio control of an AM station. These reports show that faults occurred in the remote control circuits or apparatus of three installations that caused service interruptions but that in each of the eight cases, transmitter outages resulting from all causes, including outages attributed to remote control, amounted to less than one per cent of the total time covered by each report. Petitioner advances, as reasons supporting its proposal, the argument that remote control authorization will permit the selection of better studio and transmitter sites, and through reduced overhead and more efficient operation, will aid existing stations in maintaining or expanding their present services, and will encourage the construction of new stations in sparsely settled areas.

13. On the other hand, there were a number of opinions, mainly from operators, that a control system should be required to afford the same degree of control at the remote point as exists at the transmitter, a degree entailing observations and adjustments beyond those proposed by petitioner or called for by the Commission's regulations. These same commentators asserted that the supervisory control circuits and apparatus necessary to provide such a degree of control would be so complex as to be impractical at this time. Finally, several comments pointed out that use of remote control with no one in attendance at the transmitter would facilitate entries to the transmitter by unauthorized persons, including persons desiring to use the facilities for subversive purposes.

14. The Commission has carefully considered the numerous comments submitted and on the basis of these comments and its own knowledge and experience in the field, obtained through reports and records, has determined that amendment of the rules in question along the lines suggested by petitioner is appropriate at this time. The most important consideration is whether the revisions in question would result in any degradation of the Commission's technical standards and requirements, or more specifically, would increase the possibility of outages and

Help Wanted

New Missouri station opportunities—all positions open except manager. Send complete resume. Box 113, Clinton, Missouri.

Managerial

General manager, must have successful record, real opportunity to share in profits, small eastern city, rich market area, 1000 watts daytime and FM, send picture, biography, financial requirements. Answer strictly confidential. Box 651S, B•T.

Salesmen

Experienced radio salesman with top client references and proof of selling ability. NBC station operating both radio and television. Guarantee to start, commissions as soon as established, and $8,000 to $10,000 position. Write giving full details and photo. Box 552S, B•T.

Radio salesman—Good opportunity for young, energetic man or woman in Ohio city of 100,000, at ABC affiliate. Send qualifications and references to Box 588S, B•T.

Salesman, young, aggressive, prefer New Englander to sell top market for 5000 watt network station with TV application. Box 638S, B•T.

Wanted: Sales manager go-getter with experience. Salary and commission. Excellent earning power. Must be steady and reliable. CBS midwest affiliate. Box 640S, B•T.

Opportunity unlimited! This livewire 5 kw radio station in the southeast wants a livewire salesman, whose ambition, energy and aggresiveness make him a real producer. He'll have a drawing account of $100 to $125 a week against liberal commissions—but the right man will earn a lot more than that! The man who gets this job will have a genuine opportunity to become sales manager of the station. If you think you can fill the bill, write fully to Box 669S, B•T.

Salesman. $50. weekly salary plus 10% commission. Must be experienced. Southeast area, lucrative market. Good for $10,000. Box 685S, B•T.

Salesmen: Here is the opportunity of a lifetime. Your earnings will be limited only by your ability. We are expanding our sales staff to handle both radio and TV operation. Excellent working conditions in Rocky Mountain area. Marvelous climate. Straight commission setup. No limit. We hand you 3 thousand in billings to start. Top men only need apply. Box 708S, B•T.

KUDL, Kansas City on air about May 1 needs two top salesmen. $100 weekly guaranteed first $500 business; 10% on next thousand; 15% over that. You know what we want! Send details to KTFS, Texarkana, Texas.

Reliable, hard-hitting salesman and commercial manager wanted for WCRB Good Pay, Waltham, Massachusetts.

Sales opportunity in desirable small market. WSMI, Litchfield, Illinois.

Announcers

Announcer-disc jockey with proven successful DJ record in competitive large market operation. $85.00 start with regularly scheduled increases to $100.00 weekly. Station located large central-south market. TV future. Send audition, photo and complete background. Confidential. Box 369S, B•T.

Announcer-engineer, $300. Photo, qualifications only, first letter. Box 597S, B•T.

Announcer. One who is also interested in part-time selling. Net affiliate in small east Tennessee town. $65 week to start. Write details and send audition to Box 625S, B•T.

Announcer-engineer, first class ticket, for news and disc show. Permanent position, excellent pay. Send background and tape. Midwest CBS affiliate. Box 641S, B•T.

Combination man with experience. Immediate opening. Box 683S, B•T.

Help Wanted—(Cont'd.)

Regional Minnesota station wants sports announcer. Good salary. Chance to earn extra money selling radio time. Box 688S, B•T.

Announcer-newsman. Daytime independent major metropolitan market east coast, looking for man who is strong on initiative. Salary plus talent, excellent working conditions. Box 696S, B•T.

Comedy DJ, flowing, non-hesitant ad-lib, "Q-in" gimmicks. Movie-star impersonations, dialects. Single preferred. Box 703S, B•T.

Progressive livewire kw daytimer in eastern Pennsylvania needs mature voiced, experienced disc jockey who can do a first class record show and a good newscast. Only experienced, polished announcers will be considered. If qualified can also offer football play-by-play. Box 706S, B•T.

Announcer-engineer, immediate opening, excellent working conditions. Accent on announcing and if you can produce we'll pay. Marvin Hull, KBHS, Hot Springs, Arkansas.

Wanted: Announcer-engineer. Emphasis on announcing 40 hours $80.00. Two weeks vacation with pay, time and a half for overtime. excellent working conditions. Send audition KREW, Sunnyside, Washington.

Pay good, if the announcer is good. Send photo, tape or disc. Program Director, KSCB, Liberal, Kansas.

Two experienced announcers wanted by new daytime music and news station. Disc jockey for pop music shows and news man. $300 a month plus profit sharing plan to right men. Must be available Feb. 15th. Send photo, audition and letter of qualifications to station KVSP, Lubbock, Texas.

KXGI, Fort Madison, Iowa wants seasoned announcer. News ability necessary. Steady job—good hours, nice town. Pay commensurate with ability plus opportunity with growing, aggressive organization.

Morning and news announcer. Airmail audition, photo, background. KXJK, Forest City, Arkansas.

North Carolina. Experienced personality announcer for fulltime independent. Will pay well for man with good voice. WBUY, Lexington, North Carolina.

Net station with application for TV needs staff announcer. WGEZ, Beloit, Wisconsin.

$300.00 per month to good combination man. ABC station, 37 hour week, 1½ all over 40. WGYV, Greenville, Alabama.

Staff announcer, strong on music shows but must be versatile. Contact Program Director, WJAC, Johnstown, Pa.

Immediate opening announcer and announcer-engineer. Floaters and drifters need not apply, give full details. Apply today, salary open. WMJM, Cordele, Ga.

Immediate opening announcer-engineer. Neat, honest and sober. Emphasis announcing. Salary $70 to $80. NBC Affiliate. Call, wire Radio Station WMNC, Morganton, N. C.

Announcer-engineer with first class license needed. Good salary, 40 hour week with time and half for overtime. WOAP, Owosso, Michigan.

Announcer with first class license wanted for 250 watt ABC station. Good working conditions. Send audition tape and letter stating minimum salary and background first contact. WRLD, West Point, Georgia.

Announcer for all-round staff work, needed immediately. Write at once, giving all details regarding experience, education, salary requirements or phone WSSV, Petersburg, Virginia.

Combination announcer-engineer. First ticket. Good pay. Permanent. Send audition to WTUS, Tuskegee, Ala.

Help Wanted—(Cont'd.)

Combination man with emphasis on announcing wanted immediately. Chuck Gilmore, WULA, Eufaula, Alabama.

Combination announcer-engineer, first class ticket. Permanent. WWGS, Tifton, Georgia.

Technical

Announcer-engineer, 250 watt Virginia station. Box 300R, B•T.

First class radio engineer wanted. $75.00 weekly. 1000 watt station near Atlanta, Georgia. Box 566S, B•T.

Got a first class ticket? New York State indie with TV future has immediate opening. Security for you. Box 599S, B•T.

Network affiliate needs engineers for transmitter watch, 44 hour week—$60 to $80 a week dependent upon experience. Box 626S, B•T.

First phone with two years experience. Desire something permanent. Box 637S, B•T.

Virginia kw needs engineer. State minimum salary expected. Box 639S, B•T.

Engineer-announcer, must have car, experience and good English. $75.00 forty-four hours start, raises. Box 650S, B•T.

Engineer. Iowa regional daytimer. Start $55.00. $5.00 increase at six month intervals first year. Box 678S, B•T.

Combination engineer-announcer, first ticket, emphasis on announcing. Send audition tape or disc air mail with full particulars to Box 1479, Honolulu, Hawaii.

Nebraska. First class engineer-announcer wanted for combination job. Up to $280 to start. 40 hour week. Overtime available. KCOW, Alliance, Nebraska. Also need announcer-salesman.

Immediate opening for experienced engineer. Opportunity to become chief. Salary depends on experience and ability. Excellent working conditions. Limited announcing desired—interesting future—this is a break for a combo man who wants more technical work and less announcing. If interested write or wire R. E. Adamson, KGAK, Gallup, New Mexico.

Wanted—Transmitter engineer with car, 5000 watt regional station with television application on file. Radio Station KJAY, Topeka, Kansas.

Wanted—Chief engineer for 1000 watt directional, ABC affiliate. Present chief leaving for government assignment Feb. 15. KSDN, Aberdeen, South Dakota.

Combo, first class phone with pleasant voice. 250 ABC affiliate, delightful climate. KTRC, Santa Fe, New Mexico.

Immediate opening for first phone operator. WASA, Havre de Grace, Md.

Beautiful Virginia . . . First class engineer-announcer wanted immediately. Mutual affiliate. 250 watt station. Small friendly community. Top pay to right man. Give experience and pay expected. Phone or write WCVA, Culpeper, Virginia.

Engineer with first class license. For combined transmitter and control room operation. Send full information to WHFB, Benton Harbor, Michigan.

Immediate opening first phone engineer. Beginner considered. WMDN, Midland, Michigan.

Wanted—First class engineers AM-TV operation. Transmitter only. Contact Chief Engineer, WNAM, Neenah, Wisconsin.

Combination or engineer, full details in first letter. WRIC, Richlands, Va.

Transmitter engineer for 5000 watt directional AM. Write or wire Leroy Kilpatrick, WSAZ, Inc., Huntington, West Virginia.

Wanted—First class license radio-phone operator. No experience necessary. Transmitter work only. Contact Radio Station WSIP, Paintsville, Kentucky.

Cleveland "All-American Family Station" has opening for first class engineers, 40 hour week, cost of living bonus, extra bonus for remotes. All replies honored in strict confidence. Send recent photo with employment record to Operations Manager, WSRS, Inc., Cleveland 18, Ohio. Phone Erieview 1-2005.

First phone; transmitter operator. WSYB, Rutland, Vermont.

First class phone licensee. No experience needed. Car necessary. Contact Chief Engineer, WTNS, Coshocton, Ohio.

Wanted: Transmitter engineer with first class license, immediate opening, good salary, insurance, vacation benefits. KSDN, Aberdeen, South Dakota.

Help Wanted—(Cont'd.)

WUSJ, Lockport, N. Y. has immediate openings for two first ticket men. Excellent working conditions and opportunities. Contact Jack Gelzer, Manager.

Production-Programming, Others

Experienced radio continuity director for mid-west NBC station. Heavy commercial schedule. Must have ability to direct department, originate ideas and produce selling copy. Agency or station experience acceptable. Excellent opportunity with company now operating both radio and television stations. Send complete details. Box 553S, B•T.

Commercial copywriter for regional independent station. Girl preferred. Box 619S, B•T.

Program director-announcer. Southwest major network station with a TV hearing in its lap is in need of a man that can do an early morning program (6:30 to 8:00) and serve out his working day as program director for balance of staff. Must have friendly delivery and really like people and do a morning show that's more than a DJ show or the usual time and temperature deal. Send details in first letter. Prefer man from southwest or that has some knowledge of agriculture. Give salary requirements. Write Box 662S, B•T.

Employment Service

WANT A GOOD EXECUTIVE?

Competent, reliable General, Commercial and Program Managers: Chief Engineers, Disc Jockeys, Sportscasters, other specialists. Tell us your needs today. Delays are costly.

HOWARD S. FRAZIER
TV & Radio Management Consultants
708 Bond Bldg., Washington 5, D. C.

improper transmitter operation. Factors such as the marked improvement of transmitter equipment and the reliability of such improved equipment, the satisfactory utilization of low grade operators during the late war, the successful operation by non-technical personnel of many electronic devices of an equally complex nature and upon which the safety of life and important property is often dependent, and the extensive and exclusive reliance at many stations on the chief engineer for all significant repair work, all militate for the adoption of the subject revisions. We find however that petitioner's proposal for the employment of a first class operator is inadequate. Petitioner proposed that the first class operator need not be a full-time employee but only be "on call and reasonably available to fulfill his specified duties." It is our view that each station should have in its regular full-time employment and at the station

FOR THE RECORD

at least one operator holding a radio-telephone first-class operator license to effect and insure the proper functioning of the station equipment and the implementation of the CONELRAD Plan (see par. 15, *infra*). Many of the comments received stressed the desirability and prime importance of preventive maintenance, the necessity for observation and "sniffing out" of trouble by the experienced technician, and the reliance on the chief engineer for any significant repair. It is felt that the retention of at least one first-class operator will satisfy all these criteria of proper technical operation since this operator, being employed on a regular full-time basis, will have ample opportunity to detect difficulties and engage in preventive maintenance, and be readily available at all times for necessary repair work. Further, under the rules adopted herein the restricted permittee, except when under the supervision of this first class operator, is prohibited from making any adjustment that may result in improper transmitter operation other than external adjustments in four specified situations and, after instruction, those procedures necessary to place the station in CONELRAD operation. It is the Commission's opinion that the modifications of petitioner's proposal here referred to are conclusive insurance against any degradation of its technical requirements or serious jeopardy to the safety of the operators or other personnel, and that they do not substantially inhibit the attainment of the benefits which petitioner believed would be forthcoming under its original proposal. On the basis of our experience with problems arising with the utilization of very high power equipment and the showings made in this proceeding, we have concluded that the revision of the rules to permit use of lesser grade operators and remote control shall be limited to standard non-directional and FM stations operating with the power of 10 kw or less.

15. With respect to the CONELRAD plan, it is the Commission's opinion that the plan can be implemented and put into operation by persons holding authorizations other than radio-telephone first-class, provided they have been given adequate instruction by the station full-time first-class operator.

Employment Factor

16. Numerous parties asserted that the proposed amendments would result in widespread unemployment among first-class operators, and that this factor should be accorded great weight by the Commission in reaching its determination. It is the Commission's opinion that just as under the standard of "public convenience and necessity" in Section 214 of the Act, it took into consideration the question of protection of employees in office closures and reduction of hours cases involving common carriers (*In the Matter of Employee Protection in Telephone and Telegraph Service Curtailments*, FCC 51-177, Mimeo No. 59469), so here it may consider, under the standard of the "public interest, convenience and necessity," the effect of the proposed amendments on the size and stability of the labor supply of technically qualified operators available to the broadcasting industry. Cf. *Interstate Commerce Commission* v. *Railway Labor Executive Association*, 315 U.S. 373, 380. However, in view of the applicable policy factors,—in particular, the distinct possibility, especially with the lifting of the "freeze," that television will be able to take up a substantial degree of any resultant unemployment, the requirement that at least one first-class operator be retained in full-time employment, and the necessity of according technological progress proper leeway, such consideration does not compel a reversal of the foregoing conclusion.

17. Similarly, with respect to the question of remote control operation, the Commission is of the opinion, in the light of the present status of the equipment needed for such operation, the experimental demonstration of feasibility, the conditions imposed upon its authorization in petitioner's proposals and here adopted, and the salutary purposes to be accomplished by its use in appropriate situations, that authorization of the remote control operation on a regular basis is now desirable.

18. All interested parties have been afforded ample opportunity to file written comments and exhaustive comments have been received. Because of this and the further fact that most of the conflicts engendered by these comments are based on opinion, surmise, or prognostication, it does not appear that further oral presentation would be of material assistance to the Commission upon this matter. Accordingly, the requests of various parties for permission to make oral presentation are denied.

19. Authority for the adoption of the proposed amendment is contained in Sections 303 of the Communications Act of 1934, as amended, and Section 4 of the Administrative Procedure Act.

20. In view of the foregoing, IT IS ORDERED, That, effective 30 days after publication in the Federal Register, Part 3 and Part 13 of the Commission's Rules and Regulations, the Standards of Good Engineering Practice Concerning Standard Broadcast Stations, and the Standards of Good Engineering Practice Concerning FM Broadcast Stations ARE AMENDED as set forth in the attached appendix.*

By Direction of the Commission.
T. J. SLOWIE, Secretary

Attachment*; Adopted January 26, 1953; Released: January 27, 1953.

* To be published in *Federal Register*.

The Big (TV) Picture

MERGING of ABC and United Paramount Theatres, according to free-swinging GOP Sen. Tobey and Democratic Comr. Hennock, spells the beginning of the end of independent radio and TV and their inevitable fate as chattels of Hollywood.

That argument is as fallacious as the one used two decades ago when the then new New Dealers feared that the newspapers, if given a foothold, would devour or suppress radio. There are so many instances of the radio tail wagging the newspaper dog that this line of argument long since has evaporated.

So it is destined to be with the movie people. Their big interest is television, which has affected box-office and which, arguments to the contrary aside, has contributed to the darkening of many theatres. The motion picture producers are countering with fewer and better pictures, and the exhibitors are presently pleading the case of theatre TV. Then there are the pay-as-you-go systems which will have their day before the FCC.

In the merger case, UPT could not conceivably envisage great prosperity in the operation of exhibition houses. That was its lot upon forced separation from Paramount Pictures in 1949 under the consent decree. To be successful, UPT has to earn a return for its stockholders. It found ABC in dire need of new money. It had that money. Its management has confidence in TV and in radio too. Hence the transaction.

Business men invariably turn to new ventures in their quests for success. Who were the men who went into the "flicker" business at the turn of the century? They came from all fields, including the legitimate stage. And who were the men who pioneered radio in the '20's? They were engineers, manufacturers, publishers. They are among the men who fostered the early development of TV.

It is logical that motion picture exhibitors should look to TV as a new field for venture capital. Many exhibitors are applicants for stations. When and if they are successful, they become broadcasters first. One TV station can do the job of hundreds of exhibition houses in coverage of people. TV is bigger than motion pictures. It is to be hoped that it won't become as bloated and as subservient to as many unions and pressure groups.

The argument that the ABC-UPT merger sets a precedent for other movie groups ignores the facts. The law limits the number of TV stations any entity can own to five. Five stations in an ultimate 2,000 could hardly constitute monopoly. If other motion picture interests propose to buy existing networks, there's always the FCC, on the one hand, and the Dept. of Justice, on the other, to take a look.

Sen Tobey has introduced a far-reaching bill to preclude "monopolists" from procuring station licenses. If and when hearings are held, all sides will have the opportunity to be heard. Parenthetically, it will be recalled that Congress, only last session, eliminated the "double jeopardy" provision on anti-trust, in enacting the McFarland Bill affecting FCC procedures.

As we see the big picture, film will be to TV what the transcription and record is to radio. Ownership-wise, radio has never become subservient to any other field. Nor will television.

Drawn for BROADCASTING • TELECASTING by Bud Kling

"Okay, men, now go on out there and HIT THEM HARD—HIT THEM HARD!"

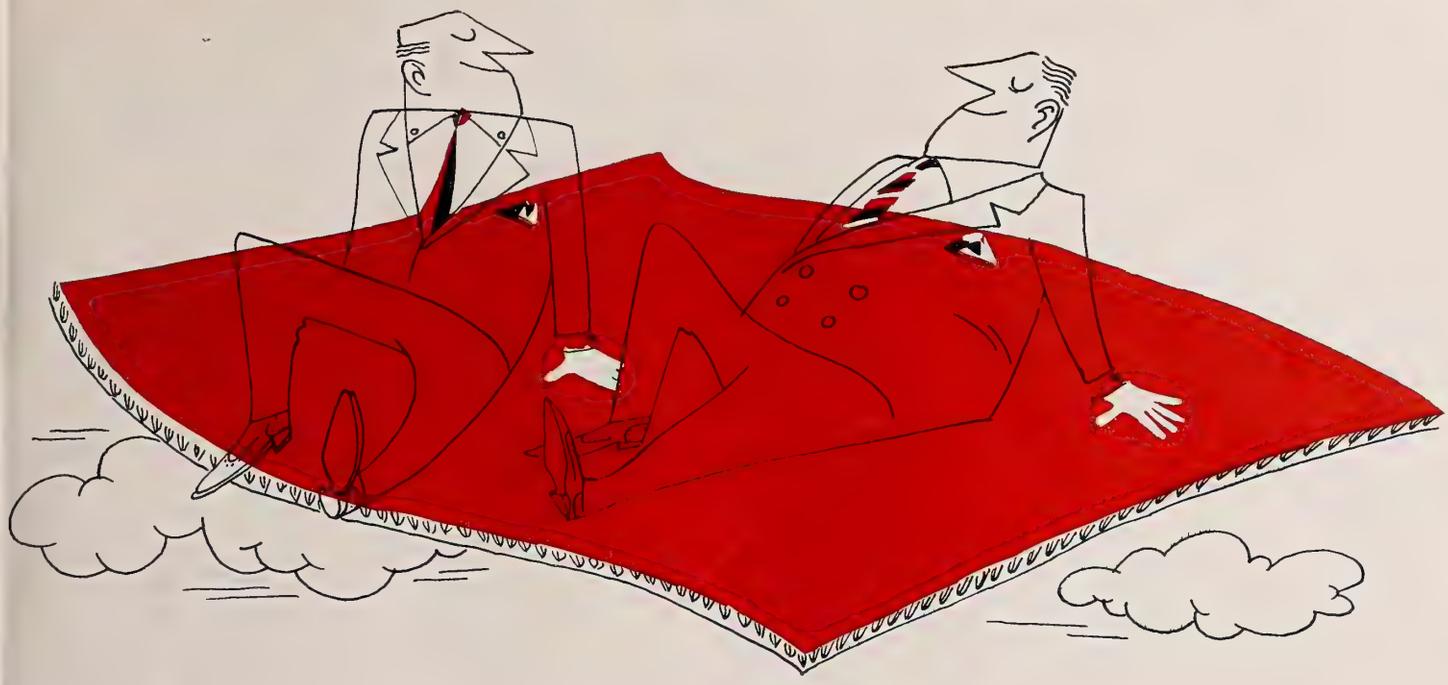
Why Radio Is Bigger

THE EXTENT of the changes that have taken place in radio in recent years is clearly illustrated in several articles appearing in this publication last week and in this issue.

BROADCASTING • TELECASTING's own analysis of 1952 business showed that despite a 13.1% decrease in network time sales total radio volume was comfortably up over the level of 1951.

A special article about independent radio station operation disclosed how independents, as a group, have improved their economic standing steadily while network affiliates, as a group, have suffered some reverses since television came along.

Another story, based on results of the Nielsen national survey, reported that 44% of all U. S. radio homes have two or more radios and that 22 million families own one or more car radios.



In this issue a special article explains how WSB Atlanta undertook a complete revision of its programming to re-arouse listener enthusiasm for radio and wound up with measurable financial gains.

While at first glance these four stories seem somewhat unrelated, the truth is that they are all part of the big story of changing business of radio. What is happening, obviously, is that successful broadcasters are relying less and less upon programming and business produced for them by big, centralized sources and are resorting more and more to independent operation. "Independent" here is not used in the sense of non-affiliation with networks but rather in its more general sense.

What also is happening is that people are still buying radio sets for their homes and for their cars, presumably for the purpose of listening to them. It is apparent that they like what they hear well enough to invest money in the equipment necessary to hear it. This trend toward multiple sets, *ie.*, those not in the living room, suggests also a new trend in audience desires.

Summarized too briefly, these desires are to hear something on radio that is different from that which can be seen on TV. That is where the Nielsen figures on "second sets" tie into the success stories of the unaffiliated stations, which historically have programmed against network radio and, hence, against network television. It is also at least a partial explanation of the results that WSB —a network affiliate—has obtained from its revamped and localized programming.

Radio is undergoing a profound change. And it seems to be for the better.

Even the owners thought the carpet was too high

—so they moved it from the second floor, where traffic was relatively light, to the first. We were hired to plug the move.

The firm, A. W. Peterson Co., sells home furnishings, sponsors our 8 a.m. news three days a week. This was supplemented for three weeks with sixteen spots publicizing the change.

Result: 6,000 people visited the new carpet department within the first two days after it opened.

Moral: *Eastern Iowans don't spend* all *their time counting money.*

THE NEWSWEEKLY OF RADIO AND TV

How is your network TV dollar doing in New York?

The odds are 3 to 1 that your network TV program is getting a lower rating in New York than elsewhere. Telepulse says so, in measuring all shows on all hookups.

To bolster your sales effort in this Number One market, you need *guaranteed viewing* — and "Guaranteed Viewing" is the name of a new plan now at work, exclusively, on WOR-TV.

Others are now profiting from its unique strategy.

You can, too. May we show you how?

it's good to be 9 *on WOR-TV*

PROCTER & GAMBLE DOES A COMPLETE JOB...

SO DO HAVENS AND MARTIN, Inc. STATIONS . . . { WMBG WCOD WTVR

Procter & Gamble will begin its 30th year of radio sponsorship in 1953. P & G's early "home economist" programs, its "soap opera" successes, ushered in by "Ma Perkins" in 1933, sound like radio's own history of programing. Radio, and now television, are proud of P & G's consistent use of the airlanes to reach and sell Mrs. Homemaker.

Havens & Martin, Inc. Stations, also pioneers in broadcasting, comprise Richmond's one and only complete broadcast institution. WMBG—WCOD—WTVR provide their loyal audiences with fine entertainment and public service. Virginians *have a habit* of turning to these First Stations of Virginia. Advertisers have, too. It DUZ bring CHEER, JOY and high TIDE in sales!

FIRST STATIONS OF VIRGINIA

January 10, 1953

REUBEN E. SOMMER
PRESIDENT & GENERAL MANAGER

Mr. James E. Edwards, President
WLS, Prairie Farmer Station
1230 Washington Blvd.
Chicago 7, Illinois

Dear Mr. Edwards:

You and your fine staff of entertainers, announcers and technicians have done an outstanding job. Not only for us at Keystone but, perhaps more important, you have done a wonderful job of providing a source of good, clean, truly American entertainment for your vast audience in WLS - Land.

Twenty years is a long time. On January 14, 1933, when the first Keystone Barn Dance Party went on the air, many of today's regular listeners were small children. To maintain the standards which were set, during the years of war and worry, of peace and promise, is an achievement which few, if any, in your field can match. You can be justly proud of this achievement.

Sincerely yours,

R E Sommer

President and General Manager.

RES:FW

The Keystone Steel & Wire Co. has been a regular user of WLS time since March 1929. For the past 20 years they have Sponsored a half hour of the National Barn Dance every Saturday night. The opportunity to serve Midwest farm families during that period is one we are glad to have shared with this fine company and its equally fine products.

IN MOVE to coordinate more closely with sales end, realignment of NBC advertising, promotion, sales planning and research department due to be announced shortly, coincident with resignation of Ruddick C. Lawrence, director of promotion, planning and development. In new organization chart Jacob Evans, director of advertising and promotion, and Robert W. McFadyen, director of development, will report to George Frey, vice president and sales director, while Hugh M. Beville, director of research and planning, will report to William H. Fineshriber Jr., who moves in from Mutual on March 2 as vice president and general manager of radio and TV networks (also see story page 68).

★ ★ ★

NBC HAS made active bid for Colgate-Palmolive-Peet to move its half-hour *Strike It Rich* program, currently on CBS-TV three times weekly, to NBC-TV as Monday-through-Friday show to bolster network's morning TV schedule. Tomorrow (Tuesday) is deadline for Colgate to let CBS-TV know as to renewal. NBC-TV offer described by C-P-P executive as 99 percent dead issue. Interesting sidelight is fact that Joseph H. McConnell will soon become president of C-P-P.

★ ★ ★

THERE WON'T be any consolidation of broadcasters' meetings this year. Likelihood is that NARTB, BMI and BAB will go their separate ways in holding district and regional sessions but with each sticking to its own sphere of interest. That was decision of NARTB board last week at Belleair, Fla., which agreed to adhere to management level. It requested BMI and BAB to operate in their respective program and sales fields. BMI and BAB, however, may combine sessions to conserve broadcasters' time.

★ ★ ★

PASTE in your hat word "T-VAC" because it may become as standard as Hooper or Neilsen in TV future. That's tentative name given proposed circulation audit project of Dr. Franklin R. Cawl, proposed to NARTB TV board at Belleair, Fla., last Wednesday, and which is being further explored by board committee headed by Campbell Arnoux, WTAR-TV Norfolk. Term means "television audience circulation."

★ ★ ★

STILL BEING awaited is reply of Zenith's president, Eugene F. McDonald, to plea of NARTB President Harold Fellows that Zenith modify or kill "anti-commercial" television film which also is regarded as condemnation of all advertising. Previewing of film month ago resulted in Mr. Fellows' letter and also prompted Henry W. Slavick, WMC-WMCT (TV) Memphis, to blast against film and advocates of subscription television.

★ ★ ★

KANSAS CITY STAR (WDAF-AM-TV) intends to battle to end on government anti-trust suit dropped in hopper only days before wind-up of Truman administration. Convinced that it's on sound ground and that its operations are beyond reproach, board of cooperatively owned enterprises is moving ahead with plans to combat every aspect of government indictment, including attempt to tie in radio-TV operations. Supreme Court adjudication will be sought if necessary.

★ ★ ★

RESIGNATION of Paul Hoffman as president of half-billion dollar Ford Foundation and appointment of H. Rowan Gaither Jr. as acting president gave rise to speculation to possible permanent appointment of important broadcast figure as Mr. Hoffman's successor. Among prominent personages mentioned as possibilities are: Dr. Frank Stanton, CBS president and chairman of newly created Ford Foundation Center for Advanced Study in Behavioral Sciences; Wayne Coy, former FCC chairman, now president of KOB-AM-TV Albuquerque and consultant to Time Inc., and John Cowles, chairman, Cowles Broadcasting Co. (WNAX Yankton, KRNT Des Moines) and executive of Cowles newspapers and magazines. (Mr. Stanton vigorously denies he should be considered as candidate.)

★ ★ ★

EVIDENCE of intense interest of Ford Foundation in television's effect upon public welfare seen in plans for naming of new public policy committee on TV comprising cross-section of experts within and without TV operating field. Among those reportedly contacted are Robert D. Swezey, WDSU-AM-TV New Orleans, chairman of NARTB TV board; CBS President Frank Stanton; NBC President Frank White; Paul Lazarsfeld, Columbia U.; I. Keith Tyler, Ohio State U.; Wayne Coy, Gardner Cowles Jr., Beardsley Ruml and Gordon Gray, WSJS Winston-Salem.

★ ★ ★

CHANGES in TV and other broadcast hearing rules to expedite and simplify competitive proceedings, adopted by FCC last week (see story page 45), are being eyed closely by some consulting engineers. With Commission clearing technical qualifications in most instances before hearing is set, some engineers are wondering what is left on which to hold hearing. But lawyers note that in cases with significant technical differences, there will be plenty of expert testimony required from engineering counsel.

★ ★ ★

RESPECTING hearing simplification, few lawyers and engineers alike recalled, until reminded by FCC Vice Chairman Rosel H. Hyde, that Administrative Procedure Act allows "paper" hearing for such proceedings, like that employed for final phase of TV reallocation case. Comr. Hyde, at luncheon meeting Friday of Federal Communications Bar Assn., assured group FCC won't go that far to simplify TV contests.

IN THIS ISSUE

LEAD STORY

Reports of widespread skullduggery in TV station applications are being investigated by FCC. Trick assertedly is to file, at last minute, competing application in locality where bona fide application is about to be granted CP, with motive either outright blackmail or delay to achieve competitive advantage. *Page 27.*

ADVERTISERS & AGENCIES

Wine merchants are pouring money into radio and TV. *Page 28.*

FACTS & FIGURES

NARTB board endorses exploration of million-dollar-plus project to obtain standard circulation measurements for TV. Intention: To come up with statistics comparable to circulation audits of printed media. *Page 33.*

FILM

TV technical experts think third-dimensional films, now in production for movie use as means of meeting TV competition; may wind up as integral part of color TV. *Page 36.*

GOVERNMENT

Special federal court slaps down FCC's long-pending anti-giveaway rules as representing censorship in violation of First Amendment. *Page 38.*

FCC revises rules and procedures to expedite TV station hearings, which are now bogged down in collateral detail. *Page 45.*

TRADE ASSOCIATIONS

NARTB staff reorganized, with creation of four vice presidencies. NARTB budget for 1953-54 fiscal year set at $735,000. *Page 50.*

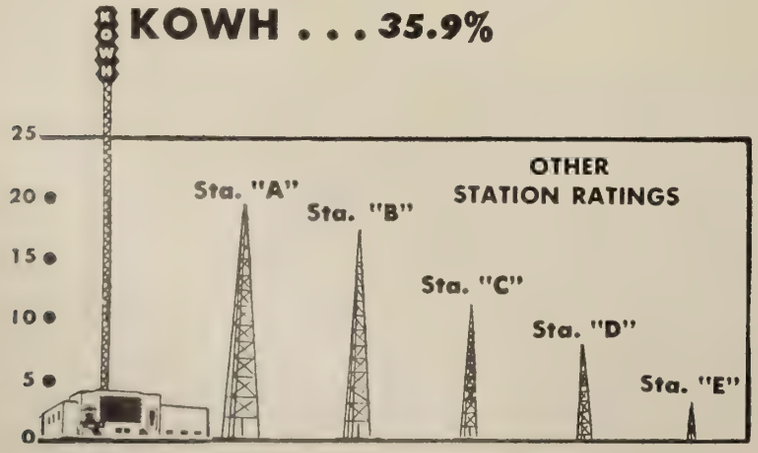
The Proof of the Pudding...

. . . Is in the LEADING—or so the JELL-O-PUDDING and PIE FILLING box-top and 25-words-or-less contest indicates!



Conceived by Young & Rubicam for General Foods and aired in a spot campaign over 120 stations, the contest featured a slant that loaded the ether with sizzling pitches. To the disc-jockey that captured the greatest number of entries according to market size and time cost went an expenses-paid vacation in Paris for himself and wife. JELL-O-PUDDING and PIE FILLING even picked up the tab for baby sitter fees!

T'aint fittin' to say, "We told you so," so we'll be content to hope KOWH's Hooper High Sandy Jackson and wife enjoy the trip.

Of course Sandy won—more proof that you can't do better than first place! And that's where the Hooper averaged below for the 14-month period from October, 1951, to November, 1952, puts KOWH—thanks to personalities like amiable Sandy.

C'est Magnifique!

- *Largest total audience* of any Omaha station, 8 A.M. to 6 P.M. Monday through Saturday! (Hooper, Oct., 1951, thru Nov., 1952.)
- *Largest share of audience,* in any individual time period, of any independent station in all America! (Nov., 1952.)

Atlantic Refining Signing Radio-TV Baseball Schedule

ATLANTIC REFINING Co., Philadelphia, nearing completion of annual baseball radio-TV schedule, following general lines of 1952 campaign. Negotiations handled by Les Quailey, of N. W. Ayer & Son, Atlantic's agency.

Radio schedule expected to be generally similar to that last year. TV coverage may be extended somewhat. Atlantic radio-TV confined to company's Eastern Seaboard marketing area, extending westward into Ohio. Major league teams to be covered include Boston Red Sox, Philadelphia A's and Phillies, and Pittsburgh Pirates.

WKBW Walkout Continues

WKBW Buffalo, silenced briefly early in week by NABET walkout, still operating fulltime at weekend. Regular schedule maintained since 2½-hour off-air interval. Station claims union gave no notice of contemplated action and has made no request for further negotiations besides rejecting station proposals to renegotiate contract ended Jan. 31. Union said to have refused to negotiate on proposed combination operation, contending such contract might lead to similar contracts all over country.

Deny WDEF Petition

CHARGE of WDEF Chattanooga that competitive vhf Ch. 12 TV bids of Southern Television Inc. and Tri-State Telecasting Corp. are incomplete and should be dismissed, denied by FCC Friday.

HYDE 'STRIKE' BID PLEA

FCC Vice Chairman Rosel H. Hyde asked members of Federal Communications Bar Assn. Friday for their help in stemming rise of "strike" or nuisance TV applications (see story page 27). Addressing luncheon meeting, Comr. Hyde also explained new hearing rules (story page 45) and commended FCBA for initiative. New FCBA officers installed at dinner Friday night: Pres.-Fred W. Albertson, succeeding Arthur W. Scharfeld; 1st V.P.-Vincent B. Welch; 2d V.P.-Percy H. Russell Jr.; Sec.-E. D. Johnston; Treas.-Robert M. Booth Jr. Committee also formed to direct awarding of new memorial medal honoring late Louis G. Caldwell.

NCAA Sets TV Plans Group With Byers Temporary Head

TV committee to evolve plan for 1953 controlled football telecasts appointed Friday by NCAA council in Chicago. Walter Byers, executive director who will serve as chairman pro tem, will call meeting in next fortnight to consider general policy and appoint TV program director. Once developed, plan to be submitted to NCAA for referendum vote with two thirds majority required for approval. Committee comprises representatives of eight NCAA districts, two small colleges and two consultants for each district.

NARTB TO STUDY TRADE ASSN. UNITY

(See earlier story, page 50)

STUDY of trade organizations serving radio and TV, including state associations, to define spheres of operation, authorized by NARTB joint boards Friday at Belleair, Fla. Offered by Robert T. Mason, WMRN Marion, Ohio, resolution is designed to avoid conflicts among NARTB, BMI, BAB and state associations. NARTB's sphere is ownership and management, it was contended.

Law to clarify Sec. 315 of Communications Act dealing with liability of broadcaster for libel and slander in political speeches was suggested. Joint boards agreed NARTB has reached highest state of effectiveness in its history, with membership and finances at all-time high.

Harold Essex, WSJS Winston-Salem, N. C., as member of Insurance Committee, reported arrangement had been made for tower insurance available to all stations, whether or not NARTB members, on uniform basis. Single company, he said, will underwrite insurance, offering lower rates and free appraisal service, both on existing towers and new construction.

William Fay, WHAM-TV Rochester, again named NARTB representative at Canadian Assn. of Broadcasters convention.

W. B. McGrath, WHDH Boston, reported on Radio Standards of Practice Committee's progress in revising standards, with emphasis on quality and ethics. Possible changes in commercial provisions debated. Coordination between radio and TV standards endorsed and may come before April convention.

Richard M. Allerton, NARTB manager of research, outlined scope of his five-city radio market survey report on profitable station operation. Full report will be presented to convention.

President Fellows authorized to name one committee to report to board on realignment of NARTB districts, and another to study election procedure and report to new board in June.

Board Friday also ratified radio and TV board actions taken earlier in week, and approved applications for new associate members, bringing total number to 81. New associates: Hughey & Phillips, Encino, Calif., equipment manufacturers; Workshop Assoc., division of Gabriel Co., Norwood, Mass.; George W. Clark Inc., Chicago, station representatives, and Tee-Vee Co., Beverley Hills, Calif., TV film producers.

NARTB's board announced following board meeting schedule: Radio board, June 17; TV board, June 18, and full board, June 19, all in Washington, D. C.

Complaints over too many industry meetings brought debate. NARTB district meetings to be held as scheduled, with agenda directed at top ownership and management and not at programs, sales or promotion. BMI urged to adhere strictly to program matters at its clinics with BAB, as radio sales promotion organization, to confine itself to that field. Suggestion advanced that BMI and BAB combine sessions.

• BUSINESS BRIEFLY

PHILLIPS ADDING • Phillips 66 (gasoline and oil), Bartlesville, Okla., plans to add 20 radio markets to its schedule, using morning quarter-hour news shows, effective mid-February for 52 weeks. Agency: Lambert & Feasley, N. Y.

CBS-TV Affiliates Board In New York This Week

SPECIAL business meeting of newly formed CBS-TV affiliates advisory board to be held in New York Thursday and Friday to hear network executives report on developments and plans and to consider problems common to network and affiliates. Formed as interim committee last June and given permanent status in September, board consists of Glenn Marshall Jr., WMBR-TV Jacksonville; E. K. Jett, WMAR-TV Baltimore; James C. Hanrahan, WEWS (TV) Cleveland; Clyde W. Rembert, KRLD-TV Dallas, and Philip C. Lasky, KPIX (TV) San Francisco.

BAB Adds 73

ADDITION of 73 stations to BAB ranks during January raises total membership to 783, President William B. Ryan announced Friday. He added that 240 stations have enrolled since April 1952 when BAB's current fiscal year began, representing 43.8% increase.

Latest subscribers range from 250 w to 50 kw in power and are scattered throughout 31 states and Washington. Mr. Ryan noted that BAB's steady growth "insures the fact that radio will be promoted as an advertising medium more aggressively in 1953 than ever before in its history."

Comment Deadline

DEADLINE for comments on proposed changes in Sec. 3.687(i) (1) of FCC's rules governing spurious TV emission was extended by Commission Friday to April 13.

Is M.H. YOUR Valentine?

"Speedy" plays the role of Cupid not only at Valentine's Day but throughout the year in lining-up the perfect romance between Mrs. Housewife and WSPD Advertised Products. "Speedy's" pulse-quickening (or purse-opening) arrows are loaded with the most concentrated ammunition yet invented,— RADIO and TELEVISION ADVERTISING.

"Speedy's" target is the large Toledo market where abounds a mammoth purse of potential buying power, which is in the keeping of Mrs. Housewife.

If M. H. is not yet *your* Valentine, let "Speedy" play Cupid for you.

Schwimmer Sees Giveaway Action as 'Ridiculous'

WALTER SCHWIMMER, president of Walter Schwimmer Productions, Chicago, whose radio Features Inc. launched original suit on behalf of his *Tello-Test* programs as outgrowth of FCC's proposed rules on giveaways (see story page 38) issued this statement Friday:

It appears that the court has decided that FCC's interpretation of what constitutes a consideration is erroneous and that for a radio or television program to be constituted a lottery, there must be actual payment by people to qualify as contestants.

The mere element of being at home and listening to or watching such a program is too insignificant and infinitesimal to be adjudged a consideration.

I am very unhappy about the basis of the court action because it made the FCC's dignity and prestige suffer tremendously in the minds of the public and the industry. The case represented a very expensive and time-consuming action that was ridiculous. I am also tremendously unhappy and disappointed that the whole industry was put to such an inconvenience.

As proof of how untenable the FCC's position was, the whole case was based on the factor of making a telephone call—all other elments of the telephone and studio quiz shows are equal and parallel. In other words, FCC did not include studio quizzes in their complaint or proposed regulations.

6.8 Million Radio Receivers Sold to Public Last Year

SALES of radios to public in 1952 were estimated at 6,878,547 sets by Radio-Television Mfrs. Assn. Retail TV sales for year were estimated at 6,144,990 receivers. Seasonal rise in store sales in December was shown, with 1,514,688 radios and 1,049,770 TV sets sold to consumers that month. In November 486,800 radios and 803,327 TV sets were sold retail.

RTMA reported 7,635,666 cathode ray tubes for television were sold by manufacturers last year. They were valued at $170,652,078. Sales of receiving-type tubes in 1952 totaled 368,519,243 units valued at $259,116,089 in the year 1952, RTMA found. Of receiving tubes sold by manufacturers, 337,080,311 were of entertainment type. Total 1952 value of factory-sold receiving tubes: $259,116,089.

Correspondents Dinner

FIRST Radio-TV Correspondents Assn. dinner since Korean War held Saturday at Washington's Hotel Statler. Although presence of President Eisenhower uncertain as of Friday night, head table scheduled to number Vice President Nixon, cabinet members, Supreme Court justices and Congressional leaders plus radio-TV network executives and Association officers and directors. Radio-TV Correspondents Assn. headed by Martin Agronsky, ABC. John Edwards, ABC, chairman of dinner committee.

Proposed Channel Changes

PROPOSED rule changes to correct sub-standard spacing in uhf TV allocations to nearly 40 cities reported by FCC Friday with comments due Feb. 27. Changes involved:

Anniston, Ala., substitute Ch. 70+ for Ch. 37—; Conway, Ark., 62 for 49+; Paragould, Ark., 58— for 44; Delano, Calif., 37+ for 33; Pekin, Ill., 69+ for 49+ Bedford, Ind., 68 for 39; Grinnell, Iowa, 71 for 46+; Mayfield, Ky., 63 for 49—; Hammond, La., 57 for 51+; Lawrence, Mass., 72 for 38+; Rolla, Mo., 46 for 31; Salisbury, N. C., 80 for 53+; Springfield, O., 76 for 46+; Bradford, Pa., 70— for 48+; Tullahoma, Tenn., 68— for 65+; Austin, Tex., *70— for *30—; Greenville, Tex., 69— for 62.

AUTO RADIOS

THERE ARE nearly 25 million radios in the nation's 38.5 million passenger automobiles, according to Nielsen Coverage Service study conducted last spring and announced late last week by A. C. Nielsen Co., Chicago. Americans own 24,964,000 car radios, representing 65% of all automobiles, pointing up fact that U. S. homes have more than one car and one car receiver, NCS explained.

Opposes Educational TV

TERMING estimated costs "unrealistic" and actual costs "burdensome" to taxpayer, Edward C. Obrist, manager of WNHC-AM-TV New Haven, voiced opposition to Connecticut's plan for network of three noncommercial educational TV stations. Speaking at symposium in Bloomfield, Mr. Obrist said he was in favor of educational TV per se, but suggested that educators experiment with programs on commercial outlets to become acquainted with costs, techniques, and capabilities of medium.

Eleven speakers, including Dean Kenneth Bartlett of Syracuse U. and Delbert Clark of Ford Foundation's Fund for Adult Education, approved project, which will be discussed further on Wednesday at State public hearing in Hartford. Proponents argued it was difficult to obtain definite time on commercial stations that would not be pre-empted by sponsored programs and asserted that costs in long run would be lower on noncommercial outlets.

New Columbia Ch. 10 Bid

NEW TV BID for vhf Ch. 10 at Columbia, S. C., by WIS-TV Corp., new firm composed of WIS owners (85%) and group withdrawing from WMSC Columbia, reported filed by FCC Friday. Pending competitive bids of WIS and WMSC to be dropped. WMSC also filed for consent to transfer of control to show withdrawal of A. R. Heywood II, Thomas B. Boyle, Paul A. Cooper, Joseph L. Nettles, Frank B. Gary, E. Grenville Seibels II and John C. Cosby. All but Mr. Cosby take WIS-TV Corp. stock.

Other TV bids filed Friday by KSGM Ste. Genevieve, Mo., for uhf Ch. 59 at Chester, Ill., and by Community TV Corp., New Orleans, to amend to return to original request for uhf Ch. 26. Latter amended to Ch. 61 last December.

New FM station bid of Chicago Skyway Bcstg. Co., proposing storecasting service there, being held in pending file, FCC advised applicant Friday in view of long pending study to determine legal status of functional music FM outlets.

Demby Productions Formed

DEMBY, BROUN & CO., N. Y., has been reorganized as Demby Productions Inc., TV and motion picture producers, President Emanuel Demby announced Friday. Mildred Demby was named vice president of Demby Productions in place of Myron Broun, who will serve as film consultant to firm. Hunter W. Smith has been named accounts supervisor and Monroe A. Werthman, production supervisor.

PEOPLE

NEWELL T. SCHWIN, advertising manager of Household Finance Corp., Chicago, substantial radio-TV time buyer, resigned Friday. His future plans not disclosed. He will be succeeded by A. G. Waack, eastern advertising manager of HFC. Both Mr. Schwin and Mr. Waack have been with firm over 20 years.

H. WYNN BUSSMANN, JAMES R. ENGLISH JR., ROLAND W. McKITRICK and **EVERETT M. NELSON,** client service executives, promoted to account executives, Nielsen Radio-Television Index Service, A. C. Nielsen Co. Messrs Bussmann and English will be responsible for New York radio-TV accounts and Messrs. McKitrick and Nelson in Chicago.

GEORGE B. SMITH named vice president of Robert W. Orr & Assoc., N. Y. Before joining Orr he was Lever Bros. brand manager.

LEWIS S. WECHSLER, Young & Rubicam, N. Y., to Emil Mogul Co., same city, as director of radio-TV department.

JACK BATTEY, advertising manager of Valvoline Motor Oils & Greases Co., N. Y., and formerly radio-TV timebuyer for Biow Co., N. Y., appointed area supervisor for DuMont Television Network's station relations department.

BEN SELVIN, manager of Southern Music Pub. Co., named artists and repertoire manager of RCA Victor Custom Record Div., to work chiefly in connection with RCA's Thesaurus library and radio syndicated catalog. He succeeds **H. H. (BERT) WOOD,** who resigned effective Feb. 28.

ALBERT BOYARS, former account executive with David O. Alber public relations firm, N. Y., to greater New York Fund as assistant radio-TV director.

WGRD Protest Dismissed

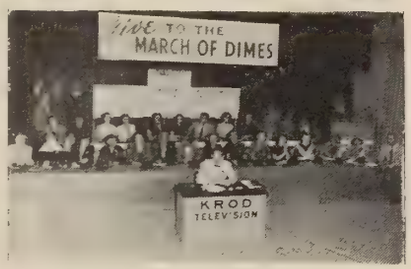
PROTEST by WGRD Grand Rapids, Mich., on FCC's grant of uhf Ch. 35 at Muskegon to Leonard A. Versluis dismissed by Commission Friday in ruling which held WGRD is not party in interest and that *Saunders* doctrine does not apply to AM outlet claiming injury from TV grant [B•T, Jan. 26]. Comr. Frieda B. Hennock dissented.

CBS-TV Signs Five

SIGNING of five new affiliates by CBS-TV announced Friday by Herbert V. Akerberg, vice president in charge of station relations: KVTV (TV) Sioux City, WETV (TV) Raleigh, WHYN Holyoke, KGUL-TV Galveston and KTNT-TV Tacoma.

New DuMont Affiliates

ADDITION of two affiliates to DuMont TV Network, bringing total to 91, announced Friday by Elmore B. Lyford, director of station relations department. They are: WCOV-TV Montgomery, Ala., which will operate on uhf Ch. 20, starting March 1 (owned and operated by Capital Broadcasting Co.), and KGUL-TV Galveston, which will operate on vhf Ch. 11, effective March 15 (owned and operated by Gulf Television Co.).



Barkley on Radio

EX-VICE PRESIDENT Alben W. Barkley's *Meet the Veep* program (NBC-TV, Sun., 5:30-5:45 p.m. EST) was to start on NBC radio yesterday as Sunday series, 6:15-30 p.m. EST. Program will use tape recording of TV version [B•T, Feb. 2].

El Paso's March of Dimes
TELETHON Proves —
for *RESPONSE-ABILITY*

it's **KROD-TV**

After only 3 weeks on the air in a completely new TV market, KROD-TV received more than $24,000 in pledges (2,064 persons responded) to the March of Dimes during its first "Telethon" attempt.

Last year, the entire drive netted only $37,000.

Pledges from many points beyond 100 miles from El Paso attest to KROD-TV's coverage. The widespread response to the "Telethon"

demonstrates dramatically that the El Paso — KROD-TV "area" is BIG!

Yes, for public service OR commercial telecasting, KROD-TV has demonstrated that it has a tremendous following for a new TV market. Add to this the finest in TV studio facilities, channel 4 assignment with mountain-top transmitter, CBS-TV and DuMont affiliations, a staff of *experienced* TV sales-service and production people, forceful promotion and merchandising, and you have the winning combination for El Paso!

Women, too, are interested

Women's stake in life insurance is constantly growing—and, along with it, the number of questions they are constantly asking about it! Yes—women *are* interested.

Not only are women named to receive the proceeds of most of the policies currently in force—but they themselves own more than $45 billions of life insurance. Almost as many women as men are policyholders.

They own insurance for the same reasons as men—to protect dependents and to provide for their own retirement years.

The Institute of Life Insurance has long recognized this interest on the part of women. It has published a number of informational booklets designed to answer the questions they ask about life insurance and to promote a better understanding of its place in family financial security.

In addition, in response to requests from women's organizations and other groups, it has provided speakers for women's financial forums held throughout the country.

In current campaigns, in radio talks, in magazine releases, and other forms of communication, the material presented is quite frequently based on questions of special interest to women.

Through these services, the Institute is helping to broaden the understanding of a subject that is of vital interest to the women of America.

Informational Booklets

These booklets, published by the Institute of Life Insurance, can be helpful as source material for radio editors, writers and commentators. They are yours for the asking. Also if there is any special way in which the Institute can be of assistance to you, please let us know.

MEET THE VEEP

Sun. 5:30-5:45 p.m. on NBC-TV.
Producer: William R. McAndrew.
Director: Ted Ayers.
Cast: Alben W. Barkley, Earl Godwin.
TV Counsellors for Mr. Barkley: Louis G. Cowan, Charles F. Gannon.

A GOOD idea was vitiated almost to the vanishing point in the opening telecast of *Meet the Veep,* new NBC-TV Sunday afternoon series starring Alben W. Barkley, the nation's former Vice President and only "Veep".

The plan to bring Mr. Barkley into the homes of the American viewing public for a quarter-hour each week must have seemed foolproof when first presented. Here is a man who in 40 years of public service has seen history from the inside, a man whose intimate association with our country's leaders has given him a chance to understand the whys and hows of our national policy better than almost any other living man.

What a wonderful idea it would be to let the Veep share his inside information with the American people, particularly as he has a warm and friendly personality which projects well through the TV screen and is enhanced by his flair for flowery, folksy oratory.

What a wonderful idea it would be to present the Veep together with another lovable old codger, the veteran political reporter, Earl Godwin, who has been covering political history for about as long as Mr. Barkley has been helping make it.

Unsure and Wavering

Maybe a third idea was needed, an idea as to what kind of a program *Meet the Veep* was going to be—intimate pictures of great men and great events, affording the viewer an inside-light on the formal records of the history books, or amusing anecdotes of the Washington scene. The first Barkley-Godwin telecast seemed unsure of just which viewpoint it was trying to observe and, in wavering between the two, fell flatter than a bride's first cake.

For example, take Mr. Barkley's account of his meeting with Franklin Roosevelt on the President's return from Yalta, an early morning private session to which he was summoned by Mr. Roosevelt "to let me bring you up to date on Yalta and you bring me up to date on Washington." Here was a fine opportunity for informed comment on one of the most hotly discussed events of modern history, a wartime meeting among the leaders of Britain, Russia, and the United States whose details are still so little known as to make them more a matter of rumor and argument than factual report. Or, if folksiness rather than political comment was to be the program keynote, here was an opportunity for a personal portrait of a President returning from what may well have been the turning point in current history. Was he grave or gay, sobered by the serious decisions that had been made or elated over agreement on a plan for winning World War II? Was he worn out from overlong hours of discussion or buoyed up with hope for the future?

But *Meet the Veep* gave us neither of these. Instead, Mr. Barkley reported at length how he had found Mr. Roosevelt in the bathroom shaving, and with no chair available, had seated himself "on a bathroom fixture" (this said with a grin as ingenuous as the one used by Arthur Godfrey at similar times). He reported that during the discussion Mr. Roosevelt became so interested that he lathered himself six times before finally shaving. When the Veep paused at this point, Mr. Godwin called upon all of his hard-earned skill at political questioning to wring the final definitive bit of information from Mr. Barkley—that FDR shaved with an old-fashioned straight-edge razor.

MESSRS. GODWIN AND BARKLEY
TV is not a cracker barrel

Best part of the telecast was the conclusion, where, growing serious for once, the Veep dealt with the grave responsibilities facing our new President (whom he surprisingly referred to as "Eisinghower") and expressed the hope that the Democratic Party would not misinterpret its role as "loyal opposition" to launch an immediate flood of carping criticism upon the new resident of the White House, before he has had the chance to show what he can do.

Production of *Meet the Veep* was on a par with the program's format, cluttered, confused and overcrowded. Mr. Barkley and Mr. Godwin sat facing each other across a desk of subexecutive dimensions, so unsuitable to a former Vice President as to give the whole scene a ludicrous aspect.

Meet the Veep, despite its false start, has the ingredients of a good TV program which could make the Veep a welcome visitor in millions of family living rooms, either as significent political comment or as anecdotal reminiscence. But it won't be welcome if it continues its initial imitation of two garrulous old-timers recalling their former glory over the village store's cracker barrel.

YOU ARE THERE

Sun. 6-6:30 p.m. on CBS-TV.
Sponsor: Electric Light & Power Cos. of America.
Agency: N. W. Ayer & Son.
Producer: Charles Russell.
Director: Sidney Lumet.
Cast: Walter Cronkite, Charles Collingwood, Don Hollenbeck.

THE re-creation of significant events on television, in the manner that they would presumably have been covered if TV had been around at the time, is a programming idea which attained generally satisfactory results in this series' aural antecedent on CBS Radio and which promises to be sound enough on TV.

Unfortuately, however, the first presentation of the television version of *You Are There* fell afoul of a problem that occassionally bothered its radio ancestor. The problem is to select an event that was of more than transitory importance. The explosion of the German dirigible "Hindenburg", which was "covered" on the opening program, does not qualify.

It was plain that the producers of *You Are There* were aware that they had a problem on

WALTER CRONKITE

A problem not yet solved

their hands. In an effort to solve it, they endeavored to show how the Germans hoped to obtain military advantages by developing lighter-than-air craft and how the Hindenburg disaster quashed their plans. Though at the time this would have been a valid theory the subsequent development of fast airplanes and destructive air armaments would have ruled out dirigibles anyway. History has relegated the "Hindenburg" to the role of a minor disaster.

Future program subjects seem more promising. Next Sunday *You Are There* is to attend the Boston Tea Party. That event would seem perfectly to meet the specifications for a suitable show. It may, however, put the program and its basic format to a new test.

If the program adheres to the technique of staging the "special event" type of telecast, with on-screen narration from central control and other points, the clash between the modern trappings of television and the 18th century costumes and scenes may destroy the reality of the production. The producers of the television version of *You Are There* will have headaches that their radio predecessors were spared.

Books

MODERN RADIO ADVERTISING, second edition. By Charles Hull Wolfe. Funk & Wagnalls, 153 E. 24th St., N.Y. 10. 738 pp. $7.50.

ALSO including "an analysis of television advertising," this book by Mr. Wolfe, described as director of radio and television at McCann-Erickson Inc. Adv., details 38 uses and advantages of spot radio, 16 steps in a radio campaign, merits of 18 types of commercials, 12 steps for creating commercials, 9 spot announcement techniques, 18 ways to use sound, sonovox and musical effects and 12 steps in creating a radio jingle.

Its 43 chapters are divided into seven parts, including radio advertising fundamentals, techniques, network, spot, commercials, history and future and opportunities. Each chapter has a foreword by well known experts in the respective fields.

The book, listed on the *Printers Ink* Business Bookshelf, includes 124 drawn illustrations, an appendix on special aspects of radio advertising by selected authorities and a glossary. Its publishers recommend it to radio station and agency executives, commercial writers, timebuyers, publicists, producers, directors, researchers, copy chiefs, script writers, announcers, salesmen, representatives, entertainers and students.

IT

It takes time to sell goods today. It takes network radio time to sell goods to the most people. And it takes time on the PLUS network to sell goods to the most people at the lowest cost. These simple facts are attested by some of the best minds in marketing, with some of the biggest (and some of the smallest) budgets in the business: last year they hired 17% more of our time than in 1951! Behind this expert testimony, you'll find two key reasons why it pays clients to spend time with us.

TAKES TIME

First, the 60,000,000 people living in Non-TV America spend twice as much time tuned to our stations as to anybody else's. And second, we price our time by a new, unique formula* that keeps costs synchronized with actual values —in TV areas as well as in the rest of the U. S. Small wonder Mutual sponsors so consistently convert time-pennies into sales-dollars! We can demonstrate how you can, too... in no time.

IS

KSTP-TV

our respects

to DAVID H. COGAN

DAVID HAROLD COGAN, president of CBS-Columbia Inc., New York, ordinarily a sober, mild-mannered individual, is explosive on one subject: He thinks radio and television manufacturers are producing sets with horse-and-buggy methods in a Buck Rogers era.

"Our assembly line production techniques have improved little if any since 1926 or 1927," Mr. Cogan says. "We're years and years behind the automobile industry."

Mr. Cogan plans to meet this problem in the same manner that he has been tackling troublesome roadblocks in the electronics field over the past 25 years. Together with his associates at CBS-Columbia, he has formulated what he describes as a "new concept of the assembly line." He intends to introduce this production technique at the new plant his company is constructing in Long Island City.

Though Mr. Cogan has earned an enviable reputation in the electronics field as a super-salesman, he believes that it was the introduction of another concept of his in 1929 that hastened his upward climb. At that time, while with the Amrad Corp. of Medford Hillside, Mass., he invented an automatic tube testing device that spurred the sale of tubes.

Credit for Salesmanship

"And I got credit for being a terrific salesman," Mr. Cogan comments.

Mr. Cogan attributes much of his success to his upbringing. He was born in Barton, Vt., on Jan. 10, 1909, and shortly thereafter his family moved to Boston. Mr. Cogan credits his father, Bened Cogan, owner of a chain of retail food stores in New England, with stimulating his interest in selling and merchandising. His mother was the former Annit Grant.

"When I was six," Mr. Cogan recalled, "father would ask me to stay in the store in Boston and help arrange the merchandise. Later, I waited on customers and assisted in the buying."

Despite this early grounding in the retail business, Mr. Cogan's interests veered toward the electronics field when he entered the Pinkerton Academy at Derry, N. H., in 1921.

He received his initial practical experience in the electronics field during the summers of 1928 and 1929 when he was a field engineer with Amrad. During the fall and winter months, Mr. Cogan continued his electrical engineering education at Northeastern U., Boston.

He accepted a full-time position with Amrad in 1929, curtailing his college studies. During this period Mr. Cogan invented his tube tester and shifted the course of his career from engineering to sales and management.

Shortly after he invented the testing equipment, Mr. Cogan resigned from Amrad and formed the Cyrad Mfg. Co., Boston, to produce and merchandise testing equipment. For two years, Mr. Cogan was on his own until the Hytron Corp. purchased Cyrad. In the changeover, Mr. Cogan became a sales engineer and later, district sales manager.

In 1932, he was appointed sales manager for Hytron and in 1945 he was elected vice president and director of the corporation. Upon Hytron's acquisition of Air King Products, Brooklyn, in 1946, Mr. Cogan was elected president of the Air King and also Royal Wood Products Co., cabinet manufacturers. In 1951, after the merger of Hytron and CBS, he was appointed president of CBS-Columbia Inc. The company manufacturers radio and television sets and components, as well as clock radios.

In his present post, Mr. Cogan supervises the activities of some 1,400 employes in four plants in the New York area. He confides that an expansion program is the company's first order of business.

In his business, Mr. Cogan stresses that "the important thing is flexibility." He describes the "ideal situation" as one "in which there is financial and production strength without the lethargy that goes with big business." And he is proud that CBS has given him considerable lee-way in the management of CBS-Columbia.

Firm's Progress

He says he is "not entirely satisfied" with the firm's progress though he estimates it has jumped from 65th to 10th place among manufacturers within the past few years. He believes the company's projected expansion program will place it in a stronger competitive position. Mr. Cogan acknowledges that one of the company's main concerns is to "let people know that CBS-Columbia is a television or radio set made by CBS."

His rigorous work schedule has forced him to relinquish many outside activities although he still is chairman of the Brooklyn Cancer Fund and a member of the Radio-Television Mfrs. Assn. and National Assn. of Mfrs.

Mr. Cogan married the former Annie Josephine Zeifman in 1934. They make their home in Beechurst, N. Y. They have a son, Bruce Melvin, 8½.

Tall and medium-built, Mr. Cogan is quiet and serious of mien—but he astounded close colleagues with this revelation:

"When I was at Northeastern, I was on the boxing team. Yes, I was a 155-pound boxer."

Shaggy Sheep Story

EDITOR:

I read in your magazine about farmers using WCCO [Minneapolis] music on contented cows, but a word of caution is in order. Another farmer nearby tried a radio in his sheep barn and it caused a terrible commotion among his herd of 30 ewes and one buck. The farmer dashed in just as the buck had committed suicide by ramming a stone wall to the crooner's final strains of "There Will Never Be Another Ewe."

Boyd Phelps, Director
Phelps Precision Lab.

Don't Make a Move

EDITOR:

I would appreciate it tremendously if you would publish this announcement from Arthur Clarendon Smith Sr., president, Smith's Transfer and Storage Co., Washington, D. C.:

"It has come to our attention that some of the moving and storage companies throughout the U. S. are broadcasting and/or televising for their own use, our slogan "Don't make a move . . . without calling Smith's." We have this slogan not only copyrighted but also registered as a trade-mark in the U. S. Patent Office. We have sold the rights to the use of this slogan to the Lincoln Warehouse Corp. for use in New York City only. No other moving or storage company in the U. S. has any right to use this slogan. We wish to put on notice all radio and television stations that we will take legal action —wherever and whenever necessary—against any radio or television station which permits our slogan to go out over their facilities."

Courtland D. Ferguson

Creepie-Peepie

EDITOR:

I would like to call your attention to an insert which appeared on Page 11 of the Jan. 19 issue of BROADCASTING • TELECASTING, relative to the "New 18 lb. camera" in which it is stated it "is the first camera to be used which does not employ cable."

You will probably recall that at both the Republican and Democratic national political conventions held in Chicago in 1952, that NBC employed what we called Ultra Portable television equipment, employing the Vidicon camera tube, on the convention floor, using radio to relay the television signals back to the control room. This equipment, while called by us Ultra Portable, is probably more familiar to you as the Walkie-Lookie or the Creepie-Peepie equipment.

This letter is written to you in the interest of correctness rather than criticism.

O. B. Hanson
Vice President & Chief Engineer
NBC New York

For the Bird

EDITOR:

Entering a lion's cage may be considered a daring exploit in the amateur league, but when it comes to professional enterprise we challenge anyone to compare with WBEL's intrepid Christie Thomsen.

Herewith photographic evidence of Christie interviewing a full grown golden eagle in his wild state. The giant bird, with a wing spread of more than seven feet . . . became lost in a

blizzard and landed, exhausted, near the Thomsen home the day before Thanksgiving.

Given shelter and an eagle's idea of a Thanksgiving feast, the bird was later turned over to the Wisconsin Department of Wild Life where he is spending the remainder of the winter and will be turned loose this spring to return to his home . . .

L. O. Fitzgibbons
Manager
WBEL Beloit, Wis.

Uncle Sam Wants You

EDITOR:

Old frustrated ex-PFCs never die—they just become radio-TV critics. I refer specifically, of course, to the poor man's John Crosby who reviewed the premiere of *Talent Patrol* for B•T [Jan. 26].

Recruiting for the armed services is one of the toughest (and most critical) jobs advertising has ever had to undertake. If your reviewer were quite aware of this, he wouldn't have attempted to build himself a reputation as a clever person at the expense of the Army's efforts to enlist volunteers. . . .

Jim Bastian
Washington, D. C.

Showsheets

EDITOR:

KVTV can use 100 reprints of your TV showsheet . . .

For your information, these showsheets will be distributed to top area distribution people in the food and drug industry. We feel they will be useful to these people in determining which of their products are being advertised on television over the networks so they may use their influence in seeing that advertising schedules are placed in the Sioux City television market when it becomes active [next April].

Dick Harris
Promotion Manager
KVTV (TV) Sioux City, Iowa

Restyling (Cont.)

EDITOR:

Dear me! Here's BROADCASTING • TELECASTING all dressed up in a nice new format, pretty as can be.

And yet it's quite obvious that the editorial staff is just about 10 years behind the times. Why? Easy.

In your response to a letter which appeared on page 21 of the Jan. 19 issue you . . . said that the two letters "AM" constituted the abbreviation for the word "radio."

Well, I'll let you in on a little secret. About 1935 a fellow by the name of Armstrong invented something new. He called it FM radio . . .

Y'know, the *real* abbreviation for radio is "AM & FM".

George W. Hamilton
FM Promotion

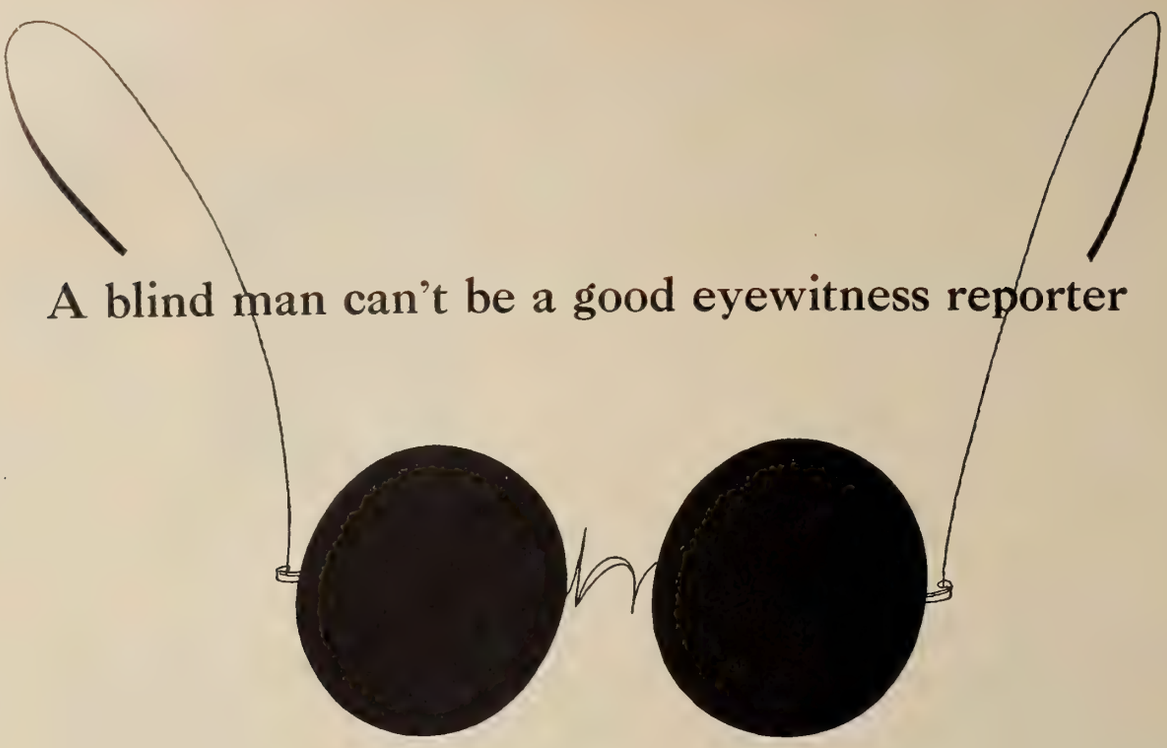
This is Mr. McAllister



This is what he says

"A large portion of our ad budget," says Mr. Walter W. McAllister, President of the San Antonio Building and Loan Association, one of the first hundred in the nation, *"goes toward sponsorship* (on KMAC, San Antonio, Texas) *of Fulton Lewis, Jr.—a news program which appeals to the people most likely to use our services. Comments . . . and interest aroused by the program . . . prove the wisdom of our participation."*

This is Fulton Lewis, Jr.

whose 5-times-a-week program is available for sale to local advertisers at local time cost plus pro-rated talent cost. Currently sponsored on 364 Mutual stations by 752 advertisers (including 60 financial institutions), the program offers a tested means of reaching customers and prospects. Check your local Mutual outlet or the Cooperative Program Department, **Mutual Broadcasting System,** 1440 Broadway, NYC 18 (or Tribune Tower, Chicago 11).

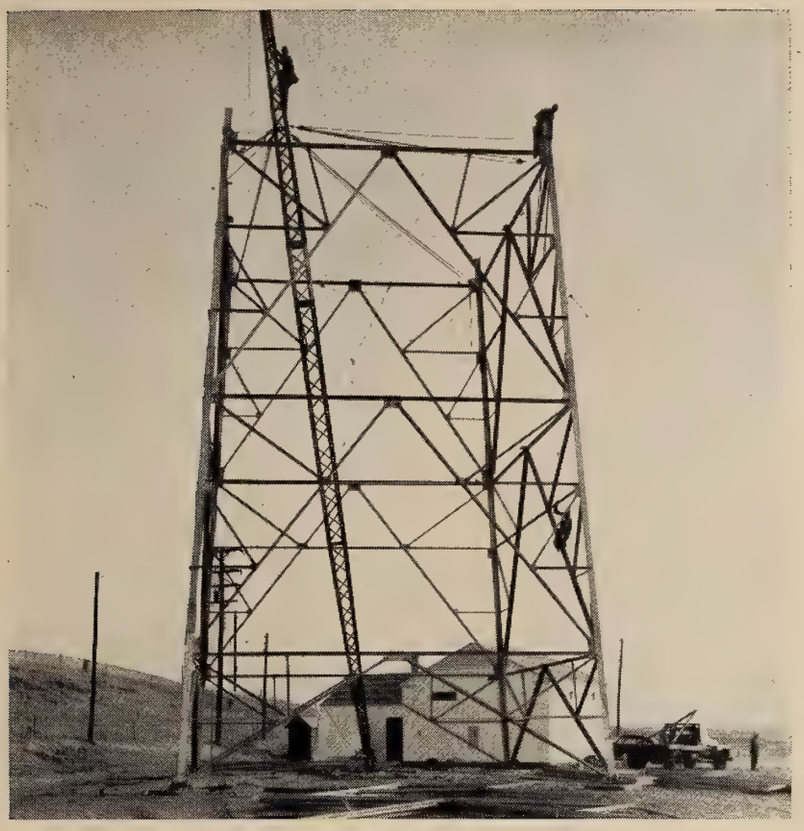
A blind man can't be a good eyewitness reporter

...neither can a man blinded by prejudice

Prejudiced reports of the Maryland road test have given the press and the public a distorted picture. In the interests of accurate reporting and highway improvement, here are facts that cannot be ignored:

The Maryland road test was a research project **conducted in the interests of better roads.** Findings were intended to act as a guide for the construction of roads better able to take care of today's traffic needs.

But in the hands of prejudiced outside interests—people prejudiced against the trucking industry, the entire objective of the test was obscured and distorted. **In these prejudiced unofficial utterances the Maryland road test became a case against the trucking industry.**



How to get the facts—The facts concerning the test are clear and are readily available from the official report, "Final Report on Road Test One—MD." They can be summed up in three main points. (1) Concrete pavements laid on **suitable subgrade** are strong enough to carry axle loads **far heavier** than permitted anywhere in the United States. (2) Concrete pavements laid on **unsuitable** subgrade can carry the highest axle loads legal in any state **as long as the subgrade support is maintained by ordinary highway maintenance practices.** (This type of maintenance was withheld during the test.) (3) The test road was **not** a typical road. The subgrade soil in those sections where cracking developed was a local variety of clay and the pavement itself was of unorthodox double-parabolic cross-section design.

The trucking industry as a vital part of the nation's transportation system and as payer of one-third of all motor vehicle taxes is vitally interested in the Maryland road test and other similar tests now being conducted. It cannot sit by and let the findings of these tests be distorted by prejudiced interests and used against it.

The Maryland road test was a test of **roads.** From it can come much good in the form of improvement in highway design, construction and repair. This good can be accomplished **if the facts concerning the test are given currency.** Anyone can get those facts by reading the Highway Research Board's complete report with an unprejudiced eye.

A radio relay tower in process of construction

OPENING NEW FRONTIERS FOR TELEVISION

Cable plow train laying coaxial cable in difficult territory

In one era of history the prairie schooner made the roads to new frontiers. Now it's radio relay and coaxial cable that cross our mountains and plains to develop new territories for television.

Intercity television transmission is not very far in time from its pioneering days. Yet its progress has been great. In 1946 less than 500 channel miles of intercity television network facilities existed. By the end of 1952 this had grown to 31,500 channel miles . . . enough to reach an audience of about 92,000,000 people.

These are big figures. But they can't tell the whole story of the big job being done. Behind them are many special projects, each costly in time and money.

Yet the cost of the service, furnished by the Long Lines Department of the American Telephone and Telegraph Company and the Bell Telephone Companies, is low. Bell System charges, for the use of its intercity television facilities, average about ten cents a mile for a half hour of program time.

BELL TELEPHONE SYSTEM

Providing transmission channels for intercity radio and television today and tomorrow

Sales-winning radio schedules for the Great Southwest just naturally include this pair of top-producing CBS Radio Stations. Results prove this! Write, wire or phone our representatives now for availabilities and rates!

National Representatives

JOHN BLAIR & CO.

Garfield Packard

on all accounts

GARFIELD PACKARD, despite his surname and Detroit background, bears no relationship to the automotive Packards. Born in Stratford, Ont., Mr. Packard moved to Detroit at the age of 2, attending school there and working as an accountant until 1931.

Now vice president and Chicago manager of the Paul H. Raymer station representative firm, Mr. Packard is a 20-year-plus broadcast veteran who has covered more than the usual maximum of two sides of the street.

He has worked as a station representative with the Raymer Co. since 1943, spending four years in New York and transferring to Chicago as an officer in February 1947. His first job in radio, as assistant to the manager of the Detroit office of World Broadcasting System, lasted two years until 1933, when he went to CKLW as manager of the Windsor division.

In 1935, he went the Campbell-Ewald agency in Detroit as radio manager and timebuyer, handling Chevrolet Div. of General Motors, the agency's largest radio biller. He bought the largest spot campaign up to that time for Chevrolet, using more than 400 stations (two-thirds of all those on the air) for *Musical Moments,* aired 185 weeks consecutively. Estimated cost in those early days was a staggering $2 million annually. Mr. Packard also set up the GM blanket contract permitting all GM divisions to combine their broadcast purchases for frequency discounts.

Mr. Packard went to Raymer, New York, after visiting the city frequently while touring the country with GM's *Cheers for the Camps,* originating in 16 armed forces camps vis CBS.

He is married to the former Margaret Oberlin, who helped him buy time at Campbell-Ewald. They live on Chicago's near north side. They share an intense interest in primitive music and art, and each year spend 50 weeks of planning for a concentrated two weeks of vacationing along off-the-beat paths in such places as New Mexico, Guatemala, Mexico and Haiti.

They are interested in painting (Mrs. Packard paints moderns), reading music and photography, color as well as black-and-white.

As for radio (Raymer also represents TV stations), Mr. Packard sees a continuing re-evaluation of the medium on the agency and client level because "It is still an excellent buy on a cost per thousand basis."

BROADCASTING TELECASTING

February 9, 1953 Vol. 44, No. 6

'SHAKEDOWN' TACTICS AMONG TV APPLICANTS PROBED

Television, no different from any other business, is attracting its share of bloodsuckers and those who follow a lax code of ethics. Of particular concern to government officials are the station applicants who enter bids simply to slow the competition or, even more unscrupulously, to command a shakedown price for clearing the way.

THE television shakedown racket, now menacing TV station applicants, is being investigated by the FCC and Senate Interstate & Foreign Commerce Committee, BROADCASTING • TELECASTING learned last week.

This growing practice came under official FCC scrutiny during the week. The Senate committee has heard of the racket and it is being investigated at the staff level.

Heeding complaints from many sections of the country, the Commission is working on one of the most distasteful situations in the history of radio-TV regulation. The racket is based on "strike" applications designed to block unopposed grants to legitimate applicants.

On highest authority it was learned that the FCC is "very much concerned" about a series of charges centering around alleged blackmail applications and others filed in bad faith to block legitimate applications.

All Avenues Being Studied

Aware of the growing problem, the Commission is looking into all possible ways of attacking practices that it feels are interfering with its regulation of TV and with legitimate expansion of the TV industry.

While no Commission official would talk openly, it's known that names and companies have been mentioned with some indication that injured applicants have submitted evidence designed to show that competing applications were filed merely for nuisance purposes.

At the Senate Committee it was learned that staff officials are watching both the alleged illegitimate practices and the steps taken by FCC to combat them. The committee operates as a watchdog of the Commission.

The committee has already investigated one suspected "strike" case. This case was turned over to the FCC, which studied the evidence and informed the committee the applicant was entitled to file.

Up to this point the committee has taken the view that "strike" charges are an FCC matter. Now that the practice is causing nationwide concern the committee is showing more interest. It was indicated a full investigation will be made if any applicant desires to submit evidence pointing to pay-off practices.

The usual way the "strike" practice works is this: An applicant files at the FCC for a TV frequency in a city. The grant is unopposed and after a normal period the case approaches its final stages, with indication that a grant is forthcoming. Just before final action is expected, the "strike" application is filed.

This throws the case into hearing status and it can mean many months, or even a year or more of delay. The second application can be (1) legitimate; (2) designed to shake down the original applicant for pay-off money or stock interest; (3) aimed at delaying the grant for purely competitive reasons.

Burden of Proof

If either of the two latter reasons is involved, the FCC then faces the difficult job of proving blackmail or illegitimate delaying action.

Should the Commission feel it has a good case against an applicant, it must decide how to proceed. It might, for example, dismiss an application "with prejudice," an embarrassing tag that could prove costly in the future. Then again it might take disciplinary action against lawyers involved in a case. This weapon, some contend, would be extremely powerful and halt unethical practices.

The whole situation is somewhat confused by regulatory problems. The FCC's rules have a section devoted to "strike" applications (1:385e). This permits conditional grant to an applicant pending final hearing in case the FCC feels an application is not filed in good faith. The rule is an old one and has seldom been used.

Argument is raised by one attorney that the old "strike" rule had its teeth pulled inadvertently by the McFarland Bill (Sec. 7c), which liberalizes the filing of protests in case of grants.

In any case, attorneys concerned with suspected "strike" applications are anxious to get FCC action in at least one case. They feel even one call for a hearing in a suspected "strike" incident would frighten away all applicants or potential applicants who have had ideas of that sort.

Suggestion that legislation be enacted has been made. One proposal would require posting of substantial bond in filing television applications. This would prove good faith, it is felt, and weed out racketeers.

Should the "strike" menace bring out specific names of persons and applicant firms, the resulting publicity might bring wholesale withdrawals, according to one view at the Commission.

Of special interest was the suggestion that such action would open up TV facilities in many areas and speed granting of many new stations now held up in Commission routine.

Actually there's nothing very new about this sort of thing. All through the history of AM there were filings which were viewed with suspicion, especially by those who had radio stations or had applied for them.

Always there arose the problem of nailing down the suspected cases. Rumors often were heard that applicants had to be bought off by legitimate permit holders or applicants.

After World War II when the rush of applications developed for both AM and FM, the FCC's staff was worked overtime in an effort to catch up with the jam. During these exciting months the charge of nuisance applications and even blackmail echoed through the industry.

Now with TV permits at a premium following end of the freeze, the Commission's files are bulging with petitions of various sorts. Attorneys and engineers alike have said informally they have turned down applicants on the ground their proposals weren't sincere. The hearing procedure in TV has been rougher than many non-industry applicants anticipated and this in itself has started to deter nuisance filings.

Senate Group Gets Money For Inquiry Purposes

NEED for an inquiry into color TV, educational TV and monopoly in broadcasting was given by the Senate Interstate & Foreign Commerce Committee as one of the reasons for asking for $75,000 to investigate various matters under its jurisdiction (S Res 41). The Senate last week approved the request and the appropriation.

There is nothing scheduled at the present time on the communications subjects.

Estimated budget for next two years calls for the spending of $58,200 for the hiring of two attorneys, one economist, three clerks and three investigators. In addition, $17,000 is estimated for expenses.

In a letter last month to Sen. William E. Jenner (R-Ind.), chairman of the Senate Rules & Administration Committee, Sen. Charles W. Tobey (R-N. H.), chairman of the Senate Interstate & Foreign Commerce Committee, referred to communications as one of the five areas of primary importance.

Last month Sen. Tobey introduced a proposal (S 538) which would forbid the FCC from approving the applications of any company convicted of violating the antitrust laws, unless no such violations and occurred in the previous five years [B•T, Jan. 26].

WINE COMPANIES INVADE RADIO-TV

Monarch and Wine Corp. of America head a list of vintners buying radio and TV spots, regional programs and daytime network shows.

THE wine merchants, in a heady invasion of the broadcasting media, are pouring money into radio and TV spots, regional programs, and daytime network shows starting in early and mid-February.

Monarch Wine Co., for its Manischewitz wine, turns to television sponsorship today (Monday) for the first time when it premieres its half-hour *I'm the Law*, a Music Corp. of America package featuring George Raft, in about six markets. The contract is for 39 weeks.

Monarch's television outlay is in addition to a radio spot campaign which started in mid-January in 55 markets for 26 weeks. The radio schedule is in its fourth year. Donahue & Coe, New York, is the agency.

Mogen David Wine Buys

Wine Corp. of America, Chicago, for Mogen David wine, has bought the 11-11:15 a.m. period on CBS-TV effective Feb. 12 for the *Bill Cullen Show*, Thursdays, 11-11:15 a.m. Mr. Cullen will highlight a variety format, supported by the Milton Delugg trio and a vocalist. The show is packaged by Larry White and Mr. Cullen. Weiss & Geller, New York and Chicago, is the agency.

Wine Corp. of America also will sponsor *News of Tomorrow* on ABC-TV, 10-10:15 a.m. EST Monday through Thursday [B•T, Feb. 2]. Weiss & Geller also placed this contract, starting today for 52 weeks.

Garrett Wine & Co., makers of Virginia Dare wine, a long-time radio client, has placed a radio-television spot campaign on 100 radio and 20 television stations effective today for 10 weeks. David Mahoney Inc., New York, is the agency.

Petrie Wine Co., San Francisco, through Young & Rubicam, same city, is another active spot entrant, with approximately $200,000 already allocated on radio-TV schedules.

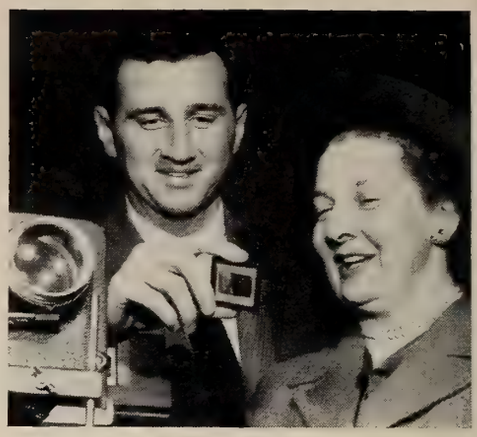
Old Monastery Wine Co., Fresno, Calif., a radio spot advertiser 18 straight years, starts its 26-week schedule in 12 markets Feb. 12. Arnold & Co., Boston, is the agency.

LaSalle Wines (independent winery and a distributor for Manischewitz wines) will sponsor RCA Thesaurus' transcribed library series, *The Hour of Charm*, on 16 radio stations in Michigan, through Brindley-Roth Agency, Detroit.

The advertiser increased the station list after a 90-day test and a tremendous boost in the sales of LaSalle and Manischewitz wines.

Piracy of Ideas Claims Called Hard on Advertising

TREND of court decisions in favor of those claiming piracy of their unsolicited ideas by advertisers and advertising agencies was called "the most urgent legal problem facing advertisers and agencies today" by David M. Solinger, New York attorney, in an address Monday to the Federal Bar Assn. in New York.



Citing a recent $375,000 California jury verdict as an example of what he termed "an alarmingly dangerous trend," Mr. Solinger said huge verdicts are being recovered "on various theories ranging from express contract, implied contract, trade custom, the reasonable value of services, unjust enrichment and copyright infringement."

He criticized releases which make the advertiser or agency sole judge of the value of an idea and advocated a contract with the submitter of the idea setting forth in advance a nominal value for the idea if it is used. Unsolicited ideas should not be considered, he said, suggesting various procedures for insulating creative departments against contact with them.

Ovington, Brooks Join BC&P

RAY OVINGTON, Grant & Wadsworth, New York, and Barbara Brooks, Joseph P. Wiggers Agency, have joined the radio and television staff of Bermingham, Castelman & Pierce, New York. Mr. Ovington will be assistant director in charge of production and Miss Brooks will be co-ordinator of broadcast activities.

Steve Siddle, timebuyer for the agency, has been promoted to assistant director in charge of station relations for both radio and television.

"DEATH" of a TV commercial was demonstrated at a meeting of the Women's Advertising Club of Chicago by Otis Carney, head of TV creative work, J. Walter Thompson Co., that city. Mr. Carney, speaking on effective television commercials, holds up slide commercial before Marion McKinney, women's travel director, Union Pacific Railroad, to emphasize "too many characters trying to put over one sales talk."

Admiral Buys Sports Events

AGREEMENT for exclusive radio-TV coverage of the *Chicago Tribune* Golden Gloves Boxing Tournament was completed by Admiral Corp., Chicago, last Wednesday, for an undisclosed sum.

Contract calls for DuMont TV Network and MBS radio coverage of the Chicagoland finals March 7, the Chicago-New York Intercity Finals March 26 and the U. S.-European competition June 16. Agency is Erwin, Wasey & Co., New York.

Admiral also is said to be negotiating for similar rights to the All-Star professional-college football classic next summer, although the firm was not prepared to announce any agreement as yet. Admiral sponsored the football game on DuMont and MBS last year.

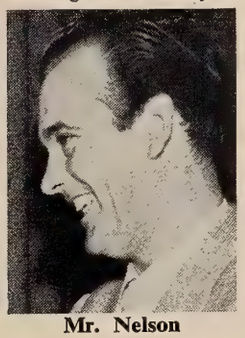
NL&B Bills $19 Million

TOTAL billings of Needham, Louis & Brorby, Chicago advertising agency, exceeded $19 million in 1952, its president, Maurice H. Needham, has reported. The agency revealed that more than half (118) of its 220 employes now own stock in NL&B. Last year was the second consecutive 12-month period during which the agency added about $4 million to its billings.

NL&B received $3 million in radio and $5 million in TV billings, with the AM-TV share accounting for about 40% of all billings [B•T, Jan. 5]. Mr. Needham added that payments under the profit-sharing plan will amount to more than 13½% of salaries of the participants, as compared with 13% last year.

M & R Dietetics Buys TV

TO LAUNCH a new powdered cream product in the New York market, M & R Dietetics Labs., Columbus, has turned to television as its major advertising medium, according to George R. Dunham, WCBS-TV New York general sales manager. He said the company has bought participations on station programs, including *Rain or Shine*, *Kovacs Unlimited*, and *There's One in Every Family*. Billed through the Ralph Jones Co., Cincinnati, the new business will run for 13 weeks, effective today (Monday).



THEO. HAMM Brewing Co., St. Paul, and Liggett & Meyers, for Chesterfields, have signed for sponsorship of exclusive WGN-TV Chicago telecasts of all daytime home games played by the Chicago Cubs and White Sox during the 1953 season, starting with the three-day city series April 10 [B•T, Jan. 26]. Handling details (l to r) are Bradley Eidmann, WGN salesman; Raymond Mithun, president, Campbell-Mithun, Minneapolis, the Hamm agency; Robert Noel, Campbell-Mithun, Chicago; William A. McGuineas, commercial manager, WGN Inc.; James T. Gallagher, business manager, the Cubs; Clyde Rapp, advertising manager, Hamm, and Harold Carlson, Hamm's Chicago district sales manager.

SOUTHERN CALIFORNIA RADIO CALLED 'GREATEST MEDIUM' AT AD CLUB MEET

SCBA Managing Director Norman Nelson reports area's radio homes are up 33.6% with rates up only 11% since 1946, despite TV. Others on a panel praise vertical saturation spots, nighttime radio, while two recount saturation campaign successes.

THAT radio continues the greatest mass medium in Southern California despite television, was the consensus of a five-member panel at a Hollywood Ad Club meeting last Monday in the Hollywood Athletic Club.

Mr. Nelson

Robert J. McAndrews, commercial manager of KBIG Avalon, Calif., and past president of HAC, moderated the panel, "Southern California Radio for 1953."

Describing Southern California as "America's fastest growing market," Norman Nelson, managing director of the Southern California Broadcasters Assn., said radio homes have increased 33.6% since 1946.

Admitting TV with eight stations now is at a high point of saturation and radio listening has dropped 26%, he presented figures to show the 1946 to 1953 population increase was so great actual hours of radio listening now are greater than before the TV era.

"During this period, too, radio station time rates went up only 11%, yet the media today in Southern California, because of its population picture, is producing audience at a lower cost-per-thousand than in 1946," Mr. Nelson declared. "During the same period . . . Los Angeles metropolitan newspapers have decreased their total circulation 1%. Today it costs a newspaper advertiser exactly 50% more to reach a circulation 1% less than it did in 1946.

Shortchanged in Past

Southern California broadcasters shortchanged themselves in the past because they couldn't determine until recently how to evaluate out-of-home listening, Mr. Nelson continued.

He said three Pulse surveys in the past year found size of out-of-home audience depends upon programming, "but as a rule-of-thumb figure, there is about a 20% bonus to be added to any in-home ratings in the Southern California area."

Success of the vertical saturation method of buying radio time was stressed by Stanley Spero, KMPC Los Angeles account executive and chairman of the SCBA sales promotion committee.

Mr. Spero said in the past stations did nothing more than exchange the same advertisers among themselves, but now a concentrated effort is being made in Southern California to bring non-radio advertisers into the media.

Sherrill Taylor, advertising and promotion manager of KNX Hollywood and Columbia Pacific Radio Network, and vice chairman of the SBCA sales promotion committee, debunked the "decline" of nighttime radio listening in the Los Angeles area.

"It used to be that a great many advertisers were writing off nighttime radio in a television home," he said, "but roughly 30% of all Los Angeles homes cannot be reached by television.

Hilly Sanders, vice president in charge of radio-TV for Dan B. Miner Co., Los Angeles agency, told ad club members many media must be used in any progressive campaign, but radio has demonstrated its stability in the past as well as now, creating desired results for clients and she would continue to recommend it.

Miss Sanders

W. P. Frost, district radio-TV sales manager for Westinghouse Electric Supply Co., told how his firm, in a saturated TV market, less than a year ago used an extensive spot campaign to introduce its TV receiver set, then virtually unknown. The name Westinghouse, he said, was associated primarily with heavy equipment or appliances in the Southern California area.

With this acute problem, Westinghouse, on a vertical saturation basis, utilized several area stations, and as a result of this, he declared, the firm's TV sets not only have become an important factor in the market from a consumer's point of view, but a substantial number of new retail outlets has been established.

"And for the first time in the history of Westinghouse TV in this area, buyers are going to retail dealers asking for the product by name," he said.

So pleased and amazed were Westinghouse officials with results of the radio campaign, they plan to continue this type of advertising in Southern California during 1953 and have expanded it to include other Westinghouse products, he said.

Lt. Col. Louis Pedlar Dies

LT. COL. LOUIS C. PEDLAR, 69, USA retired, president of Pedlar & Ryan Adv., New York, for several years until 1931 when he joined the Army Organized Reserve Corps, died at Suburban Hospital in Maryland near Washington, D. C., last Tuesday. He lived in Silver Spring, Md. He was commended by President Truman for research and analysis work during World War II. Survivors are his wife, two sons and a daughter.

Hoffman Back to Studebaker; Resigns Ford Foundation

PAUL G. HOFFMAN, one-time president of the Studebaker Corp., is slated to rejoin that firm as chairman of the board. The resignation of Mr. Hoffman as president and a trustee of the Ford Foundation, multi-million-dollar philanthropy whose far-ranging activities include the Fund for Adult Education and the Television-Radio Workshop, was announced last Wednesday by Henry Ford II, chairman of the board of trustees.

H. Rowan Gaither Jr., San Francisco attorney and associate director of the Foundation, was named acting president, pending selection of Mr. Hoffman's successor.

Mr. Hoffman helped organize the $500 million Foundation and has headed it since Jan. 1, 1951.

His resignation from the Foundation, effective March 1, was credited to his desire to make his home at Pasadena, Calif., where he and his family have lived for years and where the Foundation has maintained executive offices. Mr. Ford said the trustees had agreed unanimously—with Mr. Hoffman concurring—that the time had come to transfer the Pasadena operations to New York, where a large staff has been operating. Although Mr. Hoffman agreed with the decision, Mr. Ford said, his personal desire to live at Pasadena led him to resign.

"We plan to use his distinguished abilities and his broad experience in Foundation-sponsored programs to the extent that he may be available," Mr. Ford said.

AGENCY and advertiser executives confer with station officials when, after an absence of 17 years, WMAQ Chicago welcomes back *The Northerners* for weekly half-hour broadcasts starting Feb. 16—under sponsorship, of course, of the local Northern Trust Co. Discussing happy occasion are (l to r): Glen Hendricks, assistant to the advertising manager, Northern Trust; Rudi Neubauer, WMAQ sales manager; Peter Cavallo, director of radio, television and motion pictures, J. Walter Thompson Co., agency handling account; John O'Laughlin, advertising manager, and Davis Kirby, vice president of market research and development, Northern Trust; Harry Kopf, NBC Chicago vice president; George Heinamann, program manager of WMAQ and WNBQ (TV). Program will be heard each Monday, 9-9:30 p.m. CST.

STROTZ, TRAMMELL IN BOTTLING FIRM

Former NBC executive Sidney Strotz is president of new Coca-Cola bottling company in Pittsburgh area. With him in the new firm are former NBC Board Chairman Niles Trammell, Pennsylvania broadcasters Thomas P. Johnson and Rolland L. Adams and stars Roy Rogers and Ralph Edwards.

SIDNEY N. STROTZ, former NBC key executive, and a group of associates that includes Niles Trammell, former NBC board chairman, and other broadcasters or radio-TV personalities, have acquired the Coca-Cola bottling companies in Pittsburgh and four nearby communities: Butler, Arnold, McKeesport and Bethlehem.

Mr. Strotz

Others of the group in broadcasting include Thomas P. Johnson, 45.5% owner of WENS (TV) Pittsburgh, uhf Ch. 16 grantee, and vice president-secretary of the Pittsburgh Pirates; Rolland L. Adams, president of WAGA-AM-FM Bethlehem and publisher of the Bethlehem *Globe-Times;* and two NBC radio and TV stars, Roy Rogers and Ralph Edwards.

Mr. Strotz, president of the new Quaker State Coca-Cola Bottling Co. and also head of the Coca-Cola plant at San Jose, Calif., is moving with Mrs. Strotz to Pittsburgh. He was with NBC from 1933 to 1950, serving variously as vice president in charge of Central Div., vice president and national program manager, vice president in charge of Western Div., administrative vice president, and head of TV.

Mr. Trammell resigned as NBC board chairman Dec. 31 to become associated with ownership and management of a proposed TV station in Miami, Fla. Several other business and professional men are identified with ownership of the new bottling company. Messrs. Strotz, Trammell, Johnson and Adams are members of a seven-man board of directors.

C & W Names Case as V. P.

WINSLOW H. CASE, senior vice president and creative director of Campbell-Ewald Co., Detroit, has been named vice president in charge of radio-television copy for Cunningham & Walsh, New York, on the Liggett & Myers Tobacco Co. account (Chesterfield cigarettes). Before joining Campbell-Ewald, he was with Newell Emmett and with Liggett & Myers' creative staff.

Direct Mail Gains 11%

DOLLAR VOLUME of direct mail advertising in 1952 totaled $1,171,088,984, a gain of 10.8% over the 1951 figure, Frank Frazier, executive director of the Direct Mail Adv. Assn., reported last week. Monthly totals ranged from a low of $88,664,382 in July to a peak of $112,670,142 in October.

MAPPING plans at a Rexall conference attended by 450 druggists from six states, and held in the Twin Cities, are (l to r) John Lamb, BBDO account executive, Minneapolis; Rexall's George Davis, vice president in charge of marketing, St. Louis, and Joseph A. Galvin, chairman of the board; Norman Heffron, WCCO Minneapolis-St. Paul newsman; and Earl Cooper, vice president of Rexall, Los Angeles. Not pictured is Justin W. Dart, Rexall president. Mr. Heffron covered the six-state druggists' sessions for the station.

Marciano vs. Walcott Bout

GILLETTE Co., and its agency, Maxon Inc., New York, were reported last week to be conferring over radio-TV sponsorship of the return fight between Rocky Marciano and Joe Walcott from the Chicago Stadium on April 10. Radio-television rights to the match, which will be heard and seen on radio and TV in all but Chicago and Milwaukee areas, are expected to cost from $250,000 to $300,000. Gillette's decision as to whether it will pick up the entire national tab for the fight is expected to be announced today (Monday).

NEW BUSINESS

Spot

BB Pen Co., Hollywood (BB-Rol-Rite), starts one-minute filmed TV spot announcement campaign in eight mid-western markets, Feb. 15 for 13 weeks. Stations are WNBQ (TV) WGN-TV WENR-TV Chicago, WWJ-TV Detroit, WEWS (TV) WXEL (TV) Cleveland, WKRC-TV Cincinnati, WFMB-TV Indianapolis, WTMJ-TV Milwaukee, KSTP-TV Minneapolis and KSD-TV St. Louis. Agency: Roy S. Durstine Inc., L. A.

Leigh Foods Inc., N. Y. (Flamingo frozen orange juice), launched TV spot campaign, effective Feb. 2 on WCBS-TV and WNBT (TV) New York for minimum of 13 weeks with 56 spots per week. Program on each station includes nine announcements on Mon., Tues. and Wed., seven on Thurs., 10 on Fri. and six each on Sat. and Sun. Advertising is placed direct.

Network

Simoniz Co., Chicago, sponsoring *Big Story* on NBC-TV, Fri., 9-9:30 p.m. EST, on alternate weeks. Agency: Sullivan, Stauffer, Colwell & Bayles, N. Y.

General Products Corp., L. A. (Looz dietary supplement), renews *Stuart Craig Show* on 45 Columbia Pacific Radio Network and Mountain stations, Sun., 9:45-10 a.m. (PST), for 52 weeks from March 1. Agency: Dean Simmons Adv., L. A.

Bank of America, S. F., renews *Top of the Morning* on 11 Columbia Pacific Radio Network stations, Mon. through Fri., 7:15-7:30 a.m. PST, for 52 weeks from Feb. 23. Agency: Charles R. Stuart Adv., S. F.

Agency Appointments

Stat Pharmaceuticals Inc., Chicago (Taz—weight-reducing tablets), appoints Irvin Rose Agency, Hollywood. Radio-TV will be used.

Bay View Federal Savings & Loan Assn., S. F., appoints Brisacher, Wheeler & Staff, that city.

Bu-Tay Products Ltd., L. A. (Rain Drops water conditioner), appoints J. Walter Thompson Co., that city.

Aluminum Lock Shingle Co., Oakland, Calif., appoints Lee Wenger Adv., S. F. TV will be used.

Winter-Seal Corp., Detroit, appoints W. B. Doner & Co., Detroit.

Consolidated Sewing Machine & Supply Co. of Calif. Inc., L. A. (distributors of Viking sewing machines), and **Jerant Co.,** that city (Formula "21" lanolin compound), appoint Ben Baldwin Adv. Agency, Hollywood. TV will be used.

D. W. G. Cigar Co., Detroit, appoints W. B. Doner & Co., Detroit. Account executive is S. M. Epstein.

White Rock Corp. appoints Ellington & Co., N. Y. effective March 17.

Shavex Co., Glendale, Calif. (electric shaver), appoints Universal Adv. Agency Inc., Hollywood. **Jerry Merton** is account executive. Radio-TV will be used.

First Camden National Bank & Trust Co., Camden, N. J., appoints Aitkin-Kynett Adv., Phila.

McLaran Products Inc., Beverly Hills (scalp cream, hair dressing and shampoo), appoints Mogge-Privett Inc., L. A. Radio is being used.

F. R. Corp., manufacturer of darkroom equipment and color slide viewer, N. Y., appoints The Wexton Co., N. Y.

Seabrook Farms Co., Bridgeton, N. J. (quick-frozen vegetables and fruits), appoints N. W. Ayer & Son, Phila.

Miscellaneous

Ratcliffe Adv., Dallas, elected to membership in American Assn. of Adv. Agencies.

Ben Baldwin Adv. Agency, Hollywood, moves to 943 N. La Cienega St. Telephone is Bradshaw 2-7126.

Schwab & Beatty, N. Y., moves radio-TV department to separate quarters at 38 E. 57th St.

Like squirrels go for nuts

Just like squirrels go for nuts, local merchants go for W-I-T-H in Baltimore. W-I-T-H carries the advertising of twice as many of them as any other station in town. These smart retailers know that W-I-T-H produces low-cost results. Because W-I-T-H delivers more listeners-per-dollar than any other radio or TV station in town.

W-I-T-H can produce low-cost results for you, too. Get your Forjoe man to give you all the details.

IN BALTIMORE **W-I-T-H**

TOM TINSLEY, PRESIDENT • REPRESENTED BY FORJOE & COMPANY

Martha Brooks is a super-saleswoman. Four announcements in her program last year produced over 6,000 sales with a retail value in excess of $4,000.

The First Lady of the 17th state*

Grace Hudowolski, Travel Supervisor of the New York State Department of Commerce is a weekly guest on the Martha Brooks Show. She relates the little known facts about the personalities and history of the Great Empire State.

*The WGY area is so-named because its effective buying income is exceeded by only 16 states.

Martha Brooks has become endeared to the women of the WGY area as the result of her 17 years as a broadcaster. Bringing news of the women's world to her audience every morning between 9:15 and 10:00 a.m., Martha covers everything from unusual recipes to silver and golden wedding anniversaries and 90-year birthdays. Chatty, informative, personality-plus are the words for Martha. Her role in the daily lives of WGY-Land families easily qualifies her as "The First Lady of the 17th State."

WGY MARKET DATA

22 cities over 10,000 population
458 towns
53 counties
2,846,300 citizens

INDUSTRY-BACKED TV CIRCULATION AUDIT WINS INITIAL ENDORSEMENT

Circulation facts on television are to be presented clearly and comprehensively under this new industry-sponsored plan. The NARTB board already has named a group to scrutinize more closely the possibilities of a project that would be a TV counterpart of the circulation audits for printed media.

A MILLION dollar-plus project for a standard circulation measurement for television, to be established under industry auspices, was unveiled before the NARTB television board last Wednesday at its meeting at Belleair, Fla., and promptly won endorsement to the extent of authorization of further intensive exploration.

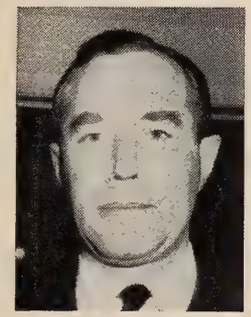
The plan was presented by Dr. Franklin R. Cawl, former Wharton school professor and now a consultant in marketing and research, after a six-week study authorized by NARTB President Harold Fellows. Designed to be the counterpart of circulation audits for the printed media, the project also has as its goal avoidance of the pitfalls that radio has experienced as a result of inter-mixture of coverage measurements and audience surveys.

Following a three-hour presentation by Dr. Cawl, the board concluded that the plan warranted further study and authorized President Fellows to appoint a committee of three to further explore the project. Named were Campbell Arnoux, WTAR-TV Norfolk, chairman; Clair R. McCollough, Steinman stations, and Ken Carter, WAAM (TV) Baltimore.

It is expected that Dr. Cawl will be retained to function with the committee in contacting all segments of the television field in connection with the plan. Contemplated, it is understood, is a pilot survey in one or two selected markets.

Specifics of Projects Not Detailed

Details of the measurement yardstick were not divulged pending procurement of trade marks and copyright protection, it was reported. All rights would be vested in NARTB by Dr. Cawl.



Along broad lines, it is understood that the project contemplates measurement of "circulation" not only as to numbers of receivers in given areas, but also as to tune-in for various segments of the day. Data would be collected by way of a combination of personal interviews, telephone interviews and mail.

One NARTB TV board member described the project as a "TV-BMB" but with certain refinements. The board officially described the plan as one that produced "a new concept and approach to the problem." It was emphasized that the project did not involve program popularity or ratings but dealt strictly with circulation aspects.

While Dr. Cawl would make no flat estimate as to cost, members talked about an eventual expenditure in excess of a million dollars. The thought was that it might be between one million and two million dollars on an overall basis. Emphasis was placed upon the desirability of getting started early to avoid the pitfalls that befell radio and notably while there are few stations and markets to be covered.

The original preliminary study was authorized by the TV board at its December meeting. At that time the board declined, for the present, to join the Advertising Research Foundation, of which Edgar Kobak, a member of the NARTB radio board, is president. The contribution requested from NARTB for ARF was in the amount of $10,000. A second letter from Mr. Kobak on the ARF fund was received by the board at Belleair and action again was withheld pending completion of the Cawl project exploration.

Robert D. Swezey, WDSU-TV New Orleans, chairman of the TV board, made this statement following the Cawl presentation: "One of the most challenging problems facing the television medium today, and those who use its facilities to sell merchandise and service, is the selection of a uniform system for measuring circulation. Dr. Cawl has presented to us a formula for such a measurement which deserves the serious reflections of all of those who are in television broadcasting and all those who use it as an advertising medium. He has outlined objectives of his study to us. The TV board is interested sufficiently in his proposals that it has approved appointment of a special board committee which will work with Dr. Cawl. This committee will be authorized to consult with appropriate individuals in the television industry."

Mr. Swezey

Dr. Cawl is a past president of the Market Research Council, past vice president of the American Marketing Assn., and while professor of merchandising, advertising and selling at the Wharton School of the U. of Pennsylvania, developed the Cawl buying power survey of Philadelphia.

He produced the first major market continuing store audits for food and drugs, which he said anti-dated Nielsen and which were used by the Department of Labor until the government produced its own commodity studies. He developed the first "continuing panel of consumer purchasing" for the *Farm Journal*. He was with the Kudner agency for seven years and worked with top accounts on postwar planning, sales analyses, copy testing, radio and television, and rating services.

He was a past chairman of the board of the Morris Price School of Advertising and Journalism of the Poor Richard Club in Philadelphia. He is editor of sales and advertising terms for the new *Webster Dictionary*.

For story on joint meeting of NARTB Boards see page 50.

L. A.'s Food Counter

DEVELOPMENT of suburban shopping centers throughout metropolitan Los Angeles has resulted in a retail revolution of self-service stores.

This is reported by "The Study of the L. A. Market," a presentation prepared by Sherrill Taylor, director of sales promotion, advertising and exploitation for Columbia Pacific Radio Network and KNX Hollywood.

Self-service supermarkets sell most of the food in Los Angeles, and the city has 1,070 of the state's 1,940 supermarkets. California has 12.6% of the nation's total.

For a Los Angeles advertiser to cover 4,910 square miles and reach 4½ million people, he must use radio, "the only medium which gains the advertiser entry into 99% of those homes."

As an added radio sales point, the city has 27% more cars per family than U. S., and 72.5% are radio-equipped, giving the city more car radios than home TV sets.

Nielsen Drops Per Cent Rating; 'Lucy' Maintains TV Lead

A. C. NIELSEN Co., Chicago market research firm, has dropped its practice of rating audiences by the percentage of homes reached. From now on, the company announces, it will rate network radio and TV program audiences only by the number of homes reached.

The move is calculated to end "misunderstanding" of the comparative popularity of ratings. Previously the radio report pegged the audience by percentages of all U. S. radio homes, and in TV, by percentages of video homes in areas where the program was telecast.

I Love Lucy on CBS-TV continues to head the top ten listing in audience popularity, according to the Nielsen Ratings for the two weeks ending Jan. 10. The programs follow:

NIELSEN-RATINGS TOP TELEVISION PROGRAMS
Two Weeks Ending Jan. 10, 1953
NUMBER OF TV HOMES REACHED

Rank	Program	Number of homes (000)
1	I Love Lucy (CBS)	14,550

NOW...AN ADJUSTABLE COWBOY!

Add "stretchin'" to the long list of adjectives we use to describe singin', strummin', leapin', sellin' Kenny Roberts. He's *adjustable* now! Come 5:00 p.m. every weekday, he stretches that explosive personality of his all over the Great Southwest (Ohio) Territory through the joint facilities of WHIO-TV in Dayton and WKRC-TV in Cincinnati. Adjustment takes place from 5:25 to 5:45 p.m. That's when Kenny comes in three sizes: As big as the big WHIO-TV market—as big as the big WKRC-TV market—or as big as *both* (and you buy what you want).

Put your product anywhere on Kenny's program and you'll get real results from a real market that's as big as you want it to be. George P. Hollingbery has participating spot information on WHIO-TV, The Katz Agency represents WKRC-TV.

The KENNY ROBERTS SHOW
originates from the studios of WHIO-TV.

WKRC-TV CINCINNATI

and

WHIO-TV DAYTON

More 5-Minute News Shows

FIVE-MINUTE radio news summaries outnumber quarter-hour news programs by a ratio between two-to-one and three-to-one, John J. Madigan, UP radio news manager, reported last week after a survey of replies from more than 600 radio news editors.

He said the poll found a 50-50 division of opinion on the advisability of interpreting news on the air. Half of the editors who were surveyed wanted more analysis, he said, while half regarded strictly factual treatment as best.

Mr. Madigan

"More news in fewer words," "more news topics," and "more light, odd quirks and personality stories" were among the principal recommendations advanced by the news editors.

Asserting UP already has taken steps to meet editors' desires, Mr. Madigan reported that "we are experimenting with many ways of writing the news more tightly, in order to get more news within the same amount of space and time."

It's 'Lucy' and Godfrey In Videodex Jan. Ratings

VIDEODEX reports of top 10 network TV programs for January 1953 show *I Love Lucy* in first place. Listings were:

TV EXPERTS KEEP TAB ON DIMENSION FILM

TV technicians and producers are watching carefully Hollywood film makers' plans to funnel some production into third-dimensional movies to meet TV competition.

HOLLYWOOD TV producers and technical experts believe that third-dimensional films, now being developed and produced by movie companies, will become an integral part of video as color is added to telecasting.

Experimental research to improve and integrate 3-D developments already is underway.

The rise of the 3-D film is attributed to the movie industry's efforts to meet TV's challenge.

20th Century-Fox Film Corp. is converting to a new third dimension and sound system of motion picture production known as Cinemascope. Rights were acquired from the inventor, Prof. Henri Chretien of the Paris Optical Institute.

It costs no more to use than ordinary methods. Only extra equipment is a special lens which is attached to a regulation camera. The lens compresses a wide range of action into a single picture. A compensating lens on the projector corrects distortion, converting images to normal.

Uses Wide-Curve Screen

A specially developed, wide curved screen, 2½ times the ordinary size and of extra brilliance, gives the scenes the same effect as that gained by live actors on a theatre's stage. Sound follows the actors as they move about the screen.

Cinemascope will be made available to all studios as soon as additional equipment can be manufactured, according to Darryl F. Zanuck, vice president in charge of production.

First Cinemascope film in color, "The Robe," will go into production at 20th Century-Fox Feb. 16.

A legal battle may result over use of the trade name Cinemascope. Don Fedderson, vice president and general manager of KLAC-TV Hollywood, has been using that title for several years for the station's syndicated film product.

The KLAC-TV process, made via closed circuit, is for kinescopes with special lighting to give them a motion picture appearance.

Other Firms Begin

Other Hollywood movie producers and film studios are already in third dimension production.

Independent producers Bill Pine and Bill Thomas are using a two-camera 3-D system developed by their releasing studio, Paramount Pictures Corp. It requires viewers to wear polarized spectacles. The Natural Vision system also requires polarized spectacles.

Warner Bros. is shooting "House of Wax" in Natural Vision and Columbia Pictures is using that same system for its "Fort Ticonderoga" film. MGM, with a similar system of its own, starts its first 3-D film, a western, in a couple of weeks. Allied Artists' (formerly Monogram) first tri-dimensional film is scheduled for the cameras in April.

3-D for TV

PERFECTION of a TV three dimension process has been announced by Henry Donovan, executive producer, Telemount-Mutual Productions, Hollywood. Firm films the half-hour *Cowboy G-Men* TV series, sponsored by Purity Bakers Corp. in 24 markets (see adjacent story).

Called Bolex Stereo 3-D and developed by Bolex Co., Swiss camera manufacturers, the dimensional effect is given by a special stereoscopic lens placed on the camera. Little increase in production costs is claimed.

Results of past research will be utilized in the next group of 13 films which goes into production March 15. Black-and-white prints also will be made for immediate distribution.

Although audiences will need polaroid glasses for color 3-D video viewing, Mr. Donovan predicts their availability at low cost.

Princess Pictures Inc. Begun by Burt Balaban

BURT BALABAN, director of programming and production for Paramount Television Productions Inc., will resign Friday to launch Princess Pictures Inc., an independent company which will produce TV films here and abroad.

Mr. Balaban said he will be president of the new company, which will distribute its TV films as well as those produced by other firms. He added that Princess Pictures, which will have offices at 11 W. 42d St., already has received distribution rights for two TV film series and is planning production on another.

Associated with Mr. Balaban in Princess Pictures' initial production effort will be Gene Martel, who has produced shorts for Paramount Pictures. Mr. Balaban is the son of Barney Balaban, president of Paramount Pictures.

Jerry Fairbanks Named In Third Court Suit

SEEKING $7,000 damages, plus return of a film and negative allegedly due him, Joel Malone has filed suit against Jerry Fairbanks Inc. and Mr. Fairbanks in Los Angeles Superior Court. Also named defendant is Consolidated Film Industries, where the film and negative were reportedly processed and stored. If the properties are not available, Mr. Malone wants $12,000 damages.

Complaint charges that in May 1950, the late Frank Graham, announcer-actor, and his partner, R. Van Des Aultes, contracted with Mr. Fairbanks to furnish all facilities for a TV film, *Satan's Waitin'* and paid him $6,575. Mr. Malone, after securing all rights to the film from Messrs. Graham and Van Des Aultes, claims he has been unsuccessful in attempts to regain the property.

Other law suits filed in Los Angeles Superior Court against Mr. Fairbanks: (1) NBC has asked foreclosure of a chattel mortgage and public sale of a block of TV films sold to Mr. Fairbanks a year ago and for which he allegedly has not paid [B•T, Feb. 2], and (2) producer Lou Lilly seeks $7,300 in unpaid back salary as production supervisor and scenario department head.

Screen Assoc. Asks Damages, Charging Copyright Infringed

SUIT for unspecified damages resulting from alleged copyright infringement was filed Wednesday in Los Angeles Federal Court by Screen Assoc. Inc., Beverly Hills, against distributor Stuart Reynolds, Reynolds Productions, Mutual Television Productions, Sovereign Productions and producer Gilbert A. Ralston.

Screen Assoc., reportedly owned and controlled by the Ralph Stolkin interests, charges the defendants with exhibiting seven half-hour TV films during the past six months that were made prior to July 25, 1952, by the plaintiff's subsidiary, Screen Televideo Productions.

The films originally were included in *Electric Theatre,* sponsored by the Electric Companies of America advertising program on 42 stations, and *Your Jeweler's Showcase,* co-sponsored by Hamilton Watch Co. and International Silver on 26 stations. At the time Mr. Ralston was the firm's executive producer and Mr. Reynolds was sales representative.

In November 1952, Messrs. Ralston and Reynolds formed Sovereign Productions to handle production and sales of *NBC-TV's Cavalcade of America* for DuPont, *CBS-TV's General Electric Theatre* for *GE* and *Your Jeweler's Showcase* for Hamilton on a regional basis. Mutual Television recently was brought into the partnership to supervise business administration and policy.

Louis Snader Wins Claim From Film Partners

LOUIS SNADER, in the long drawn-out controversy with his partners, Alexander Bisno and Samuel Markovitch, has been given complete ownership of Snader Telescriptions Corp. for an undisclosed sum under an interim award of arbitrator Samuel R. Rosenbaum.

Messrs. Bisno and Markovitch have resigned as officers and directors, and with Henry Bisno, have sold their stock holdings to the Snader interests. Snader Telescriptions Sales Inc. and other subsidiaries of the parent corporation are being dissolved under the award.

The arbitration gives use of the Snader name exclusively to the producer. However, the 750 Snader Telescriptions which were sold to Ben Frye of Studio Films Inc., Cleveland, and now are being distributed through United Television programs Inc., will continue to carry the Snader Telescriptions trade name [B•T, Jan. 19].

Final Disposition

Final disposition of the dispute between the partners is expected next Monday when Mr. Rosenbaum returns to Beverly Hills, Calif., for further sessions. A problem still pending is division of net proceeds among several hundred investors who contributed $1 million to finance the Telescription enterprises. Disposition of a group of Alexander Korda feature motion pictures and a *Dick Tracy* TV series, controlled by the Snader Subsidiaries, still is to be determined.

Controversy between the Snader Telescriptions partners led to several law suits being filed this past year in Los Angeles. When Mr. Rosenbaum was brought in as sole arbitrator some weeks ago, agreement was reached to stay the various court actions and abide by his decisions.

Upped Sales Necessitate Ziv Sales Staff Increase

CONTINUED increase in sales on *Favorite Story, The Cisco Kid* and *Boston Blackie* has necessitated expansion in the sales force at the Ziv Television Programs Inc., M. J. Rifkin, vice president in charge of sales, announced last week.

With sales on *Favorite Story* in 67 markets and on *Boston Blackie* and *Cisco Kid* in 66 and and 67 areas, respectively, Mr. Rifkin declared that these programs "constitute the most successful programs in TV history."

He announced the addition of the following men to the Ziv sales staff: David Willis, for the Akron, Canton, Youngstown area; James Bellamy, former manager of WPTR Albany, upper New York State; Phil Williams, former head of TV sales for 20th Century-Fox, Dallas area, and Hardie Freiberg, New York.

Sales

Fletcher Jones, Los Angeles (Chrysler-Plymouth dealer), started weekly half-hour *Hollywood Off-Beat* on KNBH (TV) Hollywood, for 13 weeks from Jan. 31. Series, starring **Melvyn Douglas** and filmed by **Marion Parsonnet,** is distributed by **United Television Programs.** Agency is **Charles N. Stahl Adv. Agency,** L. A.

* * *

Greene-Haldeman Co., Los Angeles (Chrysler-Plymouth dealers), started weekly half-hour *Dangerous Assignment* on KNBH (TV) Hollywood, for 26 weeks from Jan. 30. Series, filmed by **Donlevy Development Corp.,** stars **Brian Donlevy.** Agency is **Creamer & Co.,** Hollywood.

* * *

Pelton Motors, Los Angeles, has started a weekly half-hour *Invitation Playhouse* on KLAC-TV Hollywood for 13 weeks from Jan. 28. The package, consisting of two quarter-hour programs weekly, was filmed by **Rene Williams Productions,** Hollywood, and is distributed by **Guild Films Inc.** The agency is **Irwin Co.,** Beverly Hills.

* * *

Virgil Vance, Phoenix (used car dealer), has started the weekly quarter-hour *Madison Square Garden* on KPHO-TV that city, for 13 weeks from Jan. 15. Filmed by **Winik Films,** the series is distributed by **Stuart Reynolds Productions,** Beverly Hills. Agency is **Lew King Adv.,** Phoenix.

* * *

Alexander Film Co., Colorado Springs, has announced the recent TV commercial productions for the following organizations: **Mortons Foods,** Dallas, Tex., five 20-second films through **Ira E. De Jernett Adv.,** same city; **Bowman Biscuit,** Denver, three 60-second films and one 20-second film through **Ball & Davidson,** Denver; **Gruen,** Cincinnati, five 26-second, one 90-second, one 46-second and one 20-second films; **Maytag,** Newton, Iowa, seven 46-second films and ten 13-second films through **McCann-Erickson Inc.; March-Wall Products,** Dover, Ohio, three 46-second and six 15-second films; **Youngstown Kitchens,** Warren, Ohio, thirteen 50-second and six 20-second films through **Brooke, Smith, French & Dorrance; Kaiser-Frazer,** Willow Run, Mich., twelve 60-second and twelve 20-second films through **Wm. N. Weintraub Co.; Seven-Up Bottling Co.,** St. Louis, eight 20-second films; **Culligan Zeolite Co.,** Northbrook, Ill., seven 46-second and three 20-second films through **Alex T. Franz Adv.**

Distribution

Interstate Television Corp., Hollywood, has contracted **KEM Pictures,** Beverly Hills, for additional 13 half-hour TV films in *Hans Christian Andersen* series. **Scandinavian-American Television Co.,** KEM's production firm, will resume filming in Denmark in April. Interstate has 13 programs ready for distribution. **Karl E. Moseby** is producer.

Production

Dennis O'Keefe, actor, and **Empire Films,** London production firm, have entered a partnership to film 26 half-hour TV programs abroad under title, *Adventure Is My Game.* Mr. O'Keefe will star.

* * *

Hal Roach Studios Inc., Culver City, is completing production plans to film a new half-hour TV series, *Wanted by Washington,* for **CBS. Roy Kellino** has been signed to direct the series.

* * *

Frank Tashlin Co., Hollywood, with filming headquarters yet to be assigned, has been signed by **NBC** to produce, on a partnership basis, a situation-comedy TV series of 39 half-hour films, **Oops, It's Daisy.**

* * *

Kling Studios Inc., Chicago, is shooting new sports package, *Boxing from Rainbo,* on location at the arena with **Jack Drees** handling the narration. Thirteen half-hour shows, with titles and designed for commercial inserts, have been completed and 13 more are in production.

Random Shots

Galaxy Pictures, Hollywood (formerly known as Planet Pictures), recently went into production on what was to be the half-hour pilot film of *Project Moon Base,* new TV series. At end of first day's shooting, producer-director **Jack Seaman** decided he had the beginning of a feature-length film. Within 24 hours he had arranged with the financial backers for the switch and completed the screen play for the new version.

* * *

Jiro Yanase and **John Tanaka,** representatives of Television Corp. of Japan, Tokyo, in Hollywood recently to purchase video film library and equipment for their firm, which will act as producing and distributing organization for the five commercial stations opening this year in Japan.

* * *

Dynamic Films Inc., New York, has completed production of documentary film, *High Tower.* Show, produced for the **Women's League of Israel** and filmed in Israel, was presented for the first time on Jan. 17 on WABD (TV) New York. Stations wishing to screen film may contact film company or league, 1860 Broadway, New York.

* * *

Opening of a new air-conditioned motion picture sound studio covering an entire floor of the Transfilm Bldg., 35 West 45th St., New York, was announced last week by **Transfilm Inc.,** which said the space added to four floors already occupied will help to increase its TV film production.

* * *

Telenews Productions Inc., N. Y., released to

AFFILIATION contract between WKNB-TV New Britain, Conn., and CBS-TV, effective Jan. 30, is signed by (l to r) Fritz Snyder, CBS-TV national director of station relations, and Peter B. Kenney, WKNB-TV general manager.

RENEWAL of daily five-minute *Florascope on Sports* and spot schedule, plus beginning *China Smith* weekly film series, all on WBNS-TV Columbus, Ohio, signed by August Wagner Breweries and station. Seated are Helen Wagner, daughter of sponsor founder, and Jim Amento, WBNS-TV general manager, and (standing) Frank N. Jones, account executive.

DISCUSSING ABC radio's *The Lone Ranger,* saluted by ABC radio and TV on the series' 20th anniversary recently, are (l to r) Raymond J. Meurer, executive of the Lone Ranger Inc., and Gordon Fraser, ABC commentator.

SPECIAL promotion material for Ziv Television Programs Inc.'s *Favorite Story,* sold in nearly 60 markets, is examined by (l to r) Russ Clancy, Ziv New York account executive, and M. J. Rifkin, Ziv sales vice president.

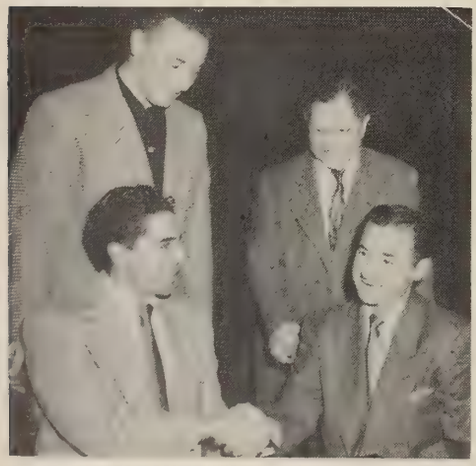
TV stations on Jan. 22 films dealing with the Soviet Union's campaign of anti-semitism.

* * *

This Is the Life, half-hour film series produced and sponsored by the **Lutheran Church-Missouri Synod,** St. Louis, in cooperation with the National Council of Churches of Christ in the U. S. A., is now carried as a regular weekly feature of 75 television stations, Synod announced last week. It is seen weekly by an estimated 6 million persons, spokesmen asserted. **Rev. H. W. Gockel,** religious director of the series, noted that new films for the 1953-54 series are already in production. **Wyatt & Schuebel,** New York, distributed the film for the Lutheran Church-Missouri Synod.

Film People

Alex Sherwood, former eastern vice president of Standard Radio Transcriptions, N. Y., to **United Television Programs Inc.** as account executive in charge of the mid-Atlantic sales territory, including New Jersey, Pennsylvania, Delaware, Washington, Virginia and West Virginia.



* * *

John A. Ettlinger, head of Goldstone Productions Inc., TV film subsidiary of Nat Goldstone Agency, Hollywood (talent agency), joins **Robers Maxwell Assoc.,** that city, with new headquarters at Goldwyn Studios, to handle film production on three new TV series. Firm packages the TV film version of *Superman* for **Kellogg Co. Milt Rosner** succeeds Mr. Ettlinger at **Goldstone Productions.**

* * *

Manny Reiner, vice president in charge of sales for PSI-TV Inc., has resigned to become foreign manager for **Samuel Goldwyn Productions,** with headquarters in New York.

PROGRAM SERVICES

PHIL RIZZUTO (seated, l), New York Yankees shortshop, signs contract to do transcribed, 26-week radio series, *Phil Rizzuto's Sports Caravan,* syndicated by Charles Michelson Inc., New York. Others are: (seated, r) Frank Scott, the star's manager, and (standing, l to r) Ray Chambers, program director, and Charles Michelson, sales distributor.

Clarkson Leaves Columbia

ROBERT J. CLARKSON, general manager of Columbia Transcription Div. of Columbia Records, has resigned. He was in the post 10 years and with the company more than 12 years. He will pursue a number of new recording projects, details of which will be announced shortly, he said.

FCC GIVEAWAY RULES TRIPPED BY SPLIT COURT DECISION

Special Federal Court in New York holds against FCC rules on giveaways, claiming misconstrual of the lottery law, and violation of the Constitution. Appeal to U. S. Supreme Court is expected to follow.

FCC's long-pending giveaway rules were slapped down by a special Federal Court in New York last week in a two-to-one decision which held that for the most part they misconstrue the Lottery Law and represent "censorship" in violation of the First Amendment to the Constitution.

Deemed sure to be appealed to the U. S. Supreme Court by the FCC, the court's majority decisions granted the motions of ABC, CBS and NBC for permanent injunctions against enforcement of all but one of the four provisions spelled out in the rules as "conditions" any one of which would make a giveaway show a lottery and therefore illegal.

The decision upheld the FCC's right to issue regulations, but of the original text of the giveaway rules it left standing only what amounts to the "preamble" and the portion which says a giveaway program violates the Lottery Law if contestants are selected by lot or chance and "are required to furnish any money or thing of value or are required to have in their possession any product sold, manufactured, furnished or distributed by a sponsor of a program broadcast on the station in question."

The three other "conditions" delineated in the rules as illegal requirements of contestants, the decision said, are not "price" or "consideration" of the sort banned by the law on lotteries (Sec. 1304 of the Criminal Code).

These include the requirements that the winner be listening to or viewing the program in question; that he answer a question whose answer has been given or hinted on an earlier broadcast; or that he be required to write a letter in a prescribed manner or answer the phone in a prescribed way, where the correct manner or way has been broadcast over the station.

Judge Leibell's Majority Opinion

Of the three judges who heard arguments on the 41-month-old rules last December [B•T, Dec. 22, 1952], District Judges Vincent L. Leibell and Edward Weinfeld formed the majority and circuit Judge Charles E. Clark dissented.

Judge Leibell wrote the majority opinion, a 41-page document.

"The act of listening to a broadcast of a 'giveaway' program, or viewing it on television, does not constitute a 'price' or 'valuble consideration,' which is an essential element of a 'lottery'," he wrote.

"It is not the value of the listening participants to the station or sponsor that is the valuable consideration contemplated by the lottery statute," the decision continued. "It is the value to the participant of what he gives that must be weighed."

Judge Leibell also noted that the Attorney General informed the FCC in 1940 that giveaways of the type which had been submitted to him at that time, similar to those involved in the giveaway rules, were not covered by the Lottery Law. When the FCC then asked Congress to legislate against this type of program, the decision continued, Congress failed to do so.

The opinion also brought out that the giveaway rules were adopted by a minority of the seven-member FCC—only four members voted, and one of these dissented.

Further, Judge Leibell wrote:

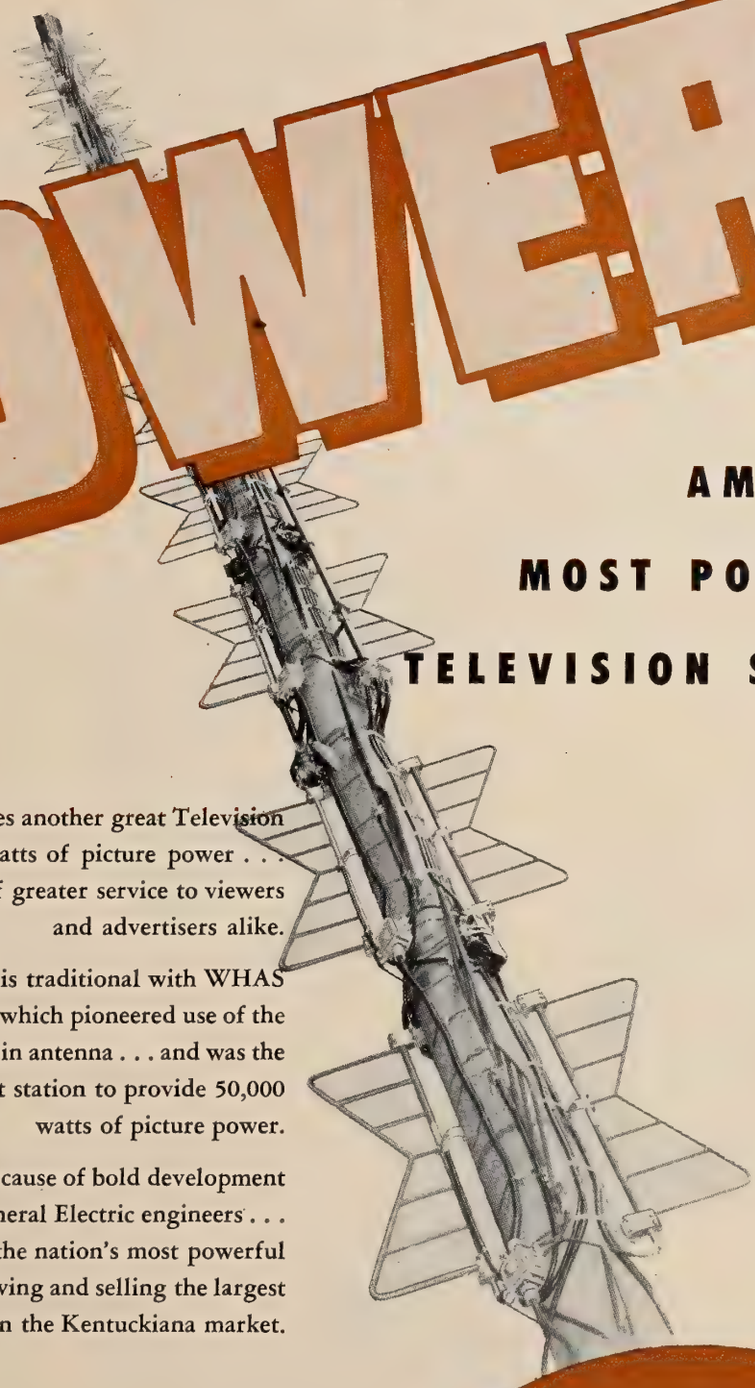
"The rules of the Commission, in their subject matter [lotteries], did not infringe the right of free speech or free press guaranteed by the first amendment. . . . But insofar as some of their provision [paragraph (B) (2), (3), and (4)] go beyond the scope of Sec. 1304 of the Criminal Code, they may be considered as a form of 'censorship' and to that extent they would be in violation of the First Amendment.

"The merits of the 'giveaway' programs are not an issue in this case. They appear to be a source of amusement for many thousands of people. Even if it could be said that 'we can see nothing of any possible value to society' in these programs, 'they are as much entitled to the protection of free speech as the best of literature or music. *Winters* v. *New York,* 333 U. S. 507.

"When the radio or television audiences tire of them, they will make their exit. But the Commission cannot hurry them off by characterizing certain features of the 'giveaway' programs as lotteries, if as a matter of law they are not."

The controversial rules, which at the time of their adoption in August 1949 would have put off the air countless programs giving away hundreds of thousands of dollars in cash and merchandise each week, were suspended by the Commission, pending completion of the court

Dissent 'Significant'



FACT that Circuit Judge Charles E. Clark dissented from the majority opinion on the FCC's giveaway rules favoring the networks was considered significant by FCC General Counsel Benedict P. Cottone, when he was asked for his comments on the New York Court's decision of last Thursday.

Mr. Cottone said he could not say for certain that the three-judge decision would be appealed to the Supreme Court until after he and his staff had digested the majority opinion and dissent, and had discussed it with the FCC and the Dept. of Justice.

"There is vindication for the FCC's position in the majority opinion as well," he said. "They did uphold the right of the Commission to promulgate regulations implementing the statute [Section 1304 of the U.S. Code]. Just what this can mean in the long run I can't say until we've read the decision and discussed it with the Commission and the Justice Dept."

NOW...316,000 WATTS...

POWER!

AMERICA'S MOST POWERFUL TELEVISION STATION

WHAS now achieves another great Television *FIRST* . . . 316,000 watts of picture power . . . 316,000 watts of greater service to viewers and advertisers alike.

This leadership is traditional with WHAS Television . . . which pioneered use of the 12-bay high gain antenna . . . and was the nation's first station to provide 50,000 watts of picture power.

First again . . . because of bold development work with General Electric engineers . . . WHAS becomes the nation's most powerful television station . . . serving and selling the largest number of viewers in the Kentuckiana market.

test, shortly before their Oct. 1, 1949 effective date. This suspension followed the winning of a preliminary injunction by the networks pending the formal argument leading up to last week's decision.

In the arguments before the court in December, ABC was represented by George B. Turner of the law firm of Cravath, Swaine & Moore; CBS by Max Freund of Rosenman, Goldmark, Colin and Kaye, and NBC by Paul B. Williams of Cahill, Gordon, Zachry & Reindel, all of New York. General Counsel Benedict P. Cottone argued for the FCC.

Text of the FCC's rules is as follows—paragraphs (a) and (b) (1) were upheld by the court while subdivision (2), (3), and (4) of paragraph (b) were set aside:

Lotteries and Give-Away Programs—(a) An application for construction permit, license, renewal of license, or any other authorization for the operation of a broadcast station, will not be granted where the applicant proposes to follow or continue to follow a policy or practice of broadcasting or permitting "the broadcasting of any advertisement of or information concerning any lottery, gift, enterprise, or similar scheme, offering prizes dependent in whole or in part upon lot or chance, or any list of the prizes drawn or awarded by means of any such lottery, gift enterprise, or scheme, whether said list contains any part or all of such prizes." (See U.S.C. 1304.)

(b) The determination whether a particular program comes within the provisions of subsection (a) depends on the facts of each case. However, the Commission will in any event consider that a program comes within the provisions of subsection (a) if in connection with such program a prize consisting of money or thing of value is awarded to any person whose selection is dependent in whole or in part upon lot or chance, if as a condition of winning or competing for such prize:

(1) Such winner or winners are required to furnish any money or thing of value or are required to have in their possession any product sold, manufactured, furnished or distributed by a sponsor of a program broadcast on the station in question; or

(2) Such winner or winners are required to be listening to or viewing the program in question on a radio or television receiver; or

(3) Such winner or winners are required to answer correctly a question, the answer to which is given on a program broadcast over the station in question or where aid to answering the question correctly is given on a program broadcast over the station in question. For the purposes of this provision the broadcasting of the question to be answered over the radio station on a previous program will be considered as an aid in answering the question correctly, or

(4) Such winner or winners are required to answer the phone in a prescribed manner or with a prescribed phrase, or are required to write a letter in a prescribed manner or containing a prescribed phrase, if the prescribed manner of answering the phone or writing the letter or the prescribed phrase to be used over the phone or in the letter (or an aid in ascertaining the prescribed phrase or the prescribed manner of answering the phone or writing the letter) is, or has been, broadcast over the station in question.

Wisconsin News Laws

LAWS of the state affecting all newsmen as well as the press and advertising have been published in book form by the Wisconsin Daily Newspaper League, supplementing two earlier booklets on the subject. Titled "Wisconsin Laws Affecting Newspapers," the 266-page volume includes provisions for a cumulative supplement to be prepared at the close of each state legislative session by the league's counsel, W. Wade Boardman of Madison, who directed preparation of the book. Price to non-members of the League is $10.

Old Old Timer

MEMBERS of the Old Old Timer's Club, a group of ham radio operators, have elected FCC Comr. George E. Sterling as president. Mr. Sterling became a ham operator in 1908, and has the call W3DF.

COURT HEARS LBS IN NFL CASE

LBS' McLendon and WDOK's Pierce describe some intricacies of radio-TV's football coverage as government testimony is about complete. Defense takes the stand next.

EVIDENCE designed to show how radio-TV restrictions of the National Football League damaged stations and networks was introduced in U. S. District Court, Philadelphia, last week as the government neared the end of its anti-trust case against the league. The defense is planning to introduce extensive testimony this week.

Effect of the NFL's 75-mile radius of protection for its clubs was described by witnesses last week as the government endeavored to show how the Sherman Act had been violated [B•T, Feb. 2].

Gordon McLendon, founder of Liberty Broadcasting System and executive director of KLIF Dallas, one of the last government witnesses, described his network's dealings with the league. Mr. McLendon is suing major league baseball for $12 million on the ground that restrictions against LBS baseball broadcasts had been a factor in putting LBS out of business. (See story, page 66).

Mr. McLendon

Liberty had more than 400 affiliates when it expired in May 1952, Mr. McLendon testified. The network depended mainly on sports programming, he said, particularly baseball and football play-by-play. Over weekends Liberty generally carried four college games, from 1947 to 1951, he testified. He said LBS broadcast recreated versions of professional football from 1947 through 1949, with live pickups in 1950 and 1951, all with NFL permission. He recalled only two games that were sponsored.

R. Morris Pierce, president of WDOK Cleveland, testified he had been denied permis-

Mr. Pierce

sion to broadcast the Los Angeles-Chicago playoff was due to start after the Cleveland game ended, he said, with WDOK offering to hold up start of the Coast game in case of an overlap.

Dec. 17, 1950, the same time Cleveland was playing New York in another playoff. The Los Angeles game

Mr. Pierce testified the Cleveland team failed to answer two letters asking the right to carry the game, so he contacted WERE Cleveland, which had contractual rights with the club. He said he advertised in newspapers that his station would carry the game but received a telegram from Liberty saying Los Angeles refused to grant the right to carry the game unless permission came from the Browns. He said failure to broadcast the game brought a flood of phone calls to the switchboard.

The government introduced minutes of NFL proceedings designed to show relationship of club executives, teams and the commissioner's office in the alleged conspiracy. The minutes quoted Commissioner Bert Bell as saying, "I cannot approve any contract (radio or TV) in which Liberty Broadcasting Co. is involved. Liberty violated the NFL constitution by broadcasting games from Cleveland and Pittsburgh."

An excerpt from the NFL minutes quoted George Preston Marshall, owner of the Washington Redskins, as saying TV and radio rights should not be sold in opposition to sponsors. This was designed to support the claim that NFL is protecting radio and TV territories for clubs and sponsors. Another excerpt showed the Los Angeles team voted against the NFL radio-TV policy at the annual meeting in 1952.

William F. E. Long, director of statistics of Radio-Television Mfrs. Assn., presented figures showing the number of sets sold by counties in 1952. Judge Allan K. Grim warned, after Mr. Long said he could not reveal exact information sources for confidential data, that the figures might be thrown out in accordance with defense objections.

David Klein, of Pulse Inc., testified on audience and receiver data.

Lee K. Beznow, attorney and secretary of WOKY Milwaukee; Don C. Wirth, president of WNAM Neenah, Wis., and Carl Gretz, sales and advertising manager of Gretz Brewing Co., Philadelphia, testified about football broadcast restrictions. Mr. Wirth said WNAM was not allowed to carry Green Bay Packers games because it was within the 75-mile limit.

Security Probe of Radio-TV Depends on Jenner and Staff

WHETHER the Senate Internal Security subcommittee of the Senate Judiciary Committee will continue its probe of subversive infiltration of the radio, television and entertainment industry will not be known for another week or 10 days until Sen. William E. Jenner (R-Ind.), named chairman of the subcommittee last week, works out plans with his staff for the next two years.

The Senate Internal Security subcommittee during the 82d Congress looked into subversive influences in the Radio Writers Guild [B•T, Sept. 1, 1952] and on the part of some radio-TV performers [B•T, Sept. 29, 1952].

Members of the Internal Security subcommittee, appointed last week are: Sens. William E. Jenner (R-Ind.), chairman; Arthur V. Watkins (R-Utah), Robert C. Henrickson (R-N. J.), Herman Welker (R-Ida.), John M. Butler (R-Md.), Pat McCarran (D-Nev.), James O. Eastland (D-Miss.), Willis Smith (D-N. C.) and Olin D. Johnston (D-S. C.).

New to the subcommittee are Sens. Henrickson, Welker, Butler and Johnston.

Incorrect FCC Form

SOME incorrect copies of revised FCC Form 323 (Ownership Report) have been distributed inadvertently, the FCC said last week. The incorrect forms contain nine questions, of which the sixth, "Operating Policy Personnel," was deleted as no longer necessary when the FCC revised the form Dec. 12, 1952. Broadcast licensees, permittees and others interested who are in possession of the incorrect forms should *not* use them or if they do use them, should ignore the question on "Operating Policy Personnel."

WEMP SETS PACE FOR MILWAUKEE MARCH OF DIMES

Strong sports programming tied to spot campaign proved to be a great success by "Cream City" independent

Highly successful triple play program policy used by WEMP paid off for the March of Dimes in Milwaukee. Adapting the music, news, sports formula to public service use is a regular practice at the Wisconsin independent, according to Lou Riepenhoff, the station's Public Service Director.

Dimes spots were used around the clock during the drive, but a highlight was a special promotion built around two sports broadcasts the same evening. On January 8th, Earl Gillespie was in Madison Square Garden to do private wire remote of Milwaukee Hawks pro basketball game. WEMP Program Director Tom Shanahan meanwhile was scheduled to follow Gillespie with a remote play-by-play of the pro Hockey benefit game at Milwaukee Arena between the Chiefs and Toledo Mercurys.

In order to tie the whole package up for March of Dimes, WEMP used (1) saturation spot schedule on day before and day of game, (2) last-minute heavy spot use by Gillespie from New York, and (3) complete March of Dimes promotion by Shanahan during the game at Milwaukee.

Result: 4,500 paid admissions at benefit game (more than double average attendance) with March of Dimes receiving the heavy proceeds. Note, WEMP is the **only station** in Milwaukee carrying any broadcasts of either pro hockey or basketball.

The personal side of WEMP's polio benefit broadcast is brought to listeners by Program Director Tom Shanahan during time-out at the Milwaukee Arena game between Milwaukee Chiefs and Toledo Mercurys. At the WEMP mike (l. to r.) are Dave Trainor, Chiefs forward, a former polio victim, holding four-year-old Mike Becker, Milwaukee youngster who recovered from polio and was chosen by March of Dimes as the symbol of hope. Chiefs' Manager Jack Stover introduces them.

Miller High Life Beer Promotes Sports All Year Play-By-Play on WEMP

Miller Brewing Co. continues year around exclusive advertising program on WEMP with play-by-play sponsorship of major league basketball—Milwaukee Hawks. Miller regularly sponsors Green Bay Packers pro football and Milwaukee Brewers baseball broadcasts, plus fat announcement schedule. Agency is Mathisson & Associates, Milwaukee.

Station Executives Praise New Broadcasting Format

"You're too modest." That was the message Hugh Boice Jr., general manager, WEMP, sent to Sol Taishoff when he had read Broadcasting Magazine editor's review of the new format.

"All of us here at WEMP are not just pleased at your re-styling, we are really enthusiastic. Congratulations are not enough, it's terrific!" added Glen D. Roberts, president.

Glen D. Roberts (right), President of Milwaukee Broadcasting Co., joins with Hugh Boice Jr., WEMP general manager, to greet the new Broadcasting • Telecasting. Both men are old-timers in field of radio with careers which parallel that of the magazine. Roberts commented, "I don't believe I've missed an issue of Broadcasting • Telecasting in 22 years. This one tops them all."

Oxydol Buys WEMP

The high-rated programs at WEMP were chosen by Oxydol to do the job in Milwaukee for the soap's current effort in the midwestern states. One minute ET's are used around the clock 22 times a week. Agency is Dancer, Fitzgerald, Sample.

HEADLEY-REED NATIONAL REPRESENTATIVES

THE WHITE HOUSE

WASHINGTON

January 30, 1953.

Dear Mr. President:

My heartiest congratulations to you and your associates as you start your term of office.

May your administration be a great success and may all your troubles be light ones.

By the way, do you expect to permit radio and television to cover your inaugural ceremonies?

Sincerely,

Dwight D. Eisenhower

Mr. Theodore F. Koop,
President,
National Press Club,
National Press Club Building,
Washington, D. C.

President Eisenhower's letter sent to Theodore F. Koop, CBS Washington, on occasion of Mr. Koop's inauguration as president of the National Press Club.

Fate of $8 Million for FCC Up to Senate, House Groups

FATE of the budget request of $8 million for the FCC—submitted to Congress by President Truman last month [B•T, Jan. 12]—will be determined by members of the House and Senate Appropriations Committees, and more directly by the Independent Offices subcommittees of both Houses.

$1.5 Million More

The $8 million request for the FCC, $1.5 million more than the Commission got for fiscal 1953, includes an additional $500,000 for broadcast activities. Last year the Commission got $1.1 million for broadcast activities.

The House originates appropriations bills. Here are members of the House Appropriations group's Independent Offices subcommittee which has a hand in determining how much money the FCC gets for fiscal 1954:

Reps. John Phillips (R-Calif.), chairman; Norris Cotton (R-N. H.), Charles R. Jonas (R-N. C.), Otto Krueger (R-N. D.), Albert Thomas (D-Tex.), George W. Andrews (D-Ala.) and Sidney R. Yates (D-Ill.).

House members of the State, Justice and Commerce subcommittee, which handles Voice of America appropriations—President Truman asked for almost $50 million for VOA activities in fiscal 1954 (see story this issue)—are:

Reps. Cliff Clevenger (R-Ohio), chairman; Frederic R. Coudert (R-N. Y.), Frank T. Bow (R-Ohio), Sam Coon (R-Ore.), John J. Rooney (D-N. Y.), Prince H. Preston Jr. (D-Ga.) and Robert L. F. Sikes (D-Fla.).

In the Senate, the following are members of the Independent Offices subcommittee of the Appropriations Committee:

Sens. Leverett Saltonstall (R-Mass.), chairman; Styles Bridges (R-Me.), Homer Ferguson (R-Mich.), Guy Cordon (R-Ore.), Edward J. Thye (R-Minn.), Joseph R. McCarthy (R-Wis.), Henry C. Dworshak (R-Idaho), Everett McK. Dirksen (R-Ill.), Burnet R. Maybank (D-S. C.), Lister Hill (D-Ala.), Allen J. Ellender Sr., (D-La.), A. Willis Robertson (D-Va.), Harley M. Kilgore (D-W. Va.) and Warren G. Magnuson (D-Wash.).

State, Justice and Commerce subcommittee:

Sens. Styles Bridges (R-N. H.), chairman; Leverett Saltonstall (R-Mass.), Homer Ferguson (R-Mich.), Joseph R. McCarthy (R-Wis.), William F. Knowland (R-Calif.), Karl E. Mundt (R-S. D.), Margaret Chase Smith (R-Me.), Everett McK. Dirksen (R-Ill.), Pat McCarran (D-Nev.), Allen J. Ellender Sr. (D-La.), Lister Hill (D-Ala.), Harley M. Kilgore (D-W. Va.), John L. McClellan (D-Ark.) and Warren G. Magnuson (D-Wash.).

MOVIE TV HEARING IS HELD UP

Theatre-TV hearings will continue on schedule after motion picture interests answer eight questions posed by FCC.

THEATRE-TV hearings are scheduled to mark time today and tomorrow while counsel for motion picture interests answer a list of eight FCC questions propounded two weeks ago by the Commission [B•T, Feb. 2].

The questions call for more explicit explanations of the reasons why theatre-TV proponents require exclusive microwave frequencies, and what criteria should be set up for operating such wave-lengths, should the FCC agree. (For full text of FCC questions, see FOR THE RECORD, page 92.)

At the end of last week's testimony, the Commissioners ruled they would consider the answers given by theatre-TV counsel before ordering continuance of the proceedings.

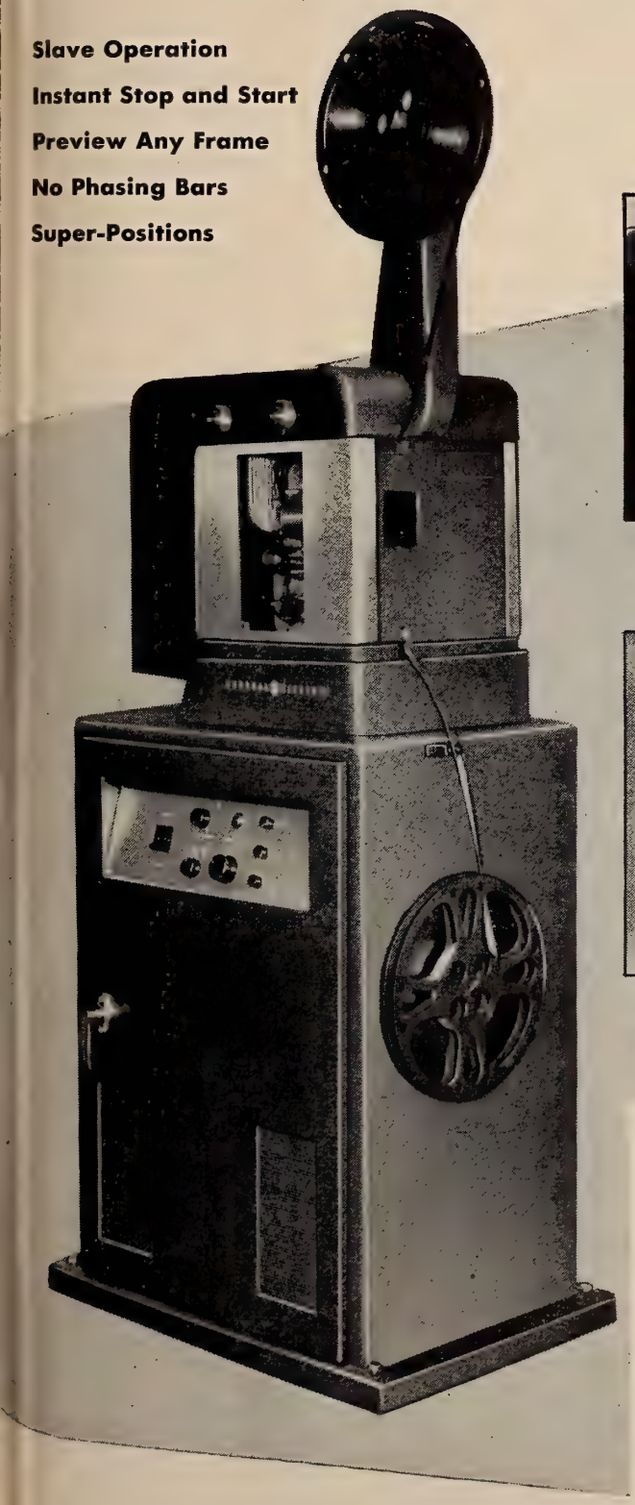
Theatre-TV hearings began last October, ran for two weeks and were resumed Jan. 26. At issue is the request of motion picture interests for exclusive theatre-TV frequencies in the 5925 to 6875 mc portion of the spectrum, with (1) video channels 10 mc wide, (2) radio frequency channels 30 mc wide, (3) two channels for a single system and (4) six systems in order to insure effective competition [B•T, Oct. 27, 1952].

American Telephone & Telegraph Co., major opponent to the exclusive frequency allocations, presented three witnesses to FCC last week to support the contention that the firm could now and in the future meet the needs of theatre-TV. Their arguments centered around (1) facilities presently available, (2) research completed and under way in transmission equipment and methods, and (3) cost data for a New York to Washington transmission system.

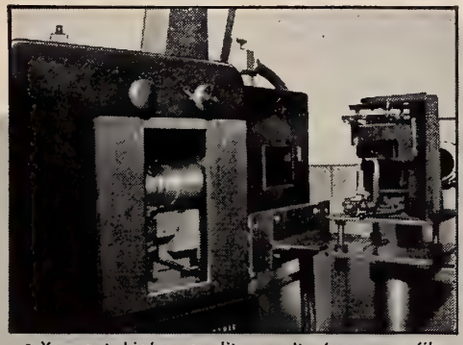
F. A. Cowan, engineering staff manager of the Long Lines department, testified as to the existing and planned inter-city transmission facilities of the Bell System, and presented the cost data figures.

Second witness for AT&T was F. M. Ryan, radio engineer, Dept. of Operations and Engineering. His testimony related to the research and development projects of the Bell System in broadcast transmission.

Final witness for AT&T was William H. Doherty, director of research in electrical communication, Bell Telephone Labs. He discussed specific development, i.e., coaxial cable, transistor and other vacuum tubes in relay systems, which were intended to show the importance of Bell System's research to communications systems of the future. His remarks were not confined strictly to application of these developments to theatre-TV.

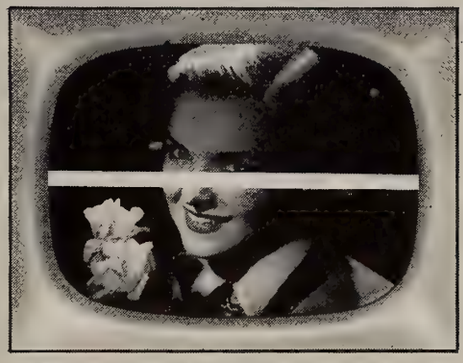


Winding up the technical and accounting direct testimony last Tuesday, RCA, Western Union and the American Petroleum Institute presented witnesses to support their protests against exclusive allocations.



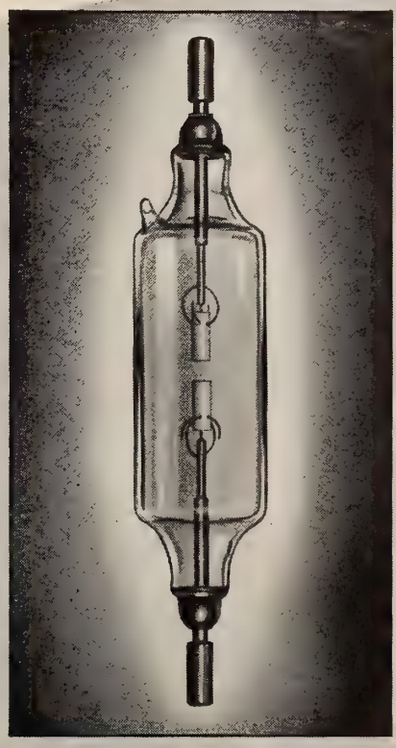
RCA, protesting the application, presented George L. Beers, assistant director of engineering, who testified that an 8 mc band-width would be sufficient for transmission of pictures which would meet specifications set forth by the proponents.

The American Petroleum Institute presented as its witness A. Earl Cullum, radio consultant engineer from Dallas. Mr. Cullum's testimony alleged that allocation in the industrial frequencies is not necessary for transmission of theatre-TV programs.



Compare G-E Synchro-Lite Projector Performance

Slave Operation
Instant Stop and Start
Preview Any Frame
No Phasing Bars
Super-Positions



• You get higher quality results from any film used—even high density film. Iconoscope tubes respond more favorably to a Synchro-Lite source than to standard incandescent sources.

• Forget annoying phase bars and "travel ghosts" and concentrate on the versatile effects you can get from the G-E Synchro-Lite Projector.

SYNCHRO-LITE FLASH TUBE, FT-231

• Money-maker and money-saver! G-E Synchro-Lite Projector gives you long lamp life, no instantaneous lamp failure, and requires low power input.

Now your commercial possibilities become unlimited—with a G-E Synchro-Lite Projector. For the first time you can superpose local film on remote presentations. Here's the only TV projector that can be slaved to a network or a remote source assuring smooth, continuous programming of a quality never before attainable! A touch of a button brings the film to a standstill within a second. Preview on the monitor any single frame of the film—from start to finish—without scorching or burning. Another touch and film starts. These days, when so much of your money-making commercial and regular programming depends on film, get the utmost in projector performance—insist on a G-E Synchro-Lite Projector. AFFILIATES: DuMont CBS Paramount

ABC-UPT MERGER APPROVAL IMMINENT

Six-to-one FCC lineup seen in favor of ABC-UPT merger, but Commissioners are more divided on question of whether Paramount Pictures controls Allen B. DuMont Labs. and whether transfers of control of KTLA (TV) Los Angeles and WBKB (TV) Chicago would be voluntary.

ENMESHED in the intricacies of subsidiary facets of the ABC-United Paramount Theatres Inc. merger case, the FCC last week devoted two full days to discussions and is scheduled to make a final decision at any moment.

Holding up the conclusion of the 18 month-old case, it was understood, was the question of (1) Paramount Pictures control of Allen B. DuMont Labs., and (2) whether the transfers of control of KTLA (TV) Los Angeles and WBKB (TV) Chicago were voluntary or involuntary [B•T, Feb. 2].

Also understood to be a factor causing some delay is the question of Zenith Radio Corp.'s petition. Firm seeks Ch. 2 in Chicago. WBKB (TV) is slated to move from Ch. 4 to Ch. 2 under FCC's Sixth Report and Order.

The lineup of the FCC on the merger approval is still six commissioners in favor and one (Comr. Frieda B. Hennock) opposed, it was believed.

As far as could be learned, Comrs. Edward M. Webster and Eugene H. Merrill were inclined to go along with Miss Hennock in opposition to Hearing Examiner Leo Resnick's initial decision finding that Paramount Pictures does not control DuMont by virtue of 25% stock ownership and that the transfers were of involuntary nature, because of the 1949 Consent Decree [B•T, Nov. 17, 1952].

Walker's Position

Key to whether that opposition will become the majority opinion apparently lies with Chairman Paul A. Walker. Best information late Thursday was that he had not switched his views conforming to the hearing examiner's decision.

Comr. Hennock's voluminous dissent was said to be mainly an attack on the alleged monopoly aspects of the merger and also in opposition to clearing Paramount Pictures and DuMont of interrelated ownership and permitting the transfers of control to be tabbed involuntary.

Miss Hennock's dissent to approval of the merger was believed to run along these lines:

- A radio-TV network and 600-theatre chain merger is against the public interest.
- Although the theatre chain ostensibly is separated from its parent Paramount Pictures, in actuality there is an overlap of stockholders. Therefore, Paramount Pictures must be considered a party to the merger.
- Paramount Pictures is in the business of producing films for competing media, theatres and TV.
- Paramount Pictures is in the TV network business (KTLA syndicates some of its shows on kinescope to other TV stations and Paramount Pictures "controls" DuMont, which also is a TV network).
- Paramount Pictures also has its fingers in the theatre-TV business through its development of large-screen TV-on-film apparatus and is interested in subscription-TV through half-ownership of International Telemeter Corp. Theatre-TV and subscription-TV are competing forms of television and also conflict with home-TV.
- Lastly, Paramount Pictures' anti-trust history disqualifies it as a broadcast licensee. This history reflects on the management of UPT, because its officers were responsible executives of Paramount Pictures before that company was divided into a producing unit and a theatre-owning group.

Meanwhile, all remained quiet on Capitol Hill where Sen. Charles W. Tobey (R-N.H.), chairman of the Senate Interstate and Foreign Commerce Committee, announced his displeasure with the merger last month [B•T, Jan. 12]. A few weeks ago he introduced a bill to forbid the FCC from granting licenses to applicants who have been convicted of anti-trust violations, unless none were on the record for the five years preceding the filing of the application [B•T, Jan. 26]. Comments on the bill have been requested of the FCC.

Court and Hill Action Seen in Baseball TV Hassle

IRKSOME question of major league baseball telecasts last week produced veiled reports of possible federal legislation to halt TV's growth in minor league territories and court action by a major league club owner seeking a portion of a home club's TV fees.

The possibility of congressional action was advanced by Sen. Edwin C. Johnson (D-Col.), president of the Western League and an outspoken critic of the major leagues' baseball policies. Sen. Johnson sounded a warning to the minor leagues to be on guard against "invasion by major league television" during a talk at the annual dinner of the New York chapter of the Baseball Writers Assn. of America in New York Feb. 1. In a news conference after his speech he was quoted by the *New York Times* as saying: "I am playing around with legislation which may be brought before the Senate."

In reply to Sen. Johnson's remarks, Walter O'Malley, president of the Brooklyn Dodgers, said:

"Baseball will take care of the radio and TV problem itself. We have a committee that is very much concerned with the problem and I am sure that it will come up with the solution before the next season is over."

Mr. O'Malley apparently was referring to a six-man committee set up by Commissioner Ford Frick to study the effects of major league baseball TV on minor league game attendance. The committee announced a short time ago that it will undertake a survey of the problem and make its findings public at the time of the All-Star game in Boston on July 14 [B•T, Feb. 2].

Threat of court action was indicated by Bill Veeck, owner of the St. Louis Browns, and is said to be directed against the New York Yankees, Cleveland Indians and Boston Red Sox, who have large-size TV commitments. Mr. Veeck tried unsuccessfully at recent major league baseball meetings to adopt rulings permitting visiting clubs to share in TV home club receipts.

Mr. Veeck charged last week that as a result of his insistence upon TV fees the Yankees, Red Sox and Indians "have ganged up on me" and deprived the Browns of night dates in their respective parks.

FASTER HEARINGS ARE SEEN FOR NEW STATIONS UNDER CHANGED RULES

FASTER, simpler hearings for new TV and other broadcast stations are foreseen by FCC through changes in rules and procedures adopted last week.

Effective immediately, the changes made by the Commission:

● Require all competing applications for the same facility to be on file at least 30 days (previously 20 days) prior to the start of the scheduled hearing. This applies to broadcast and nonbroadcast bids alike.

● Specify that a hearing shall begin with a formal hearing conference by the hearing examiner, or other presiding officer, and representatives of all parties to the proceeding. These include FCC's Broadcast Bureau as well as counsel for the applicants.

● Direct all parties at the formal hearing conference to state the contentions upon which they will rely in attempting to establish that they should be preferred over their competitors.

● Require the examiner to prepare an order setting forth such contentions, to which the parties will be limited during the hearing unless the order is subsequently modified for "good cause."

Other changes pertinent specifically to television include provision that applications will be processed first by FCC to establish basic legal, technical and financial qualifications and then set for hearing. The proceeding thereby would be cut to the following three general issues:

(1) The background and experience of each applicant having a bearing on his ability to own and operate the proposed television station.

(2) The proposals of each applicant with respect to the management and operation of the proposed station.

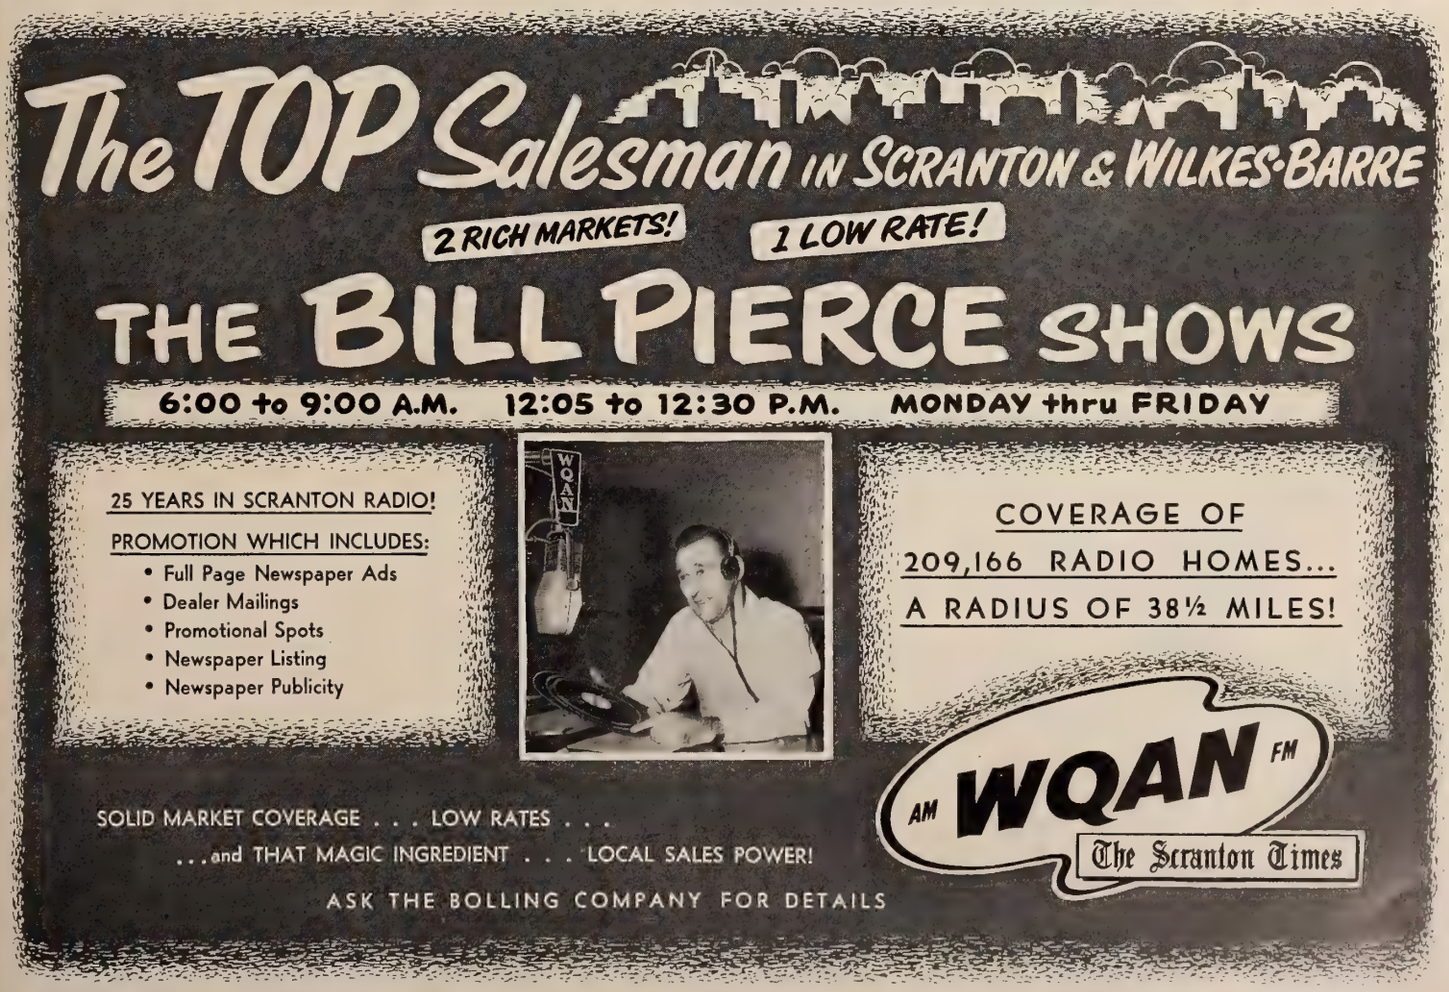
(3) The program service proposed by each applicant.

A possible additional issue would pertain to whether or not the proposed installation would constitute a hazard to air navigation should the air space subcommittee not already have given clearance. Other possible issues might pertain to significant engineering, legal or financial differences or similar matters. These would be the kind of problems to be worked out by the parties and the hearing examiner at the formal hearing conference.

FCC explained the changes will not affect hearing already underway or formally designated on or before Feb. 4, but applicants slated for hearings on which no formal orders have been issued will be subject to the new procedures. Applicants notified by McFarland letters, but not formally set for hearing, come under the new rules, it was explained.

Since last Oct. 15, the Commission pursuant to its temporary expediting procedure has been passing over mutually exclusive or contested TV applications in order to speed up processing and granting of uncontested bids, particularly in areas which have no TV service. However, it is understood a new group of contested bids has been readied and will be set for hearing under the new rules soon.

The hearing procedure and rules changes represent weeks of work by FCC Vice Chairman Rosel H. Hyde and a working committee of Commission representatives and members of the Federal Communications Bar Assn. The group is continuing its study of needed legal procedural changes and next is expected to tackle the problems of hearing continuances and amendments of applications.



Comr. Hyde was to relate details of the rules changes before a luncheon meeting of the FCBA on Friday.

The change of the 20-day rule to 30 days, FCC said, was necessitated by amendment of the Communications Act by the MacFarland Act. The Commission observed that under the old 20-day limit, there was insufficient time to send applicants a MacFarland letter and then to commence the hearing on the scheduled date.

The MacFarland letter notifies an applicant he is to be set for hearing and gives him 30 day to reply, possibly suggesting to the Commission changes in his proposal which might do away with the need for hearing.

Heretofore, in several instances, there have been legal disputes as to when a hearing actually began. In some TV proceedings, FCC designated hearings for all channels in a given city to begin before an examiner on the same date. On that date, the examiner would "open the record" of all the cases, then recess all but one until later dates. The one not recessed would then be heard in full for several weeks, followed in turn by the others.

This confusion as to commencement, FCC believes, now is settled through the designation of the formal hearing conference. The 30-day

rule would be counted back from this date. Should the conference be postponed, the last date specified will count, FCC explained.

At the formal hearing conference, the parties will note their appearances, enter into stipulations, clarify issues and work out other mutual problems. Following identification of all parties to the proceeding, the applicants must present the contentions on which each will base his case.

There is no change in the privilege of the parties and the examiner to call a "pre-hearing" conference as provided still in the rules.

Simplification of the TV hearing orders includes omission of an issue relating to differences in coverage resulting from operation as proposed in the applications. FCC observed that it would add such an issue only if it determined this comparison was required after it reviewed the applications or the petitions of the parties following designation for hearing.

The rules changes follow:

(1) Section 1.387 is amended as follows:

Delete present subparagraph (b)(3) and substitute following:

(3) Any person who, prior to the time the application in question was designated for hearing, had filed with the Commission a mutually exclusive application. Any application that is mutually exclusive with another application or applications already designated for hearing will be consolidated for hearing with such other application or applications only if the application in question is filed at least 30 days before the date on which the hearing on the prior application or applications is scheduled. If the scheduled date is changed, the date last set shall govern in determining the timeliness of an application for purposes of this paragraph. If the application is filed after the 30-day period, it will be dismissed without prejudice and will be eligible for refiling only after a decision is rendered by the Commission with respect to the application or applications designated for hearing or after such applications are dismissed or removed from hearing.

(2) Section 1.724(b) is amended as follows:

Any application that is mutually exclusive with another application or applications already designated for hearing will be consolidated for hearing with such other application or applications only if the application in question is filed at least 30 days before the date on which the hearing on the prior application or applications is scheduled. If the scheduled date is changed, the date last set shall govern in determining the timeliness of an application for purposes of this paragraph.

(3) Section 1.841 is changed to Section 1.840 with no change in text.

(4) A new Section 1.841 is added as follows:

Sec. 1.841 *Commencement of hearing procedure in cases involving broadcast applications.*[1]

(a) Except for good cause found in advance by the Hearing Examiner, all broadcast hearings will commence with a conference between the Hearing Examiner, or other presiding officer, and representatives of all parties to the proceeding looking toward agreement on all matters raised with respect to the conduct of the hearing. At this conference, the parties, including Commission counsel should be prepared to discuss (1) the matters relied upon by each of the parties, (2) possibilities of agreement to clarify the issues to be tried in the hearing, (3) admissions of fact and of documents which will avoid unnecessary proof, (4) the need or desirability of obtaining proof by depositions, (5) limitations upon merely cumulative proof, (6) the need for additional conferences, (7) date for commencing the taking of testimony and (8) such other matters as may aid the disposition of the hearing.

(b) The Hearing Examiner, or other presiding officer, shall issue an order which recites the action taken at the conference; the date of any additional conference or the date for taking of testimony which, in the absence of agreement otherwise, should not be later than 30 days after the issuance of such order if circumstances will permit; the matters relied upon by each of the parties; agreements made by the parties as to (1) admissions of fact and documents, and (2) limitations of proof and other matters; and such order when issued shall control the subsequent course of the hearing unless modified by the Hearing Examiner for cause during the course of the hearing or by the Commission upon a review of the Hearing Examiner's ruling. Proof at the hearing will be adduced only in respect of the matters relied upon by each of the parties, including Commission counsel, set out in such order.

(c) The scheduled date of hearing referred to in Sections 1.387(b)(3) and 1.724(b) shall be the date the conference is commenced pursuant to the provisions of this section. The procedure specified above does not affect the opportunity for prehearing conference as provided in Section 1.813.

[1] This section applies only to broadcast applications designated for hearing after February 4, 1953.

How Harveys built a market twelve times the size of Nashville . . .

Ten years ago Harveys was a department store with a piddling 40 feet front on Nashville's Church Street and a paltry half million annual volume. Today Harveys stretches 300 feet to fill most of a block, does a million a month.

How did it happen? Here's what Fred Harvey, president of Harveys, has to say: "Casting aside the horse and buggy concept of what a Retail Trading Zone should be, we went after an area twelve times the size of Nashville. We talked to this area over WSM, the one medium capable of converting geography into a market. We could have bought other stations cheaper, but we wanted results and that's what WSM delivered, and continues to deliver."

The fact that the phrase "It's Fun To Shop At Harveys" is heard all over the Central South . . . the fact that people come from all over to see and buy at fabulous Harveys . . . is ample evidence that WSM delivers at the retail level, too.

For the full Harveys story, ask Irving Waugh or any Petry man.
It's an eye-opener.

FCC GRANT OF VHF CH. 7 IS PROPOSED FOR KLZ DENVER

Hearing Examiner Cunningham finds KLZ "superior" to Denver Television Co., owned by the Wolfberg theatre interests, in the first TV hearing initial decision since 1948. The Wolfberg firm has 40 days to file objections, but officers late last week had no definite plan.

FIRST TV hearing initial decision since 1948 was issued last week when FCC Hearing Examiner James D. Cunningham proposed to grant Ch. 7 to Denver's KLZ.

The grant, for 316 kw, is effective within 40 days of Feb. 2, unless exceptions are taken by unsuccessful Denver Television Co. (Wolfberg theatre interests). As of late last week, Denver Television had not made up its mind about filing exceptions. If exceptions are filed and oral argument before the full Commission is requested, final decision may be put off for longer than the 40 days allowed.

Basis for favoring the CBS affiliate over non-broadcaster Denver Television, according to Examiner Cunningham's 60-page initial decision, was:

(1) Local residence of stockholders.

(2) Participation of directors in community activities.

(3) Integration of ownership and management.

In addition, Examiner Cunningham held that there was insufficient evidence in the record to determine whether there was any conflict between broadcasting and motion picture exhibition. Nor did he find sufficient basis for determining that movie exhibitors were less qualified than non-exhibitors to become licensees.

Since both applicants were motion picture exhibitors, this question did not loom as large as it may in other hearings where one but not both applicants are theatre owners.

Diversification Not Factor

In another key contention held by Denver Television—that a non-broadcaster should be chosen over a broadcaster in order to maintain diversification of the ownership of the media of mass communication—Examiner Cunningham declared that he could not find such a policy enunciated by the Commission, except in cases where an applicant was newspaper owned.

Mr. Cunningham also declared that had the Commission desired that diversification be considered in choosing between the two Denver applicants, it would have made that point one of the issues in the case. Since it had not done so, Mr. Cunningham stated that the Commission apparently did not consider this point as significant in choosing one applicant over another.

Question whether CBS affiliation contract with KLZ—which contained a first refusal clause regarding TV affiliation—was in conflict with Section 3.658 (a) and (c) was determined in the negative by Examiner Cunningham. He called Denver Television's contention that the CBS clause violated the regulation a "strained interpretation."

Anti-trust violations which were imputed as disqualifying to several principals of both applicants were dismissed by the hearing examiner on the ground that all related to events more than three years old.

In connection with the criteria enunciated by Examiner Cunningham for finding which of the applicants was best qualified, the examiner found KLZ the "superior" applicant. He pointed out that 36 of the 43 KLZ stockholders, holding 58% of the stock, resided in Denver; that one of the five KLZ directors had lived in Denver for more than 60 years, another for 34 years and a third for 12 years. He called the public service record of KLZ directors "outstanding." He also was impressed with the broadcasting achievements of KLZ during its 30 years of operation in Denver.

[For complete text of Examiner Cunningham's conclusions, see FOR THE RECORD, page 92.]

Nationwide expressions of congratulations were received by KLZ Denver within 24 hours after the FCC initial decision. It was topped with a wire from Colorado Gov. Dan Thornton, Hugh B. Terry, president of company, reported.

In a statement issued by Mr. Terry, he pointed out that KLZ already owns its transmitter site atop Lookout Mt., and has leased a 34,000 sq. ft. building in downtown Denver for studios. KLZ is ready to commence construction immediately upon the issuance of a CP, Mr. Terry said, warning, however, that should Denver Television file exceptions and request oral argument KLZ cannot begin building until the FCC comes out with a final decision.

Mr. Terry

The examiner's proposed decision culminated more than 4½ years of planning and training for TV, Mr. Terry pointed out. He referred to staff training utilizing $100,000 worth of RCA video equipment which KLZ has engaged in for the past year in conjunction with the U. of Denver, as well as public closed circuit showings of national events and "clinics."

Ike Readies Details of AM-TV Appearances

FORMAT for radio-TV contact between President Eisenhower and the public is being worked out but is not yet ready, James C. Hagerty, secretary to the President, said Wednesday in an address to the Washington professional chapter of Sigma Delta Chi, journalistic fraternity.

"I'm sure that we can work it out," he added. Mr. Hagerty had outlined Jan. 21 the policies to be followed in news conferences [B•T, Jan. 26].

Three national fellowships were awarded at the fraternity dinner, held at the National Press Club. They went to James Soule Pope, executive editor, *Louisville Courier-Journal* and *Times*; James B. Reston, diplomatic correspondent, *New York Times*, and Louis B. Seltzer, editor, *Cleveland Press*.

Griffing Bancroft, president of the Washington chapter, presided.

Mr. Hagerty in effect conceded the rising place radio and TV are attaining in the news field by describing himself as "news secretary to the President."

At his Thursday morning news conference Mr. Hagerty said the President would likely hold his first session with newsmen sometime this week, possibly Thursday.

FCC Grants Two AM, Two FM

TWO construction permits for new AM stations and two for FM were granted by FCC last Thursday:

Eastland, Tex. — Tri-Cities Bcstg. Co. of Eastland County. Granted CP for a new AM station to operate on 1590 kc, 500 w day; engineering condition (BP-8575).

Russellville, Ky. — South Kentucky Bcstg. Co. Granted CP for a new AM station to operate on 800 kc, 1 kw, daytime only; engineering condition (BP-8533).

Talladega, Ala. — Voice of Talladega Inc. Granted CP for new Class B FM station to operate on Ch. 246; ERP 9.2 kw; 210 ft. antenna; engineering condition (BPH-1819).

Nashville, Tenn.—Nashville Bcstg. Co. Inc. Granted CP for new Class B FM station to operate on Ch. 290; ERP 3.6 kw; 47 ft. antenna; engineering condition (BPH-1822).

FCC BITES INTO APPLICATION LOAD

FCC grants 10 more permits for TV operation, bringing total number of stations authorized to 338.

FOREST of TV applications, which confronted FCC last July now is starting to thin out as the Commission reaches smaller cities on its priority list of communities with no television service.

Among the eight uhf and two vhf grants made by FCC last week were four permits to cities in the Group A-2 priority list (no television service): Billings, Mont., No. 152; Texarkana, Tex., No. 208; Longview, Tex., No. 210, and Ashtabula, Ohio, No. 214.

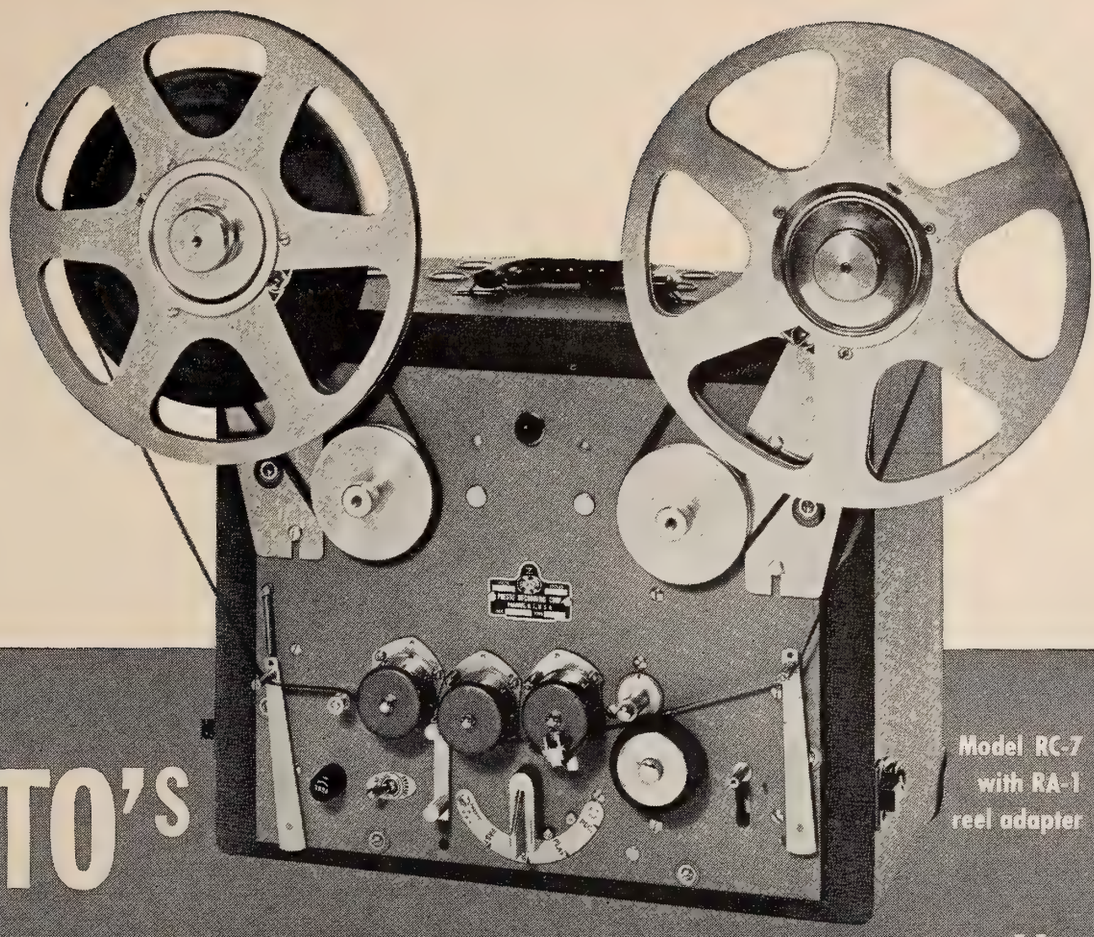
Six grants were to Group B cities which now have TV service: Lansing, Mich., No. 147; Clayton, Mo. (Greater St. Louis), No. 179; Winston-Salem, N. C., No. 175; Milwaukee, No. 182, and Hampton-Newport News (Norfolk), Va., No. 189.

Total number of TV stations authorized now stands at 338, but 14 of these are for noncommercial, educational stations. Nearly a dozen of the noncommercial outlets still report no funds with which to buy equipment and commence construction.

Number of vhf grants since the lifting of the freeze totals 68, of which two are for noncommercial, educational stations. Uhf grants total 162, of which 12 are for noncommercial, educational stations.

Grants made last Thursday were:

Billings, Mont. (City priority Group A-2, No. 152)—The Montana Network (KOOK), granted construction permit for vhf Channel 2, effective radiated power 17.5 kw visual and 8.8 kw aural, antenna height above average terrain 440 ft.



Texarkana, Tex. (Group A-2, No. 208) — KCMC Inc. (KCMC), granted vhf Ch. 6, ERP 18.5 kw visual and 9.4 kw aural, antenna 400 ft. (Comr. Frieda B. Hennock did not participate in voting on grant.)

Longview, Tex. (Group A-2, No. 210)—East Texas Television Co. (Henry Radio & Appliance Store), granted uhf Ch. 32, ERP 20 kw visual and 11 kw aural, antenna 290 ft.

Ashtabula, Ohio (Group A-2, No. 214)—WICA Inc. (WICA), granted uhf Ch. 15, ERP 19 kw visual and 10 kw aural, antenna 330 ft.

Lansing, Mich. (Group B-2, No. 147)—Lansing Broadcasting Co. (WILS), granted uhf Ch. 54, ERP 25.5 kw visual and 13 kw aural, antenna 370 ft.

Clayton (St. Louis suburb), Mo. (Group B-4,

Model RC-7
with RA-1
reel adapter

PRESTO'S "LONG PLAYING" PORTABLE TAPE RECORDER

The PRESTO RC-7 has already been acclaimed "the finest tape recorder of its size available." Although portable in size, the RC-7 embodies features and heavy duty construction found only in larger, more expensive, studio-type machines.

Now, with the new RA-1 reel adapter, this precision recording instrument becomes an indispensable piece of equipment for every station and recording studio. With this adapter, the RC-7 accommodates reels up to 10½" diameter, providing continuous long-period recording or playback.

If you are contemplating a portable tape recorder, don't buy any—until you see the PRESTO RC-7 with 10½" reel adapter (RA-1). Without a doubt, it's the *best buy in professional tape equipment!*

Present PRESTO RC-7 owners may convert their machines with this adapter for just $39.00. Write today for details!

Compare the RC-7 with any studio-type recorder

- Instantaneous speed accuracy
- Dynamic range better than 50 db. at 3% distortion
- Three-motor drive
- No friction clutch or friction brakes
- Heavy duty construction throughout
- Separate erase-recording-playback heads
- Twin speed: 7½"/sec or 15"/sec.
- Frequency response to 15,000 cps.
- Reel size: to 10½" (with RA-1 adapter)

PRESTO RECORDING CORPORATION
PARAMUS, NEW JERSEY

Canadian Division: Walter P. Downs, Ltd.
Dominion Square Bldg., Montreal

WORLD'S LARGEST MANUFACTURER OF PRECISION RECORDING EQUIPMENT AND DISCS

No. 179) — The Lutheran Church — Missouri Synod (KFUO), granted uhf Ch. 30, ERP 175 kw visual and 91 kw aural, antenna 580 ft.

Winston-Salem, N. C. (Group B-3, No. 175)— Winston - Salem Broadcasting Co. (WTOB), granted uhf Ch. 26, ERP 200 kw visual and 100 kw aural, antenna 360 ft.

Milwaukee, Wis. (Group B-4, No. 182)—Midwest Broadcasting Co. (WCAN), granted uhf Ch. 25, ERP 105 kw visual, 56 kw aural, antenna 420 ft.

Hampton (Norfolk, Portsmouth and Newport News area), Va. (Group B-4, No. 189)—Peninsula Broadcasting Corp. (WVEC), granted uhf Ch. 15, ERP 220 kw visual and 110 kw aural, antenna 480 ft. (Construction not to be commenced until application to modify WVEC (AM) antenna is granted.)

Newport News (Norfolk, Portsmouth and Hampton area), Va. (Group B-4, No. 189)— Eastern Broadcasting Corp. (WHYU), granted uhf Ch, 33, ERP 20.5 kw visual and 11 kw aural, antenna 310 ft.

FCC Grants Consent To Six Station Transfers

CONSENT was granted by FCC last week for six station transfers, including the sale of WNAO-AM-FM Raleigh by the Raleigh *News & Observer* for $250,000 to Sir Walter Television Co., newly approved permittee of WETV (TV) there, uhf Ch. 28 outlet.

Transfers approved included:

WETV (TV) Raleigh, N. C.—Granted assignment of construction permit from Sir Walter Bcstg. and Television Co. to new firm Sir Walter Television Co. Assignor was a partnership of John W. English, James R. McBrier, John J. Boland and James B. Donovan which gained permission to form a new corporation with Mrs. Lydia McBrier Jarecki and Mrs. John D. Jarecki each purchasing $50,000 of stock. Messrs. McBrier and Boland each have 14.8% interest in Erie Television Corp., applicant for new TV station in Erie [TV APPLICATIONS, B•T, July 21]; and each have ⅓ interest in Capitol Television and Bcstg. Co., permittee for KHTV (TV) Baton Rouge, La., new grantee of uhf Ch. 40.

WNAO-AM-FM Raleigh, N. C.—Granted assignment of license from News & Observer Pub. Co. to newly formed Sir Walter Television Co. Principals include president and treasurer John W. English, vice president and secretary James R. McBrier, and directors John J. Boland, James B. Donovan, Mrs. Lydia McBrier Jarecki and Mrs. John D. Jarecki. Consideration of sale was $250,000.

KRSC Seattle, Wash.—Granted consent to assignment of license from J. Elroy McCaw to Washington Telecasters Inc. for $229,500. Principals include Jessica L. Longston (51%), general partner in Bellingham Telecasters (KPUG Bellingham), president and 50% owner of KPUG, 56% owner of KSEM Moses Lake, Wash., president and 86% owner of KBIO Burley, Idaho, and president and 67% owner of KAVR Havre, Mont.; C. V. Zaser (35%), vice president and 25% owner of KPUG, KSEM, and KAVR; and Robert Pollock (14%), general manager of KPUG, KSEM and KBIO.

KHIT Lampasas, Tex.—Granted renewal of license and consent to transfer control from Lee H. Gripon, Ryan M. Howard, Kyle Smith, W. M. Brook and Harold Bakke to James E. Nugent, Albert F. Mason and Dean Turner; involves stock transfer for $4.

KARM-AM-FM Fresno, Calif.—KARM, The George Harm Station. Granted consent to Clyde F. Coombs to acquire negative control (50%) of outstanding stock from Hattie Harm; consideration $59,581.89.

KVVC Ventura, Calif.—The Voice of Ventura County. Granted consent to involuntary assignment of license to The Voice of Ventura County, Debtor in Possession.

FOUR VICE PRESIDENCIES CREATED IN NARTB STAFF REORGANIZATION

NARTB joint radio-TV board at mid-winter Florida meeting realigns top level staff organization, giving department heads contracts coincident to that of President Fellows; the joint group approves a new high budget of $735,000 for the 1953-54 fiscal year and changes staff "directors" to "managers."

TOP LEVEL staff reorganization, including the creation of four vice presidencies, was approved last Friday by the joint radio and television boards of NARTB at their mid-winter meeting at Belleair, Fla. The actions, highlighting an optimistic meeting, were taken upon recommendation of President Harold E. Fellows.

Appointed to the new positions, under three-year contracts to expire in March 1956, were:

Robert K. Richards, assistant to the president and director of public affairs, who immediately becomes administrative vice president and second in command.

Richard P. Doherty, former director of employe-employer relations, becomes staff vice president with emphasis on employe-employer relations.

Ralph W. Hardy, heretofore director of government relations, becomes staff vice president and will specialize in government relations.

Thad H. Brown, who has been director of television and counsel to the television board, becomes vice president and counsel in charge of television affairs. He previously had been under contract, which continues until April 1954.

Some question was raised regarding contracts for staff executives at the radio board meeting Thursday but this was dispelled when President Fellows emphasized the need for continuity in office and for security of key staff members. Questions were raised as to the desirability of and the need for contracts by several members.

Arney's Contract

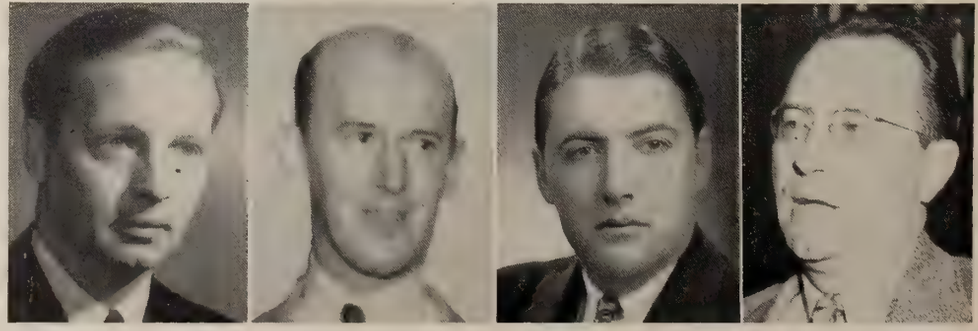
Also retained under a new three-year contract is C. E. Arney Jr., secretary-treasurer, who heretofore has been elected for successive one-year terms by the board.

Thus, all department heads will be under contract to expire coincident with the expiration of President Fellows' five-year agreement, which runs until March 1956.

Except for Mr. Fellows, whose salary scales up to $50,000 per year, the other staff executives draw between $18,000 and $22,500 but provision is made for annual fixed increases for the duration of the three-year tenures.

Unaffected in the realignment are the three NARTB officers: Judge Justin Miller, who continues as chairman of the board and general counsel of the association; and Messrs. Fellows and Arney. Also reporting directly to President Fellows is Edward H. Bronson, director of television code affairs.

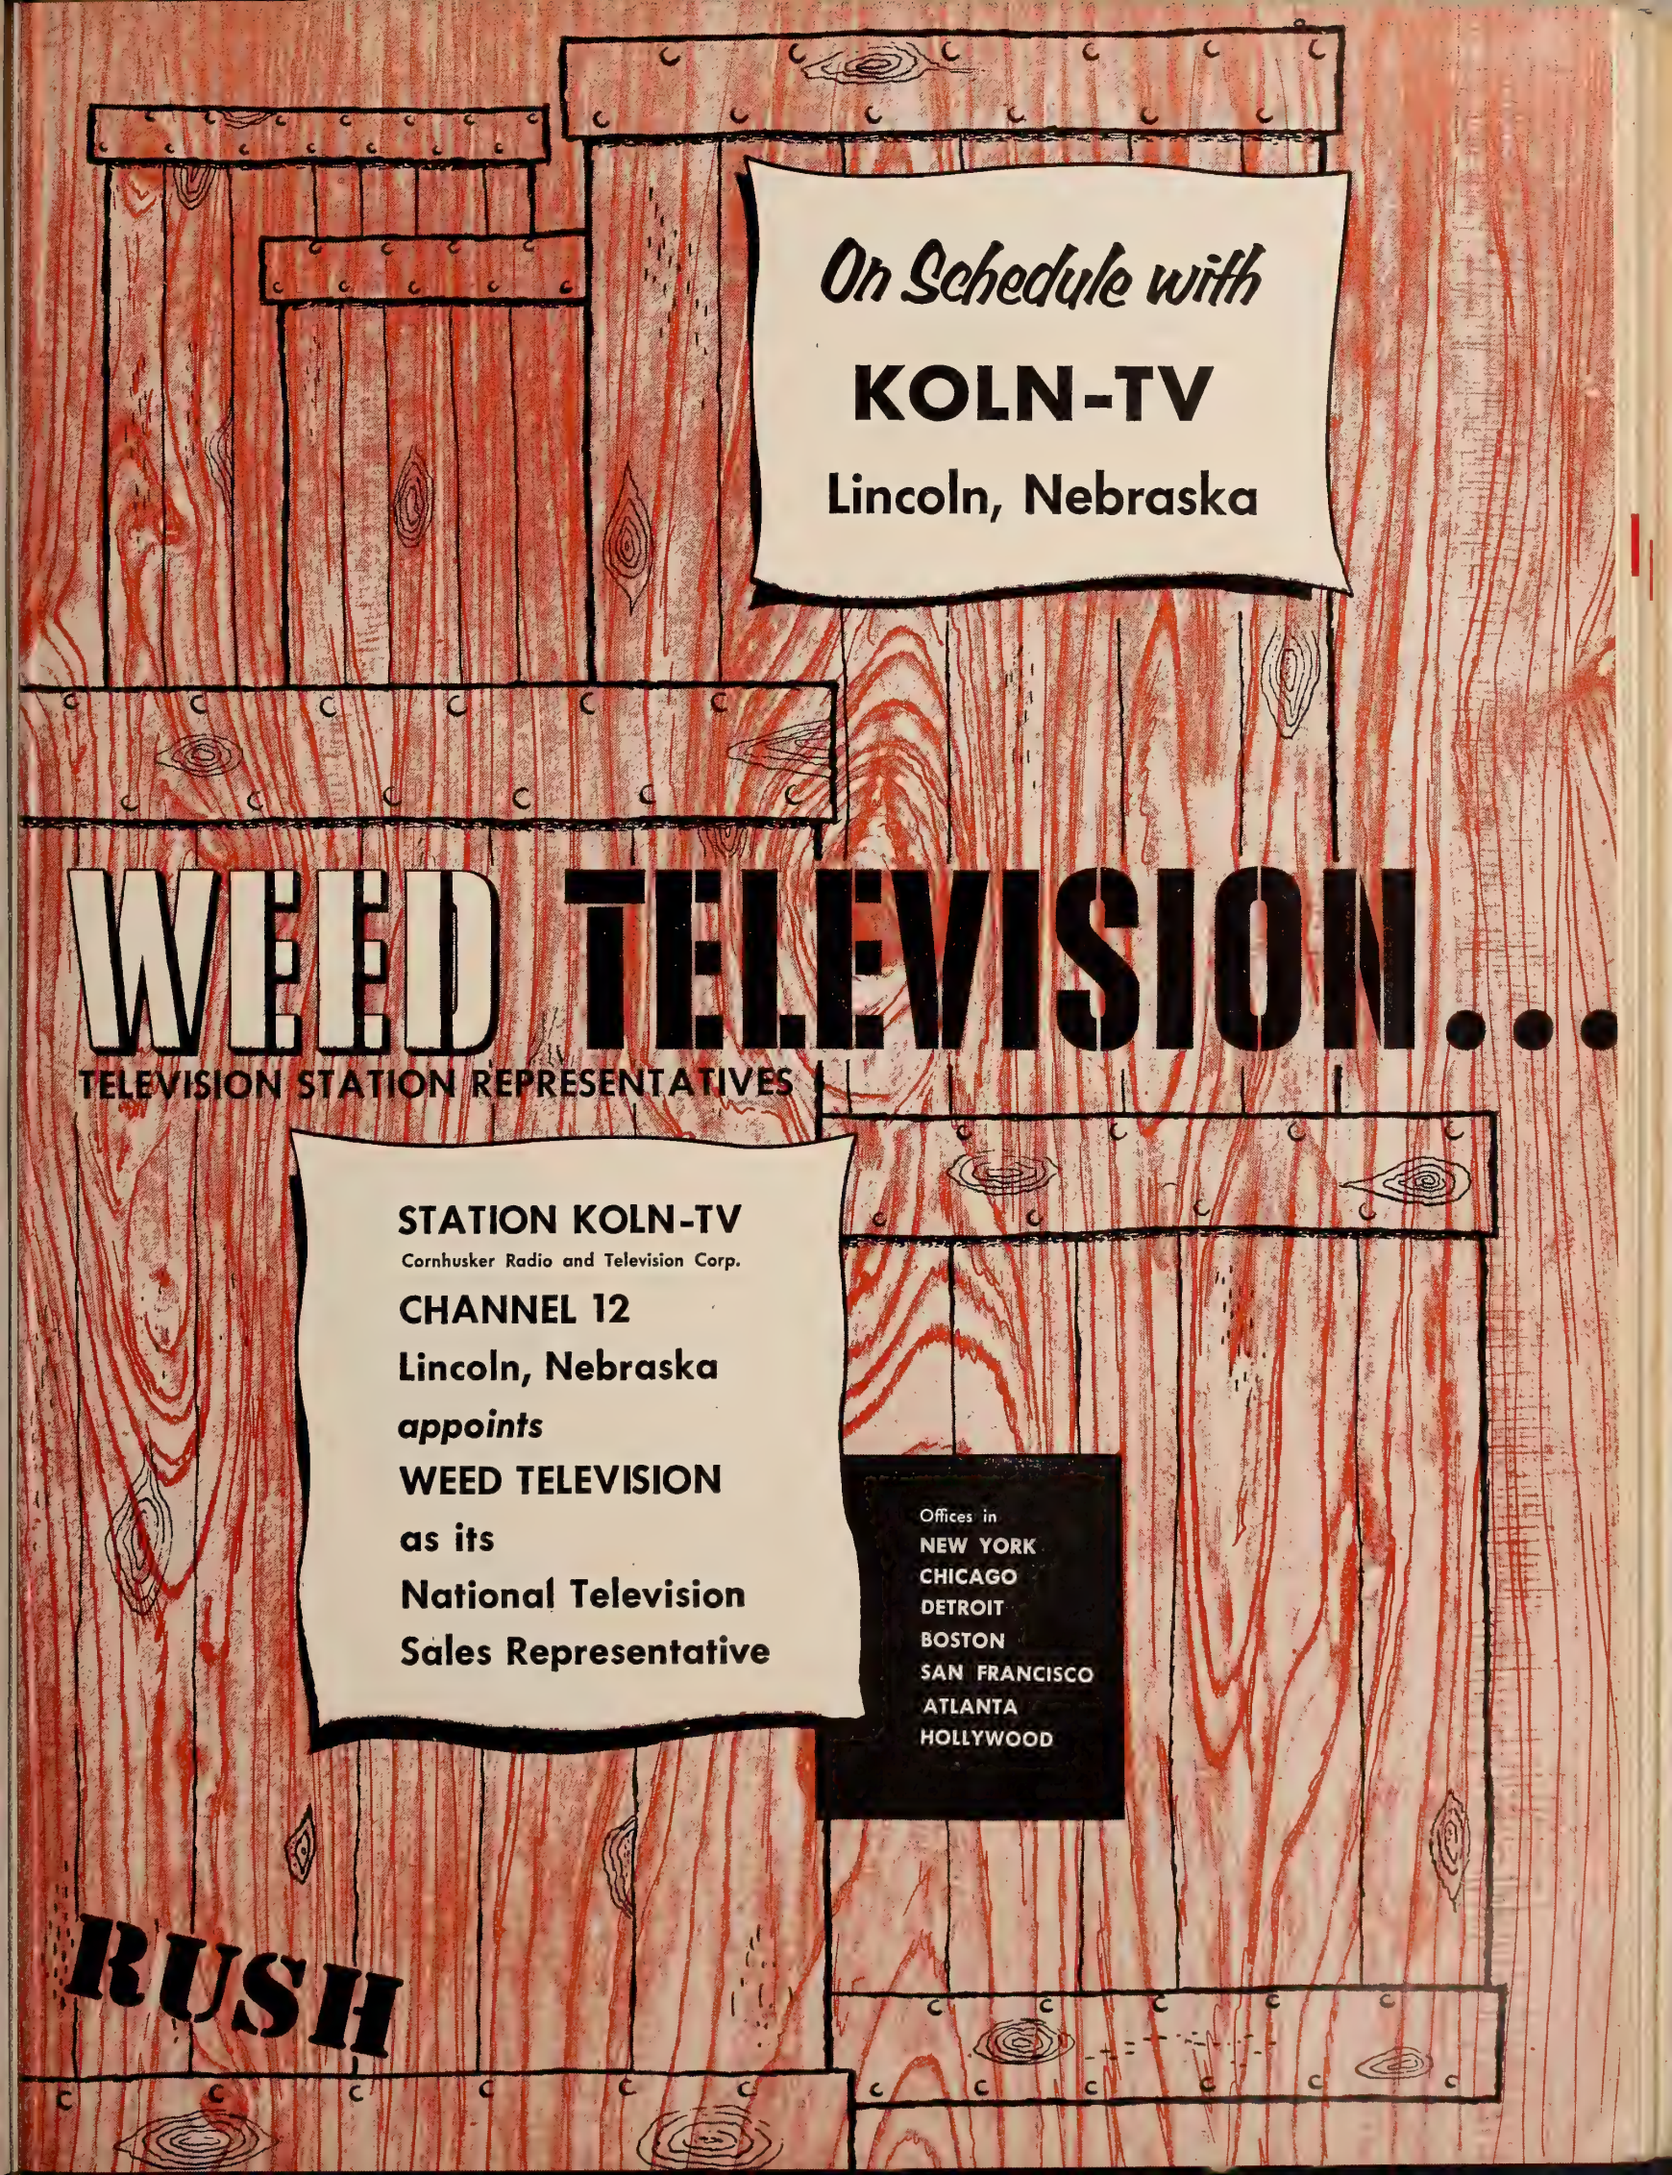
The Television Board at its Wednesday night meeting voted a contribution of not more than $3,000 to the All-Industry Tax Committee which has been dealing with excess profits tax problems.



A survey into prospective need for television sales promotion on an industry-wide basis was outlined to the television board by Mr. Richards. Based upon interviews with promotion executives of the various networks, the report stated that groundwork should be laid for some type of industry sales promotion effort but that no actual project should be launched at this time. The next step, the report stated, is to sound out opinion at the local level and to build up a ready reference of available material.

Rotation System

The TV board also approved a new rotation system for election of directors so that five directors will retire from office in the even numbered years and four directors in the odd numbered years. The four directors whose terms expire at the forthcoming April convention are William Fay, WHAM-TV Rochester; Campbell Arnoux, WTAR-TV Norfolk; Henry W. Slavick, WMCT (TV) Memphis; Ken Carter, WAAM (TV) Baltimore. Their successors, to be elected at the convention, will be named for two-year terms, three of whom will come from non-television only stations and the other from a television only station.



The radio board at its session Thursday morning accepted with regret the resignations of Glenn Shaw, former general manager of KLX Oakland, and William H. Fineshriber Jr. who had served for Mutual and moves into an NBC vice presidency this month [B•T, Feb. 2]. Mr. Fineshriber's successor is E. M. (Pete) Johnson, vice president in charge of station relations and engineering of Mutual. Mr. Shaw's successor, however, will not be named by the board because his term would expire prior to the next board meeting.

The new FCC operators rule permitting remote transmitter operation [B•T, Feb. 2] was hailed as a "significant and splendid victory" by the board. Tribute was paid William C. Grove, KFBC Cheyenne, chairman of the special committee, and Bernard Koteen, Washington attorney, who served as special counsel. Mr. Koteen was retained until March 5, at which

Ralph W. Hardy — Robert K. Richards — Thad H. Brown — Richard P. Doherty

time notice on re-hearing would expire.

In the board discussion, questions were raised as to need for clarification of certain aspects of the new rules, but it was presumed that these would be pursued at a later date. It was pointed out that the rule does not apply to remote control operation of television transmitters.

The joint board approved the highest budget in the association's history—approximately $735,000 for the new 1953-54 fiscal year—as against $685,000 for the current fiscal year. Specifically earmarked for separate television functions (those not performed by the overall organization) is $82,000 as against $76,000 last year.

The staff reorganization also entails further realignment of executive functions, All "directorships" at the staff level were supplanted by the title, "manager." This change, it was stated, is designed to avoid confusion which has arisen from the fact staff members, as well as members of the association's boards, both have been designated directors.

Allerton Manages Research

Under this realignment, Richard M. Allerton becomes manager of research; Oscar Elder, former assistant director of public affairs, becomes manager of publicity; Neal McNaughten becomes manager of engineering; Fran Riley, former information assistant in public affairs, becomes editor of the association's publications; John H. Smith Jr., who has been director of FM, becomes manager of that section and also adds to his duties the overall promotional activities of the association. His new title is manager of promotion and FM. William T. Stubblefield becomes manager of station relations.

Charles Tower, who has been assistant director of employe-employer relations, becomes assistant to Vice President Doherty. Howard Bell, former assistant to the director of television, becomes assistant to Vice President Brown.

Vincent Wasilewski, formerly attorney, becomes chief attorney. Abiah Church continues as attorney, with both working directly under supervision of Judge Miller and President Fellows.

Mr. Fellows reported to the joint boards that NARTB membership has reached a new high—totaling 1,060 AM stations, 120 TV and 24 FM.

Campbell Arnoux, president of WTAR-AM-TV Norfolk, was named chairman of the television finance committee because of the resignation, under doctor's orders, of George B. Storer, president of Storer Broadcasting Co. Mr. Storer reported his physician had advised him to refrain from industry activities for at least three months—to expedite treatment of impaired hearing suffered last year.

President Fellows, in announcing the reorgaization, said it was the culmination of work on realignment of the internal structure during his past year and a half as president. He said the new vice presidents will work closely with him in management and direction of staff activity and in staff policy determination.

"As his title indicates," Mr. Fellows said, "Mr. Richards will act administratively for me and perform in my behalf during my absence from headquarters. Although we have eliminated the public affairs department, the functions it has performed in the past will be carried on jointly by Mr. Smith, Mr. Elder and Miss Riley under Mr. Richards' general supervision."

RTMA LOOKS TO EXPANSION; WOULD BE ALL ELECTRONICS GROUP

RTMA board of directors approve inclusion of electronics industry within the organization's scope. Paid presidencies may be returned. Dr. Baker describes NTSC's progress on color TV.

FAR-REACHING reorganization and expansion of Radio-Television Mfrs. Assn. to provide a full program of services to specialized electronics manufacturers were approved in principle by the RTMA board of directors at a meeting in New York last Thursday.

Plans for implementing the report recommending the sweeping changes—including a proposal to return to the once-tried system of paid presidencies—are to be developed by a special committee and submitted for consideration by the board at its April meeting, or earlier.

The report, which the board approved in principle, calls for extensive changes in both the philosophy and organizational structure of RTMA, whose name also probably would be changed to indicate the broadened scope of activities. Electronics Mfrs. Assn. and Electronics Industry Assn. were cited as examples to indicate the industry-wide nature of the expanded association.

The manufacturers of "specialized" electronics equipment, for whose benefit the expansion is planned, spokesmen said, are those engaged in electronics work in the guided missiles, radar, aircraft, and various other military fields, for example—in general, those outside the radio-TV set and transmitter area.

It was noted that the "specialized" electronics industry represented a volume of $4 billion last year, as against $2 billion volume for the radio-TV set field.

An expansion, presumably large, of both the administrative and the engineering staffs of RTMA would follow the proposed reorganization.

Broached Last Fall

The question of RTMA's services to members in the broad field of electronics—what services it does and what it does not provide for these manufacturers as distinct from those primarily in the radio-TV home instrument field—led last fall to the creation of a special committee within the Technical Products Div. to explore the subject.

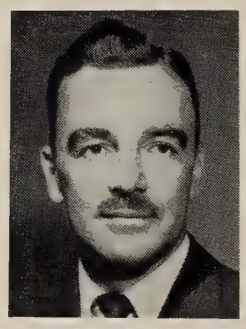
This committee reported to members of the Technical Products Div. last Wednesday during RTMA's three-day midwinter sessions at the Roosevelt Hotel in New York.

The division approved the report in principle and passed it along to the RTMA board, which itself gave approval in principal after lengthy discussion on Thursday. The board authorized President and Board Chairman A. D. Plamondon Jr. to appoint a committee to work out details and report back at the board's next meeting—currently scheduled to be held in Los Angeles in April, although an earlier special meeting could be called.

RTMA's special organizational committee, headed by Robert C. Sprague of Sprague Electric Co., a former president of RTMA, will form the nucleus of the committee on details, spokesmen said. Mr. Sprague's group, one of whose functions has been to consider the question of paid presidencies, consists of Max F. Balcolm, Sylvania Electric Products; Paul V. Galvin, Motorola; Fred R. Lack, Western Electric; Arie Liberman, Talk-A-Phone Co.; Leslie F. Muter, the Muter Co.; and as ex-officio members, Mr. Plamondon and Glen McDaniel, first paid president and now general counsel.

RTMA has had only one paid president—Mr. McDaniel, who resigned last Oct. 1 after 18 months in office. At that time Mr. Plamondon, board chairman, was given the additional office of president, and James D. Secrest, general manager, was elevated to the post of executive vice president.

Meanwhile, a heavy round of committee and section meetings occupied several hundred RTMA members during Tuesday and Wednesday sessions.



Dr. W. R. G. Baker of General Electric, head of the RTMA Engineering Dept. and chairman of the National Television System Committee, reported on NTSC progress in its work to develop a compatible system of color TV, and urged manufacturers to make color sets for participation in field tests of the NTSC technique.

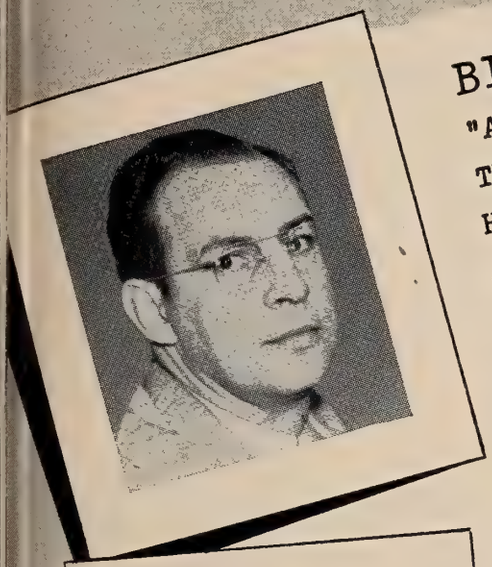
Paul Galvin, chairman of the new subscription television committee, reported after the first meeting of that group that it was decided to continue the subscription TV survey and generally to keep abreast of developments in this field.

AFA Campaign Plans Formed; Smith Appointed Unit Head

ADVERTISING Federation of America reported last week that preparations are under way for its fifth campaign in eight years centering around the general subject of a "better public understanding of advertising."

According to Ralph Smith, vice president of Sullivan, Stauffer, Colwell & Bayles, who has been reappointed campaign committee chairman, the federation will broaden and intensify its efforts this year on the 1951-52 theme of "advertising helps you get more value for your money."

Mr. Smith



The federation reported that last year nearly 900 radio stations ordered free transcriptions which described the contributions of advertising to the nation and the community.

Fellows Names TV Group

COMMITTEE to collect and distribute basic information about the growing contribution of television in the U. S. was formed last week by NARTB President Harold E. Fellows (see board stories this issue). The group will be supported by a research subcommittee comprising network research officials and NARTB's research department.

Membership of the committee, which holds its first meeting Feb. 19 in New York, are: Mr. Fellows, chairman; Richard A. Borel, WBNS-TV Columbus; Howard Chernoff, KFMB-TV San Diego; Jack Harris, KPRC-TV Houston; Henry W. Slavick, WMCT (TV) Memphis; Charles Vanda, WCAU-TV Philadelphia; John W. Pacey, ABC; David J. Jacobson, CBS-TV; Gerald Lyons, DuMont; Edward D. Madden, NBC-TV.

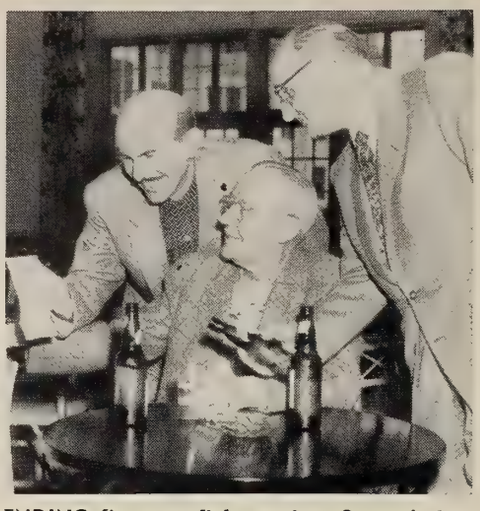
Edgar Kobak Tells AWRT Women Must Use Initiative

"WOMEN in radio and television behave more like mice," Edgar Kobak, president of the Advertising Research Foundation, head of his own management consultant firm and owner of WTWA Thomson, Ga., told the second annual all-day session of the New York chapter, American Women in Radio & Television, at New York's Hotel Astor Jan. 31.

Mr. Kobak believes there is a definite place for women in broadcast management and operation, but they must have far more initiative than already shown.

In another speech, Gen. Telford Taylor, general counsel to the Joint Committee on Educational Television and a member of the Ford Foundation's National Citizens Committee for Educational TV, discussed the problems and future of educational TV.

The all-day session was presided over by Duncan MacDonald, director of women's programs, DuMont Television Network, and New York chapter president. Pat Meikle, program chairman, introduced the speakers.



At the morning business sessions, Edythe Meserand, AWRT convention chairman and past national president, discussed plans for the spring convention in Atlanta April 30-May 3.

GAB Nominates Carswell For President at Meet

S. J. CARSWELL of WSFT Thomaston was nominated for president by the Georgia Assn. of Broadcasters at the close of its eighth annual Radio and Television Institute Jan. 29-30 at the U. of Georgia [B•T, Feb. 2]. Mr. Carswell now is vice president.

At a later session of the institute, jointly sponsored by GAB and the university's Henry W. Grady School of Journalism, the broadcasters endorsed a proposed co-op plan by GAB and the journalism school whereby journalism students will work at radio or TV stations, attending school in alternate quarters.

Other nominations by GAB included: Vice president, E. F. MacLeod (now secretary), WBML Macon; secretary, Glenn C. Jackson, WAGA Atlanta, and directors W. Fred Scott Jr. (now president), WKTG Thomasville, Allen M. Woodall, WDAK Columbus, L. H. Christian, WRFC Athens, and John Fulton, WGST Atlanta.

ENDING five-year fight against Oregon's ban on radio-TV alcoholic beverage advertising before 8 p.m., these broadcasters celebrate news at NARTB board meetings at Belleair, Fla. L to r: H Quenton Cox, KGW Portland, district director; Charles E. Arney Jr., NARTB secretary-treasurer and former northwest commentator, enjoying his first bottle of beer since repeal of ban, and Lee W. Jacobs, KBKR Baker, Ore., small station director, who started fight against Liquor Control Commission in 1949 while president of Oregon State Assn. of Broadcasters. Chairman of legislative committee which forced the issue was R. M. (Dick) Brown, KPOJ Portland.

Winners of VOD Contest Include Hawaiian Boy, 17

THREE BOYS and one girl are winners in the sixth annual Voice of Democracy Contest for high school students, with a winner coming from outside the U. S. continental boundaries for the first time.

The four winners, chosen from more than a million entries, with sponsoring stations, are:

Frank Lammedee, 17, South Pasadena High School senior, San Marino, Calif. (KPPC Pasadena, KWKW Pasadena).

Thomas J. Walsh, 17, Gonzaga High School senior, Washington, D. C. (WTTG (TV)).

Robert Davis, 17, Maui High School senior, Maui, Hawaii (KMVI Wailuku).

Adelaide Nacamu, 14, Peekskill High School sophomore, Peekskill, N. Y. (WLNA Peekskill, WFAS White Plains).

Sponsoring the contest are NARTB, Radio-Television Mfrs. Assn. and U. S. Junior Chamber of Commerce.

SDX Names Broadcasters To Major Committees

BROADCASTERS will play a prominent role this year in the major committee activities of Sigma Delta Chi, national professional journalistic fraternity.

This was apparent last week with announcement by SDX President Lee Hills, Detroit *Free-Press* and Miami *Herald*, Knight newspapers, of committee assignments for 1953. Mr. Hills announced personnel of 12 groups, including one for the Advancement of Freedom of Information under V. M. Newton Jr., Tampa *Tribune*, WFLA-AM-FM.

Among broadcasters who will serve on major committees are Jim Bormann, WCCO Minneapolis, Advancement of Freedom of Information; Griffing Bancroft, CBS, Historic Sites in Journalism; Ben Chatfield, WMAZ Macon, Ga., Membership Eligibility, and William Ray, NBC, Ernie Pyle Historic Site Ceremony.

Major committees and their chairmen follow:

Journalistic research, Prof. Clifford F. Weigle, Stanford U.; historic sites in journalism, Irving Dilliard, St. Louis *Post-Dispatch*, KSD-AM-TV; professional chapter program, George Wolpert, Milwaukee; undergraduate chapter program, Dean Burton, W. Marvin, William Allen White School of Journalism, U. of Kansas; fellows nominating committee, Charles C. Clayton, St. Louis *Globe-Democrat*, KWK.

SDX honor awards, Neal Van Sooy, the *Nevada Appeal*, Carson City, Nev.; new journalism awards, Alden C. Waite, Southern California Associated Newspapers, Culver City, Calif.; ways and means, Charles C. Clayton, St. Louis *Globe-Democrat*, KWK; membership eligibility, John M. McClelland Jr., Longview, Wash., *Daily News*, KWLK-AM-FM; Ernie Pyle historic site ceremony, Sol Taishoff, editor and publisher, BROADCASTING • TELECASTING.

Casper Heads Okla. Assn.

CY CASPER, general manager of WBBZ Ponca City, has been elected president of the Oklahoma Assn. of Broadcasters, succeeding Allan Page, KSWO Lawton. Other officers, elected at the annual meeting in Stillwater last week, include J. H. Bernard, general manager, KOMA Oklahoma City, vice president, and Guy Farnsworth, general manager, KCRC Enid, re-elected secretary-treasurer.

Mr. Casper

Board members include, in addition to Mr. Page, Lawson Taylor, KFMJ Tulsa; Bill Hoover, KADA Ada; Bill Morgan, KNOR Norman; Ray Van Hooser, KNED McAlester, and Ed Ryan, KSIW Woodward.

A minute of stop-motion magic—that's the newest of many TV commercials made by SARRA for Pet Milk Company. A chair pulls itself up to the table; a cup fills with coffee; a can pours the milk; the cup empties itself; a can hops from the shelf to the carriage. It's amazing, it's entertaining, it's product identification, *it's pure sell.* Used by Pet as a spot and on the All-Star Revue . . . with brilliant reproduction assured by SARRA'S Vide-o-riginal prints. Produced through Gardner Advertising Company.

an **NBC** primary interconnected station

UPPER UHF OPERATION BEGINS THIS WEEK, TARGET DATES SHOW

Four new stations on the air this week; several new grantees set early fall commencement of commercial broadcasting.

FIRST TV station to begin commercial operation at the upper end of the uhf band is slated to start regular programming this week. It is WFMJ-TV Youngstown, Ohio, on uhf Ch. 73 (824-830 mc), located 144 mc above the next highest uhf station, WKAB-TV Mobile, Ala., operating on uhf Ch. 48 (674-680 mc).

WFMJ-TV is an NBC affiliate and is represented by Headley-Reed.

Fred C. Mueller, general manager of WEEK-TV Peoria, Ill., said his station went on the air with a test pattern last Thursday and was to have started regular programming on uhf Ch. 43 over the weekend. It received a permit for special temporary authorization a fortnight ago [B•T, Feb. 2].

KOLN-TV Lincoln, Neb., hopes to begin commercial programming this week, according to Harold Anderson, vice president and general manager of the station. Operating on vhf Ch. 12, the station began test patterns late last week. It also has moved into new studio quarters. Representative is Weed Television.

WROV-TV Roanoke, Va., may begin commercial operation this week on uhf Ch. 27, along with WLVA-TV Lynchburg, Va., on vhf Ch. 13. Stations aired test patterns last week.

Plans to go on the air by March 1 were announced by Kenyon Brown, president and general manager of KWFT-TV Wichita Falls, Tex. Mr. Brown said network affiliation will be CBS and national representative will be Blair-TV. GE equipment has been ordered, he said.

New Studios for KCBD-TV

The construction of new studios for KCBD-TV Lubbock, Tex., is progressing on schedule, and the station will begin operation in March or April, according to Choc Hutcheson, news director. Network affiliation will be ABC and NBC, and national representative, John E. Pearson Co. KCBD-TV is assigned vhf Ch. 11.

Telecasting is tentatively scheduled for early March on Los Angeles' uhf Ch. *28, assigned to the Hancock Foundation of the U. of Southern California. The noncommercial, educational station is ready to go on the air as soon as its transmitter arrives. FCC assigned call letters KUSC-TV to the station, but station officials claim they plan to select their own call letters later.

Named to the advisory board by Capt. Allan Hancock, director of the foundation, are representatives of public and private schools, colleges and churches throughout the Los Angeles area. Additional members, representing civic groups, will comprise an advisory board. Public meetings, the first of which will take place late this month, are scheduled for the purpose of discussing operation and participating plans.

KAFY-TV Bakersfield, Calif., plans to begin operation on uhf Ch. 29 in April or May. Construction has already started. Naum Healy, station manager, said there will probably be multiple network affiliation and that the representative will be Forjoe & Co.

KCMC-TV Texarkana, Tex., hopes to begin operating on vhf Ch. 6 within 90 days. National representative will be O. L. Taylor Co.

KEYT (TV) Santa Barbara, Calif., vhf Ch. 3 grantee, announced last week it has made affiliation agreements with ABC, CBS, DuMont and NBC. George P. Hollingbery Co. has been appointed national representative. With an ERP of 51.1 kw from its 4,183 ft. transmitter location, the station officials expect to cover a large portion of central and southern California. The station plans to be on the air in May-June.

WJON-TV St. Cloud, Minn., will commence operation in May or June on vhf Ch. 7. W. C. Porsow, now general manager of WJON (AM), will manage the TV outlet. William Rambeau Co. is to be the national representative.

Rogan Jones, president of KVOS-TV Bellingham, Wash., said that station would be on the air in two to four months. Composite equipment is ready to be installed. Network affiliations and representative will be announced later for the vhf Ch. 12 grantee.

WHYU-TV Newport News, Va., just granted last week (see separate story), will be operating on uhf Ch. 33 by June, according to Frederic F. Clair, sales manager.

KNUZ-TV's Plans

Also due for a June start is KNUZ-TV Houston, Tex., according to David H. Morris, vice president and general manager. DuMont equipment has been ordered, he said. The station is assigned uhf Ch. 39.

Harold G. Cowgill, vice president and 10% stockholder of WTVP (TV) Decatur Ill., has resigned as an attorney with the Washington, D. C., law firm of Segal, Smith & Hennessey to become general manager of the new uhf Ch. 17 grantee [B•T, Feb. 2].

If the RCA 1 kw transmitter is delivered on schedule, the on-the-air date will be July 1. The middle of March or April 1 has been set as date for commencement of construction of a combined studio and transmitter building. The CAA has approvd a 602 ft. tower for the station, and FCC approval will next be sought.

Decatur has a population of about 75,000, and within WTVP's Grand B contour there is a population of 500,000, station officials said.

Mr. Cowgill was an FCC attorney from 1935 to 1944, as chief of the Rate & Traffic Div. of the Common Carrier Bureau.

John H. Cleghorn, general manager of WHBQ-TV Memphis, vhf Ch. 13 grantee owned by Harding College, said he hoped to have the station on the air August 1. Studio construction is already underway at the Hotel Chisca. RCA equipment has been ordered, and the station expects to go on the air with an effective radiated power of 100 kw, later to be increased to 316 kw. The station's television staff will be built around the WHBQ-AM staff.

Commercial operation also is slated for August 1 by WNLC-TV New London, Conn. Equipment is expected after May, with testing scheduled for July.

WVEC-TV Hampton, Va., granted last week, aims for an August 1 start, according to J. W. Chisman, president. Representative will be Rambeau.

Salem, Ore.'s Target

L. A. Harvey, grantee of uhf Ch. 24 for Salem, Ore., the second TV grant for that state, hopes for an early or mid-summer target date according to his legal counsel, Joseph Brenner. Mr. Brenner reported that Mr. Harvey intends to serve the Willamette Valley including Portland and Eugene.

Several TV grantees have fall target dates.

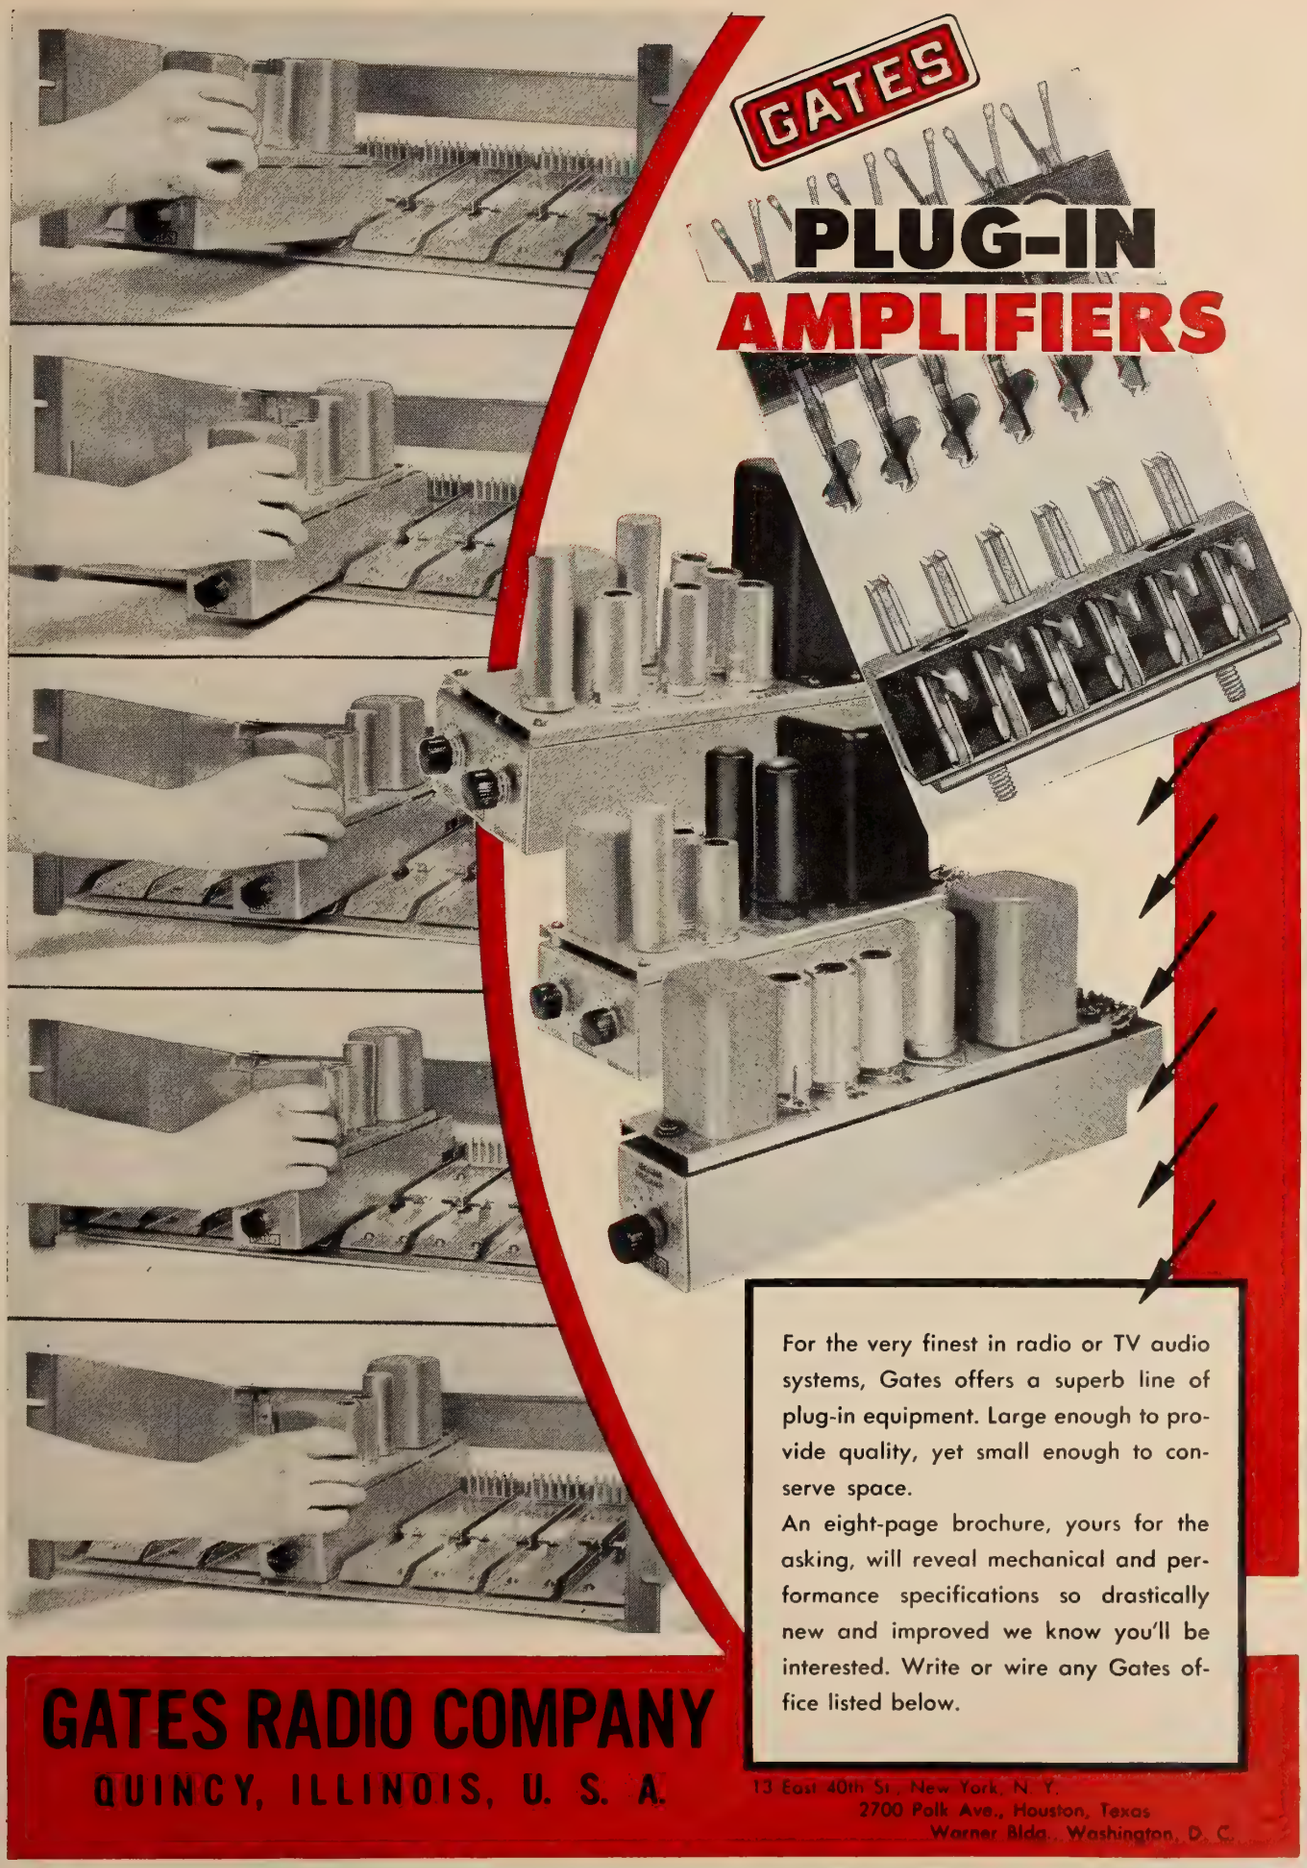
W. A. Pomeroy, president and general manager of WILS Lansing, Mich., grantee last week for uhf Ch. 54, said his target is Sept. 1.

WJHL-TV Johnson City, Tenn., aims for interim operation on vhf Ch. 11 with ERP 54 kw visual by September 1. W. H. Lancaster, president, said ERP 316 kw is planned for when equipment is available.

WCHV-TV Charlottesville, Va., uhf Ch. 64 grantee, hopes to be on by September 1, but Charles Barham Jr., president, said there is nothing too definite at this time.

Regional Television Corp., Northampton, Mass., uhf Ch. 36, is planning a fall start, too.

WNAM-TV Neenah, Wis., is another grantee aiming for the fall. The station is assigned uhf Ch. 42.



KVFD-TV Fort Dodge, Iowa, will go on the air about October 1, according to Edward Breen, president and general manager. The uhf Ch. 21 outlet will start with a 1 kw transmitter, 750 ft. tower and film, slide and live studio equipment. Mr. Breen expects that station will be affiliated with several networks. The probable national representative is John E. Pearson Co.

W. F. Craig, vice president of WLBC-TV Muncie, Ind., said last week that Hal Holman Co., Chicago, and The Walker Co., New York, will represent the TV station. They now represent the radio station. Network affiliation will be CBS and DuMont.

(For complete list of grantees' target dates see FOR THE RECORD, *page 95)*

PRINCIPALS attending signing of contract by which Bankers Life & Casualty Co. of Chicago will lease KGA Spokane, Wash., for 10 years from Gonzaga U. for $500,000 include (l to r): Charles F. Little, Bankers Life; Lester M. Smith, Blackburn-Hamilton Co., station broker; Rev. Francis J. Corkery, S. J., Gonzaga president; John D. MacArthur, Bankers Life president; Andrew G. Haley, Washington radio attorney; and Paul Doolen and Joe Tottenhoff, Bankers Life. Negotiated fortnight ago, lease is subject to FCC approval [B•T, Jan. 26].

GATES

PLUG-IN AMPLIFIERS

For the very finest in radio or TV audio systems, Gates offers a superb line of plug-in equipment. Large enough to provide quality, yet small enough to conserve space.

An eight-page brochure, yours for the asking, will reveal mechanical and performance specifications so drastically new and improved we know you'll be interested. Write or wire any Gates office listed below.

Radio-TV Appeal for Aid To Holland Flood Victims

RADIO and television in the U. S. last week went to the rescue of flood victims in Holland by broadcasting appeals for clothing, blankets, other emergency supplies and funds.

The Advertising Council sent telegrams to all radio and TV networks Thursday on behalf of CARE, which is seeking funds from the American public for the benefit of the Holland flood victims. The wire, signed by Council President, T. S. Repplier, asked for announcements on network sustaining programs and noted that CARE has been sanctioned by the State Dept. and the executive office of the President to carry on this appeal.

Walter Cronkhite, CBS-TV news commentator who had been befriended by the Dutch during World War II when he parachuted into the country, carried an appeal on his Esso program Wednesday at 6:45 p.m. Appearing on the program was Lt. Gen. Anthony McAuliffe, famed for his "Nuts" reply to a German surrender demand.

Gen. McAuliffe and Mr. Cronkhite called on parachuters of the 101st and 82nd airborne units, all of whom received help from the Dutch underground, to send blankets and clothing. Rex Smith, American Airlines vice president, offered ticket office facilities as collection agencies and promised to fly the donations to Washington airport where AA hanger No. 7 would serve as receiving depot.

Arthur Godfrey added an appeal on his 8 p.m. CBS-TV program Wednesday. One of his writers, Andrew Rooney, had dropped into Holland with Mr. Cronkhite.

START of another flood—clothing, this time —as Walter Cronkhite, CBS-TV newsman, and Lt. Gen. Anthony McAuliffe call on wartime parachuting buddies to help stricken Holland. Nationwide response was so great, CBS had to ask nation to stop giving clothing and to send money instead.

The thing snowballed. The public started to respond. Well before noon Thursday Ambassador J. H. Van Roijen, of Holland, wired his thanks to CBS and suggested money be sent to Holland Flood Relief Inc. since early needs of flood victims had been met.

All day Thursday CBS Radio and CBS TV called on the public to halt the flood of clothing and blankets, urging financial donations.

Relief items for the flood-stricken Netherlanders are being collected by WAAM (TV) Baltimore, and will be shipped tomorrow (Tuesday) via Royal Dutch Airlines to Holland. With the cooperation of Netherlands officials, Ken Carter, general manager of the station, solicited viewers to donate such vitally-needed items as blankets, sheets, lighting equipment and flashlights. Herbert B. Cahan, station program director who originated the idea for that station, spotted plugs for the appeal on all programs.

WLAW Boston reported it was flying special events news commentator Rod MacLeish to the Holland distress area Friday night.

The Boston station said Mr. MacLeish will do wide scale WLAW and network broadcasting in the interest of relief. Mr. MacLeish is operating with a Triple A State Dept. passport rating and the full cooperation of the Netherlands government, the station reported.

It reported it was offering special tape recordings of interviews with officials and distress victims to a limited number of stations.

Travis WBKZ-TV Manager

HARRY E. TRAVIS has been named general manager of WBKZ-TV Battle Creek, and expects to begin its telecast schedule May 15 on Ch. 64. Mr. Travis, for the past two and one-half years, has worked as program director of WKZO-TV Kalamazoo. Battle Creek has an estimated 182,504 sets in the market, he said in a report last week on that area's receivers.

Mr. Travis

Joe Wesp Coaxes Squeal from Prize Porker for Western New York's Popular Farm Program

This guest star is meat for WBEN'S Joe Wesp who likes to go whole hog when gathering material for his early morning farm show. Recorded interviews on the farm and at grange meetings with his many rural friends help Joe to give farmers the kind of radio program they like — the kind that makes hay for Joe's sponsors. Joe's Monday through Saturday show features livestock and produce prices, news, music and interviews — all served up country style, with Joe's pungent brand of homespun philosophy. Depend on informal Joe to inform Western New York's prosperous farmers of the merits of YOUR product in a productive way.

Ask HENRY I. CHRISTAL in New York, Chicago or San Francisco about availabilities on WBEN'S daily Farm Program, 5:30 *to* 6:00 A.M.

WBEN NBC IN BUFFALO

PACKAGED REMOTE CONTROL

for Commercial Broadcast Transmitters

AM — FM

THE RUST INDUSTRIAL COMPANY'S REMOTE CONTROL SYSTEM

The Rust System is the *only* transmitter remote control system *proven* in service in United States Commercial AM Broadcasting installations. *It meets all FCC requirements.*

STUDIO UNIT
(Type RI-1080)

REMOTE CONTROL
of transmitters means more effective station operation. Attending personnel may be utilized more efficiently. More convenient location of studio is made possible. Transmitter may be located where transmitting conditions are ideal and real estate costs low.

THE RUST SYSTEM
consists of a studio unit and transmitter unit connected by two telephone pairs. Up to nine meter readings can be made and up to nine operations can be controlled by simply dialing desired functions. Transmitter adjustment is made remotely while simultaneously observing readings of appropriate meter.

The transmitter unit is connected to any one of a number of tuning motors or contactors used for controlling transmitter tuning or other switching functions. Use of various shunts and multipliers permits the metering of several circuits at the remote control point. Any failure of the system immediately removes all power from the transmitter.

The complete system is sold on an installed basis with all components guaranteed for one year. Price includes any necessary modification of the transmitter. Savings can pay for entire cost in as little as ten weeks.

TRANSMITTER UNIT

Schafitz Claims WPIC Set His Application Back

FILING of a TV application Jan. 27 by Sharon (Pa.) Herald Broadcasting Co. (WPIC) caused Leonard J. Schafitz, also a Sharon applicant, to lose a place in the FCC's processing line, Mr. Schafitz said in a petition filed last week at the Commission.

The petitioner claims the WPIC application specifies a site less than 60 miles from Pittsburgh, where Ch. 53 is assigned, violating the minimum separation requirement. He adds that his application would have been considered by FCC in January had it not been for the WPIC application. Both are applicants for Ch. 39.

"The Commission's temporary processing procedure in establishing Sharon as A-192 in order of staff consideration gave to applicant Schafitz a legal right to have his application considered when A-192 was reached in regular order," according to the Schafitz petition, filed by Attorney Carl L. Shipley. "The Sharon Herald application, fatally defective as it is, was filed Jan. 27, 1953, the day before. By accepting an application filed in violation of Sec. 3.610 of the Commission's rules the Commission deprived applicant Schafitz of his right to immediate consideration of his application."

Smaller 'Midgets'

RADIO station WCBS New York announced Thursday a new sales package of midget spots, consisting of five-second station identification pauses for commercial messages at "half of station break rates."

Heretofore the smallest segment of time on WCBS was 15-second station identification. The new five-second IDs are limited to 18-word messages which can be presented live or transcribed. However, since the spots are subject to double spotting they cannot be transcribed if the preceding commercial is. On the other hand, the ID must be transcribed if the preceding commercial is live.

"An advertiser will get the benefit of a saturation campaign in prime time . . . for as low as 15 cents to 20 cents per thousand," Henry Untermeyer, general sales manager of the station, said. Extra package discounts follow: 14 per week earns 15%; 24 per week, 25%, and 35 per week, 30%. In addition, 24 IDs in a two-day period earn a flat 50% discount. The IDs are subject to possible pre-emption on one week's prior notice.

Walbridge, Finch Named To Top WJIM-AM-TV Posts

HAROLD F. GROSS, president and general manager of WJIM-AM-TV Lansing, Mich., last week in announcing two personnel changes said Willard E. Walbridge, former WWJ-TV Detroit station manager, will succeed him as WJIM Inc. general manager and will be made executive vice president and a member of the board, effective March 1.

Mr. Walbridge

Howard Finch has been named vice president in charge of television production and program operation and also will be on the board of directors, Mr. Gross said.

Mr. Gross said he will take a less active part in WJIM - AM - TV management but will retain the presidency and will supervise the stations' $750,000 expansion program, including construction of a $400,000 radio-TV center and a 1,000-ft. tower and installation of a 100 kw transmitter.

Mr. Finch

Mr. Gross said expansion and realignment of the WJIM-AM-TV executive staff was made in preparation for programming from the new radio-TV center. Mr. Finch also will produce and direct his own TV show and will spend several weeks in New York studying network techniques and production methods, Mr. Gross said.

WGN-TV Sees Delivery Oct. 1 Power Increase 30-Days Later

DELIVERY on a new transmitter and antenna system equipment for WGN-TV Chicago is expected by Oct. 1 and power increase from 29 kw to ERP of 316 kw 30 days later.

Frank Schreiber, manager and treasurer of WGN Inc., announced receipt of the construction permit from FCC the past week will mean an increase in power output ten-fold and improve reception within a 60-mile radius.

New 50 kw transmitter will be housed on the 30th floor of the Tribune Tower and a new antenna system atop the tower, raising the overall height from ground level to 638 feet. Additional equipment will cost approximately $250,000, according to Carl J. Meyers, WGN Inc. engineering director.

Power Boost for WHAS-TV

INCREASE in the visual power of WHAS-TV Louisville from 50 kw to 316 kw was expected to take place over the weekend after FCC authorization of maximum power. Increase was made with the help of a 12-bay high-gain antenna, developed by General Electric in cooperation with Orrin W. Towner, engineering director of WHAS-AM-TV.

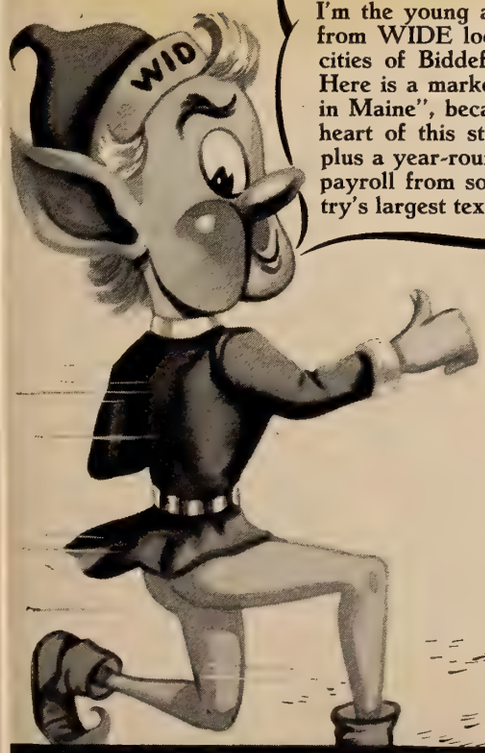
Station, which has moved to Ch. 11, conducted its first high-power tests last weekend.

Vic RADIO PROFIT Diehm Says:

I'm 'ZEL'

My job is to see that every dollar you spend on WAZL in Hazleton, Pennsylvania is turned into enormous sales for your client's products. I guarantee to deliver 70% of the radio listening audience from 8:00 A. M. 'til 10:30 P. M. in WAZL's coverage area of over 127,000 people.

I'm 'OL'



See that big nose of mine...it's big because everything's big in the area served by WHOL, Allentown, Pennsylvania. Big population! Big payrolls! Big industries and a big lot of them! Big amount of farm dollars, too! Just let me show you how to do a big job for your clients.

Meet them by name ... the Little People who do the Big Job!

I'm 'WID'

I'm the young aggressive fellow from WIDE located in the twin cities of Biddeford-Saco, Maine. Here is a market that is a "must in Maine", because it covers the heart of this state's resort area, plus a year-round manufacturing payroll from some of the country's largest textile mills.

I'm 'LEM'

See those big eyes of mine... they're wide-awake for any chance to show you what a sales-producing station WHLM is. We call ourselves "The Voice of the Susquehanna Valley", and believe me it's true. You just try us and we'll show you big results.

WAZL HAZLETON, PA. NBC-MBS (Represented by Robert Meeker Associates).

WHOL ALLENTOWN, PA. CBS

WHLM BLOOMSBURG, PA. (Owned and Operated by Harry L. Magee).

WIDE BIDDEFORD-SACO, ME. MBS-YANKEE (Represented by Edward Devney).

Supply & Demand

SOME promotional plans, as the Headley-Reed Co., station representative, has learned, can go over a little too well. Several weeks ago it distributed to agency timebuyers and researchers a TV signal range calculator that enables the user to determine TV station coverage in a few seconds [B•T, Jan. 19]. The company's supply has been exhausted but requests still are coming in, according to a Headley-Reed spokesman. He added that the gadget may be purchased from the manufacturer, the Pioneer Electric Supply Co., Cleveland.

'Times' and 'News' Buy Time On Radio-TV During Strike

TWO New York newspapers last week turned to radio and TV during the strike of the local suburban Deliverymen's Union which halted deliveries to many points outside Manhattan. Beginning Jan. 30, the *New York Times* and the *New York Daily News* placed spots on four metropolitan stations on a day-to-day basis, in anticipation of an early settlement of the strike, while public service announcements were carried on two other outlets.

The *Times,* through Arnold Cohan agency, purchased time on WCBS, WNBC and WNBT (TV) averaging approximately four spots per day. Copy urged suburban listeners to telephone the newspaper offices requesting daily mail "subscriptions" which would end automatically at the termination of the strike. *Times* spokesmen reported "extremely good" results.

In a somewhat different arrangement the *Daily News* placed three to four spots a day, Jan. 30-Feb. 3, on WPIX (TV), outlet owned by the *News,* at regular card rates. Station spokesmen added that the newspaper would probably continue using spots intermittently until the strike is over. WNEW, whose hourly newscasts are prepared by the *News,* carried several public service announcements daily as a "courtesy" to the newspaper.

Similarly, WQXR-AM-FM, which is owned by the *Times* and carries that paper's hourly newscasts, broadcast several public service announcements per day.

KSJV's Call Changed to KBIF

CALL LETTERS of KSJV Sanger, Calif., recently transferred to Poole Broadcasting Co. from Radio Sanger Co. [B•T, Dec. 22], have been changed to KBIF. John H. Poole, president and general manager, has opened sales offices and studios at 1412 Fulton St., Fresno. David C. Camp continues as manager, with R. W. Schunk as commercial manager. He succeeds Robert Kelin, who has joined the national sales staff of KLAC Los Angeles. New representative for KBIF is Robert Meeker & Assoc.

New KTBC-TV Studios

PERMANENT quarters at the Driskill Hotel in Austin, Tex., are being prepared for KTBC-TV, which expects to move in March 1. Installation and renovation in the 65-year-old hotel includes construction of a 28-by-30-foot studio, with studios and offices occupying an entire wing of the first floor. Remote facilities are being installed in the Crystal Ballroom. Station plans to take the air in late March, reports J. C. Kellam, general manager.

Grocery Contest

WOMEN broadcasters are eligible to compete for Life Line of America trophies, awarded annually by the Grocery Mfrs. of America, New York, for "outstanding contributions to the public understanding" of food processing.

STATION REPRESENTATIVES

Moore Opens Portland Office

ART MOORE & Son, Seattle radio-TV representative firm, expanded last week by opening a Portland, Ore., office at 617 Cascade Bldg. Headquarters are at 508 Jones Bldg. Roald G. Lund, former radio-TV director for Howard J. Ryan & Son, Seattle agency, has joined the Moore firm as a partner, headquartering in Seattle. Don Kneass, active in Portland radio for the past 20 years, has been named manager of the Portland office.

Mr. Kneass

Helen Mobberley Named Head of Forjoe National

PROMOTION of Helen K. Mobberley, sales manager of Forjoe National Inc., as general manager of the company was announced last week by Joseph Bloom, president of Forjoe & Co., parent organization. Forjoe National handles national representation for Transit Radio exclusively.

Miss Mobberley joined the Forjoe organization as sales manager in charge of Transit Radio in August 1952. She previously served as sales manager of Washington Transit Radio, sales manager of WINX Washington and in the sales department of NBC in Washington.

Mr. Bloom added:

"Transit Radio has gained a place of importance in the media field. The progress that we foresee in the months ahead makes it necessary to plan for the best possible management. There is no one better qualified than Helen Mobberley to assume management of Forjoe National; no one more thoroughly experienced in Transit Radio sales and management."

APPOINTMENTS

Gill-Perna Inc. appointed national representative for WGRD Grand Rapids, Mich.

George B. Hollingbery Co. appointed national representative for WNOW-TV York, Pa.

Adam Young Television Inc. appointed national representative by WFTV(TV) Duluth, Minn.

IN NORTH CAROLINA—

FM Pulled 5 Times More Inquiries at 1/17 The Cost

News for time buyers. Like you, Zenith had standard statistics available on FM radio coverage of AM "holes" and "white spots." But there's no information quite as interesting as actual results. So Zenith decided to put FM to the test with a nation-wide campaign of keyed spot announcements on Zenith Hearing Aids.

Results—at surprising low cost. In North Carolina, for example, FM pulled 5 times the number of inquiries obtained from AM, and cost per inquiry was only one-seventeenth of the AM cost. Nation-wide, the average cost of inquiries pulled by FM radio was 55% lower than that of AM radio.

Hundreds of static areas. Better investigate all the areas where AM broadcasts just can't get through because of local interference. In many of them, you'll find FM radio assures complete local coverage. The number of FM stations is steadily growing, and so is the importance of FM to your time buying schedules.

Special to Broadcasters

Your local Zenith dealer will gladly help promote your station and programs in his newspaper ads and displays. Get in touch with him today.

$250,000 in New Billings Signed for NBC-TV's 'Today'

SIGNING of seven new advertisers, representing more than $250,000 in billings, as participating sponsors of NBC-TV's early morning program, *Today*, (Mon.-Fri., 7-9 a.m. EST and CST), was announced by the network Thursday. New sponsors are:

The Trailer Coach Mfrs. Assn., through J. Walter Thompson Co., for one five-minute segment a week each Wednesday, for 52 weeks, starting April 1. The campaign is the first of its kind undertaken by TCMA and will spearhead a program of local dealer promotional tie-ins in TV markets where the show is seen.

John Morrell & Co. (Red Heart dog food), Ottumwa, Iowa, through N. W. Ayer & Son, for five-minute segments on Thursdays and Fridays, for 13 weeks beginning March 5.

Liberty Mutual Fire Insurance Co., Boston, through BBDO, for one five-minute segment a week, for 13 weeks, starting in mid-February.

Polaroid Land Camera Co., Cambridge, Mass., through BBDO, for one five-minute portion a week for six weeks, starting in mid-February.

Bymart Inc., New York, through Ruthrauff & Ryan, for five five-minute segments spread over four weeks, effective last Wednesday, and five-minute segments for four consecutive Fridays thereafter.

Nash-Kelvinator Corp., Nash Motor Div., Detroit, through Geyer Adv., for three five-minute segments in one week on three consecutive days, starting March 4.

Food Specialties Inc. (Appian Way pizza pie), New York, through Chambers & Wiswell Inc., for one five-minute segment for two weeks, effective this Friday (Feb. 13).

LBS vs. Ball Clubs Case Set for May 11

$12 MILLION suit by Liberty Broadcasting System against 13 of the 16 major league baseball clubs has been deferred to May 11, with prospects that the case may not be decided before early next year.

The trial originally was to have come up Jan. 19 in U. S. District Court, Northern District of Illinois, Eastern Division, Chicago, but was postponed to accommodate the taking of additional testimony.

Liberty is now undergoing bankruptcy proceedings in Dallas, headquarters of the former network. In its suit, all major league teams except the Cincinnati Reds, Chicago White Sox and Brooklyn Dodgers are named as defendants, charged with anti-trust violations. Liberty claims the clubs refused to permit the network to carry its *Game of the Day* broadcasts. It filed suit last February and disbanded as a network later.

White Quits, Stone Succeeds

RESIGNATION of Henry S. White as business manager of CBS-TV's program department and the appointment of Louis Stone to succeed him were reported last week, effective immediately.

Mr. White, who plans to return to independent production of programs after a short vacation, was president of World Video Inc. before joining CBS in the spring of 1950.

Mr. Stone joined the CBS-TV Business Affairs department in June 1951 after serving as executive assistant to motion picture producer David O. Selznick.

the RIGHT COMBINATION *for maximum performance at minimum cost*

NO SPLICES. As always, plastic-base Audiotape in 1200 and 2500 ft reels is guaranteed *splice-free.*

NO FRICTION SQUEAL. Perfected anti-friction process eliminates annoying tape squeal—prevents "tackiness" even under extreme temperature and humidity conditions.

MINIMUM DISTORTION. Audiotape's oxide coating is especially formulated to give *maximum undistorted output.* Comparative tests show its marked superiority in this respect.

MAXIMUM UNIFORMITY. All 7" and 10" reels of plastic-base Audiotape are *guaranteed* to have an output uniformity within ±¼ db—and a reel-to-reel variation of less than ±½ db. And there's an actual output curve in every 5-reel package to prove it!

PRECISION TIMING. Improved reel design with 2¾" hub reduces timing errors by eliminating the tension and speed changes formerly encountered at the beginning and end of the winding cycle. Ratio of OD to hub diameter is the same as the standard NAB 2500 ft reel.

CONSTANT PITCH is another advantage of the new reel design resulting from the more uniform tape speed throughout the winding cycle.

SLOWER ROTATIONAL SPEED, due to larger hub diameter, minimizes vibration and avoids possible damage to tape on fast forward and rewind.

REDUCED HEAD WEAR can also be expected, because the maximum tape tension is materially decreased.

audiotape gives you all these advantages at no extra cost!

* Trade Mark

This new 1200 ft plastic reel with 2¾" diameter hub is now being supplied on all orders for 7" reels unless otherwise specified... at no increase in price. Remember—with Audiotape, there's only *one* quality—the finest obtainable! Audiotape is available in all standard size reels from 150 to 5,000 feet.

FINESHRIBER BECOMES NBC V.P. & G.M.; ADAMS ALSO RAISED TO V.P. POST

Mr. Fineshriber moves into integral post, bringing him and NBC President White together for the third time. David C. Adams is promoted to vice president for administration.

WILLIAM H. FINESHRIBER Jr., former executive vice president of Mutual, has been elected NBC vice president and general manager of the radio and TV networks [CLOSED CIRCUIT, Jan. 19], and David C. Adams, NBC director of special projects, has been promoted to vice president for administration.

Mr. Fineshriber

Their elections to vice presidencies occurred Friday at the monthly meeting of the NBC board and are being announced today (Monday) by President Frank White.

Mr. Fineshriber, who joins NBC March 2, and Mr. Adams both will report to John K. Herbert, vice president in charge of the radio and television networks, who made known their respective spheres of operations as vice presidents.

Mr. Adams

"Mr. Fineshriber brings to his new position the practical experience of more than 20 years in network operations," Mr. Herbert said. "He is widely recognized in the industry for his ability and for his contributions to the advancement of broadcasting. Because of Bill's demonstrated talents in that field, I am particularly pleased to have his assistance in the management of our two networks.

"The election of Mr. Adams as vice president recognizes his outstanding ability in handling administrative projects. His talents too will now be used on a broader basis in our network operations."

NBC is the third network at which Mr. White, who assumed the presidency Jan. 2, and Mr. Fineshriber have served together. They were colleagues at CBS, where Mr. White rose to the presidency of Columbia Records, and at Mutual during Mr. White's tenure as MBS president.

Mr. Fineshriber, now 43, entered radio after graduation as a Phi Beta Kappa from Princeton U. in 1931, followed by advanced study at the Sorbonne in Paris. He served CBS first as a member of the publicity staff, leaving in 1934 to manage Carnegie Hall in New York and returning in 1937 to serve in a succession of important posts. He was general manager of the program department when he resigned to join Mutual in 1949. There he reached the executive vice presidency when Mr. White moved to NBC.

Currently on vacation following his resignation from Mutual to accept the NBC post—the same one held by Mr. White before his elevation to the presidency—Mr. Fineshriber is a member of the NARTB Board and the BAB Executive Committee. At MBS he was was a board member as well as executive vice president, and was a vice president and a director of General Teleradio Inc., which operates the General Tire & Rubber Co. radio-TV properties, including Mutual.

Mr. Adams, now 39, joined NBC as assistant general counsel in December 1947 after some six years with FCC. He was elected vice president and general attorney of RCA communications Inc. in July 1948, but moved back into the NBC organization the following January as assistant to the executive vice president.

At FCC, which he joined in September 1941, he served successively as chief of the International Legal Section, assistant chief of the Common Carrier Division, and assistant to the General Counsel. He also was a member of the Cable and Radio Committees of the Board of War Communications during his FCC tenure, which was interrupted by two years of military service.

Mr. Adams was a member of the U. S. delegation to the Atlantic City Radio, Telecommunications and High Frequency Conferences from May to October 1947, serving as chief assistant to Charles R. Denny, then chairman of FCC and of the three conferences, who now is an NBC vice president. Mr. Adams also was a member of the U. S. delegation to the Moscow Five-Power Telecommunications Conference and a U. S. observer at the London meeting of the International Telegraph consultative committee, both in 1946.

Mrs. Sidney R. Oberfelder Dies

FUNERAL services for Mrs. Sidney R. Oberfelder of New York, mother of Ted Oberfelder, ABC vice president in charge of owned radio stations, were held there last Thursday. Mrs. Oberfelder died Tuesday. Her husband and a son survive.

South Rises Again

CBS Television, via Edward R. Murrow's *See It Now*, made a nation-wide apology to the citizens of Gastonia, N. C. on Feb. 1. Some 50,000 Gastonians, proud of their Rambin' Rebs drum and bugle corps (one of two to represent the state at the Presidential Inauguration), rebelled violently after a CBS-TV producer switched cameras just as the Rebs were rambling into sight on TV screens.

WBTV (TV) Charlotte, blasted in Gastonia papers along with the network for the slight, issued an apology and its managers started scouting the newsreel field for shots of the Rebs' appearance in the parade. A letter from a local Gastonian to Mr. Murrow, however, reminding him of his North Carolina origin, resulted in fast dispatch of a *See It Now* correspondent, who shot the Gastonia story a fortnight ago.

POOR RICHARD Club's Gold Medal of Achievement Award goes to William Paley (r), CBS board chairman, from Joseph L. Tinney, Poor Richard president and WCAU-AM-TV Philadelphia vice president, during club's annual award dinner in that city [B•T, Jan. 26]. Award was for "contribution to the strength of the nation through service to government."

CBS Radio Names Novins Director of Public Affairs

PROMOTION of Stuart Novins, CBS Radio associate director of public affairs, to director of public affairs was announced Wednesday by Adrian Murphy, president of CBS Radio.

Mr. Novins

In his new post, Mr. Novins will report to Mr. Murphy. Wells Church will relinquish the duties and title of CBS Radio's director of public affairs but will continue as director of news and special events.

As CBS Radio's director of public affairs, Mr. Novins will supervise special documentary programs of national interest and educational, religious, discussion and general public affairs programs.

ABC Western Div. Shuffle Affects Publicity, Promotion

PUBLICITY and promotion departments have been shuffled at ABC's Western Div. Radio and TV will each be serviced by a publicity-promotion department, and both will be aided by a newly-created department, known as publicity-promotion services, Bill Phillipson, division director, has announced.

Stanton Kramer, publicity and sales promotion manager for Bing's Things Inc., division of Bing Crosby Enterprises, is director of publicity-promotion for ABC-TV Western Division and KECA-TV Los Angeles. He reports to Phil Hoffman, KECA-TV manager.

Jon Wells Barkhurst, advertising-promotion-publicity manager for CBS-TV's *The Homemakers' Exchange*, New York, becomes director of publicity-promotion for ABC Radio Western Div. and KECA Los Angeles. He reports to Amos Baron, manager of KECA.

Merwin Travis, sales promotion manager for ABC Western Div., heads radio-TV publicity-promotion services for the network, and is responsible to Mr. Phillipson.

Emerson Board Abandons Webster-Chicago Merger

STOCKHOLDERS of Emerson Radio & Phonograph Corp. were told last week the company's proposed merger with Webster-Chicago Corp. had been abandoned by Emerson's board of directors.

Benjamin Abrams, Emerson president, told stockholders at their annual meeting Wednesday in New York the contemplated merger encountered opposition from some Webster-Chicago stockholders, "as well as apparently sharp dissension within the Webster-Chicago company."

Mr. Abrams predicted a record $5 billion billings for the radio-TV industry in 1953, including sales of 7½ million TV sets and 10 million radio receivers and armed forces purchases of electronic equipment exceeding those of any other year since start of the Korean War.

All company directors were re-elected. They are: Mr. Abrams, Louis Abrams, Max Abrams, F. Eberstadt, Richard C. Hunt, Dorman S. Israel, and George H. Saylor.

Emerson Color Sets

EMERSON Radio & Phonograph Corp. plans to start production of color TV sets on a limited scale in early 1954, its president, Benjamin Abrams, told stockholders last week (see story above). First sets will be high-priced in comparison with current black-and-white models, he predicted. Mr. Abrams said Emerson is continuing developmental work on a compatible color TV system and said he was confident that such a system would be approved by FCC.

Uhf Stations to Lease Klystrons Under GE Plan

GENERAL ELECTRIC Co. has released details of a plan under which its new klystron tubes for uhf transmission will be leased to telecasters.

GE believes its plan for direct lease of the giant klystrons is a unique marketing method in the broadcast industry. The tubes will be leased directly by television stations from the GE Tube Dept. at a fixed rate per broadcast hour.

GE recently began production at the klystrons at its tube works at Syracuse. Varian Assoc. Inc., San Carlos, Calif., already has built a limited number for GE.

E. F. Peterson, GE Tube Dept. marketing manager, said the rental plan will relieve the uhf telecaster of worrying about the cost of transmitting tubes. Rental charges will include stand-by tubes for emergency service. GE said the klystron's 15 kw maximum power output is higher than any transmitting tube now on the market, and that it is the only tube which will make uhf reception comparable to the ranges now covered by vhf.

Raytheon to Add Plant

PLANS for erection of a new plant in Quincy, Mass., to manufacture and warehouse TV picture tubes were announced Jan. 23 by C. F. Adams Jr., president of Raytheon Mfg. Co., Waltham, Mass.

What Happened to Meat Prices?

THE year-end report of the U. S. Bureau of Labor Statistics makes mighty good reading for people who like meat, and that means about everybody.

It shows that as of December 30, average wholesale meat prices were 20% lower than the levels of August 19—the high point of the year.

While declines at retail aren't the same for all grades and cuts, by watching for specials you can get more mileage for your meat money than you could a short while back. This is especially true if you will remember that there is a lot of good meat around besides center cut pork chops . . . or fancy steaks from top grades of beef.

What's the reason for lower meat prices? The answer is simple —*greater meat production*— more livestock came to market during this period.

Meat prices follow the age-old law of supply and demand . . . how much meat there is, how many people want it, and how much they have to spend for it.

Did you know

. . . that there are more than *4,000 individual meat packing companies* in the United States . . . that they compete with each other daily both for the meat animals and for customers . . . that this two-way competition (plus modern, mass-production methods and full use of by-products) brings your meat to you at a *lower service cost between farm and table than almost any other food?*

RCA Scholarships to 18

ANNOUNCEMENT of RCA scholarship awards to 18 university students majoring in science or engineering was made Thursday by Dr. C. B. Jolliffe, RCA vice president and technical director. The scholarship grants, worth $800 each, are for the current academic year.

Dr. Jolliffe said seven scholarships have been awarded for the first time at the U. of Notre Dame, West Virginia U., Wellesley College, U. of Cincinnati, Franklin & Marshall College, U. of Florida and Indiana U. Miss Marijane Curran, a student at Wellesley, has become the first woman to receive an RCA scholarship, Dr. Jolliffe added.

Admiral Revises Companies

MERGER of seven subsidiary distributing companies into two corporations and creation of two other corporations to handle foreign sales have been announced by Admiral Corp., Chicago.

Admiral Distributors Inc., New York, will combine the New York distributing division and the appliances distributors branch of Chicago. A second firm will maintain distributing units in Boston, Milwaukee, San Francisco, Los Angeles and San Diego.

Importance of exports dictated formation of Admiral International Corp. and Armiral Corp. Interamericana, said Ross D. Siragusa, Admiral president.

Audio Contest

CONTEST offering more than $1,000 in prizes for the best 14 articles on the use of tape and disc recording to improve efficiency, quality and economy in a radio or TV station or recording studio was announced last week by Audio Devices Inc., manufacturer of Audiodiscs and Audiotape. Information on special gadgets or techniques developed to meet specific recording needs will be particularly welcome, the announcements said, adding that photographs or drawings should be used, if possible, to illustrate the articles. First prize is $250.

There also are three $100 prizes and ten $50 awards, and $25 will go to any other entrant whose article is published in an Audio Devices publication. Entries must be postmarked not later than midnight May 1, and should be addressed to Sound Recording Contest Audio Devices, 444 Madison Ave., New York 22. Material becomes the property of Audio Devices and entries will not be returned.

Equipment Shorts

Pentron Corp., Chicago, announces production of pre-amplifier and tape transport mechanism for use with any existing audio amplifier, radio, TV or combination.

Allied Radio Corp., Chicago, announces production of new Knight vacuum tube volt-ohm-milliammeter kit with six ranges for measuring AC peak-to-peak volts. Kit includes six milliampere ranges and five capacitance ranges.

Barber-Colman Co., Rockford, Ill., announces publication of Catalog F 3941-2 containing information on all Barber-Colman industrial controls.

Cinema Engineering Co., Burbank, Calif., has issued new CE series of resistors encapsulated in cast epoxy. They are available in three general types.

Frank A. Emmet Co., L. A., named southern California and Arizona distributor for Central Electronics, that city (record players, components and accessories).

Electronic Components Div., Stackpole Carbon Co., St. Marys, Pa., announces production of new Stackpole Type A-12 DP-ST line switch designed for handling high currents at low voltages.

Precision Electronics, Franklin Park, Ill., announces production of new Model LJ2 high fidelity amplifier. Power output is 8 w with peak of 18 w.

Kittleson Co., L. A., appointed distributor in four Western states for Reon Resistor Co., Yonkers, N. Y. (wire wound resistors).

Neely Enterprises, L. A., appointed distributors of Telefunken microphones in four Western states area.

Gerald B. Miller Co., Hollywood, Calif. appointed engineering sales representative in four Western states by Kron-Hite Instrument Co., Cambridge, Mass. (servo filters, oscillators and other electronic equipment).

Precision Equipment Co., Chicago, has published new catalog on steel shelving and lockers as well as other storage and maintenance equipment for industrial and institutional uses.

Magnatran Inc., Kearny, N. J., announces production of Unitized Rectifier ready to connect to AC line and DC load. Unit features packaged high voltage DC source.

PERSONNEL RELATIONS

West Coast AFL Protests Foreign-Made Films

IN AN ATTEMPT to curb foreign TV film production, Roy Brewer, West Coast IATSE representative and chairman of AFL Hollywood Film Council, has gone directly to local sponsors of the programs. Involved in the latest action are Los Angeles Brewing Co., using KNBH (TV) for *Foreign Intrigue,* filmed in Europe, and Thrifty Drug Stores, using KECA-TV for *Affairs of China Smith,* shot in Mexico.

The brewery, through its agency, Warwick and Legler, reports no change in programming. Thrifty, through Dan B. Miner Co., has withdrawn the Mexico-made six films which had been scheduled for showing on *Affairs of China Smith.*

Removed from List

Removed last week from the council's "unfair list" was Interstate Television Corp., subsidiary of Allied Artists, which had recently contracted for its second series of 13 half-hour "Hans Christian Andersen" films, produced in Denmark by Scandinavian-American Television Co. After the council asked networks, prospective sponsors and the American Assn. of of Advertising Agencies to refuse the series, Interstate President G. Ralph Branton explained he had invested money in the venture before the AFL campaign and it would be his only foreign-made TV product.

NABET, NBC, ABC Agree On New Wage Contract

THREAT of a strike by members of the National Assn. of Broadcast Engineers and Technicians (NABET-CIO) against NBC and ABC was averted Jan. 31 by an agreement on wages and working conditions at a meeting in Atlantic City.

Negotiations were conducted in accordance with a wage-reopening clause in the contract. A spokesman pointed out that a "no strike" provision in the pact would have expired on Jan. 31 at midnight.

He said the agreement provides for "substantial" wage increases, a reduction in the length of service escalator clauses and certain job reclassifications. The contract now runs to Jan. 31, 1955.

NABET represents some 2,000 ABC and NBC employes in New York, Chicago, Washington, Cleveland, Hollywood and San Francisco.

PROFESSIONAL SERVICES

Graim Named to Gillett

RICHARD J. GRAIM has been named an associate with Glen D. Gillett & Assoc., consulting radio and television engineering firm, Washington, D. C. Mr. Graim was with Jansky & Bailey, Washington consulting engineers, during the last war and through 1950, primarily engaged in research. The first six months of 1951 he was with the U. S. Signal Corps, later joining Gillett & Bergquist.

Concurrently with the naming of Mr. Graim as an associate of Mr. Gillett, Paul Bergquist withdrew from the partnership of Gillett & Bergquist to go into other fields. His future plans have not yet been announced. Glen D. Gillett & Assoc. is located at 982 National Press Bldg. Telephone is National 8-3373.

Mr. Frank Jones
WBNS-TV
495 Olentangy River Road
Columbus, Ohio

Dear Mr. Jones:

I thought you would be interested to know the affect of the advertising schedule for our client, Pickerington Creamery, on WBNS-TV's "Aunt Fran and her Playmates" series.

The reaction from the trade has been highly satisfactory. Pickerington's powdered milk, comparatively unknown before this recent TV campaign, has gained distribution in many new outlets, and repeat orders for the product are high. Your station merchandising department outdid itself in preparing the point-of-sale material which called attention to our television schedule. Despite the fact that a 70¢ purchase is required to secure Aunt Fran's Fingertip Puppet premium, including box top and 25¢, the returns have been most gratifying.

Very truly yours,
HARRY M. MILLER, INC.
John W Corbett Jr
John W. Corbett, Jr.
Account Executive.

Indicative of all WBNS-TV's product promotion, both Pickerington Creamery's product and an appealing premium were cleverly integrated into the top-rated Aunt Fran show . . . resulting in a gratifying sales increase for the client.

ALWAYS IN FRONT BY AN OVERWHELMING MARGIN

an agency's memo to a client

how BIG will tv be?

For one of its major accounts, Sherman & Marquette prepared a prediction of things to come in television. Here's an adaptation of that report, prepared by the agency's media director for BROADCASTING • TELECASTING. It's a view of TV's ultimate development, in terms of its usefulness to the national advertiser.

By John B. Crandall

THIS study is an attempt to predict where we will end up when all television grants have been finalized both in terms of the number of television markets and also in terms of time costs expressed by the Class A hour rate.

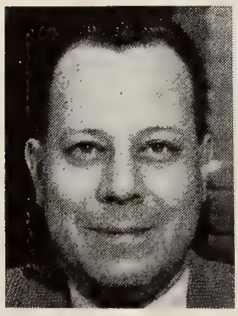
When the freeze went into effect in September 1948, television was just starting to come into its own as an advertising medium. By the time the freeze was lifted in July 1952 television had grown as a medium to a point where it was too important and potent to be ignored, too expensive to just be added on top of other media, yet too limited in coverage to be a completely national medium.

With the lifting of the freeze, we are faced with the problem of just where to add markets, and our appraisal is intensified because of the growing costs of existing television facilities. Basically, grants are being given now in three categories: (1) uhf grants in markets without television or with limited or contested vhf allocations, (2) vhf grants in medium and small sized markets, and (3) uhf grants in markets with television where either the remaining vhf channel is "hotly" contested or where the single vhf allocation is already assigned.

The Allocations

The FCC television allocations have been worked out in order to bring television to the greatest possible number of people. Because of the limited number of possible vhf allocations, it was found necessary to use uhf in areas of highly concentrated populations. However, these allocations were set up in relation to markets and not necessarily market or area potential.

Market potential has always been a basic yardstick in market selection in buying any medium. Both in terms of present television markets and from what we can see for new television markets, this yardstick will not only continue to apply but must be applied more stringently in view of the "blue chip" costs involved in television. Any medium will become progressively more expensive in terms of cost per thousand homes reached as you decrease in size of market population. In most mediums, this increase in cost per thousand follows an arithmetic progression —in television the increase is closer to a geometric progression.



It therefore becomes more necessary in television to carefully examine markets to be added and to reexamine markets currently being used. Right now many markets are being added to television. Besides judging the new markets in terms of potential it is also necessary to give special attention to new uhf stations in areas with an existing penetration of vhf homes. It has been our experience that conversion to uhf has been extremely slow up to the present time.

In view of the markets being added at the present time, it is our opinion that we should try to look ahead and see just where we will end up when all the contests are over and television has reached maximum saturation in all markets. Exactly when that will be is surely hard to predict in view of the "hot" contests for certain allocations and the variance of saturation development in certain sections of the country.

Before making actual market measurements, we feel that we should try to determine just what is the minimum number of people or homes necessary in an area in order to support a television operation. We know that along with high advertising costs, television is proportionately as expensive for a station as for an advertiser, both in construction and in operational costs. Therefore we have attempted to project minimum construction and operational costs along with maximum gross revenue to a station.

From a consensus of all people from all branches of the industry, we feel that the minimum construction expense of a station that plans live local programming is $800,000. Certainly a station could be constructed without studios or cameras but such an operation could not expect full national and local advertising income. From an analysis of several stations in various sized markets, we feel that the minimum annual operational expense of a station would be $450,000. If the construction expense were amortized over the accepted five year period, the annual minimum expense of a station for the first five years would be $610,000 and $450,000 thereafter. This does not allow for replacement of equipment or other unforeseen costs.

ABOUT THE AUTHOR

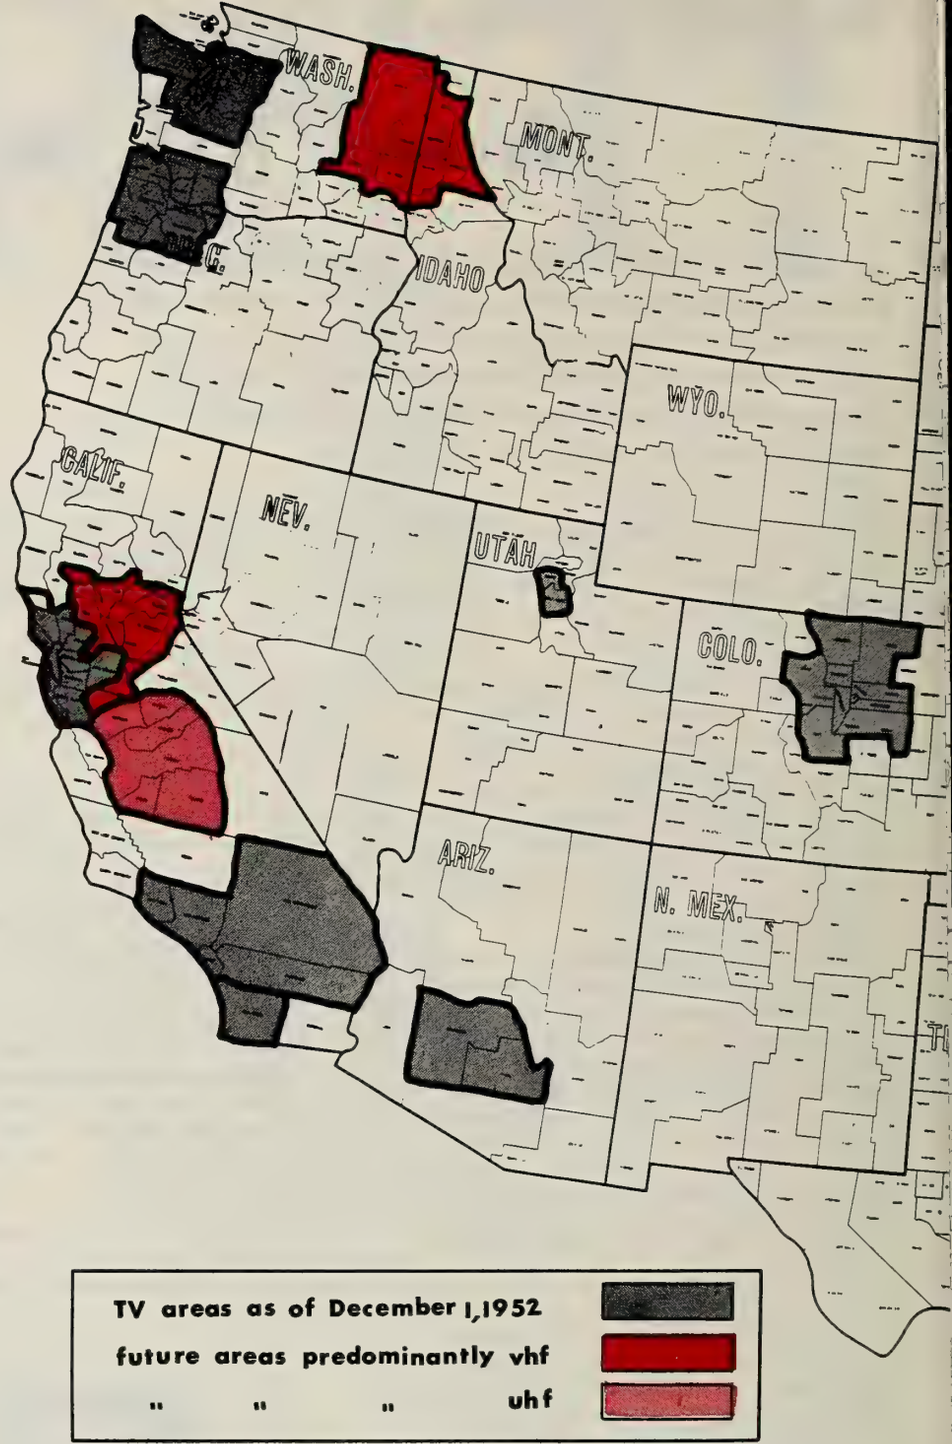
Mr. Crandall is media director of Sherman & Marquette, New York, and in that role has devoted a great deal of time to on-scenes investigation of television operations and development. He has been with the agency for seven years, since his release from wartime service with the U. S. Air Force in Europe. Before the war, he was with Kudner Agency, New York, for a year and before that was with Benton & Bowles, New York, as radio timebuyer and media buyer.

Formula for Gross

In terms of maximum expected income we have studied the 1952 gross income of three stations that are completely sold out and have a normal balance between network, national spot, and local income. Each of these stations is in a one station market. From the relation of the total gross of the stations to their Class A hour rate, we found that you can take the hour rate of a station and multiply it by 1,600 and arrive at a very close approximation of gross annual income. As a check on this formula we were able to apply it to eight additional stations where we were unable to get the actual gross figures but were able to have the stations apply this formula. The results showed a variance of from minus 3.4% to plus 12.3%.

From analyzing the experience of all stations on the air before the freeze we found that the growth of saturation was:

1st year—18%
2nd year—37%
3rd year—42%
4th year—53%
5th year—62%



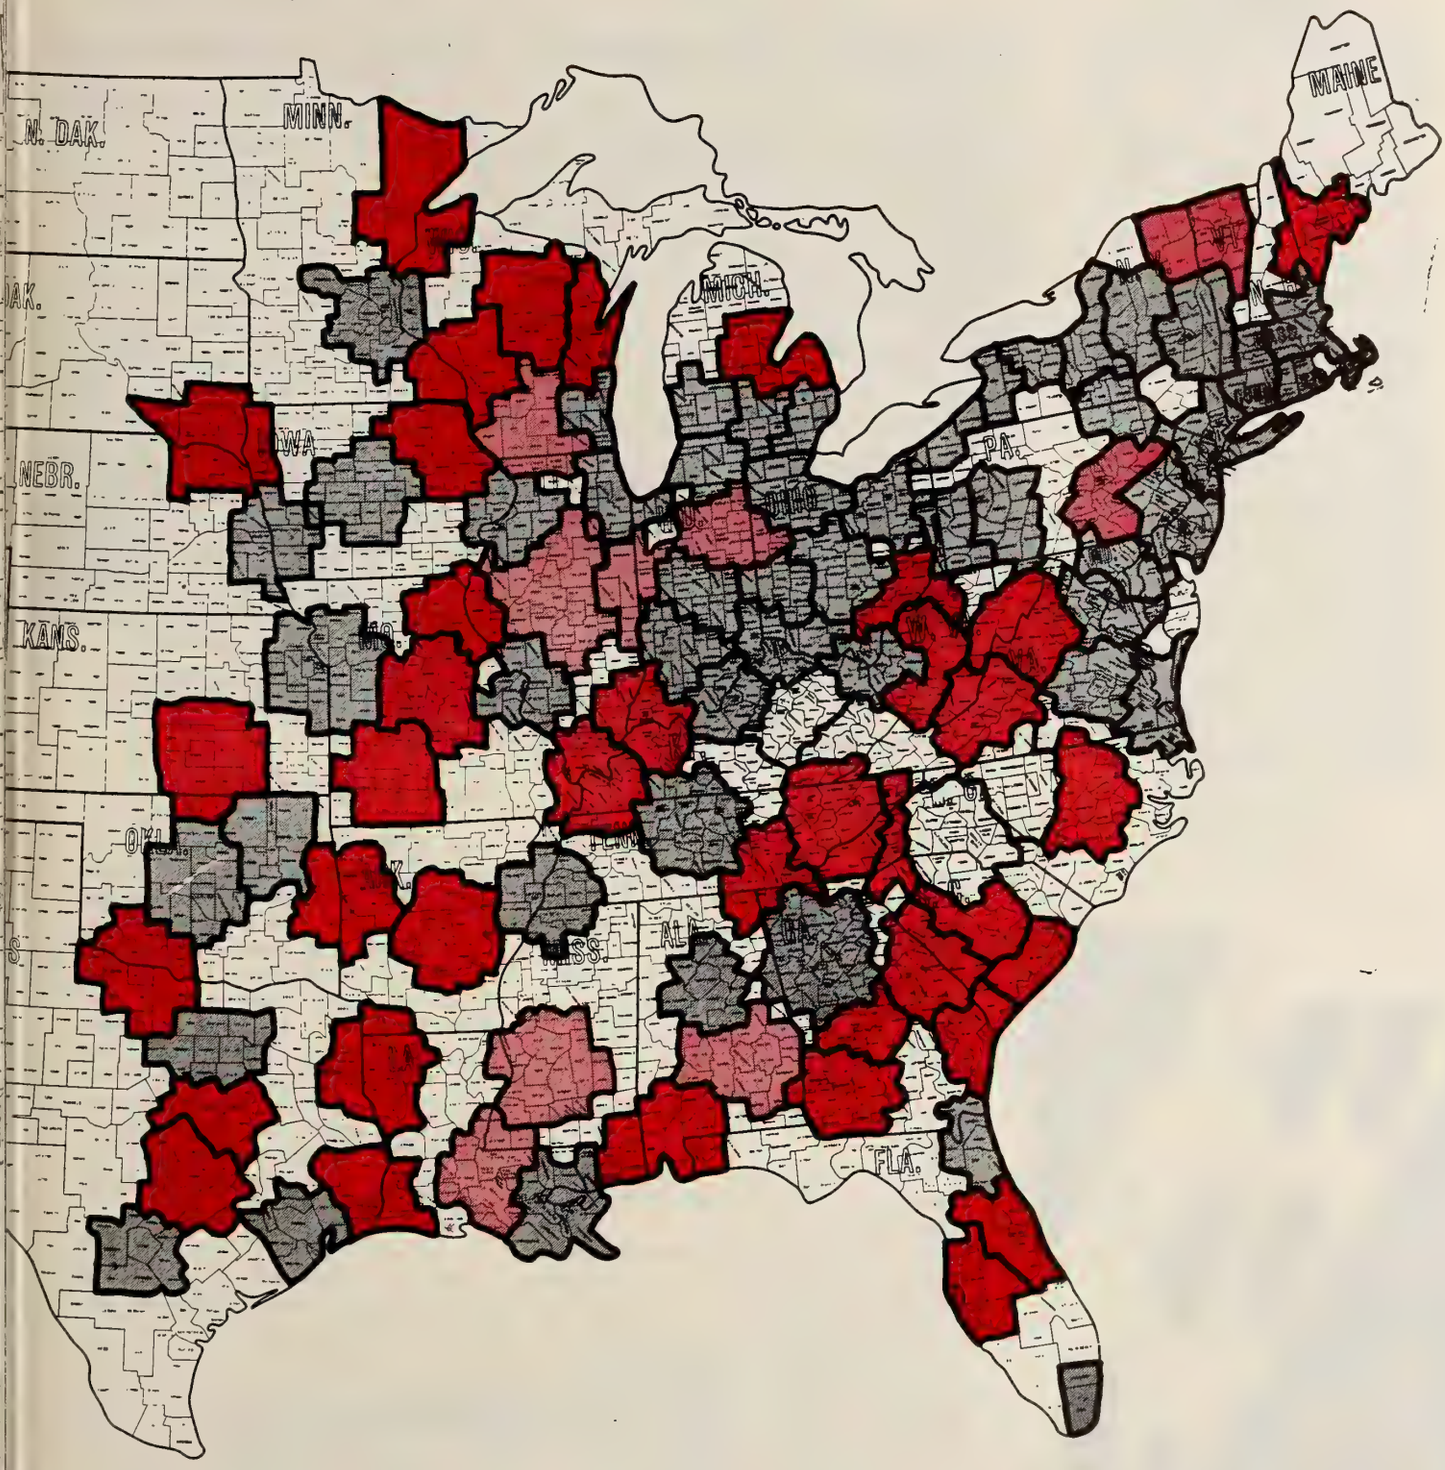
We realize that this experience must be adjusted to allow for the fact that television itself was growing during that period and is at a point today where better set development may be expected. From talking to various people in the industry, we feel that the following saturation table is more in line today for new markets:

1st year—25%
2nd year—50%
3rd year—75%
4th year—80%
Maximum saturation—80%

Now let us examine various sized markets

AN AGENCY'S CONCEPT OF TELEVISION'S FUTURE

Map at right shows existing TV markets (in gray) and future markets that contain minimum of 350,000 population which Mr. Crandall deems necessary to support healthy TV stations. (For distinctions between future areas that will be predominantly uhf or vhf, see legend.) To plot map of post-freeze TV, agency took all markets with TV grants or applications pending, drew 50-mile circle around each, throwing in any county that was at least one-half inside the circle, but counting only those counties not already covered by TV. Combining existing and future markets, agency found total of 112 market areas that have 350,000 population or more each.



based on the foregoing information. We will assume that each of these markets will be on the cable (thereby getting live programming and assuring maximum saturation), that construction and operational expenses will be minimum and that gross income will be maximum. Actually, in order to enjoy the income figures shown, the station would have to be completely sold out the day it starts on the air. The gross hour rates shown are based on one of the major network's compensation table in relation to the number of sets in the market.

Years On Air	% Saturation	Gross Hour Rate	Gross Income	Gross Expense	Net	Cumulative Net
			250,000 Population—50 Mile Radius			
1	25%	$200	$320,000	$610,000	$—290,000	$—290,000
2	50%	300	480,000	610,000	—130,000	—420,000
3	75%	375	600,000	610,000	— 10,000	—430,000
4	80%	400	640,000	610,000	+ 30,000	—400,000
5	80%	400	640,000	610,000	+ 30,000	—370,000
6	80%	400	640,000	450,000	+190,000	—180,000
7	80%	400	640,000	450,000	+190,000	+ 10,000
			350,000 Population—50 Mile Radius			
1	25%	$250	$400,000	$610,000	$—210,000	$—210,000
2	50%	375	600,000	610,000	— 10,000	—220,000
3	75%	475	760,000	610,000	+150,000	— 70,000
4	80%	500	800,000	610,000	+190,000	+120,000

This could be worked out for any size market. As examples, a market of 300,000 would be in the black the fifth year and a market of 500,000, the third year.

From the above we feel that in order to support television as a sound investment a market must have a minimum of 350,000 population in its 50 mile radius. We fully realize that there will be cases where markets of smaller size will hold out the necessary time to be in the black where financing can be done easily. We also realize that there will be successful cases of profitable operations where new owners acquire properties after the basic equity has been written off. However, we feel that the exceptions will be few and prefer to use as a base a 350,000 population minimum. Please keep in mind,

the above tables represent maximum income, minimum expense and do not allow for possible summer drop in income.

In the map above we have shown the 112 markets that have a minimum of 350,000 population (see map caption page 78). These market areas account for 83.42% of total U. S. homes, 83.11% of population, 84.74% of retail sales, 85.69% of food sales and 85.71% of drug sales, based on *Sales Management* figures.

The table at right shows how these markets break down in the order of total homes and what 80% saturation would mean in terms of corresponding hour rates. The costs per thousands homes are also shown. Note how cost per thousand rises as market size diminishes.

No. of Markets	% Of U.S. Homes	% of U.S. Population	% of U.S. Retail Sales	% of U.S. Food Sales	% of U.S. Drug Sales	Cumulative Hour Rate*	Rate % of 112 Market Total Rate	Cost Per M Homes
10	32.53	31.65	36.14	38.60	35.64	$21,100	22.28	$1.45
20	42.88	41.93	46.93	49.20	47.53	32,325	34.13	1.69
30	50.99	49.93	55.31	57.57	55.59	42,025	44.37	1.84
40	57.26	56.46	60.84	62.85	61.23	50,325	53.13	1.97
50	62.44	61.65	66.00	67.63	66.65	57,825	61.05	2.07
60	67.04	66.15	70.44	71.85	71.24	64,850	68.46	2.16
70	71.19	70.40	73.84	75.16	75.03	71,600	75.59	2.25
80	74.93	74.43	77.12	78.28	78.11	77,975	82.32	2.33
90	78.04	77.59	79.98	81.06	80.88	83,625	88.28	2.40
100	80.72	80.40	82.40	83.43	83.34	88,975	93.93	2.46
110	83.02	82.68	84.37	85.33	85.32	93,725	98.94	2.52
112	83.42	83.11	84.74	85.69	85.71	94,725	100.00	2.54

Now! From Diamond to Radio

A BIG LEAGUE NAME

A BIG LEAGUE SHOW!

Phil Rizzuto's Sports Caravan

a sparkling 15 minute transcribed radio series

About Phil. Everyone knows him . . . 12 years with the world champion Yankees.

About the Show. A fast-moving 52 quarter-hour sports program for twice-weekly broadcast. 26 weeks beginning mid-April through September, including a free-upon-request separate disc on which Phil will transcribe 5-second personalized lead-ins to commercials.

Production. Each transcription is double-faced, with 2 complete 15-minute shows, open-end for 1-minute commercials: open—middle—close.

Cost. Priced at incredibly low "quick-sale" rates.

NBC AFFILIATE IN DETROIT

Owned and Operated by
THE DETROIT NEWS

NATIONAL REPRESENTATIVE
THE GEORGE P. HOLLINGBERY CO.

No more intricate assignment is apt to be given TV than to educate the public to buy venetian blinds containing parts made by this company.

THE CHALLENGE of selling venetian blinds in the winter is calculated to test the skill and ingenuity of even a super-salesman. Even more perplexing at this time of the year is the problem of selling venetian blinds containing specific brand-name venetian blind parts.

But Levolor-Lorentzen Inc., New York, maker of venetian blind parts, accomplished these two-fold objectives in handsome style this winter. And a substantial part of the credit, according to advertising manager Warren A. Bruce, belongs to television.

"TV has done a tremendous job," Mr. Bruce said. "It went far beyond our expectations."

The bright outlook at Levolor has been achieved by use of TV spots and a 15-minute TV film in New York, Chicago, Lancaster and Nashville. Mr. Bruce pins his faith so strongly on TV that in New York he scheduled the film, *The Levolor Short Story Theatre* over WJZ-TV New York in the time slot opposite Milton Berle and Bishop Sheen.

To understand fully the amazing selling impact achieved by TV for Levolor, Mr. Bruce pointed out, it is necessary to know the specialized problems of the trade, both in creating brand-consciousness and in marketing the product.

The Problem

"Here's the way the Levolor operation works," Mr. Bruce explained. "We make the parts, such as the slats or the wheels that make the blinds go up and down. We sell these parts to local venetian blind manufacturers. They, in turn, sell the parts to neighborhood dealers, who are the ones that must reach the consumer interested in buying a custom venetian blind. Levolor's TV program tells the consumer to insist on venetian blinds containing parts carrying the Levolor tag."

For years, according to Mr. Bruce, standard operational procedure in the industry was to advertise heavily in the so-called "shelter" publications, such as *Better Homes and Gardens* and *Home Furnishings*. But in May 1952 Levolor, through its agency, Friend, Reiss, McGlone, New York, decided to schedule a limited number of TV spots. The results were so satisfactory that the company decided upon a more ambitious undertaking—and *The Levolor Short Story Theatre* was born in October 1952. It was designed to stimulate business in traditionally sales-shy wintertime.

The Solution

"And the results were almost instantaneous," Mr. Bruce recounted. "By use of literature and counter cards promoting the program and the Levolor name, we started a chain reaction from Levolor to the manufacturer to the dealer that has resulted in increased sales all along the line. And amazingly enough, dealers report consumers are actually coming into their stores and asking for venetian blinds with parts bearing the Levolor tag."

The manufacturers have cooperated wholeheartedly by distributing counter cards and literature to dealers, who in turn have passed them along to customers. In Chicago, for instance, some 44,000 pieces of literature were made available to consumers two weeks after the TV program took to the air and five manufacturers requested 600 counter cards for their dealers.

Mr. Bruce maintains that any sound businessman knows a good thing when he sees it. Not long after Levolor took the dip in TV, he added gleefully, "Our competitors decided to get their feet wet too!"

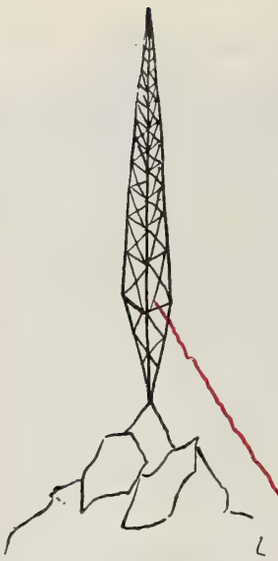
"MOVING THE GOODS" IN THE Memphis Market



Air Express and Air Freight Service by six operating airlines over thirteen radiating lines are moving more and more goods into one of the nation's fastest growing areas. The fastest way to "move the goods" through retailers in this $2 Billion Memphis Market is to broadcast your message over WREC. You get the "better half" of both metropolitan and rural listeners at the lowest cost . . . and, a single schedule does it! Memphis No. 1 Station completely covers the 76 rich counties with quality programming that **keeps** them listening. (Ask to see the latest Standard Audit and Measurement Report and Hooper Ratings for **proof**!)

WREC

MEMPHIS NO. 1 STATION

REPRESENTED BY THE KATZ AGENCY

AFFILIATED WITH CBS RADIO, 600 KC—5000 WATTS

Some prospective telecasters, especially those planning operations in smaller markets, are doing their best to keep community television systems out of their areas. Others welcome such systems as a means of extending coverage.

is community tv here to stay?

By Earl B. Abrams

ARE community television system operators going to unhook their coaxial cables from the mountain sides and streets of your community and silently steal away because you're going to put up a TV station?

Not so fast.

The community TV system enterprisers—small, local businessmen in the main—aren't feeling licked yet. In fact, they're quite cocky about the future of their little operations and they think they can hold on to them for some time yet—local telecasting or no local telecasting.

First, the service of providing TV programs to valley residents who normally should not expect to receive regular broadcasts has proved quite profitable. Although all of the estimated 160-odd systems in operation are not coining money, enough of them have paid off so they're not going to give up so easily.

Prime example of the successful wired TV system is that of Trans-Video Corp. in Pottsville, Pa. There the company took in $200,000 in installation fees with 1,500 subscribers signed up by the middle of last year. That number of subscribers also meant a monthly income of $5,625 at the rate of $3.75 per month each for maintenance and service. The installation fee is $135.

Entire cost of installing the mountain top antenna and running cables down the mountain side and on the streets of the Pennsylvania anthracite community was $200,000.

Rosy Future

In fact, Trans-Video is so sanguine about the future—it recently topped the 2,000-customer mark—that it is expending another $75,000 right now to transform its system from a three-channel facility to one furnishing six or seven channels.

A second reason for the optimism of closed circuit TV operators is this: The coming of a thousand or even two thousand free broadcast stations does not mean the 70-80,000 subscribers to community TV systems won't continue to desire additional signals. Basically, most of the TV-locked areas are small valley towns which may have one—or perhaps two—TV stations of their own. But, community TV men feel, local residents will want at least a choice of the four networks and will thus still be willing to pay for the extra services.

Another angle to the community TV operators' lack of depression about the future lies in the fact that it is not at all certain that a local telecaster will be able to get his pictures into every nook and cranny of his service area. This will be even more so with uhf, and in the small communities where closed circuit TV is paying off the FCC allocation largely calls for uhf TV.

There will always be a place for wired TV—in the mountain peaks and valleys of such states as Pennsylvania, West Virginia or Washington, the mountain top antenna men hold.

Martin Malarkey Jr., 35-year-old president of Trans-Video Corp. and also president of the National Community Television System Assn. and a highly successful appliance dealer in Pottsville, will be the first to admit that there is a basic conflict between a local telecaster and a community TV system operator. The wired TV service does limit the audience available to the telecaster, he acknowledges. But, he argues, "This is over-balanced by the fact that community TV systems extend the signals of other broadcasters.

Public Service Counts

"It is the service to the public that is the real criterion," he states. "If we can give the people a wider choice of TV fare, then there will always be a place for us," he continues.

In speaking to community TV operators in preparation for this article, B•T found unanimity on one point — although none wanted to be quoted. That is that there certainly will be some effect on wired TV where there are three or four local TV stations, bringing residents most or all of the network programs. Then, the leased TV men admit, the impact will be powerful and community TV operations will very possibly diminish to something more minor—if they are sustained at all.

They point to such cities as Harrisburg or Wilkes-Barre, Pa., where existing community TV systems face the threat of three free broadcast stations in each city.

A big question mark in the minds of community TV operators and of telecasters is that of booster or satellite operation to feed broadcast signals into shadowed areas beyond the reach of the direct TV signal.

Much hope is pinned on the outcome of the experiments currently being conducted by WSM-TV Nashville, which has been testing the extension of its Channel 5 signals to Lawrenceburg, Tenn., 70 miles away via a booster arrangement [B•T, Jan. 19].

An interim report indicated that fringe viewers can be fed a broadcast signal at a cost not more than $5,000 for each booster. If the booster idea works out in practice, then there might be a direct and straightforward competition to the community TV enterpreneur. For the telecaster would in a sense be providing exactly the kind of service the wired TV operator is—bringing TV signals down into the TV-barred areas—and for free!

It seems probable that the public is not going to pay for something it can get free.

There was some thought last year that the FCC would take a look at closed circuit TV systems. That doesn't seem probable at this time.

Last year, the Commission thought it had a logical case for such a study—that of J. E. Belknap & Assoc. which planned a series of microwave intercity relays to feed St. Louis and Memphis TV signals to Missouri, Kentucky and Southern Illinois towns. What made the application unique was that the same company planned to operate one of the closed circuit TV systems in its home town of Poplar Bluff, Mo.

The question that the Commission seemed to be eager to look into was whether a common carrier could also be one of its own customers. The circumstances would also per-

mit, it was thought, a general review of the community TV system and its relation to free broadcasting.

The Belknap principals, however, when informed of the Commission's interest—and why—decided not to be the guinea pigs in the situation. They amended their application so that as of now it is solely for common carrier privileges to pick up and relay among the various communities the signals of the St. Louis and Memphis TV stations.

As of this writing the Commission has not yet acted on the Belknap common carrier application.

It might be assumed that broadcasters, *in toto,* would be against community TV systems. This, however, is not the case at all.

There have been individual oppositions. Both KSD-TV St. Louis and WMCT (TV) Memphis announced they would refuse to authorize the pickup of their signals by the Belknap people. More lately, in an Asheville, N. C., imbroglio between local broadcasters and a projected community TV system, it was said that WBTV (TV) Charlotte would refuse to agree to such a pickup.

But in many, many other cases, telecasters rub their hands with glee at the idea of their signal being fed to TV-locked communities otherwise not counted in their sales areas.

The split is so pronounced—the major TV station owner welcoming this means to extend his audience and the local, potential telecaster irked with the competition—that even the NARTB, traditionally in the forefront in defense of free broadcasting, has decided to keep hands off.

Acrimony in Asheville

Latest flare-up between community TV operators and local broadcasters took place several weeks ago in Asheville, N. C. There Community TV Systems Inc., a Philadelphia outfit, sought city council authority to use the streets in stringing its wires to feed Charlotte signals to Asheville citizens.

Intensive opposition of local broadcasters—including the threat of WIZE that it might be forced to drop its construction permit for a uhf TV station if the leased TV system was approved—caused the city fathers to deny permission to use the streets for wired TV service [B•T, Dec. 29, 1952].

Great bulk of the existing 160-odd operating community TV systems are centered in the mountainous terrain of Pennsylvania and West Virginia. But California numbers almost a score, as does Texas and New England. There is even one in Montreal and in London, Ontario. Most are quite small, ranging down to 35 and 50 "connections." In income, they don't bulk large at all on a national basis, but they make a good living for a few local businessmen.

That community TV systems are living with broadcasters is apparent in the very nature of the service. All have to get permission from a TV station to pick up and deliver signals to subscribers. Some wired TV services actually operate within the service area of the station itself—in Seattle, home of KING-TV, two community TV systems operate in various sections of that hilly city. And in the rugged hills of New Hampshire, the Laconia leased TV service is partly owned by owners of WWNH Rochester, N. H.

Milton J. Shapp, president of Jerrold Electronics Corp., of Philadelphia, biggest operator in the field, states . . .

THE CASE FOR COMMUNITY TELEVISION

DURING the past several years Jerrold has installed 132 community systems in various towns throughout the United States, with more than 60,000 connections and, perhaps, 4 to 5 times that number of viewers. This considerable audience would not, to this day, have the entertainment and educational value of television if it were not for community systems. During the course of the coming year, our company alone anticipates expanding its community systems to the point where better than half a million connections will have been made, meaning a new television audience of from 2 to 3 million viewers. I am sure you will agree this past experience and future prospect qualifies us to state the case for community television systems.

Ready-Made Audience

Let us take up the various points in order: First, community television systems do not hamper but rather assist new stations going on the air. Is not the major problem of any new station, particularly in an area which has not had television before, the getting of an audience on the basis of which advertising contracts are obtained? With community TV, any new station has a ready-made audience of viewers.

In almost no case have stations on a community television network utilized all of the network possibilities if a local station is in a position to go network. Thus, the new station, at no cost to itself, is taken over the hump of an initial period of many months of building an audience by the prior existence of a livewire community TV system. If the station is not going network, then in any case it would have to depend on its capacity for local programming of sufficiently high quality to attract an audience. I think all broadcasters will agree that there are two widely different fields for attracting listeners—first, the national network shows, and then the local interest in programs of local origin. Any station able to produce programming of this quality can certainly effectively compete. Any station not able to produce such programs would certainly be rendering, at best, a very limited service to its community and, at best, would not attract a great many advertising dollars. The stimulus of reasonable competition on television as well as any other industry should not be underestimated in raising the level of the product all along the line. Community TV can only help in this regard.

Let us consider for a moment the question of set sales. It simply cannot be denied that the existence of community TV, as far as it has gone, has operated as a lever—in many cases the only lever—to open up new sales territory for the sale of receivers. Again, it appears axiomatic that the greater the number of stations—in other words, the greater variety of entertainment and education—that can be offered the public cannot help but result in a higher degree of saturation of set sales in any given area.

Next let us consider one of the major problems of the television-broadcasting industry—namely, the high cost of TV advertising. Obviously, at the stage in which the industry presently is, this is what might be called a "necessary evil." Nonetheless, from the point of view of the man who is spending the advertising dollar, in many cases the amount of coverage that TV can give him simply does not justify the expenditure required for TV advertising. He turns, instead, to other media—newspapers, magazines, etc. Community TV, stepping into this picture, provides vast additional coverage for the advertiser and for the TV stations without additional cost to either. Here, again, the economic benefits derive to all from community TV systems at a minimum cost spread among thousands, and perhaps eventually millions, of viewers. Already it has been possible to see the way ahead to reduce costs just as set manufacturers were able to reduce costs as volume went up and production methods became more familiar and simpler.

Community TV lends itself to many new developments forecast for the field. Let us take one in particular—the question of subscription television. Community systems are a "natural" for this. They provide a ready-made audience on a single connection network, which makes possible control and collections on a readily coordinated basis.

Blind Spots

Finally, let us take up the question of TV "blind spots." No matter what stations may do in the immediate period ahead, there will be "blind spots," some of them quite close to the transmitter. For example, Jerrold has a community system installed two miles from the transmitter at Johnstown, Pa., serving an area of 1,600 homes. These people would not get television from the Johnstown station without the benefit of community television.

In summary, I think it can be said, without qualification, that community TV is now and will in the future render a continuous service to the growing television industry. At this stage of the game, anything which effectively helps to increase the total television audience cannot help but benefit the industry. Of course this is presuming that the technical and physical capacity to render a much needed service is not abused. I believe that any study of the community TV systems will demonstrate that they are rendering a public service of an effective kind at a moderate price.

SPOT NEWS IS BETTER ON RADIO

Television news shows can be great, when the subject, the time and the production facilities happen to be in favorable conjunction, but for day in, day out presentation of the news, radio still turns out a better job.

By Paul W. White

SO THE gifted Ed Murrow and his able staff took a hundred grand and went to Korea around Christmas time and turned out a gut-buster.

So the networks set up almost every camera they could find on Inauguration Day and gave a nation, including its schoolchildren, a front-row view of one of democracy's finest hours.

So, too, television brought you the poignant moment when a defeated presidential candidate compared himself with a little boy who had stubbed his toe. The dramatic spectacle of a tongue of flame menacing human lives at a political convention. The dynamic picture of brawn against brawn in a goal-line stand within the Rose Bowl.

This was It. This was history-in-the-making. No other medium ever covered news-in-progress with such impact. Television was There. Everybody who watched it on the screen before his eyes was There.

It had taken only a few years for a new development in the science of communications to produce the Ultimate, or at least the near Ultimate. TV had become so technically expert and so magically revealing that all other media of information appeared wan and anemic.

Maybe.

But before hats are tossed in the air and the winner and new champion is too wildly acclaimed, let's sit on our hands for a moment.

Could be that radio, day in and day out, really does a more reliable and conscientious news job. Could be that television, except for its major triumphs, turns in a fairly lacklustre performance in telling the people what's happened.

I hazarded this opinion a couple of months ago in a luncheon speech I made in Cleveland at the annual convention of what from now on is to be known as the Radio and Television News Directors Assn.

The Luncheon Talk

No luncheon talk ever changed the course of anything. It's usually just one of the normal hazards on the chicken-a-la-king-and-green-pea circuit.

But this particular speech set off a somewhat unusual reaction. The trade press used quite a bit of it [B•T, Dec. 8, 1952]. *Newsweek* digested it for the length of a column. Requests for copies poured in and finally we printed a thousand of them and are still sending out a few every day to people who have heard of the thing by word-of-mouth.

Here and there, along the way, it's easy to see that some of those who sent for copies thought I was anti-television and pro-radio. Is that the fact? Anything but. Television pays me most of my salary and a man who bites the hand that feeds him shouldn't throw stones.

I'm simply asking that we not be blinded by TV's many virtues. Pictorial news is great when it *is* great. But more frequently it ranges from the dull to the mediocre—and even more frequently it's painfully slow and inadequate.

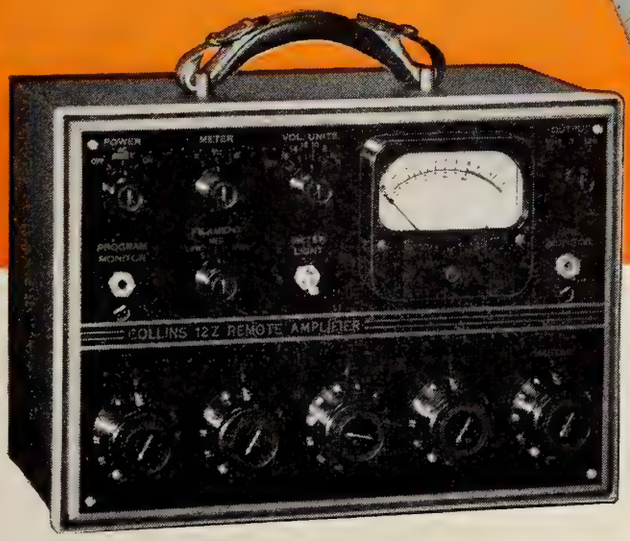
It's certainly no disservice to point out television's news weaknesses. The potentialities of the medium are so vast that enthusiasm is apt to get a bit out of control.

That's especially true when you realize that set ownership is as yet nowhere yet saturation, that television's geography is still restricted, that invention is almost certain to perfect new techniques in news coverage.

Even so, let's hold no obsequies yet for radio. Exactly 20 years ago this spring, you may remember, the press associations knuckled under to the publishers and denied their services to networks and individual stations. Radio would be such a terrific competitor, the press lords moaned, that newspapers would shrivel and collapse if news in quantity ever got on the kilocycles.

As a survivor of the so-called Press-Radio War, in which only the public was wounded,

Big events, like GOP convention, are TV's meat, but TV doesn't do well with ideas, Mr. White says.



✔ SPECIFY COLLINS
for your REMOTE AMPLIFIERS

COLLINS 12Z Remote Amplifier

✔ small, lightweight for easy portability

✔ four microphone channels

✔ automatic switchover to batteries if AC power fails

12Z REMOTE AMPLIFIER SPECIFICATIONS

Input: Four channels, with individual controls and a master control.
Gain: Approximately 90 db.
Noise level: 60 db below program level or better.
Power output: 50 milliwatts (+ 17 dbm*).
Distortion: Less than 1% at typical operating levels.
Frequency response: ± 1 db 50 to 15,000 cps.
Input impedance: Choice of 30/50 or 200/250 ohms.
Output impedance: 600 ohms (150 ohms available on special order).
Weight: Approximately 40 lbs. with batteries, 28 lbs. without batteries.

Carefully engineered to fulfill every requirement during a remote pickup, the Collins 12Z Remote Amplifier is the answer to an engineer's dream! Four microphone channels allow maximum coverage of the pickup. In case of AC power failure, switchover to battery power is automatic and instantaneous. Low microphonics of the 12Z's miniature tubes minimize "ring" if the Amplifier is jarred. All microphone cables and telephone line connections terminate on the back panel out of the operator's way.

On the front panel four individual gain controls and a master control employ Daven faders for smooth cross-fades and sensitive gain control. A range switch and meter switch connect a four inch illuminated VU meter to the proper circuit for measuring either the output level in volume units or the amplifier's operating voltages.

Batteries are standard size. Battery power automatically shuts off when the front cover is locked into position on the Amplifier.

Name the remote requirement and you'll find it's engineered into the 12Z. Specify the Collins 12Z Remote Amplifier for new equipment or replacement for inadequate or outmoded equipment. It's designed to solve both the operator's and engineer's problems on all remotes.

COLLINS 212Y SINGLE CHANNEL REMOTE AMPLIFIER

212Y SPECIFICATIONS

Gain: 85 db max.
Input impedance: 30/50 ohms or 200/250 ohms.
Output impedance: 600 ohms.
Power output: 50 milliwatts (+ 17 dbm*).
Distortion: Less than 1.0% between 50-15,000 cps.
Noise level: 65 db below normal program level.
Frequency response: ± 1.0 db; 50-15,000 cps.
Weight: Approximately 10 lbs.

**dbm, 1 mw into 600 ohms*

Small size, light weight, high fidelity remote amplifier. Engineered for fast "set up" of one-microphone remote jobs, the low cost 212Y is also excellent for permanent installation at regular pickup points. At any later date, the 212Y Amplifier can be converted to a two channel remote amplifier by inserting it in a 60H mixer unit.

For dependable remote broadcast equipment, it's . . .

I can look back now on that whole disgraceful episode with some degree of detachment. How, one wonders in the light of hindsight, could the publishers ever have believed that a new and novel avenue of communication would ever slaughter an established one?

And yet we find a situation today where men of normally good judgment are saying solemnly that television is to become *the* mass medium of purveying information and that all other media must assume secondary roles.

Bust & Boom

There's a difference, though, between '33 and '53, the difference between Depression and Boom. The publishers squealed so loudly 20 years ago because their pocketbooks were hurt and they put up a formidable, if losing, battle of resistance. This year they're making money, the radio stations are making money, so let television continue its merry way unimpeded.

Thus television faces no organized hostility from its news competitors. If it falls on its own face as an avenue of instant communication it's because it scatters its own banana peels.

And that isn't exactly a fair metaphor, either. Because television's chief flaw in news coverage today is inherent in the news itself.

News so often nowadays is ideas. Ideas are hard to photograph. Not impossible to depict but difficult. Given enough time and enough money to get together a documentary, television can do the job. But in the first quick coverage, TV more often than not messes up the news by overuse of pictures in trying to explain an idea.

Examples? Plenty of them.

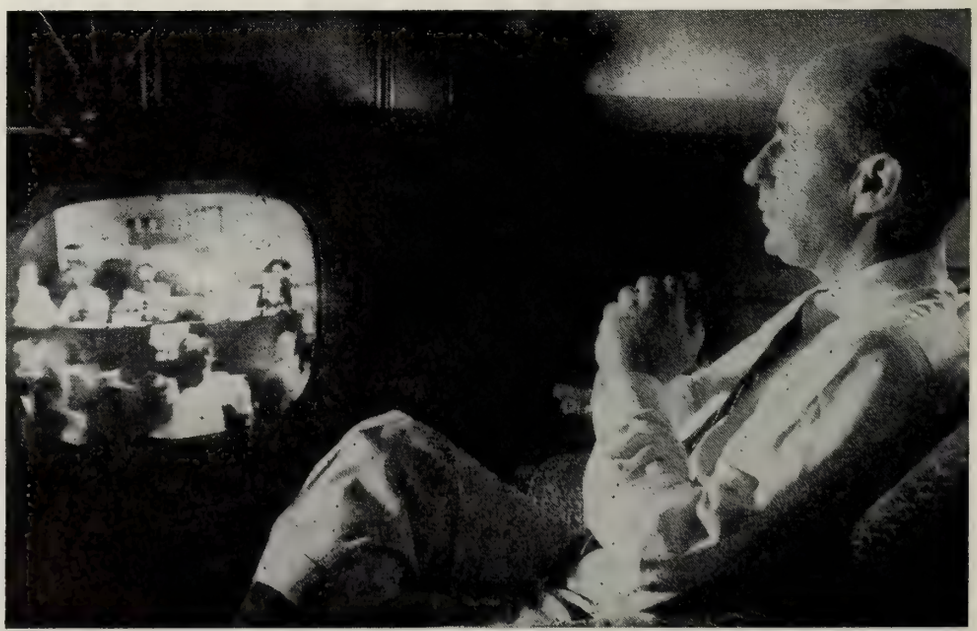
The Charles E. Wilson controversy, to take just one. Should a public servant own stock in a corporation with which he is almost certain to do business? That was the crucial question.

It could be recited quickly and succinctly on radio. And by an announcer on television, too, but currently that isn't the way TV works. No, the producing geniuses who guide it must have a "still" of Wilson and perhaps one of Eisenhower. Or they must drag out a tired film clip of Wilson and Eisenhower together. Or, more ingeniously, they should prepare a chart wrapped in ticker tape showing how much money Wilson would have to lose in taxes by selling his stock holdings. All of this overproduction merely clutters up the idea behind the news itself. It adds nothing; if anything, it subtracts the vital element of clarity.

Other examples? The dwindling of the NATO program. The rise of "strong man" rule in Egypt. The sad near-abandonment of the Schuman Plan. The rising Arab unrest. Budgets, treasury financing, tidelands oil, race segregation. All built on ideas and —at the moment of becoming news—far beyond the focus of any camera.

And let's face it—watching a man read the news or recite the news isn't much of a plus to understanding of that news. In a five-minute segment it's easy enough to take, but as the time grows longer, interest is apt to lag. The viewer often finds himself concentrating on the facial expressions or the mannerisms of the announcer rather than on the content of his words.

TV executives, of course, are aware of this and that's why they add newsreels and stills and all manner of other gimmicks to the news programs.



Newsreels Aren't Newsy

But the trouble is that there isn't much news in newsreels. You're looking at a news announcer and suddenly he says, "Well, highway development is an important aspect of our national life and today, in Ohio, a new freeway was opened to the public." There comes on your screen a view of rushing traffic and intricate clover leaves of engineering.

Now that announcer has as good as told you this:

"I don't have any other real news but I've got to fill out this program somehow and nearly everybody drives a car, so why not some footage on that new super-highway?"

Or it might be a beauty pageant, or the "first pictures" of a new volcano or a cute animal act or a style show aboard an ocean

AS GOOD a testimonial as any to the effectiveness of TV presentation of major public events, when time, money and facilities are available, is this picture. Adlai Stevenson, then a candidate for nomination, watches the Democratic convention in progress.

ABOUT THE AUTHOR

Now executive editor of KFMB-AM-TV San Diego, Mr. White is one of broadcasting's most respected news executives. As top news chief of CBS during the press-radio war and other grimmer conflicts like World War II, he developed or improved many basic techniques of news broadcasting.

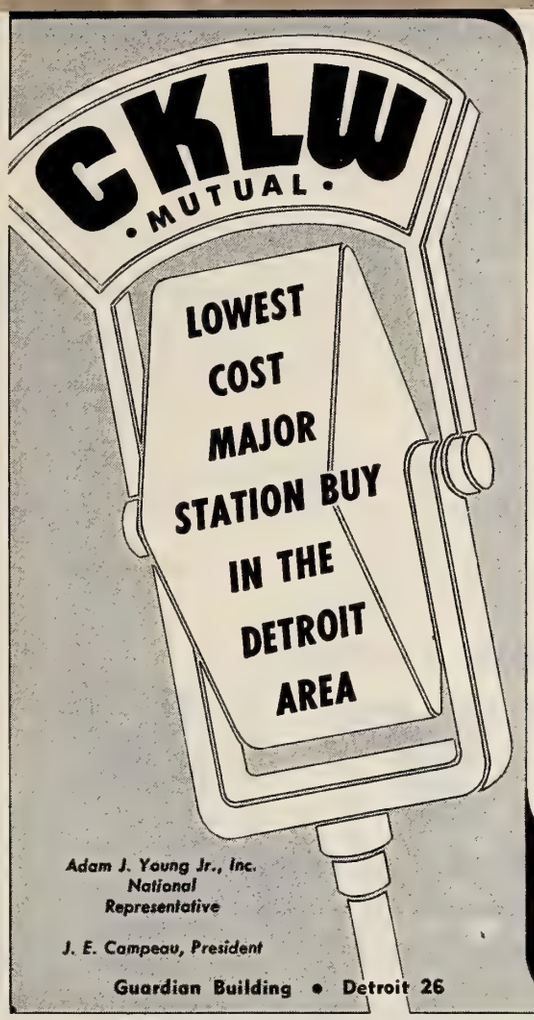
liner. Whatever it is, it isn't news and to call it that is calculated deceit.

All of which, you understand, doesn't rob TV of its terrific immediacy in at-the-scene reporting.

But even here, TV has its problems, three of which at the moment are unsolved.

First, how many pre-set events are there to cover? The trend unfortunately is toward "exclusives" and "shut-outs" in what should be the wide-open field of sports. That may account for wrestling. Something has to account for wrestling. Then there's the matter of cost. Unless a sponsor can be found for the great public spectacles in the non-sports field, the expense of coverage is almost prohibitive.

Second, how much should the announcer talk? There's a considerable division of opinion on this. In sports, the expert wants him to shut up except when something needs to be explained. The novitiate wants it all spelled out. So, when a sports event is being covered by both radio and television, some people turn off the sound portion of their video sets and tune in just the picture and the radio version.



Third, how can you show two things at one time? The radio announcer can describe both offense and defense formations in a football scrimmage in the same sentence. TV is hard put to cover a punt with one camera and the safety men waiting to receive it with another—hard put, that is, without risking a choppy and unexplained effect. Then, too, there's the matter of sideshows in connection with the main event. Radio announcers handle them easily, but TV directors, wanting a choice of long, medium or close shots, usually have all their cameramen settling on the main event. And too many TV directors know a great deal about pictures and precious little about news.

This listing of some of television's news difficulties is by no means an indictment of the medium.

No, there are times when television news is good. There are times, including the Murrow visit to Korea, when it's better than good and actually superb.

But let those of us in the business not grow too ecstatic about our opportunities on the basis of the present professional record.

It's still a rugged climb to the top of the mountain.

WIP MERCHANDISING STORY

THREE-fold study on the merchandising story in Philadelphia has been released in brochure form by WIP in that city. The folder presents the job that merchandising can do for prospective clients and analyzes all merchandising features offered by the four major stations who offer a merchandising plan in the city.

GLEASON REMINDER

A FUNNY-FACE kit containing a potato and equipment for various facial expressions was sent to editors to remind them of the *Jackie Gleason Show* on which Mr. Gleason takes the part of a number of characters. Program is sponsored by Schick Electric Shavers on CBS-TV, Saturday, 8-9 p.m. EST, through Kudner Agency, N. Y.

SPANISH SERIES

SERIES of 28 Spanish-language transcribed programs produced by WWRL Woodside, L. I., under title of *American Way of Life* has been ordered for rebroadcast in February by KUFN Phoenix. Designed to assist Spanish-speaking listeners to become citizens by teaching highlights of American history, series has been offered at cost by WWRL to stations throughout country.

TALENT SHOWCASE

IN an effort to showcase prospective TV talent, producer Bill Brennan will each week feature an aspiring video actress on KNXT (TV) Hollywood *Bachelor's Haven,* weekly half-hour panel program sponsored by Pearson Pharmacal Co. for Ennds. After being introduced to the viewing audience by program moderator Johnny Jacobs, she will serve as telephone girl and take incoming calls.

SYMPHONY DRIVE

FOR the third year, WGMS Washington on Feb. 8 dedicated an entire broadcast day and night to the sustaining fund campaign of the National Symphony Orchestra. All programs on that day were devoted to a telephone pledge campaign. Listeners were asked to sponsor free children's concerts during the 1953-54 season of the National Symphony. Last year's radio drive brought in $4,765 in pledges and provided for three free concerts.

'MUSIC SOAP OPERA'

ONLY "music soap opera" in the business is being aired by WHAS Louisville, Ky., according to station officials. *Our Home Town, a* daily 45-minute show, features Hoby Wolf who uses 20 different voice characterizations in developing a story line through the show, introducing pop songs along the way. Mr. Wolf portrays himself as a disc jockey working at WVIC (Voice of Indigo Creek). Other characters are a gossipy neighbor, telephone operator, druggist, butcher and grocer.

PLUG FOR THE HOUSEWIFE

MBS and the Independent Grocers Alliance will launch their second national grocery store sales promotion event, "Wife Week," starting today (Monday) and ending Saturday. Stressing the theme that "the little women should take a week's vacation from housework," the campaign will include network announcements and special programming by MBS and extensive in-store promotion in more than 5,000 IGA outlets.

NO INTERRUPTION

BELIEF that "the public is entitled to see a movie through without an interruption of entertainment" has led Youngstown Kitchen Co., L. A., to dispense with usual type of commercials during weekly 75-minute feature film on KLAC-TV Hollywood *Sunday Matinee.* Apart from sponsor identification at beginning and end of program only product "pitch" is 10-minute featurette film, used as an intermission break, in which home economist Norma Gilchrist demonstrates Youngstown Kitchens. Agency is the Tullis Co., Hollywood.

NEWS BEHIND THE NEWS

NEWS behind stories and headlines of past news events, including "scoops," are recounted by Clem Lane, city editor of the *Chicago Daily News,* in a new series, *The City Editor,* which debuted on WGN-TV Chicago Jan. 30. A veteran newspaperman, Mr. Lane discusses background and inside facts of interesting stories of other years, with Frank Babcock, WGN-TV announcer, also appearing in discussions.

BOWLING SHOW DEBUT

HALF-HOUR bowling program called *Duck Pins and Dollars* made its debut Feb. 1 on WBAL-TV Baltimore. Show is telecast from the Recreation Bowling Center and features

GOING INTO T-V?

Then Who is going to operate that wonderful new equipment?

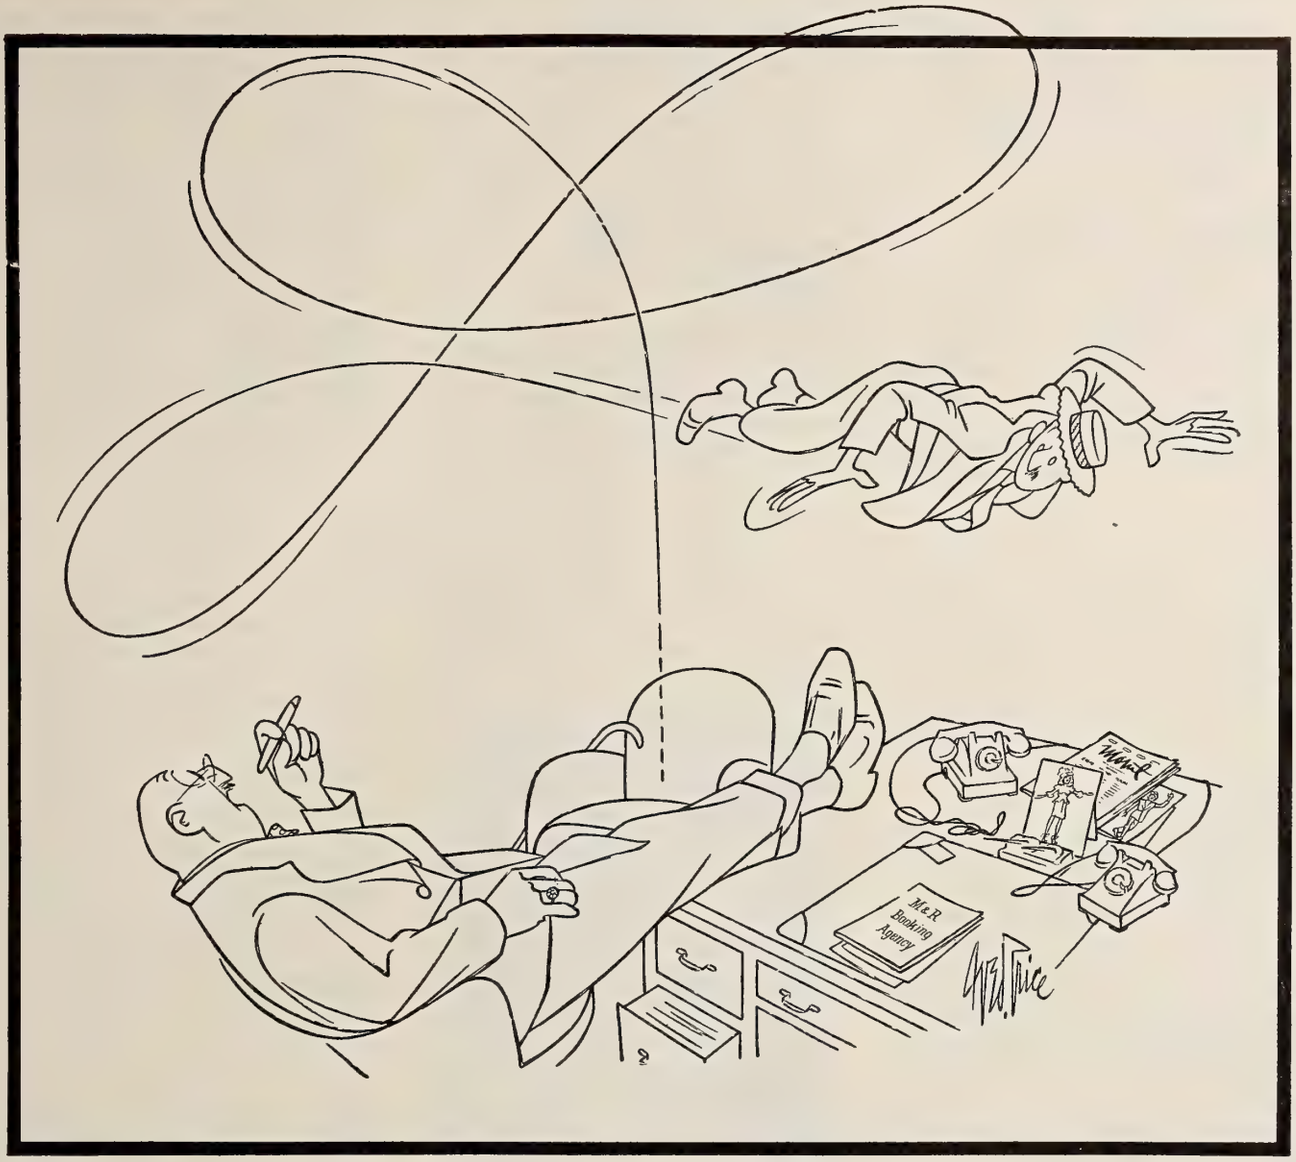
Every Television Station must have technically trained personnel — Engineers, Program and Production Managers, Announcers, Writers and Salesmen with specialized training.

NEW COURSE FOR PROFESSIONAL PERSONNEL ONLY

Our school of Telecasting's first classes in engineering and production — with experienced instruction staff — start March 2nd in our new, completely equipped Television Studios, working on a daily schedule of actual station operation — plus four hours of class room work every night — using every piece of television equipment.

This is a highly intensive course . . . small classes . . . individual training . . . and our graduates are thoroughly competent to step into any TV job.

This new TV training program is offered by the operators of the Tennessee School of Broadcasting, established in 1949, which has trained many first class engineers and announcers for radio.



New TV classes start every six weeks — a few openings remain for classes starting March 2nd. (Those without experience are invited to write for information on elementary course starting at a later date.)

"Bird imitations...that's all you can do?"

Oddly enough, some people take extraordinary things for granted.

Like radio, for instance.

Today radio entertains, informs and sells more people in more places at lower cost than any other medium in the entire history of advertising.

Today there are 105,300,000 radio sets in the U. S. A. Virtually *every* home is a radio home—and over half of them have *two or more sets.*

The average American now spends more time with radio than with magazines, TV and newspapers combined.

No wonder advertisers invested more money in radio last year *than ever before!*

bowling contests between amateurs for cash prizes. Each week five bowlers will compete. Two contestants will be chosen from the audience which will view the show from the Center. Other three will be selected from fans who write in to the program. Show's sponsor is Gunther Brewing Co.

RADIO SCHOOL ASSIGNMENT

GLIMPSE into a recent phase of history was afforded students in Macon, Ga., when WBML in that city presented a special broadcast of the new RCA Victor record, "Mr. President—FDR to Eisenhower." Broadcast was made available to over 4,000 students by radios set up for that purpose in their classrooms. For the students, the hour-long broadcast was part of the school day with a discussion period following the program.

'TREAT FOR TWO'

TWO-hour variety show, called *Treat for Two,* has had its premiere on WAAT Newark, N. J. Show, which is being aired nightly except Monday, features Hal Tunis who broadcasts from the Treat Bar and Restaurant in Newark. Mr. Tunis spins records, interviews customers and airs telephone chats with the radio audience.

CRIME DOCUMENTARY

NEW documentary crime series, *The People Ask Why,* was launched by WBBM Chicago Jan. 28. Program gives first-hand comments on Chicago crime situation and features newsmen Julian Bentley and John Harrington, special events director Chuck Wiley and commentator Paul Gibson. First program dealt with explosive "Kohn Report" authored by Aaron Kohn, prominent figure in the current Chicago City Council Crime Committee hearings.

PREVIEW ON TV PLANS

OUTLINE of programming, operational and promotional plans for KELO-TV Sioux Falls, S. D., was presented at a meeting of 500 distributors, dealers and servicemen from South Dakota, Minnesota, and Iowa in Sioux Falls on Jan. 14. Joe Floyd, president of KELO-AM-TV, answered questions on policy, programming, equipment, coverage area, and promotion to be used to sell TV. Promotional efforts of the station were described at length by Evans Nord, KELO-TV manager.

American Shows Hold Lead on Canada Radio

U. S. programs top list of 10 evening, 5 daytime network shows heard by Canadians. The "Edgar Bergen Show" leads the list of U. S. programs liked best.

AMERICAN programs lead the first 10 evening network radio shows heard in Canada, according to the national program rating report for December 1952 now released by Elliott-Haynes Ltd., Toronto. Of 24 shows, leaders are *Edgar Bergen Show,* rating 30.9, *Amos 'n' Andy* 29.4, *Our Miss Brooks* 28.1, *Radio Theatre* 26.8, *Great Gildersleeve* 20.2, *Your Host* 19.8 (Canadian), *Suspense* 18, *Don Wright Chorus* 17.8 (Canadian), *NHL Hockey* 17.5 (Canadian) and *Wayne & Shuster* 17.4 (Canadian).

CANADA

Of eight transcribed shows on Canadian stations in the same cities where evening network ratings are taken, two have ratings within the first 10 shows reported. These are *Take A Chance* 19.1 (Canadian), and *I Was A Communist for the FBI* 17.4.

The leading five daytime network shows in December were *Ma Perkins* 16.7, *Pepper Young's Family* 16, *Big Sister* 15.8, *Happy Gang* 14.5 (Canadian) and *Road of Life* 14.5.

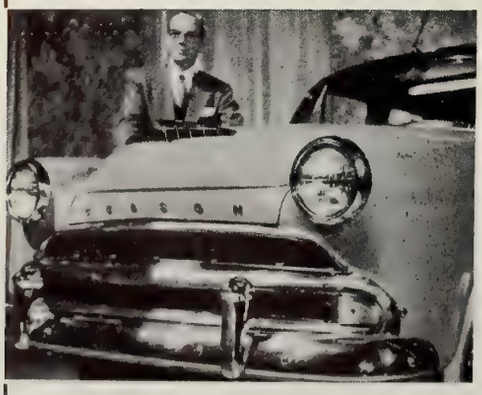
Five leading evening French-language shows were *Un Homme et Son Peche* 36.2, *Radio Carabin* 29.8, *Metropole* 28.9, *Chanson de l'Escadrille* 25.9 and *Tambour Battant* 24.6.

Praise Sung of 'Unsung Hero' by Israeli Brosh

IT IS not often that word of the Armed Forces Radio Service seeps through official channels these days, and when it does it is likely to be overshadowed by the exploits of, say, the Voice of America and the BBC in Europe.

The AFRS is a comparative "unsung hero," as it were, by any overseas communications standards—particularly in Israel.

ISRAEL



Heading up the Israeli link is Major Zvi Brosh, a broadcaster with the perspective of a man who should know whereof AFRS speaks. He has been an avid observer of BBC and American commercial broadcast techniques.

AFRS in Israel beams about 3½ hours to troops there and uses three medium wave and one shortwave transmitters. Entertainment and education are the special forte of AFRS, which operation Major Brosh directs. The U. S. Army Signal Corps set up the technical facilities, although BBC had the original hand in setting up Israeli radio and maintains a Hebrew service.

Major Brosh has been in the U. S. the past fortnight, observing the physical setups of eastern seaboard stations, including WTOP-AM-FM-TV and WRC (AM)-WNBW (TV) Washington, D. C. He arrived at perhaps the most propitious moment—inauguration week—when equipment was in high gear. He also visited BBC in London and came away with some ideas on studio production that will find their way into AFRS operation.

Major Brosh once was assistant editor of the *Jerusalem Radio Magazine* and also served in the British Navy from 1942 to 1946. He also had been assistant controller of information for BBC and served with the Palestine Broadcasting Service. He helped set up the Armed Forces Broadcasting Service of Israel (Galei Tsa-Hal) in 1950.

In addition to the BBC Hebrew service, Israel also gets programs from Belgrade and Bucharest and a half-hour program daily through the Voice of America. There are between 150,000 and 200,000 home and military receivers (most of them U. S.-made) in this comparatively new country, Major Brosh reported. He added that there are about three listeners to each set. TV is just a dream for Israel which, only four short years ago, recorded its independence as a government in the family of nations, he observed. Radio came to its geographical confines in 1934.

Again SARRA has been chosen by Cecil & Presbrey, Inc. to produce Electric Auto-Lite's series saluting automobile manufacturers of America in 2-minute TV commercials used on Suspense. In this spot, the new Hudson Jet is shown and discussed by Mr. N. K. Van Derzee, Hudson's Vice President in Charge of Sales. Other cars, all Auto-Lite users, to be similarly featured are Chrysler, De Soto, Dodge, Kaiser-Frazer, Nash, Plymouth, Studebaker and Willys.

SARRA INC.

Chicago: 16 East Ontario Street

SPECIALISTS IN VISUAL SELLING

RCA's Brunet Optimistic For Communications Abroad

IMPORTANCE of radio communications systems as means of stimulating commercial developments and helping unification of governmental work in countries abroad has been reported by Meade Brunet, an RCA vice president and managing director of RCA International Division.

He termed the outlook for radio communications business outside the U. S. as "excellent," pointing out that many governments and industries are discovering the benefits of microwave relays and other modern forms of communcations. Mr. Brunet added that stimulus is given "not only to commerce, but to health, educational and cultural activities."

Mr. Brunet also reported that by the end of 1952, there were 16 RCA-equipped TV stations either on the air or planned for early operation in the following countries: Brazil, two; Canada, one; Cuba, four; Dominican Republic, one; Hawaii, two; Mexico, three; Venezuela, two, and Italy, one [B•T, Dec. 22, 1952].

Testimonials Asked On Why Radio Is Used

CANADIAN advertisers and agencies will be asked for testimonials on why they use radio by the Radio Station Representatives Assn., Toronto. Heading the project is Paul Mulvihill, of the station representative firm bearing his name. Committee members are Frank Phillips, Radio Times Sales Inc., and Bill Stephens, Stephens & Towndrow, both Toronto.

CANADA

Association members Jan. 29 decided to have the Canadian Assn. of Broadcasters ask its stations to back up representative firms on national rates for companies operating local branch offices, to study increase in cooperative advertising at the expense of national advertising, and to check up on agency attempts to lengthen spot announcement time. A report on summer listening is to be compiled, although only about one-half the Canadian stations answered the association's questionnaire.

A permanent advisory committee, set up by the association, includes Jack Slatter, Radio Representatives Ltd.; H. Stovin, H. N. Stovin & Co.; John Tregale, All-Canada Radio Facilities; Norm Brown, Radio Times Sales; Jim Alexander, and A. A. McDermott, Radio & Television Sales Inc.

CKFH Charges Air 'Pirating'

CHARGE made by Foster Hewitt, president of CKFH Toronto, that CKEY Toronto allegedly pirated its rinkside hockey broadcasts of Maple Leaf hockey games has been denied by Jack Cooke, CKEY's president, who added he was ready to appear in court to refute the allegation.

CANADA

Hockey commentator Hewitt said he purposely broadcast false penalties in three games and maintained that minutes later in reconstructed broadcasts by CKEY, a 5 kw station, the same plays were broadcast. Mr. Hewitt presented tape recordings to demonstrate the alleged pirating.

Charge was presented to the Canadian Broadcasting Corp. board of governors in Ottawa Jan. 23. The board also heard Clarence Campbell, National Hockey League president, say that broadcasting rights to games belong to the home club and studio.

CFCF Aids Blood Drive

MONTREAL blood donor marathon lasting 37 hours, co-ordinated and broadcast continuously by CFCF that city, resulted in what the station claims is a North American ("and probably a world") record of 2,042 pints of blood donated to the Canadian Red Cross, with the marathon stopped only because no more facilities were available to handle blood promised by some 7,000 additional pledgers.

CANADA

The mammoth marathon, held in the local Hussars Armory Jan. 11-12, "is a project that has all Canada talking and we at CFCF feel a natural pride in our part" and in "this overwhelmingly additional proof of radio's pulling power and the . . . loyalty of its listeners," said Station Manager J. A. Hammond.

After months of planning, CFCF inaugurated a week's pre-campaign publicity announcement drive. Other firms, organizations and individuals furnished food, transportation and entertainment.

INTERVIEW of first donor in Montreal's 37-hour blood donor marathon is aired by J. A. Hammond, station manager of CFCF that city. A record of 2,042 pints were donated, the station reports.

Porter Defines 'Difficult' Position of Buyer Today

AVERAGE company today, from a dollar volume view, is "hard pressed" to maintain its competitive position as an advertiser, Arthur A. Porter, manager of publicity media, Leo Burnett Co., Chicago, told the Toronto Advertising and Sales Club.

CANADA

Mr. Porter pointed out that while total advertising dollar expenditures are up 278%, the average national advertising budget today has increased only 35% over 1939.

"We believe that one approach to this problem is to select the media [or medium] that will reach the greatest numbers of your best prospects at a reasonable cost—and then sell this audience just as hard and just as frequently as you possibly can."

Mr. Porter also called for "more and better media measurement information" because of limited advertising budgets and dollars.

CBC Makes First Station Grants in Two Years

FOUR new AM stations were recommended for a license by the Canadian Broadcasting Corp. board of governors at its January meeting. These are the first stations authorized since 1951, when steel controls for construction forced a halt to station licensing. One station has been upped in power, and a new FM educational outlet has been licensed.

CANADA

New stations: New Glasgow, N. S., 250 w on 1230 kc to Hector Publishing Co. Ltd.; Kingston, Ont., 1 kw on 1380 kc to Robert S. Grant; Edmonton, Alta., 1 kw on 1080 kc to Hugh M. Sibbald; Eastview, Ont., near Ottawa, new French-language 250 w station on 1240 kc to Eastview Broadcasting Co. Ltd.

CKCW Moncton has been granted permission to increase power from 5 kw to 10 kw on 1220 kc. CFRC Kingston, Ont. has been granted an FM license for 1 kw on 91.9 mc.

CHML-FM Hamilton, Ont., moves from Ch. 231 on 94.1 mc to Ch. 221 on 92.1 mc to eliminate second harmonic interference to CBLT (TV) Toronto. CHML Hamilton, CHRC Quebec and CHLN Three Rivers have been authorized 1 kw emergency transmitters.

Chicago Educators Plan Station for Vhf Ch. 11

PAPERS will be filed this month to incorporate a non-profit organization to build and operate a noncommercial, educational TV station on Ch. 11 in Chicago, according to George Jennings, radio-TV director of the Chicago Board of Education.

Mr. Jennings said papers will be submitted to place educational television on a going basis for a number of participating institutions. About $300,000 has been committed—$150,000 each from the Ford Foundation and the Board of Education—and "$500,000 or more still is needed," according to Mr. Jennings. He added it would cost $200,000 to operate the outlet for the first year.

Money from Ford will be used to purchase equipment only, under an agreement. The Board of Education will supply funds for studios. Collection of contributions from business, civic and other groups are anticipated.

Among institutions participating in the project are the U. of Chicago, Northwestern U., Loyola, DePaul U., the Art Institute and Illinois Institute of Technology.

Series on WBKB (TV)

Illinois Institute and Loyola have been participating in a TV program series on WBKB (TV) Chicago, which offered its facilities to five universities to enable them to learn TV, a WBKB spokesman told BROADCASTING • TELECASTING.

Originated last spring by WBIK (FM), radio outlet of WBKB, *Operation New Horizons* was extended into television and now runs five days a week from 2:30-3 p.m. Subjects range from child care to anthropology.

Test Telecast

AS PART of an experiment to determine television's role in education, the New Jersey State Dept. of Education last Monday telecast the President's State of the Union message to Congress to two high school classrooms in the New Brunswick area.

The program was fed live from DuMont to the department's experimental TV studio on the Rutgers U. campus, and from there by microwave relay to New Brunswick High School and nearby Highland Park High School. Edward C. Rasp Jr., assistant coordinator of audio-visual education for the state department, said an audience of 500 students was "particularly enthusiastic."

Daily telecasts of varying lengths have been presented to high schools and three elementary schools in that area, and a two-hour evening program for adults, to aid state officials in deciding how to program proposed state-owned educational TV stations.

NCCET's Minderman Urges Wisconsin Educational TV

AN EDUCATIONAL TV system will give Wisconsin taxpayers a better investment on their tax dollar, Earl Minderman, field liaison officer for the National Citizens Committee for Educational Television, said in an address to the Farm and Home Week meeting at the U. of Wisconsin, Madison, last Wednesday.

Construction of TV stations for the state's 12 noncommercial educational channels, estimated at $3 million, would cost only a small fraction of Wisconsin's total investments in education, he said.

Praising the state's FM educational network, Mr. Minderman said it was impossible for commercial TV stations to handle the educational telecasting job.

Walker Asked to Speak

FCC Chairman Paul A. Walker has been invited to make the major address at Boston U.'s annual Founder's Day Institute on March 10. Mr. Walker has not yet accepted. Stressing the theme "The University and Its Community," the Institute will feature a guided tour of WBUR, Boston U.'s station, the university's TV studio, and other exhibits. Evening program will be devoted to the question of what part the universities of the area must play in the development of educational television, according to the university's announcement.

Buys Video Equipment

ST. LOUIS Educational TV Commission, which has applied for Ch. 9 there, has ordered $144,000 worth of equipment from RCA, contingent on FCC approval of its petition. Order includes only the "minimum" needed to take the air. If station gets a construction permit, it could begin operations in three months, a spokesman said.

"Since going on the air we have enjoyed the

Theatre TV Order
Questions raised by FCC requiring answer by theatre TV proponents (see story this issue under Government).

1. Assuming a common carrier, offering only a theatre television service, is eligible to use existing common carrier allocations for such a purpose, why is it not feasible for theatre television to operate on the frequencies already allocated to common carrier services?

2. Why should common carrier frequencies be allocated to a theatre television service on an exclusive or primary use basis, and what justification is there for displacing other present users of those frequencies? What would be the nature of the "special common carrier" to which reference has been made?

3. Why is it deemed feasible to share frequencies in the industrial services but not in the common carrier services?

4. Under what concept would a theatre television service be established as an industrial service? What standards of licensee eligibility (not qualifications of particular applicants) would apply to applicants for licenses in such a service? What limitations, if any, would apply with respect to the persons or customers to whom such a service would be supplied?

5. What evidence will be introduced showing the extent, if any, to which frequencies allocated for a theatre television service will be applied for, by whom such applications would be filed, and when?

6. In addition to the cost evidence so far presented, which relates to the cost of transmission facilities only, what evidence will you introduce to show all the other costs of service, e.g., costs of production, etc., which will make it possible to determine the magnitude of ultimate cost of admission to a theatre patron?

7. What percentage of the time do you estimate programs would be shown by theatre television on a day-by-day basis?

8. Is it proposed that a theatre television service will provide programs of only live events, i.e., of programs that cannot reasonably be placed on film?

DENVER TV HEARING
Conclusions of FCC Hearing Examiner James D. Cunningham in initial decision on applications for Ch. 7 in Denver. (See story this issue under Government).

CONCLUSIONS

1. In this competitive proceeding which involves the mutually exclusive applications of Aladdin Radio and Television, Inc. and Denver Television Company for the same commercial television facilities (Channel 7) in Denver, Colorado, the record discloses that both applicants meet the basic requirements imposed by statute with regard to the permittees and licensees of such facilities, viz., both are technically, legally, financially and otherwise qualified in the premises. Engineeringwise, the two proposals are in accordance with the Commission's rules governing television broadcast stations, and neither would constitute a hazard to air navigation. It is necessary to determine on a basis of comparison, therefore, which one of them has demonstrated superiority over the other and is to be preferred in the public interest.

2. In view of the foregoing findings, it is appropriate to state the bases of the action taken upon the evidence offered under the several charges and suggestions of impropriety made by each applicant against certain of the officials, stockholders and stock subscribers of the other. On the one hand, Aladdin developed considerable evidence with respect to John M. Wolfberg, president and director of Denver Television, in connection with his theatre operations, and Emmet P. Barton, one of its stock subscribers, with respect to his failure to make the required estimated tax declaration for the year 1952. Denver Television, on the other hand, made showings with respect to several of Aladdin's officers and directors, viz., Messrs. Huffman, Ricketson and Gamble, re their theatre operations and associations, and J. Elroy McCaw, re certain of the information furnished the Commission upon his radio interests.

(a) (1) With regard to John M. Wolfberg, the facts found herein have no adverse effects upon

his character qualifications as an officer and director of Denver Television, nor are they sufficient even to raise a question in this regard. In one instance, it is shown that the two persons in immediate charge of a theatre in the Wolfberg circuit had been apprehended by the police, convicted and sentenced to pay fines on charges of selling lewd photographs on the theatre premises. As supervisor of the theatre circuit involved, Wolfberg must be held to have had a degree of responsibility for the actions of the two men perpetrating the offense, but no evidence was offered that he had knowledge of, or condoned, their illicit actions or that he himself was the subject of any complaint. In calling for the resignations of the two men following their conviction in court, Wolfberg gave indication of his disapproval of their conduct. Under the circumstances here present, culpability in the matter may not reasonably be imputed to him. (2) Aladdin further developed that open gambling occurred in one of the theatres managed by Wolfberg during the televising of the recent heavyweight championship boxing match. There is no evidence that he encouraged, permitted or condoned the gambling in question; the televising of the match was not contrary to any law or ordinance; and it is not shown that the manner in which the theatre was conducted on the occasion in question was the subject of any complaint either by the law enforcement authorities or by any member of the public. It appears that theatre television was the only means then available by which the Denver area could observe the bout while it was taking place, and Wolfberg is not shown to have been a party to the arrangements between the promoters and others whereby a description or showing of the match was denied to radio and to home television in the United States. (3) With regard to the pendency of the anti-trust and conspiracy suit instituted in court only a few days before the commencement of the hearing herein by Denver, Kar-Vu Theatres, Inc., against Wolfberg and his father, et al., which has not been brought to trial, notwithstanding the seriousness of the allegations in the plaintiff's original pleading, they may not be made the basis of any adverse findings with regard to his character qualifications. The record of hearing before the Commission contains no proof in support of such allegations.

(b) Emmet P. Barton is shown not to have filed with the U. S. Bureau of Internal Revenue a statement of his estimated income tax for the year 1952. Thus, Aladdin contends that his character qualifications as a stock subscriber of Denver Television are affected thereby, for he has allegedly violated Sections 145(a) and 294(d) (1) (A) of the Internal Revenue Code (Title 26). Although the presumption arises upon the record herein that Barton may have violated the Federal statutes cited, this is indeed a weak premise upon which Aladdin suggests adverse findings upon his character qualification. It is observed, in this connection, that the gravamen of the criminal offense contemplated in Section 145(a) of the Internal Revenue Code is that the accused has willfully failed to make declaration of his estimated tax and/or to pay same, and, with regard to Section 294(d) (1) (A), penalties are provided for failure to file such estimated tax "unless such failure is shown to the satisfaction of the (Internal Revenue) Commissioner to be due to reasonable cause and not to willful neglect, * * *." Whether Barton's failure was attended by willfulness, or whether the Commissioner of Internal Revenue would find in an appropriate proceeding that there was reasonable cause or justification for his failure, are matters of conjecture, for the record is devoid of evidence upon which determinations may be made herein. Thus, the entire subject is without effect from the standpoint of Barton's character qualifications and Aladdin's contention to the contrary is rejected.

(c) (1) Frank H. Ricketson, Jr., is shown to have been a party to the establishment of an organization which licensed "Bank Night" in numerous theatres throughout the country during the five-year period next preceding 1938, when the Post Office Department denied the use of the mails to the organization involved on the ground that it was conducting a lottery, in violation of Federal law. Upon receiving notice of the action of the postal authorities, Ricketson terminated his connection with the matter forthwith. The scheme appears to have had the sanction of the state courts of Colorado at the time it was operated by Ricketson and his associates. He is not shown to have been involved in any such activity for the past fourteen years. His action in immediately accepting and abiding by the findings of the postal authorities without contest lends support to the contention that he engaged in this operation without willful purpose to violate the laws of the United States or of any state in which the scheme was licensed. (2) He is also established as having engaged in practices, prior to the year 1942, which the Supreme Court later found to involve violations of the anti-trust laws of the United States. Upon the question of whether his actions in this behalf may now be held to adversely affect his character qualifications as an officer and director of a broadcast licensee or an applicant for television broadcast facilities, Aladdin urges adherence to the Commission's uniform policy in such cases, as stated in Paramount Pictures, Inc., et al., 8 RR 135 (1952), which, in its pertinent part, is as follows: "* * * Where such activities (anti-trust) are of recent vintage, we believe they can and should be considered in determining whether the applicant has the character requisite to a broadcast licensee. However, where those activities took place in the relatively distant past and have not continued, we are of the opinion that their materiality to a determination as to the qualifications of an existing licensee is negligible. Accordingly, in general we shall not in passing upon applications of persons who are already licensees, consider any activities involving possible anti-trust violations not directly involving radio communications which occurred more than three years before the filing of said applications." As indicated, Ricketson's anti-trust violations occurred in the relatively distant past and have not been continued. Thus, it would appear that Aladdin's position in the matter should be sustained, and, in keeping with the uniform policy stated above, his character qualifications are not now found adversely affected by reason of his anti-trust violations shown upon the record herein. (3) The remaining matters urged by Denver Television concerning Ricketson are without effect. Thus, in the 1946 court proceeding involving Cinema Amusements, Inc., against Twentieth Century-Fox Film Corporation, and others, Ricketson, although identified as an employee of some of the defendant companies in the suit, is not shown to have been a party to the actions which are the basis of the suit; and it is immaterial for the purposes of the Commission's considerations, and from the standpoint of his qualifications herein, (a) that the voting rights in the stock which he owns in another theatre operating corporation are exercised by a trustee and not by him, and (b) that he will not vote as a member of the Aladdin board on proposals which may prove injurious to best interests of motion picture theatres generally, or to the theatres with which he is identified.

(d) (1) Denver Television established that more than fifteen years ago, Harry E. Huffman, while engaged in theatre operations, conducted an audience participation "give-away" scheme which was found by a court of equity to involve a lottery. There were no complaints by the law enforcement authorities and no criminal prosecutions. In view of the Commission's announced policy in Docket No. 9572, hereinafter shown, it is apparent that Huffman's action in this matter may not now be held to adversely affect his character qualifications herein, in view of his otherwise good character as shown upon the record. (2) It is further established that he also testified in behalf of Twentieth Century-Fox Film Corporation in the pending anti-trust proceedings which were instituted by Cinema Amusements, Inc., in the year 1946, *supra*, but there was no evidence of Huffman's complicity in the alleged anti-trust violations, and the nature and character of the testimony which he presented to the court was not shown upon the record herein. He is not now identified with Twentieth Century-Fox as an officer, director, stockholder or employee. Thus, there is no basis for an inference that he has engaged in conduct related to that litigation which may now be held to adversely affect his character qualifications.

(e) Theodore R. Gamble is shown to have been employed more than twenty years ago as liaison officer by the owners of two separate groups of theatres which were operated as a pool for the primary purpose of establishing the "first-run" theatres of each under common management. Whether there were monopolistic practices or anti-trust violations attending this joint operation does not appear upon the record, and there is no evidence of impropriety on the part of Gamble in connection with his services with the companies concerned.

No Attempt to Mislead

(f) The information concerning the radio interests and connections of J. Elroy McCaw was not accurately shown in the instant Aladdin application and in other reports and applications which have been filed with the Commission concerning the numerous standard broadcast stations in which he has financial interests. However, an examination of the entire record herein, with particular reference to the facts heretofore found, leads to the conclusion that there was no attempt on the part of Aladdin in its application, or on the part of McCaw and his other radio associates, to give false information concerning material matters, or unfairly to secure an advantageous position over Denver Television in this competitive proceeding. It is clear, however, that the degree of care expected of applicants and radio licensees in furnishing the Commission with complete and accurate information was not exercised by McCaw and his associates, and the carelessness revealed upon the record in this regard will not be countenanced. However, these circumstances do not furnish a basis to hold at this time that McCaw is not qualified as an officer, director and stockholder of Aladdin, and the suggestion of Denver Television in this regard is not accepted.

3. In view of the determinations hereinabove made with regard to the several persons discussed, it is appropriate to state the Commission's uniform policy which is followed in the licensing of radio broadcast stations where applicants are shown to have violated the laws of the United States, other than the Communications Act of 1934, as amended. This is reported in Vol. 1 (Part Three) RR, 91:495. In pertinent part, it is as follows: "Violations of Federal laws, whether deliberate or inadvertent, raise sufficient question regarding character to merit further examination. While this question as to character may be overcome by countervailing circumstances, nevertheless, in every case, the Commission must view with concern the unlawful conduct of any applicant who is seeking authority to operate radio facilities as a trustee for the public. This is not to say that a single violation of a Federal law or even a number of them necessarily makes the offender ineligible for a radio grant. There may be facts which are in extenuation of the violation of law, or there may be other favorable facts and considerations that outweigh the record of unlawful conduct and qualify the applicant to operate a station in the public interest. In all such cases, a matter of primary concern is whether the violation was committed inadvertently or willfully. Innocent violations are not as serious as deliberate ones. As has been suggested by parties in this proceeding, another matter of importance is whether the infraction of law is an isolated instance or whether there have been recurring offenses which establish a definite pattern of misbehavior. A single transgression of law, particularly if inadvertently committed, might raise little question with respect to qualifications, whereas a continuing and callous disregard for the laws may justify the conclusion that the applicant cannot be expected in the future to demonstrate a responsibility towards his obligations as a broadcast licensee. In this connection, the matter of time is important. There necessarily must be more concern with recent violations than with those which occurred in the remote past and have been followed by a long period of consistent adherence to law and exemplary conduct on the part of the applicant. Cases which must be viewed with most critical scrutiny are those where the applicant has been involved in violations over a long period of time and is presently engaged in illegal practices. In all such cases, a strong presumption of ineligibility is raised and a heavy burden of proof is imposed on the applicant to show he is qualified to operate a broadcast station in the public interest."

4. The further contention is made by Denver Television that a denial of the Aladdin application is compelling, due to the arrangements it has made with the Columbia Broadcasting System for a television network affiliation. This is based upon what appears to be a somewhat strained interpretation of Sections 3.658(a) and (c) of the Commission's Chain Broadcasting Regulations. For some years there was included

The best way to sell the KANSAS FARM MARKET

use the KANSAS FARM STATION

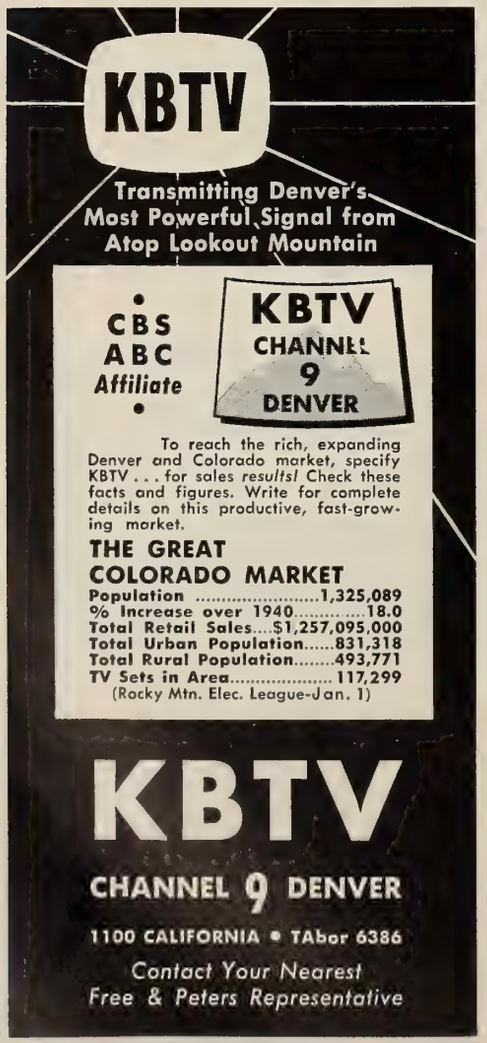
WIBW CBS RADIO in Topeka

Ben Ludy, Gen. Mgr., WIBW-KCKN

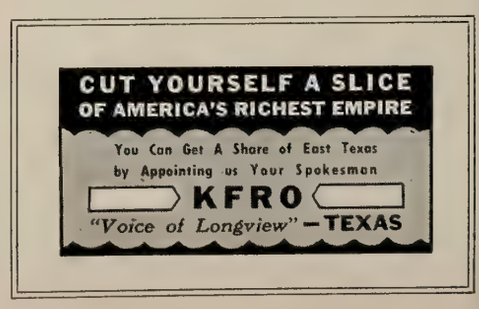
Rep. Capper Publications, Inc.

in Aladdin's standard broadcast network affiliation contract with Columbia a first refusal clause, mutually effective, with regard to future network television service, in the event Columbia should desire to extend such service into Denver and Aladdin should receive a television permit for that city. Although the clause in question is no longer in effect between the two parties, it does not appear to have been in violation of the rules cited and, moreover, it was on file with the Commission for many years, particularly in the year 1943, when the licensees of all standard broadcast stations were afforded the opportunity to amend their network agreements to comply with the then new Chain Broadcasting Regulations. Notwithstanding that the mutual first refusal clause in question was not revised for almost nine years after these regulations went into effect, the Commission is not shown upon this record to have raised any question concerning propriety of its terms. In a letter agreement signed by Aladdin and Columbia on September 30, 1952, they appear to have reduced to writing a verbal understanding that if, as, and when, Aladdin should receive a television license, it would enter into a television network affiliation contract with Columbia. Under this agreement, Aladdin is not prevented or hindered from, nor has it subjected itself to penalty for, broadcasting the programs of any other network organization. Moreover, there is nothing in the letter agreement from which a finding may be made that Aladdin is now bound, either directly or indirectly, to remain affiliated with Columbia Broadcasting System's television network for a period longer than two years after its proposed station, if authorized, goes on the air. Denver Television contends that the letter agreement is in violation of the two-year provision of the rule cited, for reason that, under its interpretation of paragraph 4 thereof, "a greater period than two years and six months may be involved because by its terms it provides that if an affiliation agreement does not commence prior to April 1, 1953, any affiliation agreement which is entered into should be at least one year in length." However, under the exact language of this paragraph, the parties have the understanding that Columbia shall be discharged of its obligation to enter into a network arrangement with Aladdin, unless the latter agrees that such arrangement "shall remain in effect for a period of at least one year from the date of commencement thereof." There is nothing here contrary to the two-year rule in question, for the restraining effects of such rule extend to the period of actual network affiliation, and it is not intended as a restriction upon applicants for television facilities, particularly those in competitive proceedings such as this, who must, of necessity, speculate with regard to the time they may expect final action upon their applications, and are seeking to secure some measure of assurance of a network service if successful in obtaining a television license. Thus, consistent with the rules in question, an applicant for television facilities may, preliminarily, arrange with a network organization to accept programs when and if its proposal for the establishment of a station is approved, provided that in such preliminary arrangements the applicant (a) does not restrict itself in any way from accepting and broadcasting the programs of another network organization, and (b) does not agree, directly or indirectly, to enter into a network contract at some indefinite future time which would involve the affiliation of its station for a period longer than two years.

5. The several areas of comparison recognized by the Commission in competitive proceedings involving qualified applicants for radio broadcast facilities are considered also in competitive cases in which television broadcast facilities are involved, viz., the applicants' local residence, their participation in public service and community affairs, and the extent to which the ownership and management of the proposed stations will be integrated. The Commission long since has adopted the view that the local residence of an applicant and his participation in the public service activities of the community proposed to be served are important factors in competitive cases, for they give assurance of a more complete and effective response to the needs and desires of such community than would be expected of a non-resident applicant or one who has been associated with the community for a relatively short period of time and has assisted in the improvement and advancement of its public institutions only in small measure or not at all; and it is far more probable that the promises and commitments made in applications contemplating a high percentage of integration of ownership in management will be carried into execution than in the case of applications not proposing any such integration or a relatively small percentage thereof. In addition, competing applicants are, of course, considered with regard to such subjects as the quality of their proposed programs, assurance of public support, operating policies, over-all plans for service, and, particularly, their demonstrated ability to execute such plans and policies by reason of the availability of adequate facilities, past experience, and a staff organization composed of qualified personnel.



Local Ownership



6. Within each of these areas of comparison, Aladdin is found to be the superior applicant. Clearly, it is more firmly rooted in the community proposed to be served and is more representative thereof, and the evidence of record establishes that it has the unqualified support of the public. It has a total of forty-three stockholders, and thirty-six of them, holding about fifty-eight percent of its stock, reside in Denver. Of its five directors, one of them has lived there for more than sixty years, and the other two for thirty-four years and twelve years, respectively. The record of performance of the five-man board of directors of Aladdin in the field of public service and community activity, considered as a whole, must be characterized as outstanding. On the other hand, about fifty-one percent of the stock in Denver Television will be held by residents of Denver, and two of its three directors have resided there for about seven years each. The background of experience in community activity and public service generally, which is shown in connection with those identified with Denver Television, is far less extensive than in the case of the Aladdin group, and whether the former would receive the support and cooperation of the community is largely a matter of speculation. Moreover, two of Aladdin's directors, who hold about thirty percent of its stock outstanding, will have, as their sole business occupations, the management and operation of the proposed station on a regular day-to-day basis, whereas, in the case of Denver Television, the only definite finding in this regard which can be made is that its president, who now holds about one-third of the outstanding stock which has been sold and has a subscription for more, and who has extensive duties in theatre management and has resided in Denver for only seven years with comparatively limited public service activity therein, will devote about one-half of his time each day to the proposed television station, and it appears possible that two other stockholders will devote portions of their time each day thereto. The evidence indicating that several of the remaining Denver Television stockholders are "in a position to devote time to the station on a day-to-day basis" is without evidentiary value, for no definite findings may be made on the basis of such showing as to whether they would ever take part in the station's operation on a regular basis. The two Aladdin directors mentioned, who will manage its proposed station, have had substantial experience in conducting the operations of AM and FM stations, and the record of performance of one of them as a station manager is established as outstanding. On the other hand, the Denver Television stockholders, who will divide their time between the proposed television station and their present occupations, have no background of experience in radio operations, and their previous training would not appear to qualify them in any appreciable measure to manage and operate a television station. In this connection, Aladdin, through its entire staff organization, in successfully operating AM and FM stations over a period of years, has given full recognition to the community needs of the area which it has served, and there is a firm basis in the record to find that it will continue to do so and that it will have the cooperation of the local public institutions in connection with its proposed television operation. Those with financial interests in Denver Television have not had the benefit of such experience and, for the most part, have been identified with various types of business foreign to radio or television broadcasting. The plans, proposals and policies of the two applicants with respect to the program service they would offer are in many respects similar, although Aladdin has a commitment with the Columbia Broadcasting System for its television network service and Denver Television has made no arrangement for a network affiliation, although it would be willing to obtain same. From the standpoint of their respective abilities to effectuate their plans for furnishing this service, Aladdin, again, has demonstrated superiority. Thus, it is shown to have actually selected a substantial number of trained and qualified engineers, technicians and other assistants for service in the several departments, all of them under the supervision of its board chairman and president, both of whom, as indicated, have substantial stockholdings in the corporation and are themselves experienced radio operators. In sum, Aladdin has shown itself presently equipped in each department to supply every type of service proposed in its application, and, in its effort to do so, it will have the support of many of the community leaders. Denver Television, on the other hand, will be required to rely upon employees to manage and operate its proposed station, and only one of such employees, namely, the manager, who will serve on a permanent basis, has been selected. He, as well as the engineering and technical director, whose services have been retained on a non-exclusive basis for the purpose of directing the construction and the initial operation of the proposed station, are experienced both in the fields of radio and television operation and are eminently qualified for the duties to which they have been assigned. However, the qualifications of the remaining staff members are unknown, for none of them has as yet been selected. Thus, there is no assurance as to the extent to which the plans or policies of Denver Television will be carried into execution, or whether, in its efforts to carry them out, it would receive the support of the community.

7. Such meager evidence as was introduced herein upon the issue of whether there exist substantial conflicts between the motion picture exhibition business and television broadcasting is wholly insufficient to support a finding, or the adoption of a policy at this time, that persons engaged in exhibiting motion picture film, whether on a large scale or otherwise, are unqualified as television licensees. Nor is there a sufficient basis furnished in the record to hold that persons engaged in such occupation are less qualified to become television broadcast licensees than those not so engaged. As found herein, two of Aladdin's directors and the president and a director of Denver Television have substantial theatre holdings at the present time.

Diversification Contention

8. It is contended that because of Aladdin's present radio operation, and the radio interests of its officers and directors, it would be more in the public interest to approve the application of Denver Television which does not have such interests, for there would result a diversification in the ownership of the media of mass communication. While the Commission, upon this ground, has in the past denied the applications of newspaper owners who were in competition with non-newspaper owners for the same radio facilities, it does not appear from a review of its decisions in competitive cases involving applications for television facilities, that the Commission has seen fit to apply a similar policy. The record of the proceeding herein is devoid of evidence which would indicate either that a radio licensee is disqualified to hold a television license and to furnish both radio and television service to the same community, or that the radio ownership and operation of an applicant for

television facilities are factors which, in the public interest, would require that it yield in favor of its competitor for the same television facilities who is not identified with radio broadcasting, notwithstanding that the latter may be less qualified than the former. Had the Commission desired this ground to be considered, its notice of hearing would have so indicated, Aladdin would have had the opportunity to respond thereto, and the Hearing Examiner would have directed of all parties comprehensive evidentiary showings upon the subject. Thus, the Commission could not appropriately prefer the application of Denver Television on the theory above stated.

9. In view of the foregoing, therefore, and upon consideration of the entire record of the proceeding herein, it is determined that the public interest, convenience and necessity would be served by a grant of the application of Aladdin Radio and Television, Inc., and the consequent denial of the application of Denver Television Company.

ACCORDINGLY, IT IS ORDERED, This 30th day of January, 1953, that the application of Aladdin Radio and Television, Inc., for construction permit to establish a new commercial television station in Denver, Colorado, using Channel 7 (174-180 mcs., ERP; Vis. 316 kw—Aur. 158 kw), BE, AND IT IS HEREBY, GRANTED, subject to the condition that its antenna structure shall be painted and lighted in accordance with Section 17.25 of the Commission's rules; and, IT IS FURTHER ORDERED, that the application of Denver Television Company for the same facilities, BE, AND IT IS HEREBY, DENIED.

FEDERAL COMMUNICATIONS COMMISSION.
James D. Cunningham,
Hearing Examiner.

Mike Martin,** president of King's Inc. (Christian charitable organization); Vice President **Axel P. Fredeen,** owner of Strom-Fredeen Floor Co., Seattle; Secretary **Edgar Atkinson,** Minister of Gospel, and Treasurer **Dr. C. Dorr Demaray,** Minister of Gospel. **King's Inc.** is sole owner of applicant; each board member has one vote. P. O. address: P. O. Box 7098, Richmond Highlands, Seattle 33, Wash. Filed Feb. 3.

Existing AM Stations . . .

Applications

WXOK Baton Rouge, La.—Capital City Bcstg. Co., request mod. CP to change from 1260 kc, 1 kw daytime, to 540 kc, 1 kw daytime, antenna height 315 ft. Estimated cost of change not indicated. Applicant states it was to have completed construction on 1260 kc, as authorized under CP, last week, and that request for mod. CP will not delay 1260 kc start. Filed Feb. 3.

New FM Stations . . .

Applications

Golden, Col.—Evert A. Bancker Jr., 98.9 mc. (Ch. 255), ERP 2.5 kw; antenna height above average terrain 580 ft., above ground 60 ft. Estimated construction cost $1,650 (major items of equipment already on hand), first year operating cost $12,000, revenue $10,000. **Evert A. Bancker Jr.,** sole owner of applicant, is a student. P. O. address: P. O. Box 364, Route 3, Golden, Col. (BPH-1834). Filed Jan. 28.

Hearing Cases . . .

Actions by FCC

Aladdin Radio & Television Inc. and **Denver Television Co., Denver, Col.**—Hearing Examiner James D. Cunningham issued initial decision looking toward *grant* of **Aladdin Radio & Television Inc.** application (BPCT-426) for new TV station on vhf Ch. 7, ERP 316 kw visual, 158 kw aural, and *denial* of mutually exclusive application of **Denver Television Co.** (BPCT-951). (Docket 9041, 10240.) Initial decision Feb. 2.

Storer Bcstg. Co., Miami, Fla., and Wheeling, W. Va.-Steubenville, Ohio—Commission stated it would withhold any further action on applications for new TV stations in conflict with those of Storer for vhf Ch. 10 in Miami (BPCT-228) and vhf Ch. 9 in Wheeling-Steubenville (BPCT-360) for period of 30 days during which Storer may elect which of its two applications it desires Commission to consider. Storer now owns or controls four TV stations; under FCC rules no

Lancaster, Pa.—New TV, vhf Ch. 8. WGAL-TV and Peoples Bcstg. Co. (WLAN). Examiner J. D. Bond.

New Petitions . . .

January 29

WGAL-TV and Peoples Bcstg. Co. (WLAN), Lancaster, Pa. New TV, vhf Ch. 8 (Dockets 10366, 10365; BPCT-910, 654)—Opposition filed by NBC, licensee WNBW (TV) Washington and WNBT (TV) New York, to petition of Peoples on Jan. 19 for reconsideration and change of issues in comparative hearing set by FCC. NBC asks that Peoples petition be dismissed on ground Peoples is not a "person aggrieved" within meaning of Sec. 5(d) of Communications Act. NBC noted vhf Ch. 4 was deleted from Lancaster and is no longer being used there.

John H. Poole tr/as John Poole Bcstg. Co. (KBIG), Avalon, Calif. New AM permittee, 740 kc.—Petition filed by CBS of Calif. Inc., licensee KCBS San Francisco (740 kc), supplementing its interference protest of Dec. 12, 1952, which asked that hearing be designated for KBIG's application for license. Supplemental petition asks that (1) KBIG program test authority be revoked, or (2) KBIG be permitted to continue operation "only at such reduced power as will afford adequate protection to KCBS." Interference protest also filed against KBIG on Jan. 30 by KMPC Los Angeles (710 kc) requesting that FCC: (1) designate KBIG license application for hearing; (2) revoke program test authority or order power to be reduced to eliminate overlap of 25 mv/m contours, and (3) require KBIG to adjust directional antenna to eliminate overlap cited.

St. Joseph Valley Bcstg. Corp. (WJVA), South Bend, Inc. License renewal and transfer of control (Dockts 9692 and 10065; BR-1877, BTC-897)—Opposition filed by Chief, FCC Broadcast Bureau, to motion of WJVA on Jan. 22 to strike exceptions of Chief of Broadcast Bureau filed Jan. 15 to initial decision of Dec. 19, 1952, proposing to grant renewal and transfer.

January 30

Versluis Radio and Television Corp., Muskegon, Mich. Permittee new TV station (BPCT-1208)—Motion filed to dismiss protest of grant submitted to FCC Jan. 22 by Music Bcstg. Corp. (WGRD), Grand Rapids, Mich., citing alleged economic injury [B•T, Jan. 26]. Versluis contends Music is not party in interest within meaning of Communications Act, hence has no standing. Versluis also notes *Saunders* case dealt with AM stations, not AM and TV, and asserts FCC found its TV application in proper form since no additional information or explanation was requested before grant.

KGAL Lebanon, Ore. Permittee to change from 930 kc 1 kw day to 920 kc 1 kw fulltime directional (BP-8223)—Interference protest filed by KXLY Spokane (920 kc) asking that grant be reconsidered and set for hearing.

February 2

Alvin E. O'Konski (WOSA, formerly WLIN), Merrill, Wis. Permittee to move to Wausau and increase power from 1 kw to 5 kw on 550 kc fulltime (BP-8239)—Protest of conditional grant of Jan. 2 and request for hearing filed by WSAU Wausau. WSAU alleges misrepresentations on part of O'Konski, concerning construction prior to receipt of CP, in his request for conditional grant.

Leonard J. Schafitz and Sharon Herald Bcstg. Co., Sharon, Pa. New TV, uhf Ch. 39 (BPCT-1509, 1549)—Petition by Schafitz for immediate consideration of his application and for dismissal of competitive bid of Sharon Herald on ground latter is defective.

February 3

Sacramento Bcstrs. Inc., et al, Sacramento, Calif. New TV, vhf Ch. 3 (Dockets 9012, BPCT-411 et al.)—Petition by KCRA to amend its application to correct clerical errors and certain minor omissions in estimated cost of construction figures.

February 4

TV Reallocation Proceeding (Docket 8736 et al) and Hearst Radio Inc., Milwaukee. New TV, application for vhf Ch. 10 (Docket 8955, BPCT-383)—Request by Joint Committee on Educational Television for permission to participate in oral argument set Feb. 16 on status of prefreeze application of Hearst for Ch. 10, reserved by Sixth Report for noncommercial educational use by Sixth Report and Order.

January 29 Decisions

ACTIONS ON MOTIONS

By Hearing Examiner J. D. Bond

Peoples Bcstg. Co., Lancaster, Pa.—Granted in part motion for continuance of hearing from Feb. 2, 1953 to date thirty days after commission action on movant's "motion to enlarge and change issues," filed Jan. 16, 1953, which is pending before commission; hearing continued until such date as shall be fixed by further order.

By Hearing Examiner Elizabeth C. Smith

Portland Television Inc., Portland, Ore.—Granted petition to amend application for CP for new TV station (Ch. 8) (Docket 10245; BPCT-956) to show (1) reduction in height of supporting tower from 649 ft. to 500 ft. and other changes resulting from such reduction of tower height, including reduction in certain of financial items shown in sec. III, page 1; and (2) certain minor changes in estimated cost of operation and estimated revenues for first year.

North Pacific Television Inc., Portland, Ore.—Granted petition to amend application for CP for new TV station (Ch. 8) (Docket 10319; BPCT-1138) to show (a) revised ant. power gain of 11.04 db and revised transmitter operating power to reflect such revised power gain; (b) revised minimum field intensity of 97 db over Portland; (c) revised distances to the Grade A and Grade B contours on present eight radials; and (d) change in operating power constants of aural trans. from 25 kw to 30 kw.

BY COMMISSION EN BANC

Change DA Pattern

WSLS Roanoke, Va., Roanoke Bcstg. Corp.—Granted CP to make changes in DA for D operation; engineering conditions (BP-8272).

Change Station Designation

WNPT Northport, Ala., West Alabama Bcstg. Co. Inc.—Granted mod. license to change station designation from Northport to Tuscaloosa, Ala. (BML-1531). No move of studio or transmitter involved.

Advised of Hearing

Lebanon-Springfield Bcstg. Co., Lebanon, Ky.—Is being advised that application (BP-8519) for new AM on 1470 kc 1 kw D, indicates necessity of hearing because of engineering considerations including interference to WLCK Campbellsville, Ky.

WOKY Milwaukee, Wis., Bartell Bcsters. Inc.—Is being advised that application (BMP-5948) for mod. CP to extend time for increasing power on 920 kc to 5 kw-LS and continue 1 kw night (BP-7959) involves considerations which indicate necessity of a hearing.

Granted Extension of SSA

Commission granted extensions of SSA to following stations, on temporary basis, for period of 60 days ending April 1, 1953:

WNYC New York City, City of New York Municipal Bcstg. System—For use of 830 kc, 1 kw, to operate additional hours from 6 a.m. (EST) to sunrise New York City and from sunset Minneapolis to 10 p.m. (EST).

KFAR Fairbanks, Alaska, Midnight Sun Bcstg. Co.—For use of 660 kc, 10 kw, U.

KWBU Corpus Christi, Tex., The Baptist General Convention of Texas—For use of 1030 kc, 50 kw, from local sunrise Boston, Mass., to local sunset Corpus Christi.

WOI Ames, Iowa, Iowa State College of Agriculture and Mechanic Arts—For use of 640 kc, 1 kw, from 6 a.m. to local sunrise (CST).

Renewal of License

Following stations granted renewal of licenses on regular basis:

A pitch for one of the top radio-TV executives in the business

by

the Vice President in charge of radio-TV of one of the top advertising agencies.

HIS EXPERIENCE INCLUDES MAJOR EXECUTIVE POSTS IN NETWORK AND GROUP STATION OPERATION.

He knows—*the advertiser-agency point of view*
the station's requirements
the network's problems
station operation
national representation

A competent administrator. A good organizer. A sharp man with the pencil, he knows how to do business with top level management and small local advertisers.

He is widely known and respected in the trade and generates loyalty among his associates.

We think "it's time for a change". His present connection does not utilize his abilities.

All replies will be kept in strict confidence.

BOX 768S, B•T.

Sept. 1-3: International Sight and Sound Exposition and Audio Fair, Palmer House, Chicago.

Sept. 28-30: National Electronics Ninth Annual Conference, Hotel Sherman, Chicago.

Small-Market TV

AS EXEMPLIFIED by the article beginning on page 77 of this issue, the thinking among national advertisers and their agencies, and therefore by networks, seems to be that the U. S. television system will, for the most part, be confined to no more than 125 markets.

Indeed, it is the view of John B. Crandall, media director of Sherman & Marquette and author of the article in this issue, that television will be a sound investment in only 112 market areas that have a minimum population of 350,000 each. It will be the exceptional TV station that thrives in a smaller community, Mr. Crandall believes.

Last summer Sidney W. Dean Jr., vice president and director of marketing services, McCann-Erickson, New York, predicted that national advertisers would be interested in buying TV in 125 primary markets. TV elsewhere, he said, would "provide important frontier opportunities to local and some regional advertisers, but [its] value to national advertisers will be impaired by the naturally higher costs of the added unduplicated markets."

Though none, of course, has officially announced its plans, the national TV networks are known to be planning similarly about the size and number of affiliated markets. Plainly, "big money" television is not going to approach the coverage of radio, unless all these experts are wrong.

The implication here is obvious. Certainly, stations are going to be built in markets smaller than those deemed minimum by the big TV advertisers and their agencies. These stations perforce will have to depend chiefly on local sources of revenue.

As with most other problems of television, the survival of smaller-market stations turns on the question of costs. Of necessity, these stations must exercise the utmost ingenuity to present attractive advertising vehicles at prices which local businesses can afford. If they manage that, they may also attract national and regional accounts which are anxious to cover more of America than the 80-odd per cent Mr. Crandall envisions but which are unwilling to bear heavy additional expense to do so.

The experience of radio broadcasters is useful as an example. As was shown in an article two weeks ago in this publication, the independent radio stations, in both large and small markets, are in sounder financial shape today than they were before television competition—because, as a group, they have been ingenious in figuring out ways to get advertising results at comparatively low cost.

Television's technical requirements will always make it more expensive than radio, but certainly costs can be reduced if telecasters ask more of their talents and less of their purses.

". . . And under no circumstances must we allow Congress to be televised . . . as sponsors, the taxpayers may get the idea they can dictate to us . . ."

Reprinted by permission of George Lichty and the Chicago Sun-Times Syndicate

Faster TV Decisions

FASTER TV decisions—as well as expediting of all broadcast cases which must go through competitive hearing — will result from the FCC's revisions of its rules to simplify hearing issues and procedures.

FCC Vice Chairman Rosel H. Hyde, members of the Commission staff and representatives of the Federal Communications Bar Assn. have done a commendable job in working out the changes. But since rules, like laws, are effective only if those concerned obey the spirit of the rule as well as its letter, the success of the amendments rests with the applicant and his legal counsel.

Much administrative red tape has been cut. FCC staff lawyers no longer control issues. The hearing examiner and counsel for the participants are given authority to consider and pin-point only "essential" issues aside from the pertinent inquiry called for by the Commission itself. Generally, legal, engineering and financial qualifications—the "minimum" requirements — are cleared by the Commission before the hearing is set, thus paring down the amount of heretofore almost endless technical detail in the record.

The big TV hearing backlog looks less formidable now that issues are cut to the bone. Requiring all cards on the table at the formal conference will speed the hearing. We hope FCC will handle the MacFarland Act requirements and other preliminaries in the extra 10 days it has given itself by extending to 30 days the deadline for applications prior to date of hearing.

Upcoming procedural changes relate to continuances of hearings and application amendments. We trust these will be as effective as those now accomplished.

Fairer and Warmer

THESE DAYS the talk about broadcasting is as commonplace as conversation about the weather. The difference is quite a few somebodies propose to do something about broadcasting.

President Eisenhower plans to take to the air with a regular report to the people. Congress, having apparently overcome its fear of direct broadcasts of committee proceedings, has before it legislation to permit radio-TV broadcasts of floor debates.

The National Press Club has its first "radio President" in the distinguished personage of Ted Koop, CBS Radio Washington news and special events director. Jim Hagerty, White House "press" secretary, will have an "associate" in charge of radio and TV.

It's the White House angle that has been Page 1 news (on the air, too). Those who envisage President Ike subjecting himself to the cross-fire of Washington's hard-shelled journalistic corps at regular "air" news conferences expect too much.

President Ike liked the reaction to his question-and-answer stints used during the campaign. An unseen announcer would ask a question (hand-picked, of course) and Ike had a prompt, off-the-cuff response. We should expect some variation of that technique in the White House reports.

To us, the most pleasing aspect of these developments is that there's hardly a murmur of opposition from the "press." A few short months ago (before the Presidential campaigns) any inkling of scheduled pick-ups from the White House or Congress, would have evoked sharp criticism from many of our printed page contemporaries.

FEEL THE "PULSE"

OF THE HEART OF AMERICA!

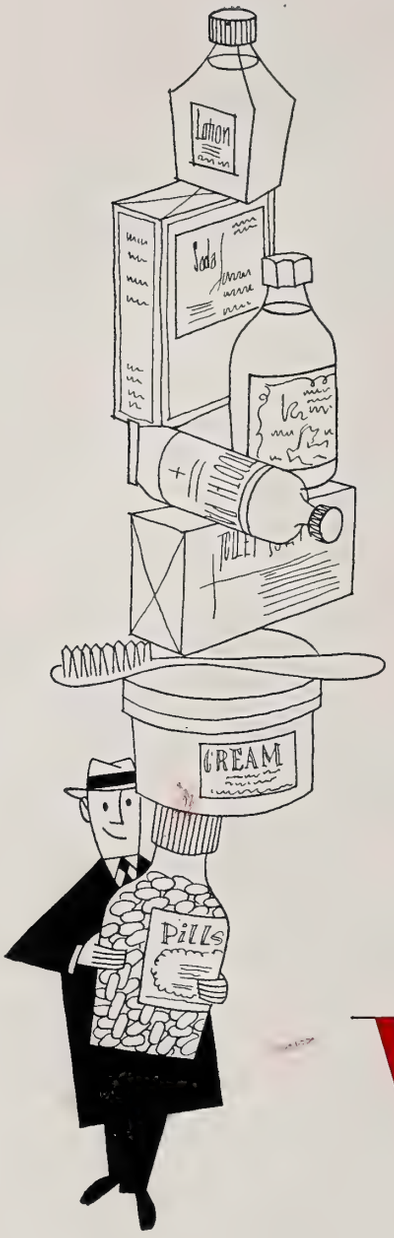
Late last year (November 5-11 and December 1-7, 1952), The Pulse, Inc., made its first Kansas City radio listener survey. The results, like those of all previous Kansas City surveys, are phenomenally "KMBC-ish"——! Here's what we mean—

9 of the top 11 nighttime programs are on KMBC!

9 of the top 10 five-a-week daytime programs are on KMBC!

For years this picture of KMBC dominance in the Kansas City primary trade area has been a well established fact. The new Pulse of Kansas City shows the same wide margin of superiority. More important, the superiority exists hour after hour, day in and day out. Yes indeed, the Pulse-beat in the Heart of America is KMBC—listener preference that means more impacts and more sales per advertising dollar.

Any Free & Peters colonel or member of the KMBC-KFRM sales staff has the entire Pulse story, and a lot of other information of utmost interest to you.



WRITE, WIRE OR PHONE your nearest Free & Peters office or KMBC-KFRM at Kansas City. Sell the whole Heart of America, wholeheartedly with . . .

BAB has hit jackpot which will benefit entire radio industry. After hitting hard at department stores for fair shake in competition with newspapers, Bureau has go-ahead from large chain of department stores which has agreed to use half its total budget for radio. Details of proposed $400,000 campaign will be ready for release some time in March. Previously only sporadic radio was bought, with bulk going to black-and-white.

★ ★ ★

BROADCAST MUSIC INC. enjoying another good year, expected again to give discount to its broadcaster licensees. BMI management won plaudits of its board of directors at annual meeting last week at Belleair, Fla., for its steady progress. Next project expected to be in serious music field through its subsidiary, Associated Music Publishers, headed by Charles Wall, who also serves as vice president-treasurer of BMI.

★ ★ ★

PLAN OF NARTB TV Code Review Board to advise President Eisenhower of its work at personal interview has hit snag—but not at White House. NARTB Radio Board, evidently figuring that visit was prerogative of full board, took exception, with result that code group's request for engagement was withdrawn following Belleair, Fla., NARTB board meeting fortnight ago. Now TV Code Board, on ground that it's autonomous, plans to reinstate request. Its members are John Fetzer, chairman; J. Leonard Reinsch, vice chairman, E. K. Jett, Walter J. Damm and Mrs. A. Scott Bullitt.

★ ★ ★

WHAT WITH CBS' H. Leslie Atlass taking over former WBKB (TV) as part of ABC-United Paramount merger—and new local TV shows being showcased for eventual network origination—there's rosy glow of optimism over future of Chicago television these days. It's agreed that under Mr. Atlass' wing, WBKB (WBBM-TV) will emphasize local public service programming, with accent on showmanship. And, of course, new United Paramount money and blood is expected to hypo ABC Chicago programming on old WENR-TV.

★ ★ ★

EXPERIMENT that may pave way for settlement of vexatious baseball-TV minor league problem launched in Atlanta, where Southern Association club will seek to pre-sell blocks of season tickets premised on telecasting of games over WSB-TV. Club, station and *Atlanta Journal* and *Constitution*, which own WSB properties, working together with Junior Chamber in project to pre-sell 25-30,000 four-ticket books at $5, good for any games, with telecasts as bait. If club breaks even on tickets, concessions will make money and precedent will be established for other ball clubs. Idea gleaned from Baltimore professional football project where sufficient advance sales were made to underwrite acquisition of Dallas franchise.

WITHDRAWAL of portion of principals from WMSC Columbia, S. C., to join WIS owners in WIS-TV Corp., granted Ch. 10 there last week, hailed in some quarters as practical solution to FCC concern over dual AM station tie-ups inherent in "marriage" TV bids. FCC, however, granted Ch. 47 to Macon merger group, but only after WBML and WNEX reduced respective holdings to 45% and brought in third independent party with 10% balance of control.

★ ★ ★

RISING INDIGNATION evident among telecasters over free plugs being given consumer magazines, thus building newsstand circulation, which publishers use to belay TV competition. It works this way: Magazine runs glowing article on TV programs, or gives it award. Advertiser reciprocates by giving magazine generous mention or perhaps shoves in commercial covering presentation of award. Affiliates' ire rising to point where action banning such free rides may be taken at NARTB convention.

★ ★ ★

ALL-INDUSTRY push to persuade Congress to delete no censorship provisions of Sec. 315 of Communications Act (which forbids broadcasters censoring political candidates' speeches on air) due to get underway this week. NARTB board at Florida session approved Government Relations Director Ralph Hardy's outline of basic broadcasters' position—which has an ultimate goal elimination of Sec. 315 entirely. Since this appears impossible in near future, campaign in this Congress will be for authority to delete libel and slander from politicos' broadcasts so broadcaster won't be "in between" on libel laws—forbidden by FCC to eliminate defamation, but liable to damage suits under state laws.

★ ★ ★

SEN. CHARLES W. TOBEY (R-N.H.), chairman of Senate Interstate & Foreign Commerce Committee, may proceed slowly on legislation to dehorn broadcasters from dilemma of political libel. Senator feels that, while his group has jurisdiction over Communications Act, matter generally might better be pursued by Senate Judiciary Committee as part of overall political problem. Sen. Tobey agrees that problem is "vexsome" for radio-TV broadcasters but seems lukewarm to taking any specific action.

★ ★ ★

MEETING of FCC officials with House Interstate & Foreign Commerce Committee Feb. 19-20, is no probe but get-together aimed at acquainting new members with work of agency, give all members opportunity to ask questions. That's not to say some searching questions won't be asked. Among those understood to be in minds of some of New Jersey Rep. Charles A. Wolverton's committee are: "Strike" applications [B•T, Feb. 9], results of McFarland Act, educational TV, color TV, length of TV hearings.

General Mills Studying New 'Package Deal'

GENERAL MILLS, Minneapolis, "considering one or two plans" for saturation radio-TV spot campaign similar to package deal evolved last year with number of stations. Campaign will be over longer period of time, Lowry Crites, firm's radio-TV media director, disclosed Friday. He said plan would be announced within week or ten days.

Mr. Crites said company is thinking along lines of advertising many different products in summer drive.

He told B•T company feels stations will be receptive to General Mills package deal. Last year, 455 announcements were aired over 13-week period, with four-fifths of schedule in Class A time and overall rate based on one-half of each station's one-time rate. Mr. Crites said new package blueprint, when finally evolved, would "not necessarily" follow this formula, but indicated there would be similarity.

It was understood General Mills had reasonable assurances from stations in 1952 they would be receptive to similar plan this year. There is "evidence" that "great many" stations would be interested again, an official of Knox Reeves advertising, GM agency, said.

Pattern will depend partly on company's decision with respect to network radio.

Once plan is announced, company officials plan to deal directly with stations, touring country sometime early in March.

DuMONT STATEMENT

DR. ALLEN B. DuMONT, president Allen B. DuMont Labs, said Friday that AB-PT decision means two things for DuMont: First, "We now have permanent instead of temporary licenses for our stations"; second, "we can have only one more station instead of two, or perhaps if Paramount files for it they will get the additional license." Dr. DuMont pointed out that FCC decision, in stating that Paramount had control of DuMont, used the word in limited and unusual sense to mean negative rather than positive control. All Paramount can do to exercise this control, he said, is to block an attempt of DuMont faction to amend the corporation's charter, which he described as unlikely (story page 27).

• BUSINESS BRIEFLY

FORD TRUCK DRIVE • Ford Motor Trucks through J. Walter Thompson Co., N. Y., lining up radio and TV spot campaign to promote its 1953 model in about 240 radio and 20 TV markets for about two weeks early in March. Ford usually expands its spot buys district by district.

NEW C-P-P PRODUCT • Colgate-Palmolive-Peet coming out with new product, Lustre Creme Home Permanent, and planning test TV spot campaign to start in late February in from three to six markets. Agency: Lennen & Newell, N. Y.

RADIO FOR LINCOLN • Lincoln Mercury cars placing district by district varied radio spot campaign starting Feb. 23. Length of contract extends three, four and ten weeks in different districts. Agency: Kenyon & Eckhardt.

BENDIX ON *TODAY* • Bendix Home Appliance Div. of Avco Mfg. Co., South Bend, Ind., buying 13 participations on NBC-TV's *Today* for six-week period. Local dealers-distributors being supplied radio-TV commercials for use on co-op basis. Campaign may go national in March. Firm will advertise its new Duomatic washer-dryer, introduced last January. Agency: Earle Ludgin, Chicago.

ICE-MAKER SPOTS • Servel Inc., Evansville, Ind., preparing four-week spot announcement campaign for its new automatic ice-maker refrigerator to start March 30 in about 100 radio-TV markets. Agency: Hicks & Greist, N. Y.

SPOTS FOR NASH • Nash cars through Geyer Inc., N. Y., preparing two-day TV and three-day radio spot schedule starting March 5 in more than 100 radio and TV markets.

SOUTHERN CAMPAIGN • Hood Chemical, through Hilton & Riggio, N. Y., placing quarter-hour transcribed show plus spots in about dozen radio markets, mostly in South, starting April 1 for 13 weeks, to promote bleaches, starches.

KIX ON NBC-TV • General Mills, Minneapolis, will advertise its Kix corn cereal when it begins once-a-week sponsorship of *Ding Dong School* on NBC-TV March 6.

FOUR NARTB DIRECTORS ELECTED BY DEFAULT

FOUR district directors who will serve on NARTB Radio Board for two-year terms starting at Los Angeles spring convention were elected without opposition when nominations closed Friday, according to C. E. Arney Jr., NARTB secretary-treasurer.

New directors are:

DISTRICT 7 (Ohio, Ky.)—F. Ernest Lackey, WHOP-AM-FM Hopkinsville, Ky.

DISTRICT 9 (Ill., Wis.)—Hugh K. Boice Jr., WEMP-AM-FM Milwaukee, Wis.

DISTRICT 13 (Texas)—Kenyon Brown, KWFT Wichita Falls, Tex. (incumbent).

DISTRICT 17 (Wash., Ore., Alaska)—R. M. Brown, KPOJ-AM-FM Portland, Ore.

Final ballots for all nine odd-numbered directorships as well as at-large vacancies (large, medium, small and FM stations, one each) to be mailed to eligible station representatives Feb. 27.

Wide-open contests indicated in at-large categories, with seven candidates for large stations, 25 for medium, 17 for small and 15 for FM.

Full list of nominees, in addition to four uncontested districts, follows:

DISTRICT 1 (New England) — Herbert L. Krueger, WTAG-AM-FM Worcester, Mass.; William B. McGrath, WHDH Boston (incumbent).

DISTRICT 3 (Del., Pa., Md., W. Va.)—Victor C. Diehm, WAZL-AM-FM Hazleton, Pa.; George H. Clinton, WPAR-AM-FM Parkersburg, W. Va.; George D. Coleman, WGBI-AM-FM Scranton, Pa. (former director).

DISTRICT 5 (Ala., Fla., Ga., P. R.)—John Fulton, WGST-AM-FM Atlanta; James W. Woodruff Jr., WRBL-AM-FM Columbus, Ga.

DISTRICT 11 (Minn., N. D., S. D.)—Harry W. Linder, KWLM Willmar, Minn. (incumbent); John F. Meagher, KYSM Mankato, Minn. (former director).

DISTRICT 15 (No. Calif., Nev., T. H.)—Paul R. Bartlett, KFRE-KRFM (FM) Fresno, Calif; William D. Pabst, KFRC San Francisco; William B. Smullin, KIEM Eureka, Calif. (former director; author of by-laws amendment limiting directors to two consecutive terms).

LARGE STATIONS—Otto P. Brandt, KING Seattle; Martin Campbell, WFAA Dallas; John H. DeWitt Jr., WSM Nashville; Robert B. Hanna Jr., WGY-WGFM (FM) Schenectady; John F. Patt, WGAR Cleveland; Victor A. Sholis, WHAS Louisville; W. H. Summerville; WWL New Orleans.

MEDIUM STATIONS—Joseph K. Close, WKNE Keene, N. H.; Roy Dabadie, WJBO Baton Rouge La.; Robert Dillon, KRNT Des Moines; John Esau, KTUL Tulsa; George J. Higgins, KMBC Kansas City; Rex Howell, KFXJ Grand Junction, Colo.; J. Frank Jarman, WDNC Durham, N. C.; Ray P. Jordan, WDBJ Roanoke; Herbert L. Kruger, WTAG-AM-FM Worcester, Mass.; C. Howard Lane, KOIN Portland, Ore.; Nathan Lord, WAVE Louisville; William B. Quarton, WMT Cedar Rapids; James D. Russell, KVOR Colorado Springs, Col.; G. Richard Shafto, WIST-AM-FM Charlotte, N. C.; Henry W. Slavick, WMC Memphis; Calvin J. Smith, KFAC-AM-FM Los Angeles; William B. Smullin, KIEM-KRED (FM) Eureka, Calif.; C. L. Thomas, KXOK St. Louis; Owen F. Uridge, WQAM Miami; Walter E. Wagstaff, KIDO Boise, Idaho; William E. Ware, KSTL St. Louis; Gunnar O. Wiig, WHEC Rochester; R. B. Williams, KVOA Tucson, Ariz.; James W. Woodruff Jr., WRBL-AM-FM Columbus, Ga.; Karl O. Wyler, KTSM El Paso.

SMALL STATIONS—John Alexander, KODY North Platte, Neb.; Matthew H. Bonebrake, KOCY Oklahoma City; Edward Breen. KVFD Fort Dodge, Ia.; Victor C. Diehm, WAZL-AM-FM Hazleton, Pa.; Fred Fletcher, WRAL-AM-FM Raleigh, N. C.; E. J. Gluck, WSOC-AM-FM Charlotte; Simon Goldman, WJTN-AM-FM Jamestown, N. Y.; Bill Hoover, KADA Ada, Okla.; Edgar Kobak, WTWA Thomson, Ga.; Ben A. Laird, WDUZ Green Bay, Wis.; J. R. Livesay, WLBH Mattoon, Ill.; Bob McRaney, WCBI Columbus, Miss.; Robert T. Mason, WMRN Marion, Ohio; John F. Meagher, KYSM-AM-FM Mankato, Minn.; J. Perry Sheftall, WJZM Clarksville, Tenn.; Gene Trace, WBBW Youngstown, Ohio; Charles C. Warren, WCMI Ashland, Ky.

FM STATIONS—Paul R. Bartlett, KFRE-KRFM (FM) Fresno, Calif.; Victor C. Diehm, WAZL-AM-FM Hazleton, Pa.; Everett Dillard, WASH (FM) Washington; Fred Fletcher, WRAL-AM-FM Raleigh, N. C.; Robert W. Ferguson, WTRF-FM Bellaire, Ohio; E. J. Gluck, WSOC-AM-FM Charlotte, N. C.; Simon Goldman, WJTN-AM-FM Jamestown, N. Y.; Robert B. Hanna Jr., WGY-WGFM (FM) Schenectady, N. Y.; Ted Leitzell, WRFM (FM) Chicago; Merrill Lindsay, WSOY-FM Decatur, Ill.; G. Richard Shafto, WIST-AM-FM Charlotte, N. C.; Calvin J. Smith, KFAC-AM-FM Los Angeles; Wallace E. Stone, WMIT (FM) Clingman's Peak, N. C.; Ben Strouse, WWDC-AM-FM Washington (incumbent); Edward A. Wheeler, WEAW (FM) Evanston, Ill.

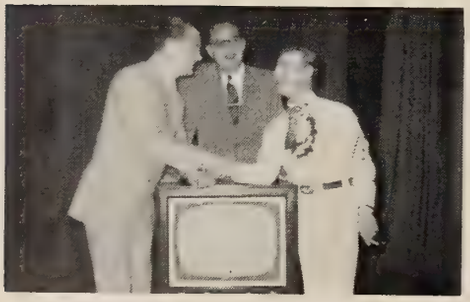
Twelve nominees were named for directorships in more than one category. They have 10 days to decide in which one category they will run. Those in two or more groups are Messrs. Bartlett, Diehm, Fletcher, Gluck, Goldman, Hanna, Krueger, Meagher, Shafto, Smith, Smullin and Woodruff.

KING OF THE DISC JOCKEYS

IN ATLANTA, GA.

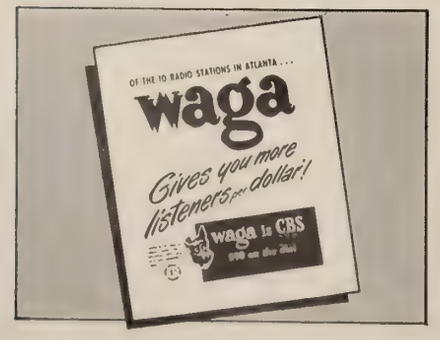
JON FARMER

Who is the most popular disc jockey in Atlanta?



That was the question *Hank Snow*, the *Singing Ranger*, and the local distributor of RCA recordings wanted to know.

30,000 radio listeners supplied the answer by voting on 27 disc jockeys from 14 stations within a radius of 40 miles of Atlanta.



The winner and champion disc jockey—our own *Jon Farmer!*

Local and national advertisers alike are using Jon Farmer to boost their sales in Atlanta—the nation's 29th market in total retail sales.

Let us tell you how WAGA and Atlanta's most popular disc jockey can team together to build sales for you.

Jon Farmer receives 21-inch TV set from Hank Snow, Victor recording star, and Sam Wallace of the Yancey Company.

WRITE FOR THIS FOLDER which shows that of the 10 radio stations in Atlanta, WAGA gives you more listeners per radio dollar.

KWTO Power Boost Set Aside; Other Actions

POWER BOOST from 1 kw to 5 kw at night for KWTO Springfield, Mo., was set aside by FCC Friday and scheduled for further hearing before Examiner J. D. Bond at date to be specified. Action was in accord with mandate of U. S. Court of Appeals for District of Columbia which ruled Commission erred in not heeding interference claims of KFDM Beaumont, Tex. KWTO is assigned 5 kw day, 1 kw night on 560 kc, directional. FCC made WIND Chicago, KLZ Denver and KFDM parties to hearing.

WSMB to Amend TV Bid

WSMB New Orleans, one of several properties involved in last week's Paramount decision by FCC (see story page 27), is amending its TV bid from Ch. 20 to Ch. 32. Ch. 32 newly available as result of finalizing of Commission order to substitute Ch. 69 for Ch. 39 at Bogalusa, La. FCC corrected sub-standard spacing.

Television Actions

FCC Broadcast Bureau late last week took following television actions:

WBRC-TV Birmingham, Ala., granted special temporary authorization for commercial operation, except for use of DuMont series 1000 and 2000 transmitter. Transmitter output 5 kw visual, 2.5 kw aural; to June 17.

KOLN-TV Lincoln, Neb., granted STA for commercial operation to Aug. 11.

WCCO-TV Minneapolis, Minn., granted STA for commercial operation, transmitter output 17.5 kw visual, 8.9 aural; to Aug. 4.

WTVJ (TV) Miami, Fla., granted extension of STA with facilities in current license except for 5 kw visual and 2.5 kw aural; to Aug. 1.

WKNB-TV New Britain, Conn., granted STA for commercial operation except RCA TTU-1B trans. 1 kw visual, 0.6 kw aural; from Feb. 6 to June 30.

WLVA-TV Lynchburg, Va., granted STA for commercial operation to July 17.

WCBS-TV New York, granted change to ERP 43 kw visual, 22 kw aural, antenna height above average terrain 1290 ft.

WGLV (TV) Easton, Pa., granted change to ERP 83 kw visual, 44 kw aural, antenna 1060 ft.

Three TV Applications

Late Friday, three new TV applications were filed with FCC. They are:

Sheboygan, Wis.—Television of Sheboygan Inc., uhf Ch. 59, ERP 20 kw visual, antenna 340 ft. above average terrain. Construction $175,000, operating $140,000, revenue $130,000. Owner of applicant is Press Publishing Co., owner of WHBL-AM-FM Sheboygan.

Fresno, Calif.—R. M. Schuler, L. E. Chenault, Bert Williamson, and L. H. Todd, uhf Ch. 47, ERP 103 kw visual, antenna, 2,314 ft. Construction $318,770, operating $300,000, revenue $375,000. Messrs. Schuler, Chenault and Williamson have interests in KYNO Fresno; Mr. Chenault also holds interest in KTVU (TV) Stockton, Calif.

Norfolk, Va.—Beachview Bcstg. Corp., vhf Ch. 10, ERP 316 visual, antenna 383 ft. Construction $642,825, operating $750,000, revenue $642,825. Principals include president and treasurer **Dudley Cooper** (50%),, Norfolk real estate; secretary **Irving M. Kipnes** (50%), account executive for ad agency Cohen & Miller, Washington, D. C.

WTVI (TV) on DuMont

WTVI (TV) Belleville, Ill., near St. Louis, signed as DuMont TV network affiliate replacing KSD-TV St. Louis in DuMont lineup, Elmore B. Lyford, network's station relations director, announced Friday. WTVI, owned by Signal Hill Telecasting Corp. and assigned uhf Ch. 54 with 220 kw ERP, is slated to start operations May 15.

COVERAGE REPORTS

WARD DORRELL of John Blair & Co. appointed chairman of Station Representatives Assn. committee to study and evaluate findings of Nielsen coverage studies and Standard Audience Measurement Services. Other committee members: Louis Moore, Robert Meeker Assoc.; Jones Scovern, Free & Peters; Daniel Denenholz, Katz Agency; Russ Walker, John E. Pearson Co.

New York Research Panel Becomes Battle Royal

WHAT was scheduled as panel discussion of broadcast audience rating services, with spokesmen for Hooper, Pulse, American Research Bureau and Nielsen explaining "why we do what we do," was turned into free-for-all, no-holds-barred battle royal by first speaker, C. E. Hooper, who devoted his allotted 20 minutes to pointing out shortcomings of other services. Meeting held Thursday night in New York by Radio Television Executives Society.

Mr. Hooper's bitterest attack was aimed at Pulse, whose roster-recall method he termed "unparalleled in inaccuracy" and "worse than worthless." He quoted Pulse ratings for four programs on WOAI-TV San Antonio, which, he declared, were never telecast. Sydney Roslow, director of Pulse, explained that its rosters are prepared from station logs, which sometimes are wrong, but he said that if Mr. Hooper could find so few errors in the thousands of station quarter-hours rated by Pulse each month, Pulse's overall record must be remarkably high.

Explaining their systems to society were: Dr. Roslow, house-to-house interviews; Mr. Hooper, telephone coincidental plus diaries; James Seiler, American Research Bureau, diaries; T. R. Shearer, A. C. Nielsen Co., Audimeters.

CAAB Praises Akerberg

ASSIGNMENT of Herbert V. Akerberg as full-time CBS-TV station relations vice president received plaudits of CBS-TV Affiliates Advisory Board Friday in resolution expressing its pleasure at Mr. Akerberg's appointment and commending "the CBS Television Division for thus making it possible for Mr. Akerberg to devote his full and unique abilities and energies to CBS Television station relations thereby assuring the sound growth of the network and its affiliates" (see story page 72).

CBS Joins ARF

CBS Television has joined Advertising Research Foundation, ARF reported Friday. Other new members: N. W. Ayer & Son, Grey Adv., Industrial Tape Corp., Meldrum & Fewsmith and Philip Morris & Co. CBS Radio has been ARF member for more than year, one of first to join after media were permitted to become members.

Buy 600 Feature Movies

MORE THAN 600 feature-length motion pictures purchased by WKRC-TV Cincinnati, U. A. Latham, general manager, announced Friday. Purchase price of films not disclosed.

PEOPLE

GEORGE ARKEDIS, Central Network sales manager, CBS-TV, to WBBM-TV Chicago as sales manager.

GEORGE KLAYEK, account executive, CBS-TV, N. Y., new Central Network sales manager effective today (Monday).

EDWIN J. SHERWOOD, TV promotion manager, Admiral Corp., Chicago, joins Kling Studios Inc., same city, as coordinator of TV production and sales. **FRED NILES** continues in overall charge of all TV-motion picture activities. Mr. Sherwood was associated with many Admiral TV programs and originated commercial policy of firm during political conventions.

CARL TILLMANNS, in charge of radio station sales and services for C. E. Hooper Inc., to Paul H. Raymer Co., N. Y., station representatives, as manager of sales research and promotion, succeeding **MARK FINLEY,** who has been appointed promotion and public relations manager for *Boston Post.*

LANN B. SMITH, senior art director of Hirshon-Garfield, N. Y., named vice president. He has been with agency 20 years.

Funeral services for **RAYMOND KNIGHT,** veteran radio and television writer-director-producer, were to be held Saturday at Walter B. Cooke funeral home, New York. Mr. Knight, said to have created more than 100 programs during his 25-year career, died Thursday in Columbus Hospital, N. Y., at 54.

Drive to Support Sports Events Planned

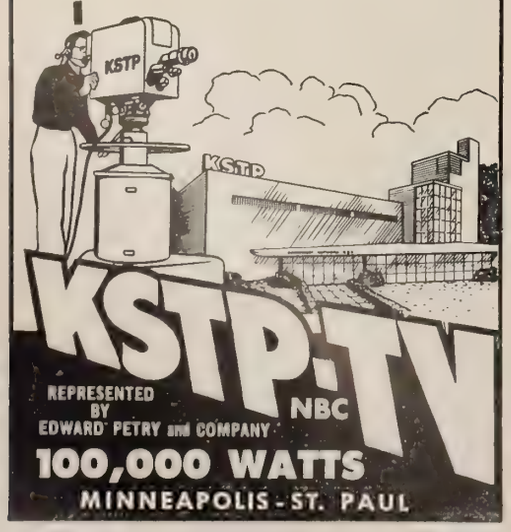
PROGRAM designed to encourage public support of sports events submitted to radio-TV set manufacturers by Dan D. Halpin, Allen B. DuMont Labs., chairman of Sports Promotion Subcommittee of Radio-Television Mfrs. Assn. Ten-point program advocates:

Boost attendance at televised sports in advertising material; display local team schedules in store windows; sell tickets for events; mention "see-the-game-in-person" on broadcasts; sell TV sets to sports celebrities and invite them to make personal appearances; avoid advertising which suggests patrons stay home to see games on TV; offer to cooperate with local sports officials; offer tickets to games in local newspaper contests; cooperate with dealer groups to encourage telecasting of sports events.

Basford Changes

BOARD of directors of G. M. Basford Co. announced three executive changes: Henry C. Silldorff, with agency since 1932 and president since 1947, becomes board chairman; Fred E. Adams, executive vice president who joined firm in 1942, becomes president, and Roger L. Wensley was named chairman of executive committee. G. M. Basford is one of leading industrial advertising agencies, handling more than 50 accounts.

SAG Near Agreement



EARLY settlement of Screen Actors Guild strike against producers of TV filmed commercials indicated Friday as spokesman for producers acknowledged that basic agreement on "most issues" has been reached. Holding up final agreement, he said, was decision from advertising agencies on their attitude toward proposals. It was felt that settlement may be reached by end of this week.

I'M THE LAW

Mon. 8-8:30 p.m. on DuMont's owned stations.
Producer: Jean Yarborough.
Director: George Archainbound.
Writers: David Victor, Jackson Gillis.
Cast: George Raft, Rochelle Hudson, others.

THOUGH there appeared to be no urgent need to expand the volume of crime programs on television, DuMont may be excused for entering this new one on the grounds of social service. In *I'm the Law* Rochelle Hudson has been given a job, and George Raft has been rehabilitated. As Lieutenant Kirby, Mr. Raft has turned to upholding the law rather than flouting it.

He is not finding the transformation easy. What little store of theatrical mannerisms he

GEORGE RAFT
A case of social service

was able to lay aside in his movie career is suited more to villain than to hero. Deprived here of the use of the gangster's smirk and the killer's threatening hiss, Mr. Raft is virtually without resources.

Whether Miss Hudson will bear up better than Mr. Raft in this series cannot be decided on the basis of the first show. Her role, in a lackluster script, was that of a girl sharpshooter, most of whose appearances on camera were associated with her work. It was not a challenging assignment, but she carried it out competently, flinching only occasionally when the pistol went off.

Neither Mr. Raft nor Miss Hudson is headed for new stardom in this one.

* * *

DING DONG SCHOOL

Mon.-Fri. 9-9:30 a.m. CST on NBC-TV
Sponsor: Scott Paper Co. (Thurs.); General Mills (Fri.) effective March 6.
Agencies: J. Walter Thompson Co. and Tatham-Laird Inc., respectively.
Producer & Director: Reinald Werrenrath Jr.
Supervision: Judith Waller.
Technical Director: John Natale.

WHILE the school bell is the traditional symbol of American education, one of NBC-TV's newest originations, *Ding Dong School*, defies the traditions of accepted TV children's programming patterns.

With the advent of partial sponsorship, this relatively unheralded program for pre-school children has had network executives thinking in terms of a valuable commercial property. Certainly the program has commanded an appreciable audience since it first went on the air in Chicago last October and went network less than two months ago.

It should be reported at the outset that *Ding Dong* won't ring any bells as a vehicle of entertainment.

But, in its quiet, unassuming way—and devoid of frills, elaborate settings and fancy camera tricks—the program serves a worthwhile educational purpose that is likely to endear it warmly to mothers everywhere.

The format is simple. Dr. Frances Horwich ("Miss Frances") sits in a studio and talks directly to the kiddies at home. On the morning of this review she showed off gifts made and sent in by the children for Valentine's Day, demonstrated a stop-light gadget, displayed scrapbooks of famous nursery characters (Humpty-Dumpty, Jack & Jill, Bo Peep) and otherwise entertained televiewing tots.

"Good morning—did you have breakfast—oh, you're just finishing breakfast," she asks in opening the program. Suzie, a doll, gets a ride in a swing ("Daddy ever swing you? . . .

FRANCES HORWICH
Ding Dong rings the bell

Oh, you're too big now—too heavy, you say"). Miss Frances shows a home-made traffic light ("This is green. . . . You can't tell here . . . but it's green when you're outside"). The last five minutes are devoted to mother, and the tempo of the show perks up to adult level.

All this seems quite easy for Miss Frances—for she is, in fact, a teacher and a leading authority on childhood and primary education.

Ding Dong Shool is far from imaginative or fast-moving, and its pace drags for an adult. But for its juvenile audience it does maintain as close an actor-viewer relationship as seems humanly possible.

* * *

STATE OF THE NATION

Sun., 4-4:30 p.m. on CBS-TV.
Host: Eric Sevareid.
Producer: Charles von Fremd.
Assistant Producer: Larry Warick.
Director: Charles Hill.
Cast: Mr. Sevareid, Secretary of Treasury George M. Humphrey and other Treasury Dept. officials.

THE AUDIENCE of *State of the Nation*, CBS-TV Sunday afternoon half-hour series, is really a visiting delegation, touring the headquarters

of our federal government under the expert guidance of Eric Sevareid, Washington correspondent for CBS-TV.

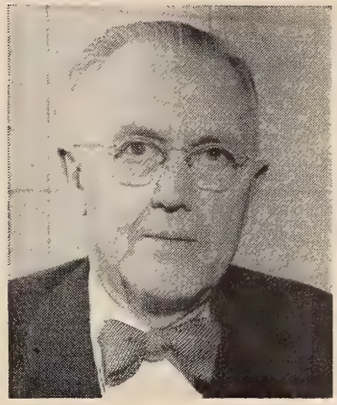
Each week Mr. Sevareid takes his party of eager sight-seers to call on a different government department, whose function, structure and mode of operation are presented through a combination of views of the department's activities and interviews with its key personnel, all filmed in advance of the Sunday telecast.

The Treasury Dept. was visited by the program on Feb. 8. The cameras started with a long shot of the Treasury Building in Washington, then worked into the office of the new Secretary, George M. Humphrey, who called upon each of top assistants to explain the duties and operations of his particular division of Treasury activities. As this department's activities include such farflung functions as those of the Secret Service and Coast Guard, minting our coins and engraving our paper money, controlling narcotics and collecting taxes, the video visitors were led rapidly from section to section without lingering very long at any one. This technique certainly insures the program against becoming boring, but there were several times that this reviewer wished it would slow up and explain things a bit more fully.

ERIC SEVAREID
Guided tours weekly

High spot of the Treasury tour came near the end, when Secretary Humphrey outlined his objectives for establishing a proper financial climate for the nation. He called first for "sound and stable dollars," for not spending "more than we earn" and for "paying a little on our debts from time to time" and doing other things "to keep our credit good." After this, he said, we can "slowly but surely reduce our tax burden."

Finally, the Secretary declared, the Treasury will strive to preserve for the young the great American opportunity "to advance and improve themselves through their own hard work and endeavors."



Produced by the CBS-TV Department of Public Affairs, *State of the Nation* is frankly an educational, public service type of telecast which makes every effort to be interesting and informative and none at all to be entertaining. High school and college students should find it an excellent auxiliary to their tests in political science and their parents could also profit from viewing these well-produced video visits to those who manage our nation's affairs.

But for one whose classroom years are far behind, the pace of the Treasury episode of *State of the Nation* was somewhat breathtaking. A little less information, delivered a little more slowly, would have been more comfortably received and more surely retained.

Mr. Adam Reinemund

Buchanan-Thomas Adv. Co.

Omaha, Neb.

Dere Adam:

It seems like I keep a Tidy House around this here place but its sure a job with all th' comin' and goin' thet our people are doin'. Our generul managir is prezident of th' Charleston Symphony, our pgm. dir. is prez of th' Kanawha Players, and our Public Affairs dir. is prez. of th' Open Forum. We even got a guy who is prez. of his church choir. Thet just goes to show how bizy our people are in th' woik of this here community. Evrybody expects big things of us I guess because we got 5,000 on 580 and most evrybody knows WCHS can git things done. Th' boss sez we got more W. Va. listenurs then any othur stashun which seems to prove thet sich work rilly pays dividends. Well, I gotta go now and Shina-Dish up in th' lunchroom on th' third floor.

Yrs., for Tidy House,

algy.

American Broadcasting And United Merge

ABC AMERICAN BROADCASTING COMPANY

Company

Paramount Theatres

The BIG Radio-TV news story... and what it means to you

The most important news in the television and radio industry in years has been announced. The long-planned union of ABC and United Paramount Theatres has been approved by the Federal Communications Commission, and the two organizations are now one company.

The event is of far more significance than any statistics of the corporate merger. The new company will be impressively stronger and more flexible, and possess a greater potential for growth.

The combination is a "natural" if ever there was one. United Paramount's great history of showmanship and superb experience discovering and developing new talent will now be available to the American Broadcasting Company.

But the really great thing about the news is the tremendous promise the merger holds for the radio and television audience.

New programs will be developed. New stars will be attracted. New techniques will be introduced. New facilities will be developed. Not tomorrow, of course. Not next week, or next month. But ABC intends to be a leader in radio and television, and it intends to grow like an oak, not a mushroom.

The future began yesterday. So keep your eyes and ears on the *new* ABC.

A DIVISION OF AMERICAN BROADCASTING—PARAMOUNT THEATRES, INC.

our respects

to E. D. RIVERS JR.

IN A SHORT six years, E. D. (Dee) Rivers Jr. has enlarged his broadcast interests from a single 10 kw operation to four southern stations. He believes his personal philosophy has been translated successfully into his radio enterprises, filling a long-standing need for the Negro, farm element and the church to have "an unlimited voice in progressive southern radio."

Mr. Rivers goes beyond the three Rs to add three of his own, "Race, Rural and Religion," which have been a part of his convictions since childhood. Long a believer in more opportunity for the Negro and the underprivileged, regardless of color or religion, Mr. Rivers has premised his commercial broadcast operations on his three Rs.

Educated to a social consciousness at an early age, Eurith Dickinson Rivers Jr. was born at Mineral Springs, Ark., May 12, 1915. Son of a former Georgia governor, he has lived in the southern part of Georgia nearly all his life.

When a high school student, young Mr. Rivers decided on law as the means for him to carry out some of his ideas for personal and civic betterment, and enrolled in night law school. He was admitted to the bar when 16, a feat in any state, and particularly unusual in Georgia.

In 1937, after he was appointed attorney for the state welfare board, he helped institute Georgia's first social security legislation. For two years, as chairman of the state industrial board on which he served in a judicial capacity, he offered unlimited legal service to Negroes without charge. Spending much of his own time in back woods visits to impoverished families, he would often rescue, with legal advice, persons who literally had sold their pots and pans to pay the rent.

Action in Public Service

Interested in all kinds of public service, he was active in Woodmen of the World, the Masonic Order, Shriners, Baptist Church and Elks. Shortly before taking on his first broadcast assignment, Mr. Rivers served in a liaison capacity on the state building program between state and federal governments. One of the major projects was getting federal aid for a state hospital open to patients of any race.

His radio career began in 1940 as an announcer-engineer at WGOV Valdosta, Ga., the station he now owns. Working during wartime manpower shortages, he handled a 12-hour shift, 7 a.m.-7 p.m., for 16 months.

Later he enlisted in the Navy. As a first class seaman, he was termed a "legal eagle" by his colleagues, who sought his advice on legal and insurance matters. As assistant to the district legal officer, he at one time recovered more than $80,000 in excess rental charges through the Office of Price Administration and federal courts for his buddies.

In 1946 he returned to WGOV, decided he liked the management side and a year later put WEAS Decatur on the air. It started as a 10 kw daytimer, and a 50 kw power increase application now is pending. Since then he has acquired three other broadcast properties—WGOV-AM-FM, WJIV Savannah, and KWEN West Memphis, Ark.—all of which have applied for TV channels. Mr. Rivers' father owns WLBS Birmingham, Ala., WOBS Jacksonville, Fla., WMIE Miami, Fla., and has a minority interest in WGAA Cedartown, Ga.

Initial Station Success

WEAS, his initial station success, was one of the first in the South to attempt "all-out" aid to the Negro. In Mr. Rivers' blueprint for his radio and television future, "hitherto neglected segments of our listeners must be satisfied in a fair, unprejudiced and non-segregated manner".

His program schedules follow his three-R philosophy, and among the firsts claimed by Mr. Rivers are an all-Negro college football game broadcast, an all-Negro baseball game, and a concentrated program aimed at combatting Negro juvenile delinquency. In recognition of a decline in crime among Negroes of the area, he was cited by Negro civic and educational leaders of Atlanta-Decatur in 1948. He is one of the first station owners to employ full-time Negro marketing and public relations specialists.

Married to the former Marie Bie, Mr. Rivers lives with his family in Atlanta. Two daughters are Jan, 18, and Dee, 12. His hobbies, apart from family and station operation, are hunting, fishing and supervision of STARS (Southern Television and Radio Sales Inc.), a representative firm handling regional and national business for more than 100 southern stations.

As for the future, "It is my desire to give, not an imaginary, but a real public service to those people who need radio the most and who feel they are somewhat neglected," Mr. Rivers says. "I also want to help raise the educational and economic conditions, as well as the general moral uplifting of all people, regardless of race, creed or color."

All Right...
Let's Talk TV "Ratings"

ADVERTISEMENTS about TV shows aimed at women buyers usually talk audience loyalty, ability to sell, knowledge of the viewers —and skip over the part about how many people are looking.

All right, let's talk "ratings":

Current ARB survey for WPTZ's "Let Skinner Do It" shows a high of 11.0. In terms of viewers that means 195,000 people watching at a given time. In terms of money it's 69c for every thousand viewers watching . . . 14 viewers for every penny spent!

Now let's talk "ability to sell":

A short while ago one of the nation's largest manufacturers of a kitchen cleanser ran a test here in Philadelphia. He used the best known women's shows on three radio stations and two television stations, including "Let Skinner Do It." Each show used one announcement, and one only, asking the viewers to send in a box top for a premium.

"Let Skinner Do It" *pulled more returns than all other Philadelphia shows—radio and television put together!*

Whether it's a vacuum cleaner or a cake mix, a tissue or a tangerine, if it's bought mainly by women, "Let Skinner Do It" can sell it for you in Philadelphia.

For the full story on this great program, give us a call here at WPTZ, or see your nearest NBC Spot Sales representative.

Rust Removing

EDITOR:

. . . . My hands are red from clapping, and my throat raw from shouting "Bravo" to the story, "Removing the Rust from Radio Programming," by Elmo Ellis [B•T Feb. 2]. To my mind, this is one of the best stories on programming I've had the pleasure of reading in many a day. My bouquet to that man for daring to be different, and to his superiors for backing him.

From my experience, too many managers make too many program directors flunkies, doing copy, special events, odd shows on the air, and too few managers get behind too few program directors, and allow too few changes, which would "make" so many radio stations big again. . . .

Jack D. Funk
Program Director
WSMI Litchfield, Ill.

Fortune's Fumble

EDITOR:

February *Fortune Magazine* has an article on government subsidized direct mail advertising.

Included among the many glib comments and statements of alleged facts is this . . . "Newspapers deliver audiences at only a few cents per thousand; radio at about $1.50."

What do they smoke to be able to conjure up dreams like that?

Robert W. Ferguson
Executive Vice President
WTRF-AM-FM Bellaire, Ohio

Which Came First

EDITOR:

WCHS is a fine radio station and no doubt has been "first" in a number of instances, BUT, the broadcasting of naturalization proceedings in the U. S. Court [B•T, Jan. 26] was first done in West Virginia by WHIS, last June—just ask the Hon. Ben Moore, Justice U. S. Court. To top it off, we sent a recording to each of the successful applicants.

P. T. Flanagan, Manager
WHIS Bluefield, W. Va.

Yearbook

EDITOR:

Declaration of Independence

EDITOR:

In the Jan. 26 issue of BROADCASTING • TELECASTING, my attention was called to the J. Walter Thompson Co. TV set count article. The report says: ". . . Since most television stations have an effective coverage radius of 60 miles or greater from the transmitter, the television advertiser is able to reach far beyond the transmitting markets." Reference is then made to a market like Bridgeport, pointing out the high ratio of television households despite the absence of transmitters.

This is particularly interesting in the light of the fact that a recent study into the quality of standards of reception of out-of-town television channels in the Bridgeport area points up a fundamental premise. Because of the weak

Most local advertisers use Kite because most local people listen to Kite!

★ Kite carries more local programs than any other station in the market (radio OR TV) for department stores, for appliance dealers, for automotive, and for food accounts!

television signal received in this area from even the major broadcasters, Bridgeport cannot be considered an adjunct of New York, and for television should be defined as a non-contiguous, distinct, and independent market.

Jay Hoffer
Sales Promotional Director
WICC-AM-TV Bridgeport, Conn.

Operator Rules

EDITOR:

Headline; Feb. 2 issue B•T, page 58, "NARTB CONVENTION: 'GOLD RUSH'." The article goes on to herald the Los Angeles confab. For comparison we find a story on page 54 of the same issue of B•T heralding the FCC decision to relax operator license rules and condoning transmitter remote operation. While the NARTB goes on a "Gold Rush" there will be hundreds of licensed operators going to the poor house. We, who are about to perish economically, salute the NARTB, FCC conspiracy in recognition of all the years of service and development in the broadcasting field, individually and collectively. . . .

Willard M. Davis
Pasadena, Calif.

EDITOR:

The super logic displayed by the FCC in the operator decision should revolutionize all concepts of science and technology. Surely such fields as medicine and aviation are sufficiently advanced so that hospital janitors are qualified to write prescriptions and perform surgery, and airline ticket clerks to fly DC 6's. . . .

Lewis C. Sherlock
Denver, Colo.

S. for Shelly

EDITOR:

I am much obliged to you for your reference in the Feb. 2 issue to my recent assignment to the job of eastern radio manager for NBC Spot Sales. The handsome photo of George M. Dietrich of ABC which accompanied it, however, must certainly have startled George and confused many of our mutual acquaintances.

Although it is not likely to win you any awards, the publication in your next issue of the enclosed photo might clear up the uncer-

tainty among your readers as to which George Dietrich works for NBC. It is George S. (for Shelly) Dietrich.

How much does it cost to keep a bear?

IF he draws a big enough crowd, a bear can earn every last berry you feed him. And the trick with a bear—or with any kind of entertainment, in person, in print, or on the air—is always the same: *to find a balance between how much an attraction costs and how much it attracts.* A way that is gaining new conviction among America's leading advertisers is network radio. For it continues to draw more people at less cost, prospect for prospect, than any other medium. It permits a rounded advertising program, with

frequency that keeps impressions fresh. And it leaves ample funds for merchandising and dealer promotion. In radio, the costs of attractions, for the numbers they attract, are lowest on CBS Radio. It has more of the traffic-building top shows than all other networks combined... and its sponsors invest 24 to 178 per cent more than on the other networks. So draw the crowds on CBS Radio—where entertainment is like a bear that performs on a birdlike appetite.

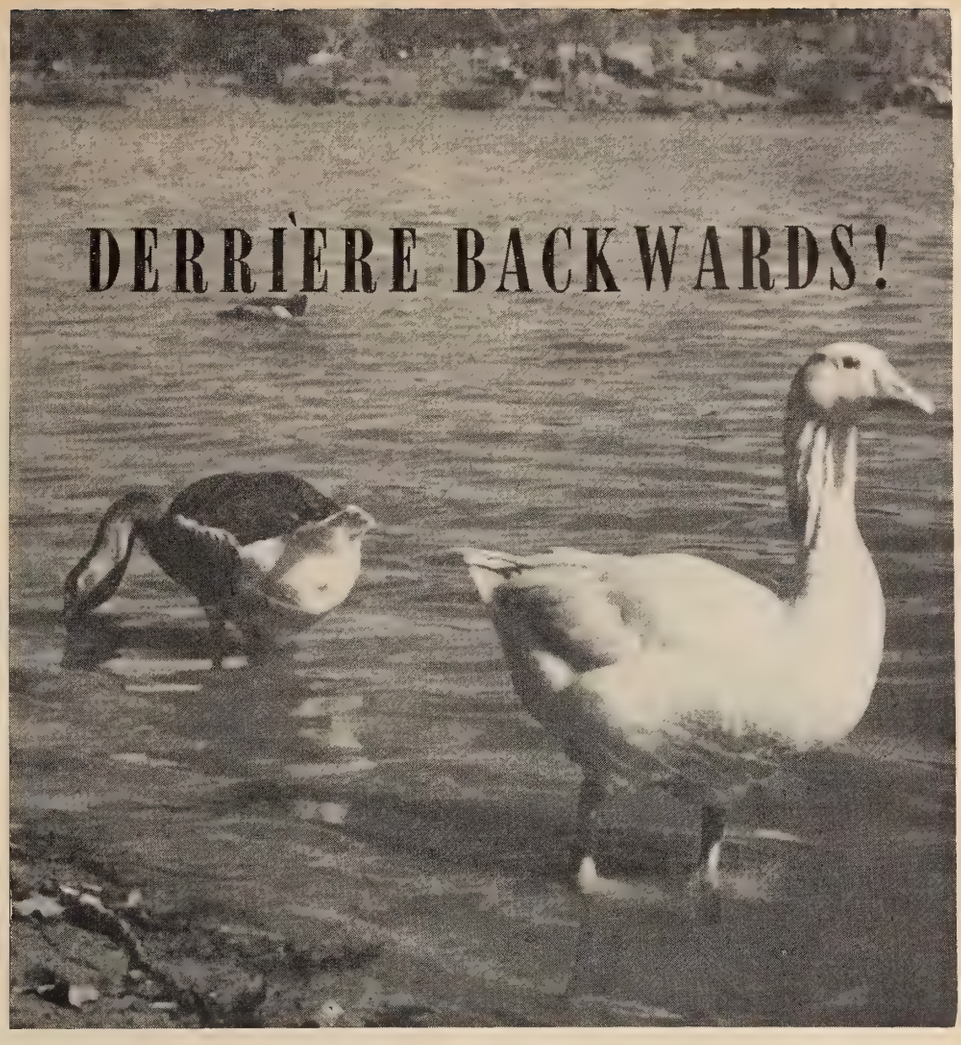
ARTHUR DURAM, director of radio and television, Fuller & Smith & Ross, New York, is a man whose past is exceeded only by the promise of his future. A gentleman and an actor, Mr. Duram also has been variously a sportscaster, a salesman, a promotion expert and a market research analyst. "And through it all," a colleague observed, "Art has never flubbed a job or lost a friend."

Acknowledgedly one of the most respected men in the field, Mr. Duram began his career in 1933—just out of the U. of Illinois—as a sports announcer for a station, then called WCBS in Springfield, Ill. Two years later he moved to Des Moines and WOC Davenport in a similar post.

After three years in Davenport he returned to his home town, Chicago, to work in radio daytime serials as an actor. In the summer of the year of his return, he went East to join a summer theatre and remained on the seaboard, forsaking acting in 1940 to join the sales staff of WHN New York. There he remained until 1942, when he enlisted in the Army Air Force.



He was stationed in the European Theatre and served there with the Air Corps for three and a half years. Discharged as a major in 1946, he returned to New York and the O'Brien & Dorrance organization, where he wrote copy.

One year later, in 1947, he returned to Chicago, this time to WBBM, the CBS outlet, as midwest promotion manager for the network. He came East to New York again several months later to function as market research director and assistant to the network sales manager.

In January 1952, Fuller & Smith & Ross, previously an industrial agency, decided to press vigorously its general advertising and asked Mr. Duram to develop its radio and TV department with himself at the head.

Today, in that capacity, Mr. Duram administers for the agency such shows as Westinghouse's *Freedom Rings* (CBS-TV), Owens-Corning Fiber Glass *Arthur Godfrey Show* simulcast (CBS Radio and TV), Tuesdays and Thursdays (10:15-30 a.m. EST), and Alcoa's *See It Now* (CBS-TV).

Mr. Duram is married to the former Marjorie Barnett. They have one son, Michael, 5. The Durams live in their own home in Chappaqua, N. Y. Mr. Duram's hobbies are golf and tennis.

Gertrude the goose knows that it pays to put up a good front when posing for a picture. Who knows? Some talent scout may spot this photo and give her the lead in "Mother Goose" or "The Goose That Laid the Golden Egg"—that's why Gertrude is giving out with the old Barrymore! Gladys, left background, is doing a poor job of selling herself. She's backing into this ad—going about her publicity and advertising "derrière backwards."

Some time-buyers and advertisers are like Gladys—backing into the Oklahoma City market by buying on the lightweight peanut-whistle stations. You can't sell your product by turning your back on the prospects!

Don't be a Gladys . . . don't come into this market "derrière backwards;" like Gertrude, put up your best front in Oklahoma City. Buy KOMA, the only 50kw CBS outlet in the state . . . the merchandising-minded station, serving you from a new quarter-million dollar studio.

BROADCASTING TELECASTING

February 16, 1953 Vol. 44, No. 7

AMBITIOUS ABC PLANNING INITIATED UNDER NEW MERGED OWNERSHIP

A revitalized ABC, fired with new strength from its merger with United Paramount, already is firming up its plans that will drastically affect the network field as well as other phases of the broadcast industry. It won't necessarily be a quick transformation, but ABC has definitely stated its intention to be a leader in the field . . . growing "like an oak."

PLANS for transfusing United Paramount's lusty millions into the run-down body of ABC were set in motion last week immediately upon receipt of the long-awaited signal from FCC (also see stories following).

Goal and purpose of officials of both companies was to raise ABC to the competitive stature, alongside the other networks, which FCC said would be the result when it handed down its multi-sided final decision approving the $25 million merger of ABC and United Paramount Theatres last Monday.

More and bigger affiliates, new talent, new programs—these were immediate objectives of the new company, American Broadcasting-Paramount Theatres Inc., in its efforts not only to make the ABC "home broadcasting" division competitive, but, if possible, to build it into the paramount network organization.

It would take a while. This was the theme of official pronouncements. For competitive reasons, executives said, blueprints could not be made public until details were set. But they promised developments would begin materializing with regularity, starting shortly.

Special Meeting Feb. 26-27

First real details of the battle plan are expected to be disclosed to members of the ABC Stations Advisory Committees at a special meeting called for Feb. 26-27 in New York. Officials of AB-PT and its ABC division, who talked with affiliates via closed circuit on Thursday, will meet with the TV Stations Advisory Committee on Feb. 26 and with Radio Stations Advisory Committeemen on the following day.

In broad outline, first consideration is two-pronged—lining up of stations and clearing of time, a dual problem which concededly would need the assistance of programs that could compete more solidly with those of other networks.

In one attack on this problem Leonard H. Goldenson, who headed United Paramount Theatres and becomes president of AB-PT, and Robert E. Kintner, who continues as president of ABC in its new status as an AB-PT division, plan a talent-hunt trip to the West Coast within about a month.

The search for new talent and new programs also will have the continuing aid of Robert M. Weitman, a veteran showman and star "discoverer" and a UPT vice president, who becomes ABC vice president in charge of programming and talent.

There has been speculation that with the estimated $25-to-$31 million resources available from UPT, ABC in its drive to line up new TV affiliates might offer additional compensation features as special inducements and possibly touch off an "affiliation war" among networks in the style of the CBS-NBC talent raids of a few years ago.

ABC officials gave no hint of plans of this nature, but did make it clear that they are out to build a network on a parity with its rivals in all respects, radio and television, and were working toward a stronger station lineup than before the merger. Aside from programming, sales, and general development plans, they expect the fact that the merger is now a reality will itself make stations more interested.

Spokesmen said they already—even before the merger was approved—had discerned a trend among new TV stations to sign with ABC. They expect it to continue, but, as one official pointed out, progress in that direction will be somewhat beyond ABC's control in one respect —that is, it will depend in part upon the rate at which FCC licenses new stations.

Additionally, in most of the major markets where ABC affiliations are especially desired by the network, there are more applicants than channels, meaning drawn-out hearings and unpredictable delays. ABC now has an 81-station TV network and 355 radio affiliates.

To improve its TV facilities, ABC plans to spend $2.5 million to boost its five owned stations to maximum power. Timetable calls for completion of this project by about 1954.

Goldenson's Goals

AB-PT President Goldenson listed the goals as "more entertaining, interesting and informative programs," but quickly added that "it will, of course, take time." ABC President Kintner, while describing the merger as affording ABC "the potential of more rapid and greater growth in the home broadcasting field," also cautioned that "to achieve our high goals we must proceed slowly in order to build soundly and in a business-like manner" (for texts of these and other statements, see stories following).

In the same tone, ABC said in newspaper and trade advertisements immediately following the merger that "new programs will be developed. New stars will be attracted. New techniques will be introduced. New facilities will be developed. Not tomorrow, of course. Not next week, or next month. But ABC intends to be a leader in radio and television, and it in-

THE TWO chief executives of the new AB-PT have experience in working together. Edward J. Noble (r), chairman of the finance committee of AB-PT, has served as general chairman of the 1953 Greater New York campaign of the National Foundation for Infantile Paralysis, and Leonard Goldenson (l), president of AB-PT, has been chairman of the New York motion picture industry's part of the March of Dimes. Here Mr. Goldenson presents a check for $49,328.67 which his committee raised to help fight polio.

CHRONOLOGY

Merger Proceedings

May 24, 1951—Plans for merger of corporations announced jointly by Edward J. Noble, ABC Chairman, and Leonard H. Goldenson, UPT President.

May 28, 1951—ABC Board of Directors approves plan for merger.

June 6, 1951—UPT Board of Directors approves plan for merger.

July 27, 1951—Stockholders of both corporations at separate meetings approve plan for merger.

Jan. 15, 1952—FCC opens hearings in Washington on plan for merger.

Nov. 13, 1952—Examiner Leo Resnick of FCC recommends approval of merger.

Jan. 5,1953—FCC holds one day oral arguments in Washington between all parties concerned.

Feb. 9, 1953—FCC approves merger of American Broadcasting - Paramount Theatres Inc.

tends to grow like an oak, not a mushroom. The future began yesterday. So keep your eyes and ears on the *New* ABC."

Mr. Kintner spelled out the aims "in general" as being "to develop new programming and new techniques for both radio and television . . . important programming development in all areas—entertainment, drama, education, news, and variety . . . . [with special attention to] certain program fields where we consider ABC under-developed, namely, situation comedy, general comedy, and dramatic presentations."

Officials also forecast a gradual buildup in the number of hours programmed for the TV network. Some increases were being made before the merger. Program schedules show that about a month ago ABC-TV was programming approximately 27½ hours a week for the network. Since then it has signed, for example, an additional 90 minutes on Tuesday nights (fights, 9-10:30 p.m.).

Among agencies it was felt the TV network in particular could make two specific moves, fairly early in the growth period, to increase its desirability to advertisers: (1) strengthen Friday-night programming around the *Ozzie & Harriet Show*, and (2) build a strong program block around the *Lone Ranger* on Thursday evenings.

While the merger approval set off plans for expansion and development in many areas, the change in ownership is not expected to affect the arrangements instituted a few months ago with Edward Petry Co., John Blair & Co., and Blair-TV for representation of the ABC-owned radio and TV stations in the spot sales field, a spokesman reported.

First Board Meeting

Little more than 24 hours after the merger approval was announced, the new AB-PT board held its first meeting—largely devoted, it was said, to "paper work" relating to the incorporation, with some changes in titles of officers.

Principal UPT additions to the roster of ABC officers are Robert H. O'Brien, who was UPT secretary-treasurer and becomes executive vice president of the broadcasting division; Mr. Weitman, new ABC vice president in charge of programming and talent; Earl J. Hudson, president of UPT's United Detroit Theatres Corp., who becomes vice president in charge of ABC's West Coast Div.; and John Mitchell, manager of WBKB (TV) Chicago under ownership of Balaban & Katz, another UPT subsidiary, who becomes manager of what was formerly ABC's WENR-TV Chicago, which has now switched its call letters to WBKB.

Mr. Mitchell, it was understood, is slated for election to a vice presidency of ABC in addition to his post as manager of WBKB.

With Mr. Hudson's installation as vice president in charge of the ABC western division, William Phillipson, who has been in charge there, will return to network headquarters in New York as an assistant to President Kintner. Ernest Lee Jahncke Jr. continues as ABC vice president and assistant to Mr. Kintner.

Four officers of ABC also are officers of the parent corporations: Mr. O'Brien is financial vice president and secretary of AB-PT; while Mr. Kintner, Mr. Weitman, and Robert H. Hinckley, vice president in charge of the Washington office of ABC, are AB-PT vice presidents (for complete organization charts of AB-PT and ABC Div., see opposite page).

It was made clear that Edward J. Noble, board chairman of ABC as well as owner of some 57% of its stock before the merger, who also is the largest single stockholder of AB-PT (almost 10% of common, 55% of preferred) will be active in the affairs of both the new parent corporation and the broadcasting division. He is chairman of the finance committee of AB-PT.

The board of AB-PT consists of 13 members who formerly sat on the board of UPT, and from ABC's board. They are:

From UPT—H. N. Balaban, A. H. Blank and Robert B. Wilby, heads of UPT theatre operating subsidiaries; John A. Coleman, member of New York Stock Exchange firm of Adler, Coleman & Co.; Charles T. Fisher Jr., president of National Bank of Detroit; E. Chester Gersten, president, Public National Bank & Trust Co. of New York; Mr. Goldenson; Walter W. Gross, UPT vice president and general counsel; Robert L. Huffines Jr., director, Burlington Mills Corp.; William T. Kilborn, president, Flannery Mfg. Co., Pittsburgh; Walter P. Marshall, president, Western Union Telegraph Co.; Mr. O'Brien, and Herbert Schwartz, president, City Stores Inc.

From ABC—Messrs. Noble, Kitner, and Hinckley; Earl E. Anderson, and Owen D. Young, honorary chairman of the board of General Electric Co.

THE NEW LINE-UP

At right is organizational chart showing executives of new AB-PT and ABC Division. Connecting lines between pictures show chains of command.

At the first AB-PT board meeting, held Wednesday, titles of three AB-PT officers were changed: Mr. O'Brien from secretary-treasurer to financial vice president and secretary; Simon B. Siegal, from comptroller to treasurer, and James L. Brown, from assistant treasurer to comptroller and assistant treasurer.

Though ABC will be operated as a division, authorities said, it is not contemplated that a comparable UPT division will be established. Rather, the AB-PT organization will handle UPT activities, including theatre ownership and operation and theatre TV development.

Separate Headquarters

Separate headquarters also will be continued for AB-PT and ABC, with the latter slated to complete the move of its executive offices from the RCA Bldg. to its own quarters at 7 W. 66th St., New York, by about April 1. AB-PT's offices are at the Paramount Bldg., 1501 Broadway, New York.

FCC's announcement of approval of the merger was delayed until after the stock market closing on Monday. ABC common stock, which had closed at 11⅛ that day, jumped quickly Tuesday morning. Trading was suspended to show the change in name. During Tuesday a total of 31,700 shares of the new AB-PT stock were traded, compared to 4,900 of ABC common the day before, and reached a high of 15⅜ before closing at 14⅞, its low for the day. On Wednesday, dealings slackened off—7,200 shares were traded—and the stock dropped a quarter of a point to 14⅝.

Capsule of the Multi-Pronged Paramount Case

HERE'S what the FCC did last week in its eventful decision regarding the year-and-a-half-old Paramount case:

(1) Approved the merger of ABC with United Paramount Theatres Inc. by a vote of five to two. Comr. Hennock vigorously dissented. Comr. Edward M. Webster recommended that the merger approval be held up pending further study of the qualifications of UPT to hold broadcast licenses.

(2) Approved the sale of WBKB (TV) Chicago from UPT to CBS for $6 million. Again Comrs. Hennock and Webster dissented. Also approved the move of WBKB from Ch. 4 to Ch. 2, and dismissed Zenith Radio Corp. application for Ch. 2. To this Chairman Paul A. Walker and Comrs. Hennock and Webster dissented.

(3) Held that Paramount Pictures Corp. controls Allen B. DuMont Labs. Comrs. Rosel H. Hyde and George E. Sterling dissented to this.

(4) Approved the transfers of control of KTLA (TV) Los Angeles from old Paramount Pictures Inc. to new Paramount Pictures Corp., and of WBKB (TV) Chicago from old Paramount Pictures Inc. to new UPT, and of negative control of WSMB-AM-FM New Orlearns from old Paramount Pictures Inc. to UPT. Comr. Webster strenuously opposed these, as did Comr. Hennock. Comr. Eugene H. Merrill opposed transfer of KTLA.

(5) Renewed the licenses of WBKB, WSMB-AM-FM and WABD (TV) New York.

(6) Issued licenses to cover construction permits to KTLA, WTTG (TV) Washington and WDTV (TV) Pittsburgh.

TOBEY CRITICAL OF MERGER APPROVAL

"Grievous" and "shocking" thing, says the chairman of Senate Commerce Committee of merger approval. He sees it as "plague on mass communications" but doesn't contemplate any direct action to upset the FCC decision.

SEN. Charles W. Tobey (R-N. H.), chairman of the powerful Senate Interstate & Foreign Commerce Committee, last Thursday blasted FCC's approval of the ABC-United Paramount Theatres Inc. merger as "a very grievous matter" and violative of the country's anti-trust laws.

In a statement to BROADCASTING • TELECASTING in Chicago, Sen. Tobey said he thought the Justice Dept. should look into the Commission's decision, particularly with respect to its anti-trust implications, and described it as a "plague on mass communications that will haunt the U. S. for years to come."

He asserted that the bringing of mass communications under one roof—that is, theatres, films and television—"is not in the public interest" and declared flatly that the Commission told Examiner Leo Resnick that he could not look at the anti-trust aspects of the proposed wedding of ABC and United Paramount Theatres Inc.

Sen. Tobey, who heads up the radio-minded Senate Commerce Committee in the 83d Congress, backed down on his threat to take action to this extent: He said he still planned full-scale hearings but he had "no idea" as to when they would be scheduled. He intimated that it was rather academic at this time to take any action on the ABC-United Paramount case.

Hearings have been indicated on Sen. Tobey's bill (S 538) which would prohibit the Commission from granting station licenses or permits to those applicants who have been convicted of anti-trust violations—save by special FCC order in instances where the violations have not occurred within the five years prior to application for license.

$80 Million Profit?

It was his understanding, Sen. Tobey continued, that "one of the parties" in the ABC-United Paramount merger case stood to "profit" by about $80 million on the merger and he felt the Justice Dept. should look into the case. He declined to comment specifically on whether he, as chairman of the Senate Commerce Committee, would seek action from the Justice Dept.

The New Hampshire Republican also refused to comment on the Commission's approval of findings that Paramount Pictures controls Allen B. DuMont Labs. He left no doubt, however, that he looked with favor on Comr. Frieda B. Hennock's stand on the decision [she had concurred in such findings] and her position on educational television.

Referring to FCC's denial of Zenith Radio Corp.'s bid for a commercial TV outlet on Chicago's Ch. 2, Sen. Tobey also indicated—without saying so in so many words—that he went along with FCC Chairman Paul A. Walker and Comrs. E. M. Webster and Hennock on their dissent to the Commission's dismissal action.

Sen. Tobey reiterated his "shock" that the Commission sustained Examiner Resnick's initial decision, particularly in view of the recommendations of the Commission's legal staff. He had initially scored the Resnick proposed decision in a telegram from Europe last December while serving as an advisor to UNESCO [B•T, Dec. 8, 1952].

"The Commission told Mr. Resnick that he couldn't look at the anti-trust aspects of this case beyond a certain point," he asserted. "This is a grievous and shocking thing," he said.

Sen. Tobey made his remarks in advance of a news conference in Chicago last Thursday afternoon. He addressed a dinner of the Traffic Club of Chicago that evening.

Zenith May Go to Court On Sale of WBKB (TV) to CBS

PROSPECT that the FCC's action in approving the sale of WBKB (TV) Chicago to CBS for $6 million might end up in court was seen late last week when FCC denied a Zenith Radio Corp. petition for a stay order pending its formal request for reconsideration.

Zenith said it would file a petition for reconsideration not later than Feb. 20, objecting to the Commission's dismissal of its four-year-old application for Ch. 2 in Chicago. Commission had dismissed Zenith's 1948 application on the grounds that WBKB must move to Ch. 2 in line with the new allocations formulated last April [B•T, April 14, 1952] and that Zenith had forfeited its rights in the channel by failing to participate in the allocations proceedings and in the WBKB renewal hearings (part of the Paramount case).

Late Thursday, the FCC denied Zenith's Wednesday petition for stay, but explained that it would not issue an authorization for WBKB to move to Ch. 2 before considering Zenith's petition for reconsideration if filed not later than Feb. 20.

Zenith, which has been using Ch. 2 for experimental purposes (including most lately Phonevision tests) since 1939, was quick to protest its "loss."

Comdr. E. F. McDonald Jr., Zenith president, stated that "if this FCC decision is permitted to stand, it means that Balaban & Katz has sold for $6 million that which we believe to be our property." Zenith held a CP for commercial TV on Ch. 2 in 1946 but relinquished it during the first color TV hearing in 1946-'47.

WBKB Sale Part of Merger

Since the sale of WBKB to CBS was part of the merger arrangements—in order for AB-PT to comply with the FCC's duopoly rules prohibiting the same company from owning more than one TV station in the same market—the dissents of Comrs. Frieda B. Hennock and Edward M. Webster applied to this aspect of the merger, too. In addition Chairman Paul A. Walker dissented to the original Zenith dismissal decision, and he again dissented to the Commission denial of Zenith's petition for stay. Miss Hennock did not participate, and Comr. Webster objected to part of last Thursday's denial.

H. Leslie Atlass, CBS Central Division vice

Background, Growth of ABC to, Including New Merger

PROGENITOR of today's ABC was the Blue Network of NBC which began operating in 1927. In 1941, the FCC issued its now famous Chain Broadcast Rules which, in one provision, forced NBC to divest itself of one of its two networks (the other was then called the Red Network, which became the present NBC network).

In 1943, the Blue Network was bought by Life Saver tycoon Edward J. Noble for $8 million. At that time it consisted of 715 employes, 168 radio affiliates and 2½ owned and operated stations. The Blue Network's net sales in that year were $18,819,988.

In the nine years since 1943, ABC has invested $6 million in improving its radio facilities and $11.5 million on TV facilities. It now consists of more than 2,500 employes, 355 radio and 81 TV affiliates which include five owned and operated AM-FM and TV stations. They are WABC New York, WENR Chicago, WXYZ Detroit, KECA Los Angeles and KGO San Francisco. Report filed with New York Stock Exchange last week showed that for nine months ending Sept. 30, 1952, ABC took an estimated loss of $659,000. ABC's highest income was $1.5 million before taxes in 1947. As of Dec. 30, 1951, ABC's long term debt stood at $9,790,000. Of ABC's 1,689,017 outstanding shares, Mr. Noble owns 901,667 shares, or 53.38%. ABC has never paid a dividend nor has Mr. Noble ever received a salary as chairman of the board.

As of Sept. 30, 1951, ABC had total assets of $26,808,211, with current assets of $8,006,201. Total liabilities of ABC at that time was $12,571,091, with current liabilities of $4,529,520.

UPT, set up in 1950 as the theatre-holding company formed from the old Paramount Pictures Inc., had, as of Sept. 30, 1951, total assets of $119,703,840, of which $39,471,575 were current assets, and total liabilities of $58,591,433, of which $15,165,-161 were current liabilities.

Consolidated 1951 UPT earnings were $10,705,000 including capital gains (after taxes) of $4,002,000. For the first nine months of 1952, UPT's consolidated earnings were $8,339,000. Under the terms of the Consent Decree UPT will own about 650 theatres throughout the U. S.; at the present time it is still divesting itself of theatres in accordance with court orders.

Under a pro-forma balance sheet as of Sept. 30, 1951, American Broadcasting-Paramount Theatres Inc. showed total assets of $152,084,955, with $52,945,902 as current assets, and current liabilities of $21,143,633, long term liabilities of $50,869,675, a capital surplus of $33,301,771 and an earned surplus of $18,031,522.

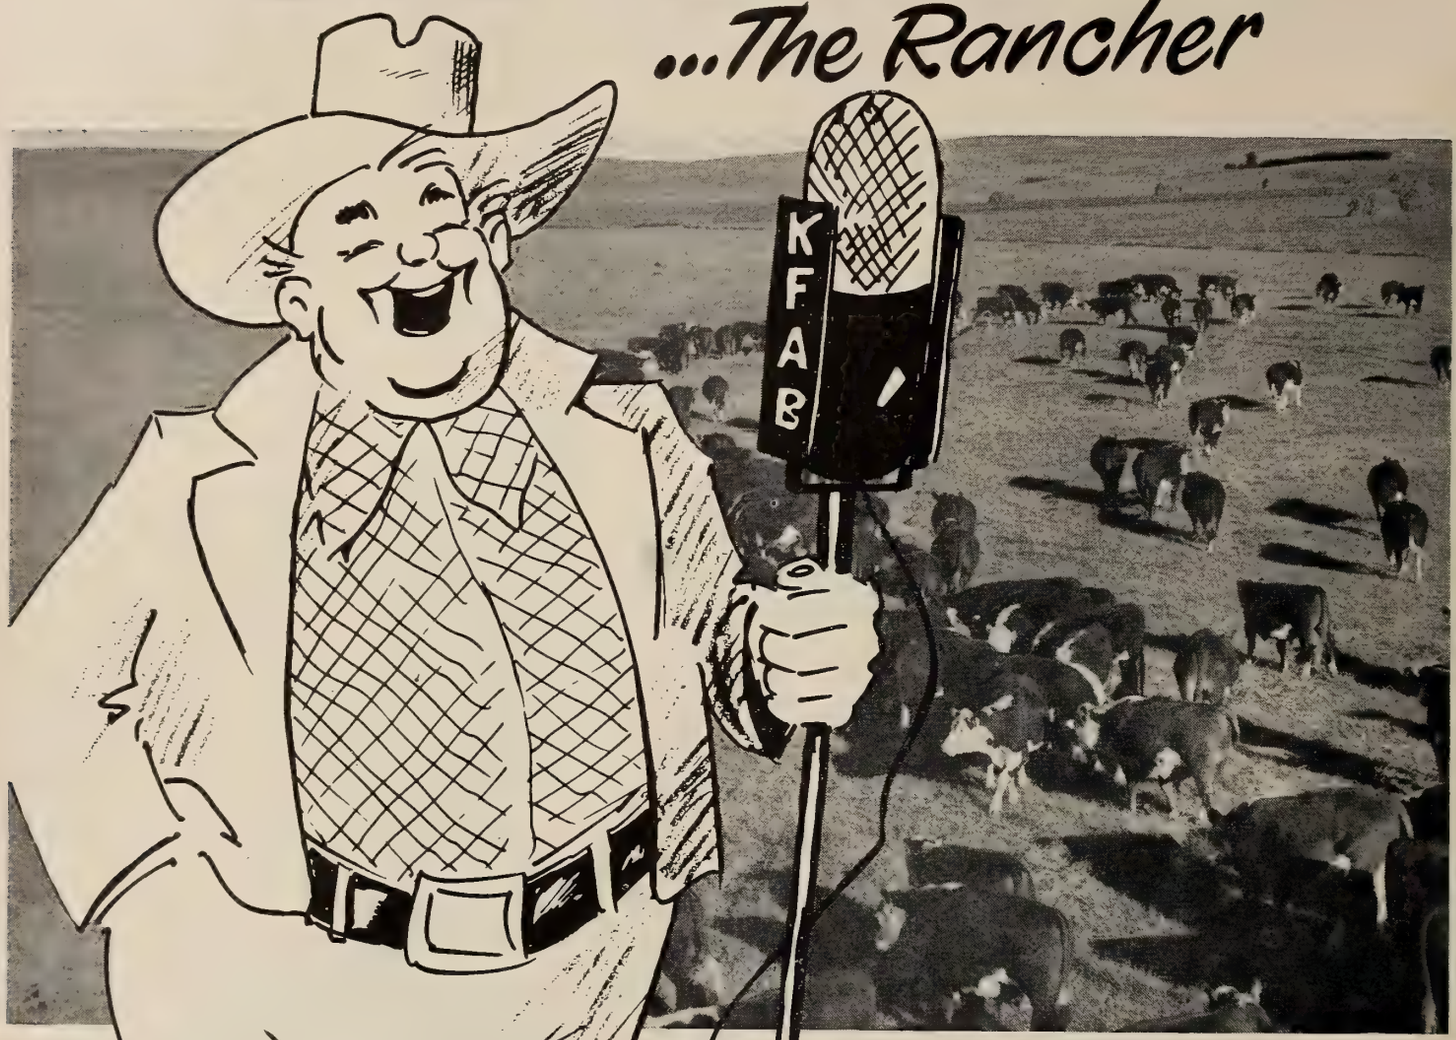
The 3,260,228 common shares of UPT will be exchanged for the equivalent common shares of AB-PT. ABC stockholders will receive for each share of their stock $7.50 of common AB-PT stock measured at $19 per share and $7.20 of 5% nonvoting $20 par preferred AB-PT stock. This means that an ABC stockholder with 100 shares will receive 39 9/19 shares of AB-PT common and 36 shares of AB-PT preferred. Mr. Noble and his family will hold just under 10% of AB-PT common and 55% of AB-PT preferred.

AB-PT now owns five and a half AM and FM stations (half interest in WSMB-AM-FM New Orleans), five TV stations, and about 650 theatres.

Like ducks take to water

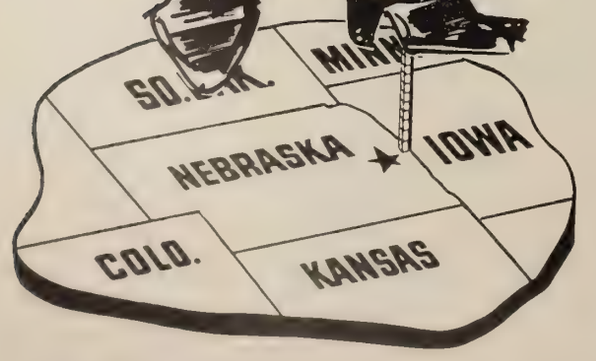
Baltimore merchants take to W-I-T-H just like ducks take to water. W-I-T-H regularly carries the advertising of twice as many of them as any other station in town.

For a real good reason! W-I-T-H delivers more listeners-per-dollar than any other radio or TV station in Baltimore. And that means low-cost results. W-I-T-H can do it for you too! Get all the details from your Forjoe man.



IN BALTIMORE **WITH**

TOM TINSLEY, PRESIDENT



REPRESENTED BY FORJOE & COMPANY

BIG MIKE
...The Rancher

Livestock represents a big industry in Nebraska and the Midwest Empire. Cherry County in Nebraska produces more cattle than any other comparable area in the world. From the range lands to the Omaha Stockyards go some one and three-quarter million head of cattle every year. The Union Stockyards in Omaha, the world's largest cattle market, is the index to a billion-dollar industry—livestock raising in the great Midwest Empire. The men and women responsible for this big industry depend on BIG MIKE, the 50,000 watt KFAB, for service and entertainment all over this area. A BIG MIKE representative—Free & Peters—will be glad to tell you the story, or contact Harry Burke, General Manager.

BIG MIKE is the physical trademark of KFAB, Nebraska's most powerful station.

THE MIDWEST-EMPIRE STATION

KFAB

1110 K.C.

50,000 WATTS OMAHA CBS RADIO

president and general manager of WBBM, said that CBS had taken over the facilities of WBKB last Monday shortly after the merger was approved.

WBBM-TV officially bowed in last Thursday morning at 9 a.m. CST on the old WBKB Ch. 4.

CBS-TV is planning to build the WBBM-TV staff around present WBKB personnel who have indicated a desire to remain at their positions.

While the present plan is to remain in the State-Lake Bldg., Mr. Atlass has said that WBBM-TV eventually will move to other quarters in close proximity to Chicago's downtown Loop area. CBS Radio facilities are located in the Wrigley Bldg., at 400 N. Michigan Ave.

As part of the sale-merger John Mitchell, present WBKB manager, moves to AB-PT's Chicago TV outlet. Others slated to shift are Sterling Quinlan, WBKB program manager, and William Kusack, chief engineer, though there was no official confirmation from ABC on the positions they would assume.

WENR-TV officially became WBKB (TV) last Thursday morning at the same time WBBM-TV call letters debuted on viewer's screens. It will remain on Ch. 7 under the new AB-PT banner.

WBBM-TV Staff Appointments

CBS was planning to announce key appointments to the WBBM-TV staff to replace Messrs. Mitchell, Quinlan and Kusack. It was understood Thursday that Al Bland, WBBM program manager, Eugene Eubanks, assistant program director, and other executives were involved in contemplated switches.

WENR-TV began telecasting Sept. 17, 1948 and was the second of the five ABC O and O TV stations to be launched by the network. Call letters of WBKB have been associated with the second oldest TV station in the country and it was the pioneer TV outlet in Chicago under Capt. William C. Eddy. WBKB started operating experimentally in 1939, commercially in September 1946 and has been affiliated with CBS.

Approval of the merger also means the termination of a temporary "convenience" contract between CBS-TV and WGN-TV Chicago for certain of the network's shows which WBKB could not clear. WGN-TV has been carrying a block of CBS-TV morning shows from 10:30 a.m. to noon. The morning block comprises *Strike It Rich, Bride & Groom, Love of Life, Search for Tomorrow* and *Guiding Light*. WGN-TV's primary affiliation is with the DuMont TV Network.

WGN-TV is expected to carry the CBS-TV shows for at least another two months. The network is required to give 60 days notice of cancellation of its affiliation contract with the *Chicago Tribune* TV outlet.

Statements by Key Figures Concerned with the Decision

Leonard H. Goldenson, AB-PT president, said:

We are truly pleased that the FCC has authorized this merger. With this approval comes a great responsibility. The American public is looking to a strengthened ABC for new and more varied programming on both radio and television. More entertaining, interesting and informative programs—these are the goals. It will, of course, take time, but we shall do our utmost in the coming years to keep faith with the public and the many radio and television station affiliates, stockholders and employees who see in this merger an opportunity to build a vigorous, public minded and profitable broadcasting operation.

Edward J. Noble, chairman of the board of ABC, who is now chairman of the finance committee of AB-PT, stated that the merger represents a major step forward in the development of ABC into a leading home broadcasting company. He said.

Starting in 1943, ABC has grown from a business of $12,000,000 to one of about $60,000,000. During this period, ABC, strengthened by public financing, acquired KECA in Los Angeles and WXYZ in Detroit, built five television stations and created modern radio and television plants in New York, Chicago, Detroit, Los Angeles and San Francisco.

Through this merger with United Paramount Theatres, Inc., ABC has found a company with available working capital for aggressive, effective competition in the home radio and television broadcast field, a management familiar with show business and with television through its television station, WBKB in Chicago, and a company very interested in the future of radio and television.

As a very substantial stockholder in the new American Broadcasting-Paramount Theatres, Inc., and as Chairman of its Finance Committee, I propose to continue active participation in the management of both the over-all company and the home broadcasting division, the American Broadcasting Company.

Robert E. Kintner, who continues as president of the American Broadcasting Company, a division of the merged company, said:

We are naturally gratified at the action of the FCC in approving the merger in the public interest. This is an action we have long awaited and one which will give the American Broadcasting Company the potential of more rapid and greater growth in the home broadcasting field. With added capital and with strengthened manpower, ABC will now have the weapons with which to compete more effectively. We recognize and accept eagerly the opportunity given to ABC through this merger to stimulate more vigorous competition within the radio-television broadcasting industry. This, of course, will be of immense importance not only to the industry but to the audience served by both radio and television and its advertisers. To achieve our high goals we must proceed slowly in order to build soundly and in a business-like manner.

Under the plans of the merger, the American Broadcasting Company proposes to develop new programming and new techniques for both radio and television. We plan important programming development in all areas—entertainment, drama, education, news and variety. We will explore particularly certain program fields where we consider ABC under-developed, namely, situation comedy, general comedy and dramatic presentations. These in general are our aims. We hope to achieve them through steady, consistent development and growth.

H. Leslie Atlass, vice president of CBS' Central Division and general manager of WBBM Chicago, issued the following statement:

We are grateful that the FCC has seen fit to grant to the CBS Television Network an outlet in Chicago. To us this means that we will better be able to bring to the people of Chicago and environs the same high calibre programs that CBS has always provided its vast audience. We now have a responsibility that we have long wished to assume. Our audience may be assured that we will use our facilities to bring them the best in television education and entertainment.

Competitive Factor Noted By FCC as in Public Interest

IT IS in the public interest to strengthen ABC vis-a-vis NBC and CBS, the FCC determined last week in approving the merger of ABC with United Paramount Theatres Inc.

In this, the Commission followed the reasoning of Examiner Leo Resnick, whose initial decision recommended a grant of the merger [B•T, Nov. 17, 1952].

But, the FCC's majority decision brought a grim and angry dissent from Comr. Frieda B. Hennock. Not opposing the merger, Comr. Edward M. Webster felt it should be held in abeyance until further examination had been made of the qualifications of UPT to hold broadcast licenses.

In its majority opinion, the Commission referred to the 1941 Chain Broadcast Rules which were drawn to develop competition to the dominant NBC and CBS networks. The "superior earning power and working capital" of other networks were also referred to by the Commission majority.

Structure of Rival Networks

The fact that NBC was part of giant RCA, that CBS was in the record and TV set manufacturing business, that DuMont was in the electronics and TV set manufacturing business, that MBS was owned by companies with a diversification of interests (General Tire & Rubber Co. is the largest stockholder), all of this was mentioned by the Commission majority as reasons for sympathetically considering ABC's plight.

"The extensive financial resources of the other networks enable them to take greater program risks and to erect and staff more elaborate facilities," the Commission opinion read. "The lack of adequate and diversified resources has been the principal obstacle which has precluded ABC in the past from providing the vigorous competition which might have been expected from the establishment of ABC as an independent competitive network. Because of the necessity of investing its limited funds in physical improvements, ABC has been without the other funds needed for the development of a program service equal to that of its competitors . . . "

Merger would permit ABC to strengthen both radio and TV programming, take chances on program development, the Commission said.

Competition between theatres and TV for audience and product was acknowledged by the Commission, but determined not to be crucial.

Although both motion picture exhibition and radio and TV vie for audience, there is a difference, the Commission held.

Theatres compete for the "outside" audience with other outside activities, the Commission said. Radio and TV, on the other hand, compete for "in home" attention.

There is little if any competition for product, the Commission determined. Theatres are in market for feature pictures, TV for specially made film. TV cannot compete with theatres for features because of (1) rental costs, (2) union restrictions, and (3) question of TV rights to film properties, the FCC majority pointed out.

AB-PT Purchasing Power

When and if the day comes that feature length pictures are released to theatres and TV "there is a theoretical possibility that American Broadcasting-Paramount Theatres Inc. would have a purchasing power in connection with the acquisition of films which could be used to its advantage and to the disadvantage of its competitors," the Commission admitted.

However, mitigating against this, the Commission added, was the fact that feature films were only one type of TV programming and were subject to certain limitations and disadvantages when used on TV. Also that increased use of films made specially for TV

For excerpts of decision see "For The Record", page 115.

Here in the San Francisco Bay Area

(ONE OF "FIRST 10" MARKETS IN TV SETS)

tv

is a major advertising medium... and the major TV station in the market is

KRON-tv

which operates on Channel 4 and puts more eyes on SPOTS

Most Advertisers! Rorabaugh reports that KRON-TV serves the largest number of advertisers in this 3-station market

Biggest Audience! Pulse shows that KRON-TV offers the greatest percentage of audience, day and night, and all week

Best Shows! Pulse counts more top-rated shows on KRON-TV than on the other two San Francisco stations *combined*

Clearest Coverage! The market's highest antenna sends KRON-TV's signal throughout the Bay Area market, deep into Northern and Central California

It has pioneered in San Francisco TV (Channel 4) since November 15, 1949.

Air view of Coit Tower atop Telegraph Hill. From "The Hill" early-day San Franciscans watched for ships entering the Golden Gate

may make less desirable feature films made for theatre exhibition. And, finally, the FCC said, AB-PT promised that there would be no package or combination deals in the procuring of films for theatres and TV.

Fear that AB-PT might attempt to depress TV to the advantage of its theatre holdings was held to be unfounded by the Commission majority. There still would be competition from other TV stations and networks, the Commission pointed out.

FCC majority also found that the merged company will not own or control stories, nor produce or distribute feature films for theatres.

That there is a possible conflict between theatre TV and home TV was acknowledged by the Commission. It also saw a more direct possible conflict between theatre TV and subscription TV—for product.

But, the FCC said, it does not intend to anticipate the future of theatre TV or of subscription TV.

Miss Hennock's lengthy dissent focused almost entirely on the potential monopoly and competitive aspects of the merger.

Tone of her opposition was expressed in her opening paragraphs:

. . . the Commission has built what was at most a foothill of difficulty into a mountain of trouble for itself and our entire broadcasting system. . . . In areas without established precedent, the Commission has taken an undue risk with the future of broadcasting by permitting the introduction therein of a new and potentially deleterious force and by setting in motion a series of events that must be productive of harmful future consequences upon our radio and television services . . . such consequences will hamper and stunt the growth of that most vigorous and flourishing competitive broadcast system which the American people need and desire.

Miss Hennock devoted several sections of her opposition to the thesis that the merger conflicts with Sec. 7 of the Clayton Act. This has to do with the possible lessening of competition when two firms consolidate.

Not in Public Interest

She also vigorously maintained that the parties to the merger case failed to prove that the amalgamation was in the public interest and that UPT failed to prove that it is qualified to hold broadcast licenses.

Cassandra-like, Miss Hennock claimed that Commission approval of the merger "portends harmful future consequences" for broadcasting, competition between broadcasting and other mass media of communications, sources of broadcast programming, and the degree and quality of broadcasting services.

TV and motion pictures are "in fundamental and violent competition with one another" for audience and product, she maintained.

Her argument ran along these lines: The public has just so much leisure time. Although there are some differences, TV and theatre exhibition are much alike; they are both visual and aural presentations. TV has had a "substantial" and generally adverse economic effect on both motion picture exhibition and production. Competition between the two media may reasonably be expected to become far more substantial in the future.

Commission attitude that feature films are not for TV are belied by the growing popularity of just such programs on TV, Miss Hennock insisted. With the growth of TV, broadcasters may soon find it economically feasible to bid for feature films, Miss Hennock predicted.

There is a "substantial risk," Miss Hennock maintained, that the merged company may engage in restrictive practice against TV "particularly so when the company's greater investments in theatres may be in an especially vulnerable or precarious position. . . . It is simply too much to expect full, vigorous and unrestricted competition between the separate arms of one company at the expense of consequent disadvantage and loss to the company's total operations."

To the Commission's view that such restrictive practices would only rebound to AB-PT's disadvantage since there would be competition from other TV stations and networks, Miss Hennock objected.

Such "external" competition did not work out within the motion picture industry itself, she said alluding to the anti-trust history of that industry. In the face of a monopoly situation, she said, "It is just as likely that others in these fields will themselves seek to adopt the position and techniques of the monopolists. Here, as elsewhere, the existence of competition often spurs monoply to even greater efforts toward the reduction and elimination of competition."

'Huge Multimedia Combine'

She called the merger "a huge combine of multimedia economic power against which other TV networks and stations will find it difficult to compete on any basis even approaching fairness and equality."

She declared that the merged company's "massive" purchasing power for films will make its presence felt against its telecasting competitors. Some day, TV and exhibitors will be buying films from same sources, she predicted. Then the merged company's "power from volume" will be to its advantage with suppliers and also in securing and keeping TV affiliates, she maintained.

Merger approval is unfair to DuMont, Miss Hennock asserted. It puts that network in the position of competing with three dominant networks, instead of two as heretofore, she said.

Taking a broad view of the possible effects of the merger, Miss Hennock foresaw the amalgamation of the motion picture and TV industries. Other companies—both motion picture and TV—will not live with "competitive disadvantages" inherent in the ABC-UPT merger, she said.

Merger approval also conflicts with FCC policy on diversification of ownership, Miss Hennock declared. It also may violate the 1948 Supreme Court decision on the motion picture anti-trust suit which precludes motion picture producers from owning theatres and vice versa, she said.

Thus, she pointed out, AB-PT owns theatres and a TV network which is in the production business. Also Paramount Pictures owns a station and a network (kinescope recordings of KTLA programs syndicated to other stations) which might be considered exhibition and it also produces motion pictures.

"Today we open a vast Pandora's Box," Miss Hennock glumly declared, "one forbidding in aspect and one that will not easily be shut again. . . . It may possibly forecast the bleak day of complete elimination of the small or moderately sized and fully independent operator from all of the broadcasting, particularly television."

Although Comr. Webster voted against the merger, he did not oppose it on the same grounds as Miss Hennock. Comr. Webster did not think the Commission had fully explored the anti-trust activities of Paramount Pictures and of UPT. Therefore, he felt the merger should be held in abeyance until the anti-trust record had been more fully examined.

Comr. Merrill had this comment on the subject of the merger, which he favored: That Congress "might consider it advisable to give further guidance to the Commission in the discharge of its functions in this relatively young, vigorous and rapidly growing TV field."

FCC Finds Paramount Pictures Controls Allen B. DuMont Labs.

IN the only reversal of the hearing examiner's initial decision [B•T, Nov. 17, 1952], the FCC found that Paramount Pictures Corp. controls Allen B. DuMont Labs. through its unique position as sole Class B stockholder and second largest Class A shareholder.

Dissenting from this position—which follows a 1946 and 1948 FCC opinion along the same lines—were Comrs. Rosel H. Hyde and George E. Sterling. They felt, as did the examiner, that for all practical purposes, Dr. DuMont and his associates dominate the company's activities.

FCC decision means that Paramount Pictures and DuMont between them are limited to not more than five TV stations. FCC regulations prohibit the same entity from owning more than five TV stations.

Undetermined at week's end was whether DuMont would take the decision to court. Dr. DuMont refused to discuss the decision. Col. William A. Roberts, DuMont's Washington counsel, was on a case in Nevada and was not expected back in Washington until the weekend. It was presumed that a statement would be issued after conferences between Dr. DuMont and Col. Roberts.

Some observers question whether DuMont has anything to go to court on since its applications were granted.

Nub of the Commission's decision on the control issue was contained in this sentence of the conclusions:

"The rights which Paramount holds in DuMont constitutes both negative control of important phases of DuMont's corporate existence and potential affirmative control over all phases."

Owns All B Stock, 2.4% A Stock

Paramount Pictures owns all of the 560,000 shares of Class B stock, the Commission pointed out. It also owns 43,200 shares (2.4%) of the Class A stock, which, next to Dr. DuMont's 3%, is the largest Class A group, it said. Due to its Class B holdings, it names three of the eight DuMont directors and also the secretary, treasurer and assistant treasurer, the conclusions continued. FCC said:

The practical consequences of these facts in terms of influence, and potential and negative control is clear. . . . No amendment can be made to the Certificate of Incorporation, nor can any other provision affecting the voting or other rights and privileges of either class of stock he made without affirmative vote of Paramount's B stock.

The Commission said that Paramount from the beginning of its participation in DuMont in 1938 assured itself of a major voice in DuMont's affairs.

"This record, therefore, shows that as a matter of basic organization Paramount has been given a dominating position in DuMont which sets it apart, in terms of influence, from all other stockholders," said the Commission.

Webster Dissents Bitterly In KTLA and WBKB Approvals

SURPRISE finding in the Paramount case was that old Paramount Pictures Inc. violated the FCC regulations by not seeking FCC permission before transferring KTLA (TV) Los Angeles and WBKB (TV) Chicago to new Paramount Pictures Corp. and UPT.

But, said the Commission, it could not believe that this action was willful, and therefore it granted the license applications requested.

This brought one of the most indignant dissents in the whole case—that of Comr. Edward M. Webster.

Comr. Webster maintained that Paramount Pictures had chosen voluntarily to reorganize following the 1948 Supreme Court decision. Since it was voluntary, Commission rules required that Paramount seek FCC approval of the transfers of the two stations (plus negative control of WSMB-AM-FM New Orleans) before effecting such changeover.

What aroused Comr. Webster even more was that the FCC, after finding that Paramount had violated Commission rules, nevertheless granted the license applications.

Paramount's Clear Record Since '49 Decree Pointed Up

SINCE the 1949 Consent Decree, which followed the 1948 Supreme Court decision in the long-drawn-out motion picture anti-trust suit, Paramount Pictures has put its house in order. Therefore, it and UPT have no anti-trust taint since 1948 and are qualified to be licensees.

That is what the FCC majority found on the anti-trust issues of the Paramount case. The 1948 cut-off date for anti-trust violations was ordered by the Commission during the hearing last August after pleas by ABC and UPT for means of expediting the merger cases. Comrs. Frieda B. Hennock and George S. Sterling did not participate in that decision.

The Commission majority also found that Paramount Pictures practiced no restrictive measures regarding the use of feature films on TV, but that lack of full-scale use of features on TV resulted from the economics of theatre exhibition, which brought returns TV could not hope to meet. The Commission also declared that withholding of features from TV was in part due to union restrictions and the question of TV rights.

Neither Paramount Pictures nor UPT have discriminated against TV in story properties and talent, the Commission held. Again it was a question of economics.

This called forth dissents from Comrs. Hennock and E. M. Webster, and a partial objection from Comr. Eugene H. Merrill.

Comr. Hennock's opposition was most intensive. She claimed that the Commission's August order deleting from consideration Paramount's anti-trust history prior to 1948 "eviscerated" the anti-trust issue and reduced the record to a "nullity."

Even with the record excised of pre-1948 monopoly and restraint of competition considerations, Miss Hennock claimed that it was incomplete and inconclusive regarding post-1948 anti-trust suits.

Nor has the record been cleaned up regarding conflicting testimony, she asserted.

Point Miss Hennock made—and in this she was joined by Comr. Webster—was that it behooved the examiner to permit the Broadcast Bureau to delve into pre-1948 anti-trust violations if it could prove continuing violations.

In this, they were joined by Comr. Merrill.

SOAPS VS. DETERGENTS; UPS AD DRIVES

Fight for supremacy in the cleanser field reaps big billings for broadcast media.

RISING BATTLE for sales between soaps and detergents is resulting in a clean victory for radio and television.

In a rivalry that promises to gain still more intensity, the two contesting forms of cleansers are enlisting an increasing artillery of radio and TV spots and network shows to pound home the superiority of their respective wares.

This intra-product competition, moreover, promises to accelerate even more the struggle which already is driving radio and TV billings to near record highs in the soap-detergent arena.

Among the soaps, B•T learned, such products as Silver Dust, Rinso and Duz are pouring additional money into radio and TV.

The detergents—including Fab, Cheer, Dreft, Surf and Tide—are retaliating with escalated expenditures of their own.

As one of the battle sidelights, it was reported that one soap, Super Suds, was considering a change to a detergent form.

The specific business maneuvers of the various products are as follows:

Lever Bros.' Silver Dust will start a 52-week campaign in 100 markets effective mid-February and early March. Sullivan, Stauffer, Colwell & Bayles, New York, is the agency.

Lever's Lux Flakes, a soap, through J. Walter Thompson Co., New York, is switching its *Lux Video Theatre* on CBS-TV from Monday to Thursday, 9-9:30 p.m. EST (replacing *Biff Baker,* cancelled by American Tobacco Co.) in an attempt to get a better rating.

Procter & Gamble's Cheer, one of the newest detergents on the market, through Young & Rubicam, New York, is placing a national spot campaign starting March 3 in 100 radio and 20 TV markets.

Procter & Gamble's Duz, a soap, has bought sponsorship of three quarter-hours a week on *The Garry Moore Show* on CBS-TV, effective Feb. 10 [B•T, Feb. 9].

P&G's Dreft, a synthetic detergent mainly used for dishes, is plunging a considerable budget into a large spot announcement campaign estimated at more than 100 markets, starting this month for 13 weeks. Dancer-Fitzgerald-Sample, New York, is the agency.

Lever's Rinso is buying its 100-market radio spot announcement campaign for five weeks, using four and eight-second announcements, wherever stations agree to the "midget spots" [B•T, Jan. 26]. The advertiser was the first to buy a block of station identification announcements under WCBS New York's new identification package plan (five seconds) starting Feb. 9. Hewitt, Ogilvy, Benson & Mather, New York, is the agency.

P&G's Tide, detergent, continues to spend about $8 million in advertising, including sponsorship of a half-hour show featuring Red Skelton on Sundays on NBC-TV, and three quarter-hours a week on NBC-TV. Tide also uses spots for supplementary purposes. Benton & Bowles, New York, is the agency.

Detergents Inc. (All), a detergent used especially for washing machines, started a spot radio campaign in mid-January and mid-February on about 25 stations, with until-forbid contracts. Mumm, Mullay & Nichols, Columbus, is the agency, whose New York office, Wyatt & Schuebel, placed the campaign.

Lever's Surf, a detergent, promotes its merits along with other Lever brands on the following network shows: *Hawkins Falls,* five times weekly on NBC-TV; Arthur Godfrey, quarter-hour telecasts on CBS-TV, the radio portion being sponsored on CBS Radio by the firm's Breeze (a detergent); *Lux Radio Theatre* on CBS Radio; *House Party* on CBS-TV, and *Aunt Jenny* on CBS Radio.

Colgate-Palmolive-Peet's two entries in the detergent field, Vel and Fab, are heavy users of spot radio through William Esty Co., New York.

Boxing on TV Insured

TO HELP offset any loss to the TV sponsor as a result of a possible cancellation of a scheduled boxing match between Carl (Bobo) Olson and Norman Hayes in Boston Garden, Ellington & Co., New York, agency for *Saturday Night Fights,* on behalf of Bayuk Cigars Inc., insured the match for $100,000.

The decision to obtain the policy, according to Jesse T. Ellington, agency president, was made because the first two bouts of the new TV boxing series, scheduled on ABC-TV, were cancelled because of injuries to boxing principals.

$600,000 for TV Spot Hinges On Fla. Legislature Tax Vote

INSERTING a big "if"—if the money is made available—in its move to increase next year's appropriation for use of TV spots in promotion of Florida grapefruit, the Florida Citrus Commission meeting in Lakeland, Fla., Feb. 11 voted to spend $600,000 for TV spots starring "Miss America" during the fiscal year beginning June 1.

Time between 6 and 9 p.m. will be sought on CBS-TV and NBC stations (or other outlets where desirable) in markets selected by the agency. Filmed 20-second spots would be used three times a week or oftener.

In recommending the $600,000 appropriation, the commission emphasized that the sum would become available only through an increase in taxes on grapefruit, which would have to be voted by the Florida Legislature during its six-week session beginning next month in Tallahassee.

The group authorized its agency, J. Walter Thompson Co., New York, to "start buying time immediately" and to use up to $75,000 between now and June 30. This money presumably would come from cancellations of current TV and radio grapefruit advertising.

The Citrus Commission is spending approximately $700,000 during the current year for all grapefruit advertising in all media.

In a separate action, the Citrus Commission voted to cancel the Saturday morning TV show *Happy's Party* in three cities—New York, Detroit, and Washington—effective with the end of the present 13-week period. The show will be continued in Pittsburgh only.

The cutback was sparked by an expected scarcity of advertising funds during the current season. A reduction of approximately $115,000 is expected because of the downward revision of the Dept. of Agriculture's estimate of this season's Florida citrus crop.

YEARS of RESULTS . . . . From RADIO and NEWS!

★ 100 per cent distribution for Polar Bear Coffee in the Fort Smith Trade area is proof of results for the Noon News, now in its 23rd consecutive year on KFPW . . . under the same sponsorship. Left to right, celebrating the 7,000th broadcast of Polar Bear Coffee News—J. W. Davis, sales manager, Griffin Grocery Co.; James C. Leake, vice president; Dwight Sample, manager, Griffin Grocery Co., Fort Smith, and Pat Garner, veteran news chief of KFPW. Inset, John T. Griffin, president of Griffin Grocery Co., makers of Polar Bear Coffee.

★ One of KTUL's staunchest advertisers is Harry Clarke of Clarke's Good Clothes in Tulsa, who has sponsored "Tomorrow's News Tonight" every night at 10:00 for 15 years. Taxiposter held by Newscaster Ed Neibling, left, and Clothier Clarke heralds longevity of newscast. Plaque on wall was awarded KTUL and Clarke last March by BAB as second prize in the national "Radio Gets Results" contest. Clarke's has advertised continuously on KTUL since a week after the station went on the air in 1934.

JOHN ESAU—Vice President, General Manager

AVERY-KNODEL, Inc., Nat'l Representatives

AFFILIATED WITH KOMA, OKLAHOMA CITY

YEAR-LONG contract for Frederic W. Ziv show, *Favorite Story*, on WNBW (TV) Washington is completed by (seated, l to r): Woodrow Hellmuth, president, U. S. Metals Products Corp. and Capital Supply Co.; Paul Lynn Heller, president of the agency of the same name; standing, Gerald M. Feld, agency account executive; Bill Dothard, Ziv district representative, and Tony Mielke, salesman for the television station in Washington.

STATION, AGENCY EXPERTS ANALYZE RADIO AT SEMINAR IN WASHINGTON

BAB's Sweeney cites department stores as great source of untapped revenue for radio, while officials describe operation of various classes of stations and agency executives define best use of the medium.

LOCAL RADIO's greatest potential revenue lies in the department store field, and the medium's biggest gains in the next two years will be with this kind of advertiser. This assertion by Kevin Sweeney, vice president of Broadcast Advertising Bureau, was made to members of the Washington (D. C.) Advertising Club Wednesday.

He warned that station executives must understand the retailer's problems and check department store copy closely to reap the greatest rewards.

Radio itself is responsible for the lack of department store revenue, and only a management eager to find new techniques can change the present box score, Mr. Sweeney said. He reported that "no more than a dozen" department stores in the country use radio with the same intensity as newspapers.

Stores will come into the sponsor-fold, however, because "we have learned more about how to use radio in the past five years than in the previous 25."

Mr. Sweeney keyed a panel discussion by station managers, representing various classes of operation, and another by agency executives, outlining their usage of radio. Pointing to "bargains" in their own types of operation were John S. Hayes, president, WTOP Inc. (CBS), for network; Robert Rogers, vice president and general manager, WGMS (specialized), and Ben E. Wilbur, sales manager, WOL (independent), all Washington.

Panel chairman was Ben Strouse, general manager of WWDC-AM-FM.

Alvin Miller, vice president of Cohen & Miller agency, introduced Washington agency panelists who discussed their use of radio. They were Harwood Martin, owner of the agency of the same name; Ruth Graze, account executive and timebuyer, Alvin Epstein Adv.; Jeff Abel, Henry Kaufman & Assoc., and M. Belmont Ver Standig, owner of the agency of that name.

Joseph L. Brechner, general manager of WGAY-AM-FM Silver Spring, Md., was in charge of the radio seminar. A similar session, concerning television, is planned by the group in March.

RCA Victor to Sponsor 'Oscar' Awards Simulcast

RCA VICTOR DIV., paying $100,000 for exclusive rights, will simulcast the Academy of Motion Picture Arts & Sciences 25th annual "Oscar" awards presentation on NBC from Hollywood Pantages Theatre March 19, 10:30-11:30 p.m. EST. Only institutional commercial copy will be used.

The AMPAS ceremonies have been heard on ABC radio in past years, but this is the first time the major studios have allowed a telecast of the event.

M-G-M, long a TV holdout, will permit contract talent to appear before the cameras during the ceremonies, the contention being they are participating in a "news event" and not performing as actors. Other major studios who withhold contract players from video also have indicated full cooperation. Sale of broadcast rights for the first time eliminates necessity for movie studios to share costs of the presentation.

Bob Welch, former Paramount Pictures producer and now an NBC-TV producer and idea man, will supervise production of the simulcast.

Toni's 'Biggest' Campaign Dominated by Radio and TV

Chicago firm, with accounts split among four agencies, plans plus $12 million campaign for 1953, with radio-TV to receive up to $10 million.

WITH its advertising budget split among four Chicago agencies after resignation of the account by Foote, Cone & Belding last December, Toni Div. of Gillette Co. last week was planning the most ambitious advertising campaign in its history.

It was understood radio will derive approximately $3 million and television $6.4 to $6.5 million of the overall budget estimated at far above $12 million. Toni's radio-TV budget was estimated at plus $3.5 million last December. No addition of programs is planned immediately, although one or two changes are anticipated on radio. Spot radio and television also will be used. The firm also plans to introduce new products.

R. N. W. Harris, Toni president, said the firm's 1953 budget will be its heaviest in history, with the biggest share in radio and television. Toni's 1952 budget had been estimated at $10 to $12 million.

Supplementing radio and television will be extensive schedules in newspapers and national magazines.

The budget includes an appreciable share for radio-TV advertising of Toni home permanent (Weiss & Geller is agency); Prom self-neutralizing home wave (Leo Burnett Co.); New Bobbi pin curl permanent (Tatham-Laird) Toni creme rinse (Tatham-Laird), Toni creme shampoo (Price, Robinson & Frank), and White Rain lotion shampoo (Tatham-Laird).

Toni plans to continue *Racket Squad* and *Arthur Godfrey & His Friends* on television, as well as the following radio network programs —*Arthur Godfrey Time, Breakfast Club, Break the Bank, Crime Letter from Dan Dodge, Fun for All, This Is Nora Drake,* and *Tennessee Ernie.*

CBS-NBC CONTINUE C-P-P SPAT

CBS-NBC battle for Colgate-Palmolive-Peet business continued last week. The sponsor reportedly is getting a two-week extension of deadline for notifying CBS-TV whether it intends to renew its sponsorship of *Strike It Rich,* which NBC is trying to swing over to is own network [CLOSED CIRCUIT, Feb. 9]. Original deadline was last Tuesday.

NBC spokesmen said they were trying "as aggressively as possible within normal means" to get CBS-TV's Colgate account switched to NBC-TV, and that an answer was due early this week.

NBC is trying to sell Colgate on not only moving the half-hour *Strike It Rich* daytime program from CBS-TV to NBC-TV, but of increasing its sponsorship of the series from the present thrice-weekly schedule to a full five times weekly.

Purported terms of NBC's bid generated fire among CBS-TV executives, who claimed NBC offered to make no charge for sponsorship of the program two days a week. NBC officials denied this version and countered that CBS-TV originated the furor.

...to the time buyers for food and drug advertisers

TOP CHANGES MADE AT BIOW CO.

TOP LEVEL changes at Biow Co., one of the top 10 advertising agencies in terms of broadcast billings, were announced last week.

Milton H. Biow, who has been president since he founded the agency in 1918, became chairman of the board, and F. Kenneth Beirn, executive vice president, was named president.

The changes "will make possible my devoting even more time to our agency's accounts and key sales and advertising problems," Mr. Biow said. "The advancement of Mr. Beirn to the presidency will enable him to concentrate more fully on administrative functions, including the selection and development of manpower, all of which he has done so well in the company's interest and development.

"These steps are part of a long-range expansion program begun some years ago which has aided the Biow organization to grow from approximately $20 million in billings handled by 200 persons to approximately $50 million in billings and a staff of 420 men and women. In part this increase has stemmed from the addition of new clients. In greater measure, it results from the increased business of older clients."

Mr. Biow added that he plans to continue the arrangement permitting employes to purchase a total of approximately 25% of the firm's common stock. Mr. Biow holds the remaining common and preferred shares.

Among the leading radio and television advertisers represented by Biow Co. are: Philip Morris & Co., Procter & Gamble Co., Bulova Watch Co., Jacob Ruppert Brewery, Pepsi-Cola Co. and Eversharp Inc.

Mr. Beirn joined Biow in 1948, having previously been New York manager for Grant Adv. and Dancer-Fitzgerald-Sample. He was named executive vice president in 1949.

Little Elected C-P-P Chmn.; McConnell Is President

JOSEPH H. McCONNELL, former president of NBC, was elected president of Colgate-Palmolive-Peet Co., effective March 1, and Edward H. Little, president of C-P-P since 1938, becomes chairman of the board, effective immediately [B•T, Jan. 5], it was announced last Thursday, following a meeting of the board of directors.

Mr. McConnell also was elected to the company's board of directors and the executive committee.

Mr. Little, as chairman of the board and also as chairman of the executive committee since 1938, will continue to serve as chief executive officer under an amendment to the by-laws of the company, passed last Thursday.

James A. Reilly, executive vice president in charge of soap sales, was elected a director at the meeting.

Charles S. Pearce and S. B. Colgate are honorary chairmen of the board.

Mr. Little has served C-P-P since 1902 when he joined the firm as a salesman.

The pattern of Colgate's foreign operations was largely established by Mr. Little. World wide sales of the company have increased from $100 million when he became president to more than $350 million in 1952.

Mr. McConnell, former executive vice president of RCA, was elected president of NBC in October 1949 and served in that capacity until December 1952 when he resigned to take the Colgate post [B•T, Jan. 5].

How Much Was Pabst's Tab For the Gavilan-Davey Bout?

HOW much did Pabst Brewing Co. pay for rights to the Kid Gavilan-Chuck Davey welterweight fight in the Chicago stadium last Wednesday evening?

There were reports that the sponsor of these regular weekly boxing matches on CBS-TV had guaranteed a sellout at the stadium and was laying $100,000 on the line for the TV rights.

Chicago Stadium says it tain't so—that Pabst "got off the hook" because of avid interest in the fight and a good gate. Stadium spokesmen claim the actual lump sum for TV rights would be closer to $12,000 than $100,000 on the basis of Pabst's yearly TV contract. They say Pabst tells only half the story.

Stadium spokesmen say that Pabst guaranteed a net gate of $200,000. The actual net was $211,415. It was pointed out that the brewing firm has a contract with the International Boxing Club for Wednesday night fights.

Pabst Brewing Co. headquarters in Chicago had no comment on the apparent discrepancies in the news. A spokesman said such business transactions were "confidential" but added that Pabst paid extra for the fight.

The TV viewing audience was estimated at between 35 and 55 million, with some 65 stations carrying the telecast. There was no radio coverage.

Sachs Signs With WBBM

MORRIS B. SACHS Inc., Chicago clothing retailer which has pioneered in use of radio, last week signed a long-term contract with WBBM Chicago for 18 quarter-hour programs per week.

Mr. Sachs said his firm had tested spot announcements on a majority of Chicago stations for six months and results proved "AM radio on a large station was the most economical buy we could make. Radio will continue to hold the leading role in our advertising program."

NL&B Names Burton V.P.

APPOINTMENT of Robert R. Burton as vice president at Needham, Louis & Brorby, Chicago, was announced by that agency last Monday. Mr. Burton formerly was vice president in the Chicago office of Young & Rubicam Inc. where he supervised accounts of the Elgin National Watch Co., the Bissell Carpet Sweeper Co. and the Pullman Co.

Bosco Co. Inc., N. Y. (Bosco milk amplifier), names Ruthrauff & Ryan, that city, effective April 1. Company expected to expand both network and local TV.

we've been on both sides of the desk

It's mighty helpful to understand the other man's problem when you are trying to sell him something.

The men of H-R Representatives have a decided edge in this business of advertising selling because of their vast experience on *both* sides of the desk.

Collectively H-R men have been successful buyers of time; account executives in agencies; have owned, managed and sold for radio stations; been advertising manager of well-known national companies and last and most important, spent years and years representing AM and now, TV stations.

Yessir, when you can talk the language of both sides of the desk, it's much easier to prove your point.

Remember, there is no desk-bound brass at H-R Representatives. So, whether it's one of the owner-partners or a veteran salesman H-R Always Sends A Man To Do A Man's Work.

FACTS & FIGURES

99% of N. Y. TV Viewers Like Movies—Advertest

FULLY 99.6% of all TV homes in the New York area regularly viewed video movies during January 1953, Advertest Research reports, adding this is a 5% increase over January 1952.

The Advertest report, "The Television Audience of Today," indicated weekday viewing was highest from 7-11 p.m. with 69% and weekends after 11 p.m. with 55%.

Children make up the major part of the TV movie audience before 7 p.m. with adults, the majority women, viewing mainly after that time. Total family viewers on weekdays, by periods: before noon, 4.6%; noon-5 p.m., 17.7%; 5-7 p.m., 38.5%; 7-11 p.m., 48.0%; after 11 p.m., 43.5%.

Preferences before and after noon up to 5 p.m. are comedy and musical movies; from 5-7 p.m., comedy and drama; 7-11 p.m. and afterward, drama and mystery.

Advertest, citing increased movie popularity on TV, said in 1952 that 33% of viewers rated movies as good or excellent, but that January's figure is 46%. The hour-length movie is most popular, followed by the hour and a half film.

Type and variety of films and hour of their presentations were listed by respondents as bases for their selection of favorite movie shows, with about 40% willing to accept repeats of movies on TV if "exceptionally good" or "shown at different times." The study is available for release from Advertest Research, 90 Bayard St., New Brunswick, N. J.

NBC-TV, CBS-TV Get Equal Number of 'Emmys'

NBC-TV and CBS-TV programs and talent drew equal number of "Emmy" national awards at the fifth annual Academy of Television Arts & Sciences. Awards were made at the dinner held Feb. 5 in the Hotel Statler, L. A. One award in the national category went to DuMont TV Network and another to Paramount Television Productions.

Lucille Ball was a double winner, sharing one award with her husband, Desi Arnez, as co-stars of the CBS-TV situation comedy, *I Love Lucy* (Philip Morris). Other honor was as the best TV comedienne.

Best dramatic show was the NBC-TV *Robert Montgomery Presents* (Johnson Wax and American Tobacco Co.). NBC's *Your Show of Shows* (Lehn & Fink, Benrus, Griffin, Prudential, R. J. Reynolds, SOS) was named best variety program. Bishop Fulton J. Sheen, *Life Is Worth Living* (Admiral) on DuMont, was named the outstanding TV personality.

CBS-TV's *See It Now* (Alcoa) and *What's*

My Line (Jules Montenier) were judged best public affairs and audience-quiz-panel programs, respectively. NBC-TV's *Dragnet* (Liggett & Myers) was picked as best mystery-adventure program. Paramount award was for *Time for Beany*, syndicated children's show. Jimmy Durante, of NBC-TV's *All-Star Revue* (Pet Milk, Johnson & Johnson), was called best comedian. Thomas Mitchell was selected as best actor and Helen Hayes as best actress.

Local award was given KLAC-TV Los Angeles for Liberace, pianist, as outstanding male artist and best entertainment program. Betty White, feminine personality, received an award as star in KLAC-TV's *Life With Elizabeth* (Sears, Roebuck). A tie occurred in the children's group. KNXT (TV) Los Angeles was given award for *Tim McCoy*. KNBH (TV) Los Angeles won with *Peanut Circus* (Circus Peanuts). English Channel swim coverage by KNBH was called best special event. KTLA (TV) Los Angeles' *City at Night* (Santa Fe Railway) was named as best public affairs program.

60 Million Persons Watched TV Inaugural

ABOUT 60 million persons in the U. S. saw Inauguration proceedings Jan. 20 some time during the five hours of telecasting between 11 a.m. and 4 p.m. EST, Hugh M. Beville Jr., NBC director of research and planning, reported last week.

Mr. Beville

Mr. Beville said this estimate is based on a special Trendex average-minute coincidental figures report representing 10 major TV markets with "maximum" competition. The figures show there were more TV sets in use (85% at one time or another) than for any other daytime telecast of major importance.

Virginia TV Count Change

COUNT of TV set saturation in Virginia, as recorded in April 1950 by the U. S. Census Bureau and first published in the Jan. 5 BROADCASTING • TELECASTING, contained transcribing errors in figures for Orange and Page Counties. The Orange County TV figures should have read: 3,290 homes reporting; 80 homes reporting TV sets; .02% with TV. Page County: 3,910 homes reporting; 75 homes reporting TV sets; .02% with TV.

Godfrey's 'Scouts' Climbs In January ARB Report

TOP VIDEO programs continue to be *I Love Lucy* with Lucille Ball and Arthur Godfrey's *Talent Scouts* and *Godfrey & Friends*, according to the January report of the American Research Bureau. *I Love Lucy*, No. 1 for the seventh consecutive month, exclusive of the summer hiatus period, also reached more homes than any other video show.

Mr. Godfrey's *Talent Scouts* reached more homes than ever before, and showed one of the highest ratings of the past year, ARB reports. Firm terms the results particularly significant because the show is carried in only 23 markets and available to only 64% of the nation's set total. *Lucy*, however, reaches 98.7% of the video audience, and *Comedy Hour* goes to 99.9%.

ARB listings of the top 10 programs and the homes reached follow, covering the week of Jan. 6 through 12.

	Program	Rating
1	I love Lucy (CBS)	68.2
2	Talent Scouts (CBS)	61.5
3	Godfrey & Friends (CBS)	52.9
4	You Bet Your Life (NBC)	50.6
5	Star Theatre (NBC)	50.1
6	Dragnet (NBC)	48.6
7	Show of Shows (NBC)	43.8
8	What's My Line? (CBS)	41.6
9	Comedy Hour (Abbott & Costello) (NBC)	40.0
10	Fireside Theatre (NBC)	39.8
	Our Miss Brooks (CBS)	39.8

	Program	Homes in Millions (add 000)
1	I Love Lucy (CBS)	14,270
2	Godfrey & Friends (CBS)	11,170
3	You Bet Your Life (NBC)	10,350
4	Show of Shows (NBC)	9,370
5	Dragnet (NBC)	9,290
6	Star Theatre (NBC)	8,900

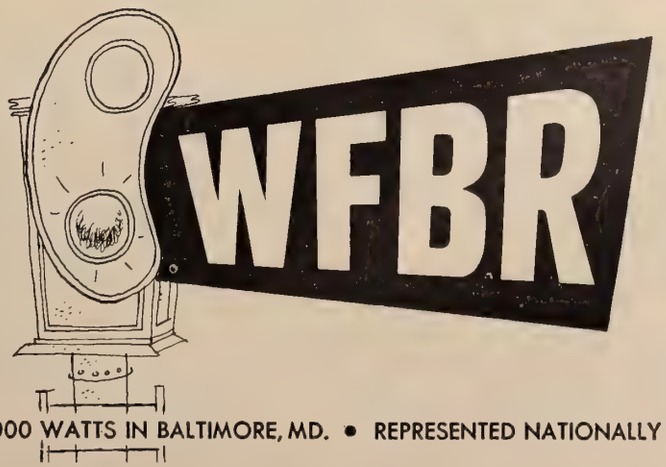
Still riding WFBR's "gravy train" after 11 years!



Little Potts Furniture Store and Hampden Rug Cleaners —two of Baltimore's most astute advertisers—are still riding high after 11 years on Club 1300!

Most of the advertisers on Club 1300 have been on for over 5 years—many for 8, 9 and 10 years—and two have been there since Club 1300 went on the air, 11 years ago!

Many success stories have been written by WFBR advertisers, both local and national, who have used Club 1300 alone in the Baltimore market!

And Club 1300 is typical of many WFBR home-grown participating shows. Shows like Morning in Maryland, Melody Scoreboard, Every Woman's Hour, Melody Ballroom, Shoppin' Fun and others—can chalk up successful sales mileage for you.

Want to ride on our gravy train? Ask your John Blair man or write, wire or phone

Stolkin Interests Sell RKO Control to Hughes

A NEW chapter in the career of Ralph E. Stolkin was written last week as the Chicago millionaire and three associates returned controlling interest in RKO Radio Pictures Inc. to west coast industrialist Howard Hughes.

Decision to return the stock (1,013,420 shares) came after a conference between Mr. Stolkin and Edward Burke Jr., his associate in one time stock holdings in KOIN Portland, Ore., and KJR Seattle, Wash., until their resignations from top posts in RKO last fall [B•T, Oct. 27, 1952].

"We have no interest in owning the stock unless we can have management of RKO," Mr. Stolkin said, noting he and his associates had been minority stockholders since October. Mr. Stolkin had been described as vice president of National Video Corp., Chicago, and identified with Screen Assoc. Inc., Hollywood.

As of last week, the Stolkin group owed Mr. Hughes, RKO board chairman, about $5.25 million, and is expected to pay this week $37,000 interest due from Dec. 15.

Film Sales

Completion of 63 sales of programs during Jan. 14-28 period was announced last week by **Peter M. Robeck,** general manager of **Consolidated Television Sales,** New York. He noted a trend for stations to purchase more than one filmed TV program at a time for showing on local level.

* * *

Series of eight 60-second film commercials in the form of human interest playlets has been prepared by **Sarra Inc.,** New York and Chicago, for the **Society for Savings,** Cleveland, Ohio. Commercials were produced through **The Griswold-Eshleman Co.,** bank's advertising agency, with James Pritchard, agency president, and Walter F. Meads, account executive, supervising production in Sarra's Chicago studios.

* * *

National Health Aids Inc., Baltimore, Md. (NHA Vitamin Complex, Fastabs), has renewed a half-hour TV film on **WGN-TV** Chicago, Sunday, for 13 weeks, effective Jan. 20. Agency is **Television Advertising Assoc.,** same city. **Chrysler Dealers of Chicago** Feb. 1 start a half-hour film, Sunday, also on WGN-TV, for 52 weeks. Agency is **McCann-Erickson.**

Availabilities

Demby Production Inc., New York, announces that *What's Playing?,* TV program of complete scenes (not coming attractions) from new motion pictures, will be made available on a national basis. It has been running for the past 39 weeks over **WJZ-TV** New York.

Distribution

Station Distributors Inc., New York, has acquired distribution rights to the 52 half-hour film segments of *The Ruggles,* family comedy series starring **Charles Ruggles.** The package is owned by Television Productions, Hollywood. To date, the show has been sold in 11 markets: Los Angeles, San Francisco, Denver, Albuquerque, Chicago, Lubbock, Indianapolis, Amarillo, Honolulu, Boston and Kalamazoo.

* * *

Screen Gems Inc., New York, has acquired distribution rights to *Professor Yes 'n' No,* quarter-hour open-end film quiz show in which the audience participates for prizes. Contract was negotiated by **John H. Mitchell,** vice president in charge of sales for Screen Gems, and **Allan Trench** of **Tragborn Productions Inc.,** Pittsburgh, producer of the series.

Production

Jack Denove Production, Hollywood, is filming 20 quarter-hour, two half-hour and 30 one-minute TV films for **The Christophers,** society headed by **Father James Keller.** Quarter-hour programs, distributed under title *What One Person Can Do.*

* * *

Volcano Productions, Hollywood, is completing a half-hour pilot film for **NBC** in network's proposed TV version of its radio program, *The Chase.* Using a suspense-adventure format, each succeeding film will utilize a different cast.

Film People

Ilo Harvey appointed assistant manager of **Consolidated Television Sales** East Coast Office in N. Y.

* * *

Michael Nidorf, talent manager and former partner in General Artists Corp., elected vice president of **Official Films Inc.,** New York.

* * *

Dwight W. (Bill) Whiting, sales manager of **KTTV (TV)** Los Angeles, joins **Consolidated Television Sales** as western sales manager.

* * *

Philip Lepinsky, formerly with Fleischer Studios, New York, and Jam Handy, Detroit (TV film production), appointed director of new animation department at **Filmack Trailers Inc.,** Chicago.

Did you know that every week-day afternoon, one of every three families listening to *any* Milwaukee Radio Station is tuned to WMIL* or one other independent?

So says Hooper.

* *Represented by Forjoe*

YOU MIGHT THROTTLE A LEOPARD WITH YOUR BARE HANDS*—

BUT...

YOU NEED THE FETZER STATIONS TO MAKE A KILLING IN WESTERN MICHIGAN!

WKZO-TV in television, WKZO-WJEF in radio—that's the easiest way to choke off competition in Western Michigan.

TELEVISION: WKZO-TV is the Official Basic CBS Television Outlet for Kalamazoo-Grand Rapids. Its bright Channel 3 picture is received by a quarter million Western Michigan and Northern Indiana television homes—a 28-county market with a Net Effective Buying Income of more than $2,000,000,000. And here's the stopper: The October 1952 Videodex Report credits WKZO-TV with 106.1% more *afternoon* viewers than Station "B"—213.4% *more evening viewers!*

RADIO: You'll look a long time before you'll find two more obvious radio buys than WKZO, Kalamazoo, and WJEF, Grand Rapids. Both are far ahead of all competition. Together, they deliver 57% more Kalamazoo and Grand Rapids listeners than the second-best two-station combination in the two cities. It's the same story in rural areas. The 1949 BMB Report credits WKZO-WJEF with big increases over 1946 in unduplicated audiences—*up 52.9% at night, 46.7% in the daytime*—and there's every reason to believe similar increases have occurred since.

It will pay you to get the whole Fetzer story. Ask your Avery-Knodel man for all the facts, or write direct.

** On a hunting expedition in Africa, Carl E. Axeley killed a full-grown leopard by choking it to death.*

WJEF top IN GRAND RAPIDS AND KENT COUNTY (CBS RADIO)

ASCAP-Broadcaster Problems May Be Resolved This Year

PRESENT differences between TV broadcasters and ASCAP over proper terms of payment for per-program licenses to telecast ASCAP-licensed music may be settled this year.

There are two important reasons why 1953 may be the year of decision for a problem that has been unsolved for nearly five years: First, it is anticipated that before the year is out the Federal District Court in New York will act on the petition filed in July 1951 by 55 TV station operators, who after nearly two years of negotiations with ASCAP failed in agreement, asked the court to set a fair and reasonable fee, under the terms of ASCAP's 1941 consent decree. ASCAP's counter petition to have the consent decree amended to remove the obligation to issue per-program licenses, which will be heard first, would, if approved by the court, settle the problem by eliminating it.

Second, ASCAP's blanket licenses for TV, accepted by the video networks and a number of individual stations, will expire Dec. 31, 1953. In the negotiations for new licenses it is expected that the TV broadcasters will attempt to work out an overall deal that would remove the need for court action.

Promotion on Local Level For Ziv's Lombardo Show

EXTENSIVE local promotional campaigns are planned by sponsors of the Frederic W. Ziv Co.'s Guy Lombardo radio program as tie-ins with Mr. Lombardo's nationwide band tour which started yesterday (Sunday) and continues through late April.

Ziv said that nearly 150 local sponsors already have signed for the show. Typical of local promotional support, according to Ziv, is the plan of the Lynchburg (Va.) Coca-Cola Bottling Works to use three radio spots daily and large tune-in ads for three straight days, including the day of the program, and to circulate the Tune Club booklets published by Ziv.

The booklets, distributed free to all sponsors, are designed to aid listeners in identifying the mystery medley, and thereby win Gruen watches. Gruen has made available $2,500 worth of watches to each sponsor.

Columbia Promotes Carlson

COLUMBIA Records Inc. has announced the promotion of Alden O. Carlson, senior sales representative with Transcription Div., to division general manager, post recently vacated by Robert Clarkson [B•T, Feb. 9]. Mr. Carlson joined Columbia's transcription sales staff in 1942.

MISCELLANEOUS

George F. Foley Inc., N. Y., radio-TV program production firm, has moved its offices from 9 E. 45th St., to 625 Madison Ave. Phone number has been changed to Plaza 1-1860.

Frank Cooper Assoc., Hollywood, talent agency and program packager, moves to 6277 Selma Ave. Telephone is Hillside 2297.

William B. White Agency, Beverly Hills, talent agency and program packager, moves to 332 S. Beverly Dr. Telephone is Crestview 4-6301.

Phil Davis Musical Enterprises, N. Y., assigned by Brooke, Smith, French & Dorrance to create one radio and one TV commercial for Goebel beer.

NEW OFFICERS of Montana Radio Stations Inc. meet after a one-day session in Butte where more than 100 persons, representing 24 of the state's 25 stations, attended. L to r are: Norm Penwell, KBMN Bozeman, re-elected secretary-treasurer; Ed Cooney, KOPR Butte, retiring president; Ken Nybo, KBMY Billings, new president, and Ian Elliott, KRFJ Miles City, vice president. At the business session, stations adopted a resolution supporting the Horan Bill, which would exempt stations from libel liability in political broadcasts. Art Mosby of KGVO Missoula led a discussion on copyrights.

BAB and BMI Will Sponsor Field Clinics Jointly

Broadcasters will save time attending 42 rather than 86 local work sessions.

INTEGRATED series of two-day sales and program clinics will be held under the joint auspices of BAB and BMI during the seven-week period starting May 25, it was announced today (Mon.) by Carl Haverlin, BMI president, and William B. Ryan, president of BAB [CLOSED CIRCUIT, Feb. 9].

Designed to save time for broadcasters and their staffs, the 42 joint clinics planned for this year will replace 86 such meetings held in 1952, when each organization conducted 43 clinic sessions. Tie-up is a natural one, and, as the joint statement points out, it is "impossible" to think of programming without thinking of sales and vice versa. "The basis of successful radio management is the thoughtful coordination of both programs and sales," both groups believe.

Commenting on the decision to continue the BMI program clinics, NARTB President Harold E. Fellows said: "We're glad BMI is going to continue them this year. NARTB looked into the possibility of producing such program clinics this year, but we are not geared to do them in the fashion to which broadcasters have become accustomed through the good work of Carl Haverlin and his crew. As a step in the direction of minimizing the number of meetings which broadcasters must attend, I am happy to learn that BMI is integrating its clinics with the BAB sales clinics."

BAB's part of the combined clinics will be planned "to provide those in attendance with not only a well laid-out plan for selling in today's competitive market, but also with an insight into many categories of potential business that heretofore have been neglected," Mr. Ryan said.

BMI, according to Mr. Haverlin, will again this year present "forums in which top program brains may interchange program ideas before the widest possible audience of working broadcasters. We hope to make the program clinics and the bull sessions, in which all who attend may participate, even better than before," he said.

Plan was discussed by the BMI board at its annual meeting at Belleair, Fla., Feb. 8-9-10. NARTB, which will operate at the management level at its district meetings, formally endorsed the joint BMI-BAB plan.

Three of BMI's 14 directors were excused from the meeting. Absent were Joseph H. Baudino, Westinghouse; Herb Hollister, KBOL Boulder, Colo., and Herbert V. Akerberg, CBS New York. Attending were Carl Haverlin, president; Sydney M. Kaye, vice president and general counsel; NARTB Board Chairman Justin Miller; NBC Vice President William S. Hedges; Raymond Diaz, ABC; James E. Wallen, MBS; Paul W. Morency, WTIC Hartford; J. Harold Ryan, Storer Broadcasting Co.; J. Leonard Reinsch, James M. Cox stations; Leonard Kapner, WCAE Pittsburgh; John Elmer, WCBM Baltimore.

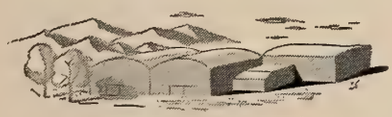
BMI staff members who reported included Charles Wall, BMI vice president in charge of finance; Robert Burton, vice president in charge of publisher relations and secretary; Jean Geiringer, vice president in charge of foreign relations.

Madsen Is Elected

Mr. Madsen

ARCH L. MADSEN, general manager of KOVO Provo, Utah, was elected president of the Utah Broadcasters Assn. at a meeting Jan. 26 at Salt Lake City's Newhouse Hotel. The picture inadvertently run in a story on the UBA meeting and election [B•T, Feb. 2] was of E. F. Peffer, president of KGDM Stockton, Calif.

SMPTE Shifts TV Sessions



TO avoid calendar conflict with the NARTB convention in Los Angeles April 29-May 2, the Society of Motion Picture and Television Engineers has shifted the TV sessions of its 73d semiannual convention to April 30-May 1. Ordinarily the TV technical papers and demonstrations are presented the first days of the SMPTE convention, scheduled in Los Angeles' Statler Hotel April 27-May 1.

"The Big News in TV is UTP in '53"

Custom-tailored or ready-made—now, with its own production facilities, UTP stands ready to serve all your TV film needs.

In addition to twelve top "packaged" shows for the local buyer, *UTP now has its own huge Hollywood studio* to "custom-produce" films of any type for the discriminating regional or network buyer.

And the important thing about UTP's complete new production set-up is that it's operated by men who best know the problems of maintaining high-quality film production on a moderate budget, and are equally familiar with the problems of the advertiser.

HEART OF THE CITY (Big Town) — Famous half-hour series that scored smashing successes for Lever Brothers as "Big Town." Featuring reporters Steve Wilson and Lorelei.

DOUBLE PLAY (With Durocher and Day) — Baseball's "Royal Family" presents guests from the Sports World's "Who's Who" in lively, informal quarter-hour sessions. 39 quarter-hours.

OLD AMERICAN BARN DANCE — Twenty-six half-hours starring famous National Dance entertainers . . . Pee Wee King, Tennessee Ernie, others. Terrific commercial corn! Produced by Kling-United.

WASHINGTON SPOTLIGHT — Unique quarter-hour panel show featuring Marquis Childs and important Washington personalities. Timely, topical . . . a new show released each week.

COUNTERPOINT (Rebound) — Bing Crosby Enterprises' series of 26 dramatic half-hour suspense shows. A national award winner with tremendous adult appeal.

HOLLYWOOD OFF-BEAT — Action-packed half-hour series starring Melvyn Douglas as a sophisticated sleuth supported by well-known Hollywood names.

STUDIO TELESCRIPTION LIBRARY — Featuring Peggy Lee, June Valli, King Cole trio, Mel Torme and 150 other stars in a library of all-time favorites, plus monthly "refresher" tunes. Versatile, flexible, adaptable to any programming need.

ROYAL PLAYHOUSE (Fireside Theatre) — The highest rated dramatic film program in its first run as "Fireside Theatre." 52 outstanding half-hours, produced by Bing Crosby Enterprises.

PLUS THESE OTHER ATTRACTIVE PACKAGES: Sleepy Joe, delightful half-hours for kids; The Chimps, unique quarter-hours starring "Bonzo".

LAWTON, OKLAHOMA

Oklahoma's Third Largest Market

Represented Nationally by O. L. Taylor Co.

AFFILIATES GROUP WILL CONTINUE

GOVERNING committee of the All-Industry Radio Affiliates Committee, at a meeting Feb. 7 at Belleair, Fla., agreed to continue the organization until the NARTB convention in Los Angeles next April, at which time a decision will be reached on permanent organization.

Paul W. Morency, WTIC Hartford, chairman, announced after the session that the committee will report to the general membership at a session scheduled for 3:30 p.m., April 28, during the NARTB sessions. A proposal then will be made for the continuation of the organization, created in 1951 to combat deterioration of the rate structure in radio. The organization was formed spontaneously during the Chicago NARTB convention, immediately after announcement by CBS that it would adjust night-time rates downward.

Mr. Morency has agreed to remain head of the organization "until the Los Angeles meeting only," it was announced. Some thought has been given to a revised organization plan whereby independently organized station and advisory planning committees of the networks would constitute the nucleus of the Radio Affiliates Committee.

Attending the Belleair session, in addition to Mr. Morency, were Clair R. McCollough, Steinman Stations, vice chairman; G. Richard Shafto, WIS Columbia, S. C.; Leslie C. Johnson, WHBF Rock Island, Ill.; Robert D. Swezey, WDSU New Orleans, and Ben W. Strouse, WWDC Washington.

VOD Contest Winners Begin Tours in D. C.

FOUR high school students, winners of the sixth annual Voice of Democracy Contest, last Thursday started a weeklong series of tours, broadcasts, meeting with President Eisenhower, telecasts and a trip to Colonial Williamsburg, Va.

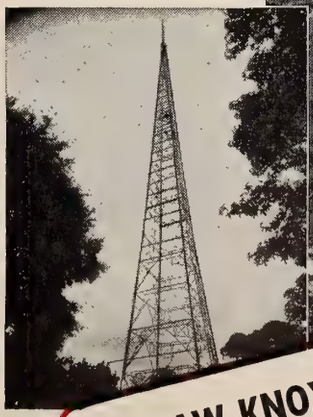
The four winners are Frank Lammedee, San Marino, Calif.; Thomas J. Walsh, Washington, D. C.; Robert Davis, Maui, Hawaii; Adelaide Nacamu, Peekskill, N. Y. [B•T, Feb. 9].

Scholarships for $500, radio-TV consoles and certificates will be presented to the young people Wednesday at the annual VOD luncheon at the Mayflower Hotel, Washington.

The annual competition is sponsored jointly by NARTB, Radio-Television Mfrs. Assn. and U. S. Junior Chamber of Commerce, with endorsement of U. S. Office of Education and National Assn. of Secondary School Principals.

Public Relations Meet March 1

JOHN H. SMITH Jr., National Assn. of Radio and Television Broadcasters, is a member of the convention committee which is planning the 8th annual conference of the American Public Relations Assn. in Washington, D. C., March 1-3 at the Mayflower Hotel.



ABA Convenes March 15-16

ANNUAL spring membership meeting of the Arkansas Broadcasters Assn. will take place March 15-16 at the Marion Hotel in Little Rock. Equipment manufacturers and distributors have been invited by the board of directors to attend the meeting, for which registration begins at noon Sunday, March 15.

Designs Unlimited

WHATEVER factors determine the type, height and location of your TV Antenna Tower, you can depend on Blaw-Knox to give you *more for your money*. Does the job call for a self-supporting structure atop a mid-town building or a sky-scraping guyed tower out in the open? Do you prefer a square design or triangular? Blaw-Knox builds them all—and every one is backed by more than four decades of experience in this field. If you are anticipating a TV license, write or phone today for capable engineering assistance with your plans.

FCC GRANTS 17 NEW TV STATIONS PERMITS

Clearing station applicants for TV channels at a fast clip, FCC last week came close to breaking the record number of grants for a single week.

GRANTING applications for 6 vhf and 11 uhf new TV stations last week, FCC came close to beating the record number of 18 grants it made last July [B•T, July 14, 1952]. The 17 total was most FCC has made in any one week following the lifting of the TV freeze.

One of the permits was the first to be awarded an applicant comprising a merger of two AM stations in the same city. Uhf Ch. 47 was granted to Macon Television Co., owned by WBML and WNEX, competing outlets at Macon, Ga. (see story page 55).

Another permit—that for vhf Ch. 10 at Columbia, S. C., to WIS-TV Corp. — was granted just a week after the application was tendered [B•T, Feb. 9]. WIS-TV Corp. is owned 85% by principals in WIS and 15% by a group withdrawing from WMSC Columbia.

New uhf Ch. 29 grantee at Dallas, Tex., is KLIF there, owned by Barton R. and Gordon R. McLendon, principals in the former "fifth" radio network, Liberty Broadcasting System.

FCC dropped down its Group A-2 priority list (cities without any TV service) to No. 236 (Midland, Tex.; 1950 population: 21,713).

The Commission got as far as Oklahoma City, Okla., No. 194 in the Group B list, making two grants there.

Total number of TV stations now authorized in the U. S. and its territories is 355, of which 182 are vhf and 173 uhf. The total includes 2 vhf and 12 uhf permits for noncommercial educational stations.

New grants made last Wednesday and Thursday were:

Wheeling, W. Va. (City priority Group A-2, Number 31)—Polan Industries (permittee for WPTV [TV] Ashland, Ky.), granted construction permit for uhf Channel 51, effective radiated power 24 kw visual and 13.5 kw aural, antenna height above average terrain 170 ft.

Columbia, S. C. (Group A-2, No. 37)—WIS-TV Corp. (WIS), granted vhf Ch. 10, ERP 265 kw visual and 160 kw aural, antenna 630 ft.; subject to condition that stockholders who have interest in WMSC Columbia divest themselves of that interest.

Portland, Me. (Group A-2, No. 45)—Portland Telecasting Corp. (WLAM), granted uhf Ch. 53, ERP 22.5 kw visual and 12 kw aural, antenna 330 ft.

Macon, Ga. (Group A-2, No. 54)—Macon Television Co. (WBML and WNEX), granted uhf Ch. 47, ERP 100 kw visual and 55 kw aural, antenna 500 ft. Comrs. Rosel Hyde and E. M. Webster dissented and issued separate statements; Comrs. George Sterling and Eugene Merrill issued separate concurring statements.

Eugene, Ore. (Group A-2, No. 124)—W. Gordon Allen (licensee of KGAE [AM], Salem, Ore.), granted uhf Ch. 20, ERP 19.5 kw visual and 11 kw aural, antenna 300 feet.

Parkersburg, W. Va. (Group A-2, No. 169)—West Virginia Enterprises Inc. (Frank, Helen and Ben Baer, 32.5% owners of WTBO Cumberland, Md.), granted uhf Ch. 15, ERP 19 kw visual and 10 kw aural, antenna 580 ft.

Rome, Ga. (Group A-2, No. 170)—Coosa Valley Radio Co. (WROM), granted vhf Ch. 9, ERP 2.9 kw visual and 1.45 kw aural, antenna 720 ft.

Beloit, Wis. (Group A-2, No. 172)—Beloit Bcstg. Co. (WGEZ), granted uhf Ch. 57, ERP 21 kw visual and 11 kw aural, antenna 230 ft.

Eureka, Calif. (Group A-2, No. 220)—Redwood Bcstg. Co. (KIEM), granted vhf Ch. 3, ERP 17.5 kw visual and 9.3 kw aural, antenna 110 ft.

Gulfport, Miss. (Group A-2, No. 226)—WGCM Television Corp (WGCM), granted uhf Ch. 56, ERP 21.5 kw visual and 11.5 kw aural, antenna 300 ft.

Minot, N. D. (Group A-2, No. 232)—Rudman Television Co. (50% owner of new TV station in Billings, Mont.), granted vhf Ch. 10, ERP 58 kw visual and 31 kw aural, antenna 390 ft.

Minot, N. D. (Group A-2, 232)—North Dakota Bcstg. Co. (KCJB), granted vhf Ch. 13, ERP 29.5 kw visual and 15 kw aural, antenna 420 ft.

Midland, Tex. (Group A-2, No. 236)—Permian Basin Television Co. (Video Independent Theatres Inc.), granted vhf Ch. 2, ERP 50 kw visual and 25 kw aural, antenna 1,010 ft.

Dallas, Tex. (Group B-2, No. 155)—Trinity Bcstg. Corp. (KLIF), granted uhf Ch. 29, ERP 50 kw visual and 25 kw aural, antenna 490 ft.

St. Louis, Mo. (Group B-4, No. 179)—Missouri Bcstg. Corp. (WIL), granted uhf Ch. 42, ERP 79 kw visual and 46 kw aural, antenna 490 ft.

Oklahoma City, Okla. (Group B-4, No. 194)—Oklahoma County Television & Bcstg. Co. (KWCO Chickasha, Okla.), granted uhf Ch. 25, ERP 17.5 kw visual and 9.5 kw aural, antenna 500 ft.

Oklahoma City, Okla. (Group B-4, No. 194)—KLPR Television Inc. (KLPR), granted uhf Ch. 19, ERP 91 kw visual and 49 kw aural, antenna 580 ft.

WCCO-AM-TV Hosts To Washington VIP's

SEVENTH annual Congressional dinner was held Feb. 9 by WCCO-AM-TV Minneapolis at the Hotel Statler, Washington, D. C. Top station executives were hosts.

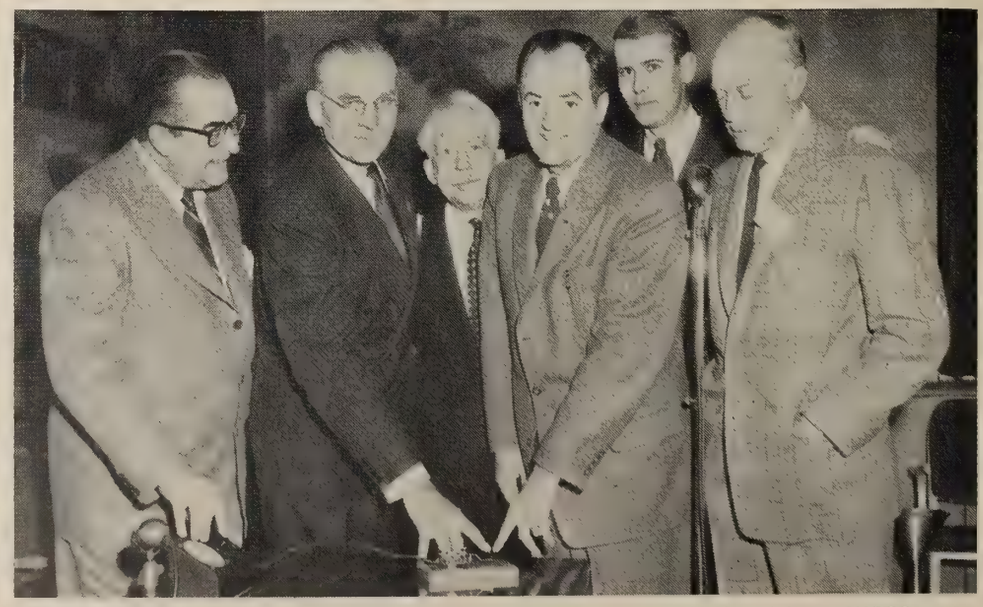
Guests lists at the Monday dinner was broadened beyond the Minnesota delegation to include legislators from Iowa, Wisconsin, North Dakota and South Dakota. Thirty-one guests took part.

NFL Suit Resumes Feb. 24 With Defense Presentations

TRIAL of the government's antitrust case against the National Football League is scheduled to resume Feb. 24 in Philadelphia, with the defense to start presentation of evidence that restrictions against radio-TV coverage of games were not unreasonable restraint of trade.

The Dept. of Justice completed its case last Monday, having consumed nine court days [B•T, Feb. 9, 2] in presenting evidence.

Judge Allan K. Grim, of the U. S. District Court (Eastern Pa.), refused to dismiss the suit as requested Tuesday by Bernard I. Nordlinger, chief defense counsel.



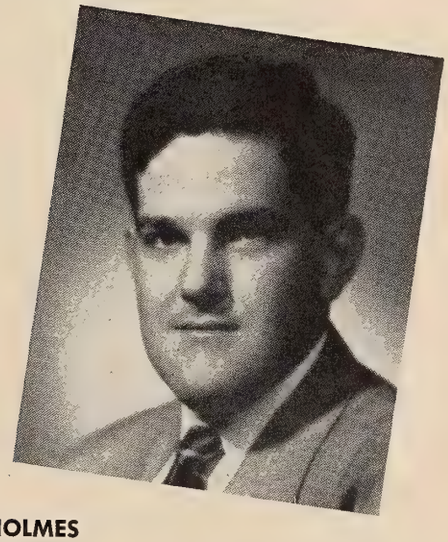
The football league contended there is no interstate commerce involved and any restrictions on radio-TV were reasonable.

W. Perry Epes, government counsel, pressed the argument that economic justification is not an excuse for violating Sherman antitrust laws, whether it be professional football, baseball or any other business. Asked by Judge Grim if it made any difference whether TV killed professional football, Mr. Epes said, "Legally the result is irrelevant."

Judge Grim replied, "Then it is a matter of discretion with the Dept. of Justice whether it wants to bring a case or not regardless of the ultimate result." This brought from Mr. Epes the answer that the economic effect has nothing to do with it.

Mr. Nordlinger argued that the government "did not substantiate the fact that the NFL conspired to obstruct or interfere with interstate commerce." He said the NFL's main business is to sell tickets to football games, not radio and TV rights, adding these rights were not a source of substantial profit.

Final government witness last Monday was Gordon McLendon, president of the defunct Liberty Broadcasting System. Mr. McLendon, replying to a question from Judge Grim, said he felt radio has not hurt professional football but has created more interest in the game, as well as other sports. Under defense questioning, Mr. McLendon said he had tried to buy stock in the Dallas team, loaning $12,500 to Giles Miller and Curtis Sanford, two Texas businessmen until he could get league approval to be a stockholder.



POWER BOOST at WCCO-TV Minneapolis was activated from Washington, D. C., where Sens. E. J. Thye (R-Minn.) and Hubert H. Humphrey (D-Minn.) pressed key during station's annual dinner to Congressmen and Senators in its service area. L to r: Cedric Adams, WCCO newsman; Sen. Thye; William J. McNally, chairman of board; Sen. Humphrey; Robert B. Ridder, president; F. Van Konynenburg, vice president and general manager.

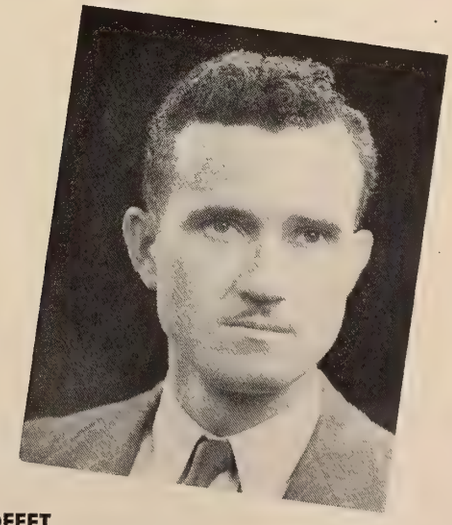
FURTHER EXPANDS ITS SERVICE TO



182,429 ARKANSAS FARMERS

JOHN R. HOLMES
KLRA Farm Service Director

WHEN, in March of 1951, KLRA added John R. Holmes to its staff as Farm Service Director, it took a long step forward in service to the farm folks of Arkansas. Johnnie became the first and only full-time Farm Reporter operating in Arkansas. Now, to further expand KLRA service, and to cover Arkansas farm news more completely, KLRA is pleased to make this announcement:

JIM MOFFET, a January, 1953, graduate of the University of Arkansas College of Agriculture, has joined our staff as Johnnie's assistant. John and Jim will cover all important farm meetings, sales, demonstrations, fairs, and will visit important farm improvement programs all over the state. A new concept of Farm Service is being instituted by KLRA in the early morning period.

JIM MOFFET
KLRA Assistant Farm Service Director

Fate of Theatre TV Hearings Uncertain

WHAT happens to theatre TV hearings from now on rests with FCC, following last week's oral argument on questions propounded by the Commission three weeks ago [B•T, Feb. 2]. Chairman Paul A. Walker recessed the hearings until further notice after a one-day session last week.

In seeking to clarify the issues and clear up some "inconsistencies in testimony," the Commission enumerated eight points on which it sought clarification. In the notice of those points, the Commission said that it would decide whether to continue the hearings.

In any event, the hearings cannot be resumed before March 2. The Commission is tied up this week with other business, and next week, Feb. 23 and 24, is scheduled to hear seven oral arguments.

FCC Queries

Three weeks ago, the Commission ordered theatre-TV proponents to answer questions which it considered necessary to the proceeding's continuance. Specifically, more information was asked as to what kind of allocation was being requested, what the nature and cost of programs would be, and why theatre TV could not fit into the already existing common carrier allocations.

Presenting statements for the motion picture industry were Marcus Cohn, attorney for National Exhibitors Theatre TV Committee, and Vincent B. Welch, representing the Motion Picture Assn. of America.

Mr. Cohn told the Commission the motion picture industry had no intention of using the transmission facilities for the distribution of filmed programs into movie houses. Comr. Frieda B. Hennock asked if a new theatre TV industry would anticipate taking programs away from broadcasting facilities to put them into admission houses, or if an exclusive frequency allocation would not also mean "exclusivity" in the showing of many programs and features now being broadcast for home TV. Mr. Cohn replied that programs transmitted over theatre-TV facilities would be, for the most part, those which are not available now to home viewers.

Data on Programs

Vice Chairman Rosel H. Hyde asked for more specific information on program types. Mr. Cohn said, as now envisioned the programs would fall into three categories: (1) entertainment, (2) special events, such as news and sports coverage, and (3) educational and instructional programs during "off-hours" to special groups. He said every theatre with TV exhibition facilities might ultimately expect as much as five hours programming per day.

Mr. Welch said exclusive allocations were necessary because existing common carriers either could not or would not provide adequate facilities for theatre-TV.

An exclusive frequency allocation, he said, would be far superior to shared frequencies, either in common carrier or industrial services bands.

MERGED APPLICANTS GET TV GRANTS

Competing AM operators in Macon, Ga., as well as competitors in Columbia, S. C., circumvented time-consuming FCC hearings by working out joint applications. The result: Both received their grants last week.

TWO cities in which competing AM stations sought TV permits received grants last week following mergers of their principals. The cities were Macon, Ga., and Columbia, S. C.

A Ch. 47 facility was granted to Macon Television Co., comprising stockholders of both WBML-AM-FM and WNEX-AM-FM, competing Macon stations.

Another facility, Ch. 10, was granted to WIS-TV Corp., Columbia, after six stockholders of WMSC Columbia agreed to sell all their interests in WMSC, itself a former applicant for Ch. 10. The six now hold stock interest in WIS-TV Corp., now 85% owned by owners of WIS Columbia [B•T, Feb. 9].

The Macon grant inspired dissenting opinions by Comrs. Rosel H. Hyde and E. M. Webster, with Comrs. George E. Sterling and Eugene H. Merrill writing separate concurring comments. Comr. Frieda B. Hennock did not participate in this case.

Originally WBML and WNEX had tried to settle their competitive TV problem in Macon by forming a new corporation in which each would have five shares, or 50% of stock. Control had been vested in a board of six, three from each station, with Alfred Lowe, WNEX manager, resigning to manage the TV operation. This plan had been designed to keep AM competition alive, with the TV outlet also strictly competitive.

New Corporate Plan

Last Dec. 3 the FCC told the applicant it could not approve this merged operation. A new corporate plan was set up, WBML and WNEX each owning nine shares or 45% control, with 20 shares outstanding. W. A. Fickling, vice president and director, owns two shares or 10% of the new group and has no official relationship with either of the broadcast outlets. Number of directors was increased to seven, three from each for WBML and WNEX, and Mr. Fickling.

This arrangement received majority FCC approval, but set off a series of comments on competitive aspects of the Macon situation.

WMAZ Macon is applicant for Ch. 13 in Warner Robins, Ga., a community near Macon.

The new Macon Television Co. proposal sets up safeguards to protect competition between WBML and WNEX. These include: Separate AM program and sales operation, including public service responsibilities; no overlapping interests of any nature; no common use of operating staff, salesmen, offices, studio or transmitting facilities, rates, programs or program sources; no advertiser to be required to buy time on one station to obtain time on the other.

The three TV stockholders promise no TV action will be taken which would be conditioned on action by the AM stations; TV rate card will not be related to time purchases on

WOODland! AM

And now the "Single Rate" applies!*

Nighttime radio schedules on WOOD are now a smarter investment than ever because:

1 You buy nighttime at same price as daytime, and what a cost-per-thousand picture that will give you! Just check your SRDS and your SAMS report . . . you'll see what we mean by a "real sleeper buy" in the rich Grand Rapids market.

2 You get a "bonus", too! The Katz sponsored Pulse Study of 18 TV cities reveals number of radio sets in use at home is about the same at night as in daytime; but — get this — at night there are more people listening to each set. Daytime radio has a peak at 10:00-11:00 AM when 365 people per 1,000 radio homes are listening; at night, the peak is 8:00-9:00 PM with 517 listeners per 1,000 radio homes; the figure never goes below 431 from 6:00-10:00 PM. It's poppa home from work who makes the difference.

**Literally, an exception — Class B is from 11:30 PM to 7:00 AM.*

WOOD

GRAND RAPIDS, MICHIGAN

WEOA — Evansville, Ind.
National Representatives: Katz Agency

the AM station; no common TV-AM use of sales staffs or facilities; TV station not to be used to show the AM affiliations. A manager not connected with either of the 45% stockholders or their stations is to be employed.

The majority decision described the problem as "a novel one," to be decided on the specific facts in the case. Finding no need to call a hearing, the majority said the grant would bring early establishment of uhf service to Macon, improving the uhf competitive position in the "as yet unopened field" of TV broadcasting in the area.

Comr. Hyde dissented that the action compromises the FCC's multiple ownership policy (Sec. 3.35) and might lead toward "an undesirable increase in government regulation of the internal affairs of licensee management." Other channels are available for Macon from an engineering standpoint, aside from the assignment table, he added.

Comr. Webster's dissent was based on "a definite relaxation" in the policies limiting the concentration of interest in two AM stations in the community. He wondered if competition might be restricted and suggested a full study of the question.

The separate concurring opinion of Comr. Sterling said the ruling should not set a precedent and each case should be decided on its own merits. Comr. Merrill said his approval was not to be construed as a general endorsement of all proposed "marriages." He called attention to the possibility of assigning another channel to Macon.

WIS-TV Corp., is owned principally by Broadcasting Co. of the South, licensee of WIS-AM-FM Columbia, WSPA-AM-FM Spartanburg, S. C., and WIST-AM-FM Charlotte, N. C. The grant is conditioned upon A. R. Heyward II, Paul A. Cooper, Thomas B. Boyle, Joseph L. Nettle, Frank B. Gary, E. Grenville Seibels II and John C. Cosby divesting themselves of holdings in WMSC. The latter group, except Mr. Cosby, together own 14.5% of WIS-TV Corp. G. Richard Shafto, vice president-general manager of Broadcasting Co. of the South, is president of WIS-TV Corp., while Charles A. Batson, director of TV for the WIS licensee, is managing director and vice president of the Ch. 10 grantee.

FCC Explores Question Of NBC Interest in KOA

QUESTION whether NBC might have a hidden interest in KOA Denver, competing with KYMR Denver for TV vhf Ch. 4 there, was explored last week in hearings before FCC Hearing Examiner James D. Cunningham and with NBC Financial Vice President Joseph V. Heffernan as the witness.

When NBC sold KOA to Bob Hope and Denver interests headed by Mayor Quigg Newton in 1952, Mr. Hope gave NBC a note for $1,250,000 as his part of the $2,250,000 purchase price for the 50 kw station on 850 kc.

Essential point under scrutiny was whether NBC has any rights in KOA under the terms of the note. Since NBC already has its five TV stations—the limit permitted to one company by the FCC—fact that NBC has any interest in KOA might force denial of its TV application as sixth NBC station.

Mr. Heffernan told FCC Counsel Robert J. Rawson that NBC felt the Hope note was adequately secured and that provisions providing for protection of NBC in event of default were the common protections in normal business practice. He said that if Mr. Hope defaulted, NBC then had the right to force the sale of the station to another party.

WSAU, PERMITTEE REP. O'KONSKI HASSLE ON 'MISREPRESENTATIONS'

Wausau's long-established WSAU claims economic injury from Rep. O'Konski's new station grant there, while charging the Congressman with misrepresentation. This the Wisconsin solon is not only quick to deny, but ready to hurl his own counter-charges.

CHARGES and counter-charges are being exchanged before FCC by long-established WSAU Wausau, Wis., and the newly-approved WOSA there (formerly WLIN Merrill), owned by Rep. Alvin E. O'Konski (R-Wis.).

WSAU protests the WOSA grant on the ground of economic injury as set forth in the Sanders Bros. case and also charges that Rep. O'Konski made misrepresentations to the Commission in his explanation of certain premature "preliminary" construction at the WOSA transmitter site [B•T, Feb. 9].

In his reply to FCC, Rep. O'Konski denies misrepresentation and in turn questions the truthfulness of contentions made in affidavits presented the Commission by WSAU representatives. The Congressman late Thursday stated WSAU "canvassed the whole town, including the mayor and chief of police" to solicit protests against the new competing outlet.

Wausau has a population of 30,414 with 98.3% radio set saturation, or a total of 8,709 radio homes [B•T MARKETBOOK, Aug, 18, 1952].

WSAU, established in 1937, has been the sole station in Wausau until the move of WLIN from Merrill to Wausau as WOSA and the grant of a construction permit to Lakeland Broadcasting Corp. for WHVF, assigned 250 w on 1230 kc, but not yet on the air.

WSAU, NBC affiliate, is assigned 250 w on 1400 kc and is licensed to WSAU Inc. Of 350 shares outstanding, President-Treasurer John R. Tomek holds 179 shares and Vice President Charles Lemke holds 171 shares.

Rep. O'Konski founded WLIN in Merrill in 1948 on 730 kc with 1 kw daytime only. Change to 1 kw fulltime, directional, on 550 kc was approved in 1950 and on Dec. 4, 1952, FCC consented to switch of the station to Wausau as WOSA with boost in power to 5 kw, directional, operating fulltime on 550 kc. WOSA is a Mutual affiliate.

VEEP gets membership card in Radio-TV Correspondents Galleries of Congress from Hollis M. Seavey (r), MBS commentator and retiring president of the correspondents group, upon completion of Alben W. Barkley's first *Meet the Veep* show inaugurated Feb. 1 on NBC-TV.

Inquiry concerning the commencement of construction at the WOSA transmitter site south of Wausau prior to receipt of the grant was posed to FCC in two letters received by the Commission. The first, dated Dec. 5, 1952, was by Richard P. Tinkham, Wausau attorney, who informed Chairman Paul A. Walker he had not received a reply to his Nov. 3 protest in behalf of Marathon Electric Mfg. Co. there. The second, dated Dec. 15, 1952, was from Robert C. Altman, district attorney, Marathon County, Wausau.

Rep. O'Konski, through Frank U. Fletcher, his Washington radio counsel, in an affidavit dated Dec. 15, acknowledged certain premature construction had been done at the transmitter site, for which the Congressman apologized and assured the Commission, would not be used for WOSA. He asked that the grant be modified to include a condition that no pre-grant construction could be used. FCC issued the modification on Jan. 2.

WSAU Protest

WSAU filed its protest of the Dec. 4 grant in early January, noting FCC policy on premature construction as set forth in the case of TV Colorado Inc., permittee for KKTV (TV) Colorado Springs, Col., on Ch. 11 [B•T, Dec. 1, 1952]. WSAU contended Rep. O'Konski's "violation of Sec. 319(a)" of the Communication Act "requires, not only a Commission demand that illegal construction not be used in the completion of the station, as was required of TV Colorado Inc., but also a hearing to determine all of the circumstances under which the violation was made and whether or not the circumstances bear on the moral and other qualifications of the applicant to be a licensee."

In dismissing WSAU's protest in a memorandum opinion and order in late January [B•T, Feb. 2], FCC stated:

The only fact specified by the protestant is that Mr. O'Konski commenced construction prior to the date the permit was granted. Sec. 319(a) does not make it illegal to construct a radio station without a permit. Instead, it merely is a direction to the Commission not to license a station, unless, a permit for its construction has been granted prior to the commencement of construction to be utilized in the station. Therefore, the fact of premature construction, of itself, would lead to nothing more than to condition the grant to preclude the use of such construction, an action the Commission has already taken.

The protestant does not allege any facts from which, if proven, we could conclude that the applicant was unqualified to be a broadcast licensee. He infers the possible existence of such facts by requesting an issue to determine whether the violation of Sec. 319(a) was such as to reflect on the applicant's qualifications. However, in view of the statutory mandate to specify with particularity the facts, matters and things relied upon, we do not believe that the mere phrasing of a question is sufficient upon which to set aside the effective date of a grant, as we would be required to do if the instant application were to be designated for hearing. Accordingly, we find the protest fatally defective.

WSAU now has pending a protest of the Commission's Jan. 2 modification of WOSA's grant. It is in this pleading that the claim of economic injury is made. In a supplemental petition, WSAU includes affidavits and photos purporting to show the status of WOSA con-

we gambled...

struction and contradicting Mr. O'Konski's earlier statement that "the only actual construction for exclusive use of a radio station that would not be used for another purpose was the laying of the tower support bases and a small amount of ground wire."

The WSAU petitions were filed by Fly, Shuebruk & Blume, New York and Washington radio law firm.

Rep. O'Konski, in his reply last week, points out the tower bases have been dynamited and new ones built. He asserts the fact WOSA did not go ahead with major construction, despite the availability of much material, until after the grant "shows clearly that our action was not malicious or defiant."

Rep. O'Konski contends two sheds on the 80-acre farm transmitter site will be used for non-radio purposes and three-fourths of another "will be used for caretaker purposes and a small portion for radio. Had I *not received* a grant all three of these buildings were a necessity and would have been built anyhow and used for purposes other than radio. For the protestant to allege otherwise is pure fabrication and conjecture based on wishes and not fact."

Mr. Tinkham's protest disclosed pendency of two libel suits against Rep. O'Konski claiming nearly $1 million in damages as the result of paid union broadcasts over WLIN concerning a labor dispute between Marathon Electric and United Electrical, Radio & Machine Workers of America.

The first suit, for $100,000, was filed in the Circuit Court of Lincoln County by Mr. Tomek, who in addition to majority interest in WSAU is also attorney for Marathon Electric. The other suit, for $875,000, was filed in the Circuit Court of Marathon County by Marathon Electric. The latter suit besides Rep. O'Konski names a Emil Muelver and Irwin Weir.

L. F. Schmitt, counsel for Rep. O'Konski at Merrill, wrote FCC on Dec. 19 contending "there is not a shadow of merit in either case."

District Attorney Altman, however, in his letter said the labor dispute "has degenerated into a name-calling contest, and the radio station was used."

Chairman Walker's reply to Mr. Altman's letter explained the Commission had considered WLIN's handling of the union broadcasts in its rulings and observed that before and after each program WLIN "offered rebuttal privileges to those holding opposing views."

Meanwhile, United Electrical has filed with FCC a charge of censorship against WOC-TV Davenport and WHBF-TV Rock Island for refusing to air the union's Christmas program on the ground it was controversial **(see story page 74).**

Sprague Declines Post

ROBERT C. SPRAGUE, who resigned as president of Sprague Electric Co. Jan. 12 to accept nomination as Under Secretary of the Air Force, announced last week he preferred not to become involved in a possible Senate controversy over his stock interests.

Writing to President Eisenhower Feb. 7, he regretted he could not accept nomination but added he felt the President should not run the risk of embarrassment of Congressional debate over stockholdings. He had taken steps to eliminate any possibility that he would be called on to make any decisions concerning business between the Air Force and his company.

Mr. Sprague is a former board chairman and president of Radio-Television Mfrs. Assn. He voiced reluctance to dispose of his stock in the family corporation to outside interests because the town of North Adams, Mass., is highly dependent on this plant.

TWO NEW TV GRANTEES START IN BLACK

WEEK-TV Peoria and WLVA-TV Lynchburg report business is good, highlighting this week's report on new stations commencing operation.

FIRST reports from two new TV stations which commenced operation this month indicate that they are operating "in the black," one reporting it isn't taking any more business and the other stating it can accept only a few more national accounts.

The outlets are WEEK-TV Peoria, Ill., and WLVA-TV Lynchburg, Va.

Fred C. Mueller, general manager of WEEK-TV Peoria, Ill., said the station went on the air with commercial programming Feb. 1, almost within hours after receiving its special temporary authorization to operate on a commercial basis [B•T, Feb. 2].

Full Commercial Schedule

Mr. Mueller said the station was operating with a full commercial schedule.

"In the first place," Mr. Mueller said, in explaining the reasons for the large amount of time sold on the station, "nothing at WEEK-TV is makeshift or temporary. We have everything—studios, transmitter, tower—permanently and correctly installed."

WEEK-TV is the only Peoria station now on the air, operates on uhf Ch. 13 and is affiliated with NBC-TV. Representative is Headley-Reed.

WLVA Lynchburg, operating on vhf Ch. 13, began commercial operation Feb. 8, and will probably be an interconnected station by May 1.

Philip P. Allen, vice president and general manager, said WLVA-TV's coverage is "more than excellent." He reported that there were viewers as far away as North Carolina, and that the station covered Charlottesville, Waynesboro, Danville and Roanoke, all in Virginia.

The Lynchburg station operates from 6 to 11 p.m. daily, is affiliated with CBS and DuMont and is represented by Hollingbery.

Harold E. Anderson, vice president and general manager of KOLN-TV Lincoln, Neb., said the station will probably begin commercial programming today (Monday) or tomorrow. He said DuMont engineers are on hand, and that the station has been airing a test pattern on its vhf Ch. 12 with full effective radiated power of more than 26 kw visual since last Wednesday.

By last Wednesday night WFMJ-TV Youngstown, Ohio, on uhf Ch. 73, was airing a test pattern with 80% of its power. Power will be gradually increased, according to Peter Frommert, production manager, until the full transmitter output of 1 kw is reached.

Commercial programming will most likely begin this week, Mr. Frommert said.

"We were being received in Akron with only half our power being transmitted," Mr. Frommert happily exclaimed, "and Akron is 45 miles away. With just a dummy load being put on the transmitter, we were getting reports of local reception," he said.

WFMJ-TV is the first station to begin programming at the upper end of the uhf band, so its coverage results will be watched with interest [B•T, Feb. 9].

Profiting by some of the errors made elsewhere, WROV-TV Roanoke, Va., on uhf Ch. 27, is not trying to break any speed records for putting a signal over the air.

"We don't plan to break our necks to get just anything on the air, and then have to run around later and clean up a mess," Frank E. Koehler, general manager, said.

Mr. Koehler said that about 80% of the TV sets in the station's area are either converted to uhf or convertible, and that in order to give TV servicemen and dealers ample time to tune new sets to uhf Ch. 27, he was planning to keep a test pattern on the air for as long as two weeks.

"In the Black"

"WROV-TV is going to begin operating in the black," Mr. Koehler revealed, "at least for the first 13 weeks. It looks pretty good," he said.

Jack Schuler, operations manager at WHUM-TV Reading, Pa., uhf Ch. 61 grantee, said the station went on the air with a test pattern at 12:12 a.m. Feb. 10, operating the first 12 kw uhf transmitter built by General Electric at its Syracuse, N. Y., plant.

A special uhf antenna developed by GE engineers multiplies the transmitter power to produce an effective radiated power of 260 kw visual.

Mr. Schuler said it was hoped the station would begin commercial programming today (Monday) or tomorrow.

He said GE engineers were working around the clock on the station, ironing out any of its bugs before programming begins. Mr. Schuler said it would be another 48 hours before all

JACK SCHULER (r), operations manager of WHUM-TV Reading, Pa., talks with Robert E. Lauterbach of GE's broadcast equipment headquarters sales staff prior to start of test pattern telecasts Feb. 10. The uhf Ch. 61 station will operate with ERP 260 kw.

...and won!

KCBQ was the **first** station in the nation to switch to the **new ABC–UPT**. With its vast resources in capital and talent, the **new ABC** is now the "Royal Flush" of the entertainment business.

the adjustments probably would be made.

WHUM-TV is being well received in Harrisburg, Lewisburg, Lancaster, Reading and other eastern Pennsylvania cities. Operators of the Williamsport community antenna system, who will provide WHUM-TV programs to their subscribers, said the station was received with an antenna four feet off the ground.

With the high power beamed from a 1,000 ft. high antenna atop Blue Mtn., 22 miles north of Reading, the station expects to cover an area extending 62 miles from the antenna site. The area includes some 750,000 families in eastern Pennsylvania, and parts of New Jersey and Maryland.

WHUM-TV, a primary CBS-TV affiliate, is represented by H-R Representatives.

Various reports were received from last week's 17 grantees about how soon they expected to get on the air.

In St. Louis, N. M. Pagliari, national sales manager for WIL, uhf Ch. 42 grantee, said the station hoped to have the TV outlet on the air before the end of this year. At present there is no network affiliation, he said. WIL-TV will operate with ERP of 79 kw visual.

Fifth in St. Louis

WIL-TV is the fifth uhf TV station granted to the St. Louis area. The others include KSTM-TV St. Louis, uhf Ch. 36; WTVI (TV) Belleville, Ill., uhf Ch. 54; KACY (TV) Festus, Mo., uhf Ch. 14, and KFUO-TV Clayton, Mo., uhf Ch. 30.

E. G. Polan, one of the principal stockholders of Polan Industries, grantee for uhf Ch. 51 in Wheeling, W. Va., said the station, granted an ERP of 24 kw visual, would be on the air in October.

Charles A. Batson, managing director of WIS-TV Corp., grantee for vhf Ch. 10 at Columbia, commented that the quick action by FCC on the newly amended application "surprised us, but not unpleasantly." He hopes for delivery of one of the first RCA 10 kw transmitters within the next few weeks and said construction of the station will begin immediately. Commencement target date is Sept. 1. Affiliation with NBC is expected since WIS is an affiliate of that network. TV sales representation also is expected to be handled by Free & Peters, Mr. Batson indicated.

Test Pattern by August

Frank S. Hoy, president of Portland Telecasting Corp., uhf Ch. 53 grantee for Portland, Me., said a test pattern should be on the air by August, with commercial programming commencing in September. This is the first grant for a TV station in Portland, Me., Mr. Hoy said.

RCA equipment has already been ordered, and a tower is on order from Truscon Steel Co. Studios and transmitter will be located in the Columbia Hotel on Congress St. The station was granted ERP of 22.5 kw visual with a 300 ft. antenna.

Mr. Hoy is the principal owner of WLAM Lewiston, Me., a member of the Maine State Board of Education (where he served as chairman for two years), serves on the Maine School Building Authority and is a director of the Maine Development Credit Corp. In Lewiston he is a vice chairman of the board of directors of the Central Maine General Hospital, director of the Manufacturers Bank, vice president of the Chamber of Commerce and past president of the Rotary Club.

Ed McKay, manager of WROM-TV Rome, Ga., said the starting date for his station was set for July 15. Network affiliation for the station, which will operate with an ERP of 2.9

"A G-E TUBE SUGGESTION SAVED US $1,100!"

Says **GEORGE A. WILSON**
Director of Engineering
Radio Cincinnati, Inc.

"Two GL-5513's in our TV transmitter have had over 7,000 hours' service. That's three times the life we got from this type a while back—means a total of $1,100 we've saved in replacements! Better maintenance is part of the story, but the big reason is the advice G-E engineers gave us about matching up paired tubes so as to get balanced electrical characteristics.

"13,000 hours from a 6-tube bank of GL-8008 rectifiers—that's another economy figure in our records. Also, General Electric makes sure that when we need tubes, they're delivered *fast.* We couldn't ask for better all-around service than we get from G-E tube distribution here in Cincinnati!"

* * *

Your 16 years with WKRC, Mr. Wilson, gives you experience that makes your comments all the more important. G.E. is glad to have helped you realize these tube economies.

Station engineers everywhere will find G-E efficient tube service no farther away than their local G-E tube distributor—no harder to reach them than the telephone. Dial now the number of *your* distributor! The sooner he starts serving you, the sooner you will save money. *Tube Department, General Electric Company, Schenectady 5, N. Y.*

WKRC HAS A SHOW FOR EVERYBODY

● Variety and educational programs over WKRC supplement CBS network shows, giving Cincinnati viewers a wide choice of television fare. The second station in Ohio to receive a TV license, WKRC lives up to its reputation by also providing complete news and weather coverage. AM broadcasting, plus FM transit radio, are other services aired from the 600-foot WKRC tower. All three transmitting operations credit much of their reliability to General Electric tube performance.

You can put your confidence in—

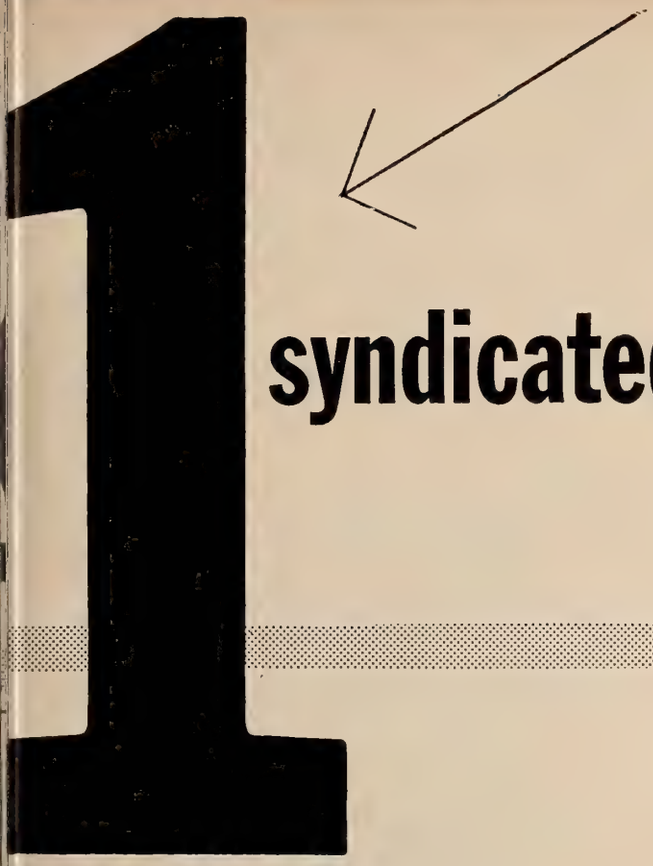
MOVIE QUICK QUIZ

a smash hit!

WLTV, ATLANTA . . . . Telecast at 7:00 p.m. Rating 15.4. This equals the ratings of the other two Atlanta TV stations combined!

WNAC-TV, BOSTON . . . . Telecast at 12:50-1:05 p.m. Rating 6.9. This is 4 times higher than the competing station in this market.

KPRC-TV, HOUSTON (half-hour show) Telecast at 10:00-10:30 a.m. (with different sponsors each day). Rating 10.8. This rating accomplished in 6 weeks. Outstanding for this time of day.



WDSU-TV, NEW ORLEANS . . . . Telecast at 5:45 p.m. Rating 28.4. Highest rating of any strip show in this market.

WTAR-TV, NORFOLK, VIRGINIA . . . Telecast at 6:45 p.m. Rating is 36.0, which we believe to be the highest rating of any local 5-time-a-week show in America.

AFTER 40 WEEKS ON THE AIR:
"Movie Quick Quiz has gone over very well with the Colonial Store Managers in the five cities where we are using the program.

The client is very well pleased with Movie Quick Quiz. I am confident the advertiser will renew for another year after the present 52 weeks are up."

Pete Liller
LILLER NEAL & BATTLE ADV. AGENCY
Atlanta, Georgia

syndicated quiz in TV?

It's **MOVIE QUICK QUIZ,** a smash hit from San Francisco to Boston. Has the biggest sale of any syndicated quiz show; has the highest ratings of any syndicated multiple show in America.

MOVIE QUICK QUIZ is a fifteen-minute, five-time-a-week TV program that has terrific impact as a nighttime feature. But—here is a series that is priced low enough to be used with *great effectiveness during the daytime hours.*

WHY IS MOVIE QUICK QUIZ SO SUCCESSFUL? 1. Because it's backed up by fifteen years of radio—TV quiz know-how. 2. Because it has a sure-fire format that can't miss. 3. Because, and *this is the biggest reason,* it comes with clever "minute movies" which furnish clues to the questions asked by the M.C. These minute movies are not film clips or simple pantomimed clues. They are original, dramatic, filmed vignettes that are entertaining and intriguing in their own right, in addition to high-lighting clues for the "MQQ" questions. 4. MOVIE QUICK QUIZ is a quality program—everything that we furnish or that is part of the show has been developed and created particularly for this television program at great expense and time-consuming effort.

HERE'S HOW MOVIE QUICK QUIZ WORKS: An emcee phones out and asks a provocative question. Except in this case, there's a minute movie to illustrate the question. And for each succeeding call—there's a brand new minute movie and a brand new question. Sounds sort of simple and obvious, doesn't it? But you've got to see the pilot film to appreciate the know-how and the planning that has gone into MOVIE QUICK QUIZ. "MQQ" is a most ingenious combination of quiz technique with TV eye appeal. We have a full year's library of 780 original minute movies now on hand, specially produced for "MQQ".

MERCHANDISING HOOK: We've got one that's sure-fire. One "MQQ" sponsor, with 17 stores, tabulated 50,000 people entered his places over a two-week period as a result of MOVIE QUICK QUIZ and over 90% then made purchases!

HERE'S WHAT YOU GET: We furnish all minute movies, questions and answers, special slides, film opening and close, operational instructions, the "works." You provide M.C. and awards. (We can help you on the awards if you ask us.) MOVIE QUICK QUIZ can be sponsored by local retail chain, local store, national advertiser, or used as a spot carrier by station.

LET'S ALL BE HAPPY! Buy MOVIE QUICK QUIZ. The sponsor will get terrific sales, the station will get a BIG rating, the advertising agency will be a hero, we will have another good order!

CREATORS OF TELLO-TEST

America's FIRST and most successful syndicated Radio Quiz Show

kw visual and a 720 ft. antenna, is not set, but national representative will be Weed Television. The station is assigned vhf Ch. 9.

Hugh O. Jones, president and general manager of WGCM-TV Gulfport, Miss., uhf Ch. 56 grantee, said he was unable to predict a starting date but that he plans early construction of the station.

John W. Boler, president and general manager of KCJB-TV Minot, N. D., said the vhf Ch. 13 station will probably be on the air by June of this year. DuMont equipment has been ordered, he said. The station will operate with an ERP of 29.5 kw visual and antenna height of 420 ft. Mr. Boler is now in New York to determine network affiliation and to select the national representative.

Edgar Bell, a 4% stockholder of Permian Basin Television Co., vhf Ch. 2 grantee for Midland, Tex., said the Midland station would use RCA equipment. There is no definite word on the starting date, representative or network affiliation, he reported. The station was granted ERP of 50 kw visual with a 1,010 ft. antenna.

Meanwhile, it was announced the following stations will join the CBS-TV network:

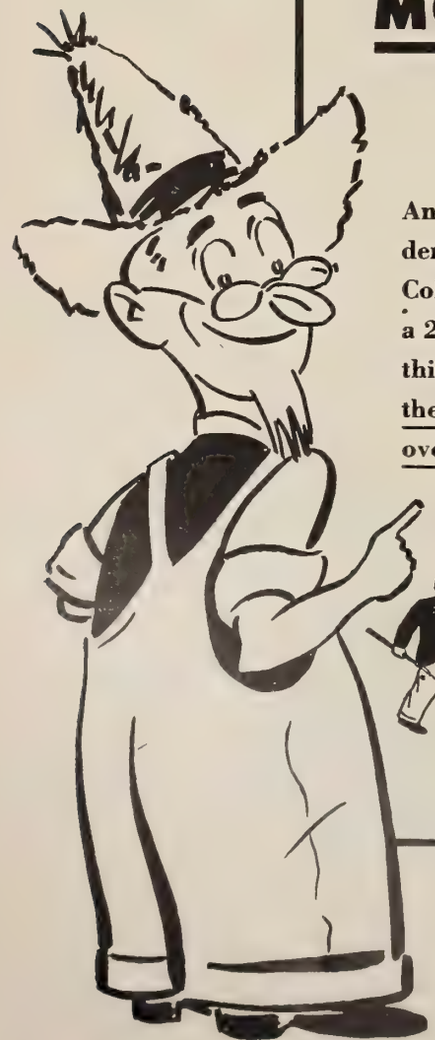
KVTV (TV) Sioux City, Iowa, as a primary, supplementary noninterconnected affiliate, to join April 1. The station is assigned vhf Ch. 9.

WETV (TV) Raleigh, N. C., as a primary, supplementary noninterconnected affiliate, to join CBS-TV March 15. Station will operate on uhf Ch. 28.

WHYN-TV Holyoke, Mass., as a primary, supplementary interconnected affiliate, assigned uhf Ch. 55, to join the network March 15.

KGUL-TV Galveston, Tex., as a basic, interconnected affiliate March 15. It will operate on vhf Ch. 11.

KTNT-TV Tacoma, Wash., assigned vhf Ch. 11, will be a basic, noninterconnected affiliate March 1.



John E. Pearson Televison Inc. will handle national television sales for WOUC (TV) Chattanooga, Tenn., uhf Ch. 49; KFSA-TV Fort Smith, Ark., uhf Ch. 22; WJHL-TV Johnson City, Tenn., vhf Ch. 11; KGKL-TV San Angelo, Tex., vhf Ch. 3, and WHIZ-TV Zanesville, Ohio, uhf Ch. 50.

Details Are Presented On New WHAS-TV Output

WHAS-TV Louisville is operating with 316 kw visual power, having sextupled its output last week while shifting from Ch. 9 to Ch. 11.

The high power, described as tops in the TV field by Victor A. Sholis, vice president and director of WHAS-AM-TV, was achieved over a four-day period under direction of Orrin W. Towner, chief engineer.

When the channel shift was made Feb. 7 a hot spot developed in the transmitter. This limited the power increase temporarily to 250 kw. The trouble was solved Feb. 10 and since then the station has been operating with 316 kw.

Mr. Sholis

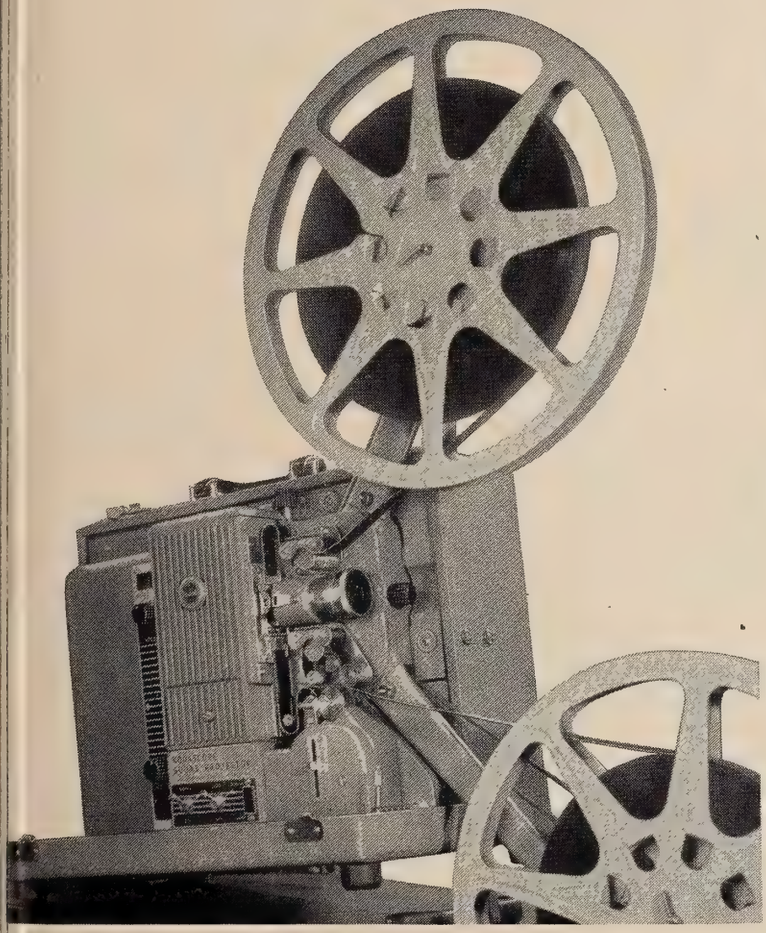
High power was achieved by use of the 12-bay antenna installed in 1950. Equipment for the Feb. 7 power boost and channel shift arrived at Louisville last Jan. 16.

Mr. Towner cooperated with General Electric Co. in construction of an amplifier that would produce the increased power. He persuaded GE to modify its 20 kw equipment to turn out 28 kw. With the high-gain antenna, the signal output reached 316 kw.

Little opportunity was available for equipment tests, most of which were done on a water-cooled dummy antenna. Air testing involved re-tuning of all circuits to Ch. 11, followed by complete re-tuning to Ch. 9.

The power change means a considerable improvement in service, particularly to viewers some distance from the Louisville tower site, besides addition of the service area, it was stated.

Mr. Towner



Describing steps taken to adapt transmitting equipment, Mr. Towner said:

"The six-inch coaxial transmission line which we originally installed carries our higher power without replacement and with high efficiency. It was only necessary to replace approximately 30 feet of connecting 1⅝-inch line to complete our preparations . . .

"We also installed a double stub tuner at the base of the antenna to take care of minor variations in the termination of our brand-band 12-bay antenna. This tuner required only a quick and minor adjustment . . ."

Having trouble getting TV films approved?

Here's how many telecasters are licking the problem

10:00 A. M. Film is previewed at TV station . . .

2:00 P. M. Film is shown at ad agency . . .

3:30 P. M. Client sees film in own office . . .

Before any TV film show is "bought," it must be presented at the station . . . the advertising agency . . . or in the client's office. And sometimes all three places in one day.

Many telecasters have solved their "multiple showing" problems by furnishing their salesmen with Kodascope Pageant Sound Projectors.

TV salesmen like the Pageant because it's easy to carry anywhere. They can set it up fast, thread it in a minute. Even well-worn audition films look and sound better with the Pageant's improved optical system and unique "focusing" sound system.

Best of all—servicing is no problem . . . for the Pageant is *permanently lubricated,* eliminating breakdowns from improper oiling. No other portable 16mm. sound projector has so many quality features. Yet, the Pageant lists at only $400.

You'll find you can get more TV film programs approved in more places . . . faster . . . when you use the Pageant. Let your Kodak Audio-Visual Dealer demonstrate it for you—or send the coupon for complete details.

Prices include Federal Tax where applicable and are subject to change without notice.

To check . . . to project . . . slide commercials

Use a Kodaslide Projector (illustrated) to see or show 2" x 2" transparencies. You've a choice of several models starting at only $26.10. To screen slide commercials in a client's office, use the unique Kodaslide Table Viewer. It's a precise projector and brilliant screen—combined. Priced from $49.50.

NCAA Names TV Committee To Work With Industry

Group will try to iron out wrinkles in the controlled TV plan.

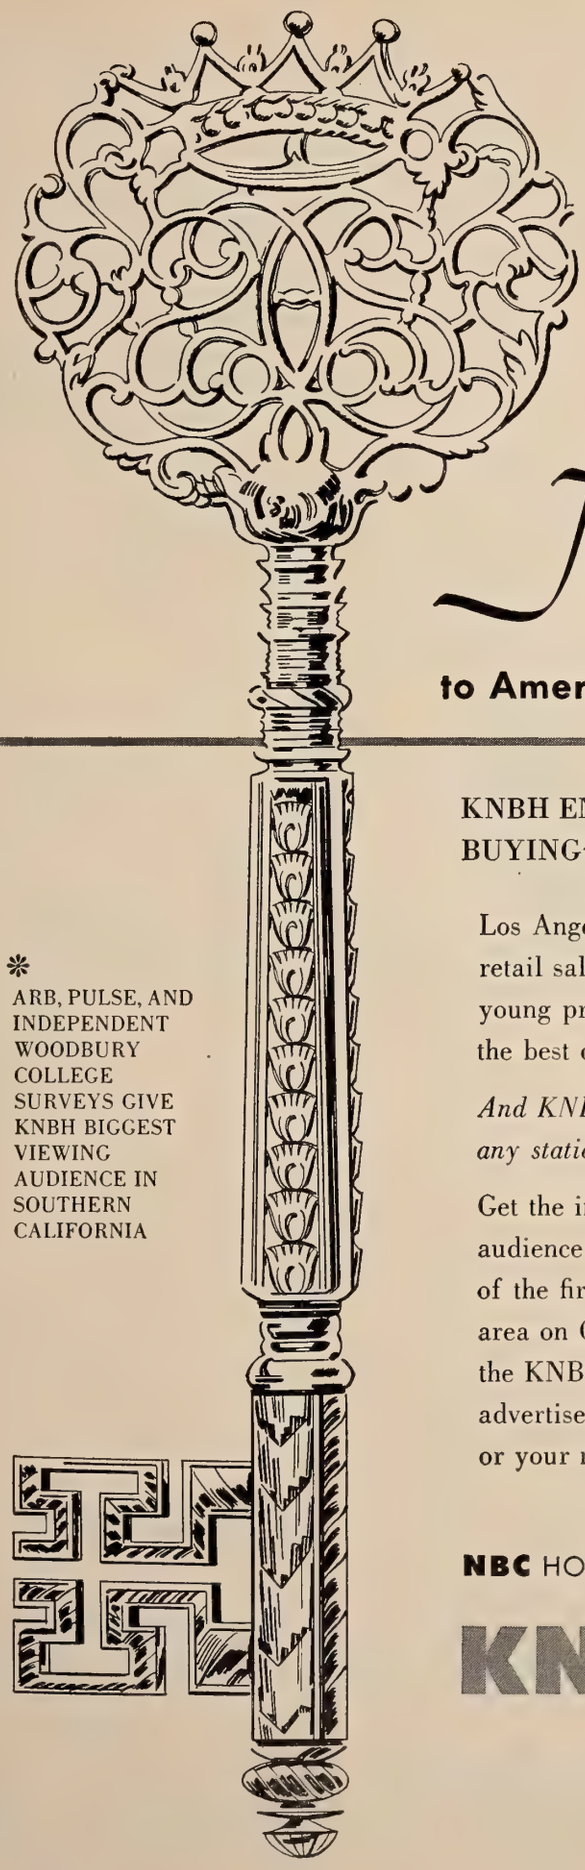
MACHINERY for administering NCAA's controlled football telecast program in 1953 has been set in motion by the association's council with appointment of a TV committee headed by Walter Byers, executive director, who will serve as chairman pro tem.

The new committee, which will replace that dissolved during NCAA's recent convention in Washington, D. C., comprises these representatives: Dist. 1—Eugene Flynn, athletic director, Holy Cross U.; Dist. 2—Robert T. Kane, athletic director, Cornell U.; Dist. 3—Jeff Coleman, business manager, U. of Alabama; Dist. 4—H. O. Crisler, athletic director, U. of Michigan.; Dist. 5—Reaves E. Peters, executive secretary, Big Seven Conference; Dist. 6—Howard Grubbs, Southern Conference; Dist. 7—E. W. Romney, commissioner, Mountain States Conference; Dist. 8—C. Harvey Cassill, athletic director, U. of Washington.

Of this group, Messrs. Coleman, Peters, Grubbs and Romney are holdover members. Representing smaller colleges are J. Shober Barr, athletic director, Franklin Marshall College, for eastern districts, and an undesignated member from Colorado School of Mines, western districts. Mr. Byers also was named member at large.

He announced that the TV committee will meet again in Chicago Feb. 23-24 to work out details of the controlled football TV plan and to appoint a television program director. After the plan is approved by referendum vote of the membership, the director will set up liaison with networks and sponsors. Permanent chairman and steering committee also will be chosen.

A two-thirds majority of the membership is needed to formalize the controlled football TV plan, which calls for a one-network contract covering one game per Saturday and one appearance per college. Some relaxation of NCAA policy on regional contests is anticipated [B•T, Jan. 12].



NCAA delegates met Feb. 6-8 to discuss general policy practices, including enforcement procedures for strengthening NCAA [AT DEADLINE, Feb. 9]. The council also named two consultants or advisers for each district:

Dist. 1—Frank Thoms, Williams College; John P. Curley, Boston College; Dist. 2—Ralph Furey, Columbia U.; Ernest D. McCoy, Penn State; Dist. 3—Horace Renegar, Tulane U.; C. M. Farrington, George Washington U.; Dist. 4—Ed Krause, Notre Dame; K.L. (Tug) Wilson, commissioner, Big Ten Conference; Dist. 5—Blair Gullian, Washington U. of St. Louis; Louis Menze, Iowa State College; Dist. 6—J. F. McKale, U. of Arizona; D. X. Bible, U. of Texas; Dist. 7—E. E. Wieman, Denver U.; Juan Reid, Colorado College; Dist. 8—W. O. Hunter, U. of Southern California; Al Masters, Stanford U.

WFBR Single Rates

A SECOND ABC affiliate will join that network's single-raters Sunday when the new rate card No. 20 of WFBR Baltimore becomes effective. A trend for affiliates was forecast when ABC's five owned stations became single-rate outlets and KXOK St. Louis, an affiliate, joined the single-raters [B•T, Feb. 2].

WFBR's one-time rates will be $200 per hour from 9 a.m. to 11 p.m., and $125 per hour for the station's other period on the air—11 p.m. to 9 a.m.

Crosley Earnings Hit Peak Despite AM Slack

SALES and earnings of Crosley Broadcasting Corp. in 1952 surpassed those of the preceding year despite a slackening of radio revenues, the annual report of Avco Mfg. Corp., Crosley parent, showed last week.

Crosley owns and operates WLW and WLWT (TV) Cincinnati, WLWC (TV) Columbus, WLWD (TV) Dayton and WINS New York, and has bought WLTV (TV) Atlanta.

Income from television operations reached "new highs" in 1952, according to the report. "Although there has been an industry-wide decline in revenues from sound broadcasting, the company was able to maintain time sales on WLW at a much higher comparative level than those of radio broadcasting as a whole."

Despite NBC's move in October to give "substantial increased discounts to advertisers," Crosley's non-network revenue at WLW increased enough to virtually offset the network loss.

WINS New York, the company reports, maintained a position "comparable to last year."

Crosley TV set sales reached high summer levels, continuing strong the rest of the year. Crosley last November bought the television picture tube and miniature receiving tube facilities of Sarkes Tarzian Inc. at Batavia, Ill.

Avco Net Sales

Avco's consolidated net sales reached $326,585,641 in 1952 compared with $286,598,113 for the previous year. Consolidated net income amounted to $11,028,927—second largest in Avco history—as compared to $10,089,214 during 1951.

WSLM Ready for Operation

TWO months later than originally planned, WSLM Salem, Ind., was ready last week to go on the air with program tests. The station, which had its equipment stolen in December, has recovered it and asked FCC Thursday for permission to start operation. Don H. Martin, owner, had planned to put the 1220 kc daytimer on the air before Christmas.

SNAKE-in-the-grasp-of-the-man-in-the-grasp of eight-foot boa constrictor is J. Robert Kerns, managing director of WSAI Cincinnati, who received the dubious gift from an unidentified admirer, who wrote: "To the man who has everything."

WOC-TV SELLS

They Came for Miles

. . . FOR MINKS

Gordon Furs has had swank salon in Davenport for past 3 years. Year ago, Gordon's tried limited TV promotion using spot announcements. Schedule showed such promise that, last Fall, Gordon's took on bigger TV project. With a local jeweler, co-sponsored live WOC-TV program—"Candlelight Cameos"—9:45 Tuesday night.

On one program featured minks; by closing time Saturday of same week HAD SOLD 7 MINK WRAPS—ranging from stoles to jackets; average sale, more than $2000. Another week, beaver got the spotlight; SOLD 3 WITHIN 4 DAYS AFTER TELECAST; average sale more than $1700. All sales traceable to WOC-TV.

Says firm head Jake Gordon: "During 13 weeks, 'Candlelight Cameos' helped us sell more mink wraps than I had anticipated selling in next 3 years. It also greatly expanded our trade area. For example, one Wednesday, lady came from Galesburg, Illinois, 48 miles away, to buy her daughter Ranch Mink Cape Jacket shown on previous night's program. Friday of same week, this lady was back, at her husband's insistence, to buy mink wrap for herself."

Minks or motor cars . . . crackers or candy bars—you name it and WOC-TV SELLS *it*. Just ask your nearest F & P Man about our *success stories;* he's got a million of them (well, almost a million)!

P. S. Co-sponsor of "Candlelight Cameos"—Schneff Brothers jewelers—has adopted a "Macy's doesn't tell Gimbel's" policy relative to sales returns from this program. But it is significant that Schneff's with Gordon's have signatured a 30-week renewal of this program.

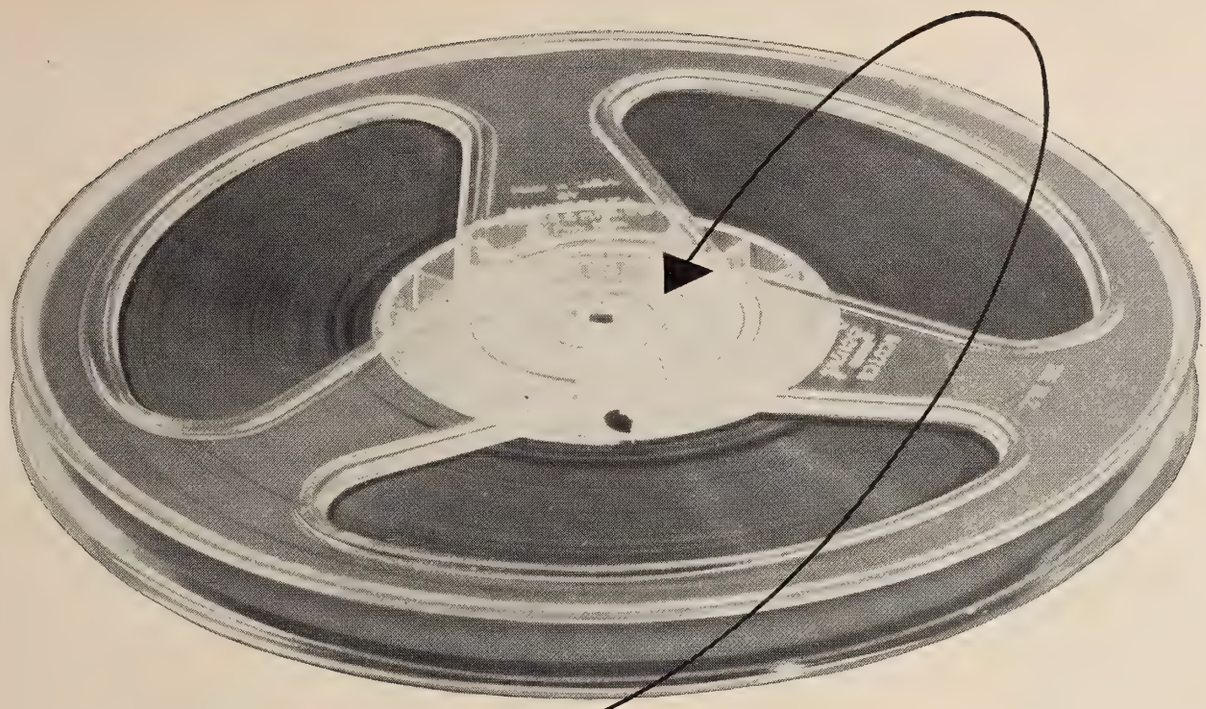
Wheelahan to Leave WSMB For Own Radio Interests

HAROLD M. WHEELAHAN, general manager and vice president of WSMB-AM-FM New Orleans, has resigned effective March 1 to devote full time to his private interests in radio, including his vice presidency and co-ownership of KSYL Alexandria, La.

Mr. Wheelahan

Mr. Wheelahan will be succeeded on that date by John R. O'Meallie, who has been sales manager of WTPS New Orleans.



The resignation was announced last week by Gaston J. Dureau Jr., president of WSMB Inc. Mr. Wheelahan, a veteran of 24 years at WSMB, until recently was a board member of NARTB. He will continue to serve WSMB in an advisory capacity, Mr. Dureau said.

He said Mr. Wheelahan is credited with introducing radio to many New Orleans homes and was first to present over the air such personalities as Dorothy Lamour, the Boswell Sisters, Margaret Viegas and Jerry Cooper. He will continue to live in New Orleans.

$5,000 to N. C. Educational TV

LARRY WALKER, general manager, WBT WBTV (TV) Charlotte, N. C., has announced $5,000 has been granted by the Jefferson Standard Foundation to North Carolina Gov. William Umstead's Advisory Commission on Educational Radio and TV. The contribution is for research in developing North Carolina's eight channels reserved for educational TV.

The Jefferson Standard Foundation was established by the Jefferson Standard Broadcasting Co. to provide funds for charitable and educational purposes. Mr. Walker, vice president and secretary-treasurer of Jefferson Standard Broadcasting Co., is chairman of the Advisory Commission's subcommittee in Charlotte.

It's the only large-hub reel of tape with **no loss in output!**

The new thinner *Dry Lubricated* tape furnished with the "Scotch" Brand 7-inch professional reel is the *only* tape wound on a large-hub reel with output equal to "Scotch" Brand 111-A, the acknowledged standard of the recording industry.

3M COMPANY

Lane Named President Of Crosley's WLTV (TV)

WILLIAM T. LANE was elected president of Broadcasting Inc., operator of WLTV (TV) Atlanta, last week by James D. Shouse and Robert E. Dunville, board chairman and executive committee board chairman, respectively.

Mr. Shouse also is chairman of the board and Mr. Dunville president of Crosley Broadcasting Corp., operator of WLW and WLWT (TV) Cincinnati, WLWC (TV) Columbus and WLWD Dayton and WINS New York.

Mr. Lane's election came at the same time as the formal acquisition of WLTV (TV) by Crosley Broadcasting. Purchase already had been approved by the FCC. Sales price, including 100% of capital stock, was $1.5 million [B•T, Feb. 2].

Plans for the Atlanta station were outlined last week by Mr. Lane, former WLTV Atlanta general manager. He said details of a million dollar expansion program would be disclosed within the next three months. Station also plans to increase its 23.8 visual ERP to full 316 kw.

KFEQ Marks 30th Year

SPECIAL anniversary programs will be aired this week at KFEQ St. Joseph, Mo., which is marking its 30th year on the air. The station's original license, issued Feb. 16, 1923, by the Bureau of Navigation of the Dept. of Commerce, was titled "License for Land Radio Station."

Television studios are being constructed for KFEQ-TV, expected to take the air this spring on Ch. 2. Barton Pitts is president of KFEQ Inc. Other officers: Henry Bradley, vice president; Glenn Griswold, treasurer, and J. Ted Branson, secretary.

Red Cross Blueprints Fund Broadcast Plans

REPRESENTATIVES of stations, networks and trade publications attended a 1953 Red Cross fund campaign luncheon at the Waldorf-Astoria, New York, Tuesday, to hear a report by James Sauter, chairman of the radio-TV bureau.

Outlining the national RC quota of $93 million and the Greater New York goal of $7 million, he said the drive will be launched March 1 with an all-star program which radio and TV networks will carry at different hours.

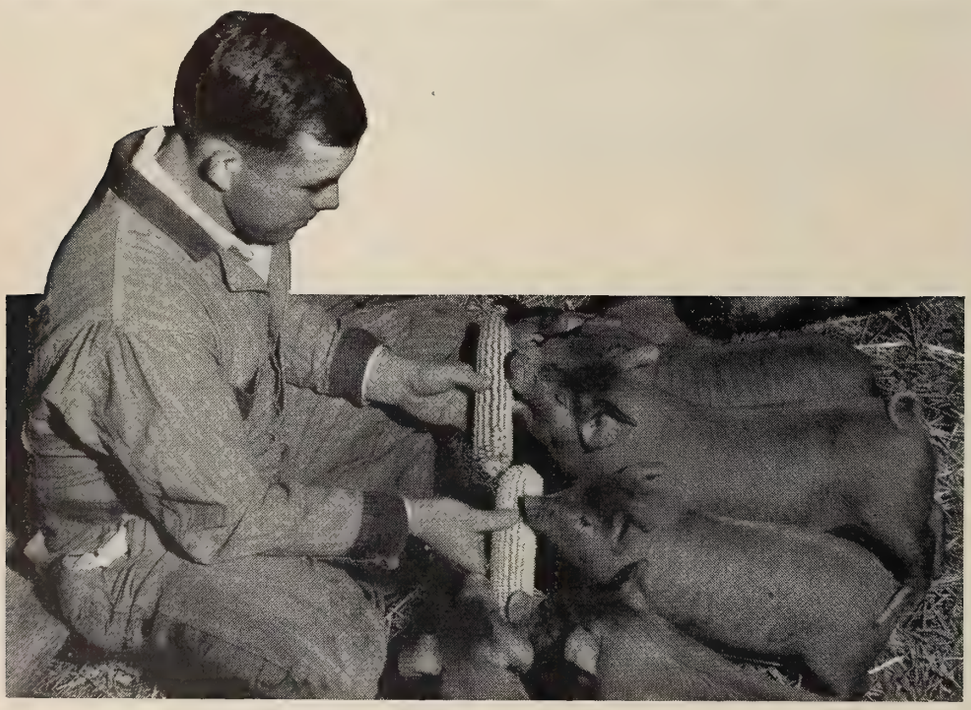
Four quarter-hour recorded programs with Jack Benny, Bob Hope, Phil Harris, Alice Faye and Bing Crosby will be available to radio stations, along with spot announcements. A 13-minute film with John Daly as narrator giving a dramatic report of Red Cross activity will be available to television stations.

Blain to TV Sales Post

EWART M. BLAIN, former CBS-TV sales account executive, has been named director of television sales for WEEU-TV Reading, Pa., Thomas E. Martin, general manager of WEEU-AM-TV, announced last week. Veteran of 20 years in broadcast sales, Mr. Blain was with Free & Peters, station representatives, as account executive in New York for 11 years. WEEU-TV, now under construction, is expected to take the air March 1 on uhf Ch. 33 as an NBC affiliate.

Mr. Blain

Jacob E. Edelstein Dies



JACOB E. EDELSTEIN, 75, vice president and director of The Outlet Co., licensee of WJAR-AM-FM-TV Providence, died last Wednesday. He had been associated with the company more than 50 years and as its publicity director, was in charge of newspaper advertising and publicity for the stations. Survivors are a brother and two sisters, all of New York.

WAPO to Affiliate With ABC

WAPO Chattanooga has signed an affiliation contract with ABC, effective April 7, Raymond G. Patterson, president and general manager, said last week. The station announced its network affiliation change upon the merger of ABC and United Paramount Theatres. WAPO presently is affiliated with NBC. WDEF Chattanooga will in turn become the NBC affiliate in that city, also on April 7 [B•T, Jan. 26], ending its present ABC affiliation.

KGUL-TV Names CBS TV Spot

KGUL-TV Galveston, Tex., has appointed CBS Television Spot Sales as its representative, effective immediately, it was announced jointly last week by Paul E. Taft, general manager of the station, and Sam Cook Digges, general sales manager of CBS TV Spot Sales. KGUL, slated to commence operations in late March, is assigned Ch. 11 and will be a basic affiliate of CBS-TV.

Three Sponsors Share '53 Radio-TV of A's, Phillies

THREE sponsors will share the 1953 radio-TV baseball schedules of the Philadelphia Phillies and Athletics, according to N. W. Ayer & Son, that city. Telecasts will include both home opening day games, both games of all Sunday doubleheaders, all Saturday afternoon games and the first games of all holiday doubleheaders from Shibe Park. A limited series of night telecasts is being arranged. No night telecasts were carried last year and only the first game of doubleheaders.

WFIL-TV, WPTZ (TV) and WCAU-TV, as in 1952, will rotate the schedule.

The radio schedule will be similar to that in 1952, including all Shibe Park games of both teams and road games not conflicting with home contests. WIBG will carry this program along with a four-state hookup.

Sponsors are Atlantic Refining Co., Chesterfields and Valley Forge beer. Gene Kelly and George Walsh will announce Phillies games while Byrum Saam and Claude Haring will cover the Athletics. Messrs. Kelly and Saam will accompany the clubs on road trips.

Oleson to Head WEAM

GEORGE OLESON, sales executive at WOL-AM-FM Washington, has been appointed general manager of WEAM Arlington, Va., Harold Thoms, WEAM president, said last week. Mr. Oleson, who was with WEAM from September 1949 to June 1952, will assume his new duties by Feb. 23, Mr. Thoms said. He replaces Howard Stanley, WEAM general and sales manager for the past five years, who has resigned.

WWJ Promotes DeGroot

DON DeGROOT, station manager of WWJ-AM-FM Detroit, has been appointed assistant general manager of WWJ - AM-FM-TV, Edwin K. Wheeler, stations general manager, said last week. Mr. DeGroot's appointment came after Willard Walbridge resigned as television station manager to join WJIM Lansing, Mich. [B•T, Feb. 9]. Thomas Warner, a member of the sales staff, has been named radio sales manager, Mr. Wheeler said.

Mr. DeGroot

Staff Changes at Lee

LEE STATIONS has effected several personnel changes at KGLO Mason City, Iowa, and WTAD Quincy, Ill., Herbert R. Ohrt, executive vice president, reported last week.

Lloyd Loers, sales manager of WTAD for two and one-half years, transfers to KGLO in the same capacity, replacing C. D. Hilton, who has resigned to enter another business. Doug Sherwin has been named assistant program director at KGLO.

Mr. Loers' work at WTAD has been taken over by John R. DeBow, named local sales manager by Walter Rothschild, station manager. John Phillips is handling sales there fulltime, and Ralph Drescher has been added to the sales force.

Akerberg Assigned Fulltime On CBS-TV Stations Relations

INDICATING the widening scope of network station relations activity as more and more TV stations are licensed, Herbert V. Akerberg, who has been station relations vice president for both CBS Radio and CBS-TV, last week was assigned to concentrate fulltime on CBS-TV.

Announcing Thursday that Mr. Akerberg would serve as fulltime CBS-TV vice president for station relations, J. L. Van Volkenburg, network president, said "it will now be possible for Mr. Akerberg to take a more active part in the planning and management group activities of the CBS-TV Division." He said Clarke (Fritz) Snyder would continue as CBS-TV director of station relations.

Mr. Akerberg's "successor" at CBS Radio was not announced immediately. William A. Schudt Jr. is CBS Radio's national director of station relations.

Mr. Akerberg joined CBS in 1929 as an engineer, and later became chief engineer and research and development engineer. He has been station relations vice president since 1936. Before he went to CBS, he built WPAL Columbus, Ohio, in 1923 and operated it until 1926.

New Garroway Contract

DAVE GARROWAY, star of NBC-TV's early-morning *Today* program (Mon.-Fri., 7-9 a.m. EST and CST), has been signed to a new contract covering his participation on the program during 1953 plus guest appearances on other NBC shows. Contract also includes an option on his services beyond 1953.

NBC-AM-TV Makes Further Staff Realignment

NBC Vice President Herbert announces new shuffling at the staff level in three departments.

REALIGNMENT of NBC's research and planning, advertising and promotion, and development departments on a staff level, reporting directly to network management, was announced Wednesday by John K. Herbert, vice president in charge of networks.

Changes are effective immediately. Mr. Herbert said Hugh M. Beville Jr., director of research and planning, will report to him on all research activities on behalf of NBC's radio and TV networks. Jacob A. Evans, director of advertising and promotion, and Robert W. McFadyen, director of sales development, will report to the administrative sales manager, Walter D. Scott. Stephen A. Flynn, manager of sales service, also will report to Mr. Scott.

This new organizational structure, according to Mr. Herbert, follows the resignation of Ruddick C. Lawrence, director of promotion, planning and development, to whom department heads formerly were responsible.

Commenting on the change, Mr. Herbert said:

"The establishment of the research and planning department as a staff function reporting directly to network management reflects the importance of this activity in the development of our plans and policies for serving our advertisers and their agencies, our affiliated radio and TV stations and our listening and viewing audiences.

"The sales development group under Mr. McFadyen will work directly with the network sales staff and will assist our sales unit in all problems of sales development in both radio and television. By bringing the sales development function and our advertising and promotion department within the structure of the sales department, we feel that we can strengthen and supplement our sales operation and increase the value of our services to our advertisers and their agencies."

As the newly-appointed manager of sales services, Mr. Flynn succeeds Frank Reed, who has resigned.

C. R. Abry Named ABC-TV National Sales Manager

CHARLES R. (CHICK) ABRY has been appointed national sales manager for ABC-TV following resignation of Edwin S. Friendly Jr., who has joined Barry & Enright Productions, radio-TV packaging firm, which will be known as Barry, Enright & Friendly.

Mr. Abry joined ABC-TV in June 1951 as an account executive. Since November 1952, he has served as ABC-TV's eastern sales manager. He previously was a network sales acager.

Joining ABC-TV as a salesman three years ago, Mr. Friendly became eastern sales manager, and was national sales director at the time of his resignation last week. Several weeks ago, he was relieved of all administrative duties —at his own request—to concentrate on sales, at which time Mr. Abry was designated to take over the administrative functions [B•T, Feb. 2].

J. Glen Taylor Elected To MBS Vice Presidency

J. GLEN TAYLOR, a vice president of General Teleradio Inc., radio-TV subsidiary of General Tire & Rubber Co., has been named a vice president of Mutual, whose stock is controlled by General Teleradio, Mutual President and Board Chairman Thomas F. O'Neil announced last week.

Mr. Taylor

Mr. Taylor, who also is on the MBS board, will concentrate on Mutual network interests and other owned-and-operated properties of General Teleradio, which include the Don Lee and Yankee Networks and WOR-AM-FM-TV New York in addition to majority stock of Mutual.

Naming of Mr. Taylor as a Mutual vice president followed the resignation of William H. Fineshriber Jr., executive vice president, to become vice president and general manager of the radio and TV networks of NBC [B•T,, Feb. 9].

CBS Dividend Declared

CBS Inc. board of directors Wednesday declared a cash dividend of $0.40 per share on class A and class B stock, payable on March 6 to stockholders of record at the close of business Feb. 20.

WOR KS!

More advertisers place their confidence in WOR than in any other station in the country.

And with good reason...

WOR personalities have earned the confidence of the largest station audience in America— 26,000,000 people in 14 states!

WOR sells—everything from bread to bird seed— in the world's most competitive market.

That's why *more* advertisers worry *less*—with WOR.

Let us show how WOR can translate listener confidence into solid sales success for *you.*

KDYL-TV
Now 30,000 Watts
From 8,900 Feet!

America's most powerful channel 4 television station now doubling its market area to cover virtually all of Utah plus Southern Idaho, Eastern Nevada and Western Wyoming.

GE Speedup on Klystron Tubes Expect 20 Per Month

PRODUCTION of new 15 kw Klystron uhf transmitting tubes by General Electric Co. and Varian Assoc. of San Carlos, Calif. (which developed the Klystron to GE specifications), is expected to reach 20 per month before the end of the year, a GE spokesman said last week.

Without giving details, he said present production is considerably below that figure, and that all 15 kw Klystron production scheduled through September, and part of the October to December production quota, already has been committed. GE is leasing tubes to telecasters at a fixed rate per broadcast hour [B•T, Feb. 9]. WHUM-TV Reading is among stations participating in the lease arrangement.

Zenith Sales at New High

SALES of Zenith Radio Corp., Chicago, in January were the highest for that month in the company's history, Comdr. E. F. McDonald Jr., president, reported last Tuesday.

Zenith also attained the "highest level of production and sales in its history" during the year ended Dec. 31, 1952, with consolidated sales reaching $137,462,000, Comdr. McDonald reported, predicting production and sales in the first quarter of 1953 "will establish a new record for this particular period of a year."

DuMont Tube Sales Mark New Record in January

NEW records were established during January production of television picture tubes by the cathode-ray tube division of Allen B. DuMont Labs., F. P. Rice, division manager, announced Wednesday.

DuMont's TV picture tube output in January was 231% over January 1952; 31% over January 1951, and 57% over January 1950. Mr. Rice added that the last quarter of 1952 was the division's best, volume-wise, when production was 271% over December 1951.

COMPACT projector used for lapping superimposition and divided images and controlled remotely or locally is being marketed by Gray Research and Development Co., New York. Called the Telojector, the device makes it possible for video stations to use 2-by-2 inch, standard 35mm, transparencies for commercials and show content, with automatic lapping of an unlimited number. Telojector was developed with RCA and network and station engineer.

SHORTS

Radio Tube Div., Sylvania Electric Products Inc., N. Y., announces production of cut-off pentode amplifier designed particularly for use in electronic computers. New tube is termed Type 6145.

Daven Co., Newark, N. J., announces availability of new hermetically sealed resistor series 1160 and 1161, for use as secondary standards, resistor elements in bridge networks, voltage divider circuits and attenuation networks.

Majestic Radio & Television Div., Wilcox-Gay Corp., has moved executive, sales and advertising offices to 70 Washington St., Brooklyn 1, N. Y. Telephone is Ulster 2-6000.

Pilot Radio Corp., Long Island City, N. Y., announces production of new AM-FM radio tuner titled Pilotuner Model AF-723, for use in high fidelity music systems.

PERSONNEL RELATIONS

NABET Waives Local Voice In WWJ-NBC Originations

JURISDICTIONAL waiver agreed to by National Assn. of Broadcast Engineers and Technicians (CIO) in signing a two-year agreement with WWJ-AM-FM-TV Detroit gives the stations the right to originate NBC shows with or without participation by NABET members who are employes of WWJ-AM-FM-TV, the station has reported.

The contract was signed Feb. 7 after out-of-court settlement of a WWJ suit, which had asked the court "to restrain NABET and its members from interfering with origination of network programs, arising out of the refusal of the Detroit Chapter of NABET to work with NBC-NABET personnel on the Dinah Shore programs which were to have originated from the new $2 million WWJ-TV studios Dec. 9 and 11."

The new NABET-WWJ contract runs from Feb. 1, 1953, to Jan. 31, 1955, and does not provide for wage re-opening, the station reported.

FCC Gets Union Complaint

"CENSORSHIP" charges have been made by United Electrical, Radio & Machine Workers of America against WOC-TV Davenport, Ia., and WHBF-TV Rock Island, Ill., alleging in a letter to the FCC that the stations cancelled contracts to show a Quaker film on Christmas Day.

The film was titled "A Time for Greatness." The stations told the union they refused to accept the film because it was controversial and at variance with program policies.

In a public memorandum, the union described the refusals as "gross" censorship of a film that District Council 8 in the Quad Cities had planned to sponsor as a public service. The union added that the suppression was not directed at it but at the specific film. Further evidence will be submitted to the FCC, according to Russ Nixon, UE Washington representative. At the FCC it was stated that WOC-TV and WHBF-TV had been informed of the charges and had been asked to file comments.

ADVERTISING COSTS UP?

Take typography, for example. It now takes $184 to buy composition that cost $100 in 1942. But for an advertising value that today is better than ever, there's **radio**.. the medium that's now delivering the biggest audience in history at a cost only slightly more than that of ten years ago!

Take WBZ, for example. It now takes **only** $125 to buy a result-producing participation package that cost $100 in 1942. And the audience has increased much faster than the slight rise in time cost, throughout the vast New England territory dominated by WBZ's 50,000-watt voice!

In six of the most important market-areas in the country, Westinghouse stations offer exceptional **values** in advertising coverage. Free & Peters will help you pick the times that pay the best return for **your** business!

WHUM-TV'S HELICAL ANTENNA PASSES TESTS

Antenna for Nation's Highest Power UHF TV Station Passes Exhaustive Operations Exam at Electronics Park

The transmitting antenna for the nation's most powerful UHF television outlet—WHUM-TV in Reading, Pa.—was put through its paces recently by G-E test men at Electronics Park.

The orange-colored antenna was lying on its side atop a hydraulic lift—the type your car is jacked up on when the oil is being changed. Some 1800 feet away, a microwave "dish" pointed its concave eye at the hoisted antenna and supplied a power beam.

Salvatore Savastano of C and GE Test squinted through a surveyor's transit set at the center of the hydraulic lift. He centered the glass of his instrument on a piece of red tape fixed in the center of the distant microwave "dish", then made a reading of the degrees and minutes of the angle.

INTER-COM SYSTEM HELPS

Savastano announced his findings into an inter-com system. Inside a warm little hut located about 50 feet away, Test Foreman Zeke Armlin and Ronnie Fisk, a UHF antenna engineer, were recording the results.

Savastano, assisted by test man Bob Estes, were told to shove the big lift to another horizontal angle. They made reading after reading.

FIGURES FORM GRAPH

Meanwhile, the figures found by the transit began to shape into a graph—snaking up and down on the chart being made in the tiny hut. What the engineers call a "power pattern" was beginning to form. This allows them to measure the power gain of UHF antennas.

A TV station ordering an antenna is interested in specific power gains and "beam tilts" for the steel transmitting finger to be poked into the heavens. The test men at the hydraulic lift-antenna-"dish" setup are learning if the specifications are being met.

C and GE's Leon DeFoe of Test Design came up with the idea of seating the antennas being tested on the hydraulic lift. It enables easy manipulation in swinging the antennas to various angles.

WHUM-TV's five-bay antenna will come to rest atop a 1,000-foot tower to transmit the nation's most powerful UHF beams.

Salvatore Savastano, G-E test engineer, checks WHUM-TV's new Helical Antenna. The UHF antenna was tested thoroughly before it was "okayed" for shipment to the Reading, Pa. station.

Springfield TV Station WWLP Wages War on Antenna Towers Plummeting Ice

During and after a recent snow and ice storm, Springfield television Station WWLP—being constructed—was "under attack" by plummeting ice from the antenna tower. Chunks and icicles as long as 6 ft. and as wide as 3 inches fell on the transmitter building's roof.

Several times the sturdy roof was punctured. Serious damage was averted by makeshift roof reinforcements. But before the storm had ended, William L. Putnam, treasurer of Station WWLP, and his staff devised a plan to put a false roof on top of the building.

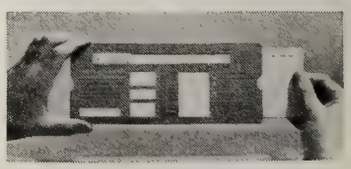
They intended to put removable two-by-fours on the roof over which they would weld 12 gauge wire mesh—this layer of wiring to break and scatter the ice when it hits, reducing chances of damage to building.

However, instead, with what Station WWLP calls "Yankee ingenuity", it is developing the first known "antenna tower defroster". The device consists largely of resistance cable, wrapped around the uprights of the tower. Starting at a point some 40 ft. from the ground, this cable will follow the uprights to the very top of the tower structure.

Automatically operated, the new—and as yet unnamed, unpatented—device will go on and off as soon as the temperature and humidity shall reach a certain level.

Treasurer Putnam says: "As soon as this device is installed WWLP will have racked up for itself another 'first'. Its most important 'first' will be going on the air as Springfield's first TV station—an all General Electric equipped UHF outlet."

Peoria's WEEK-TV Receives G-E UHF Transmitter



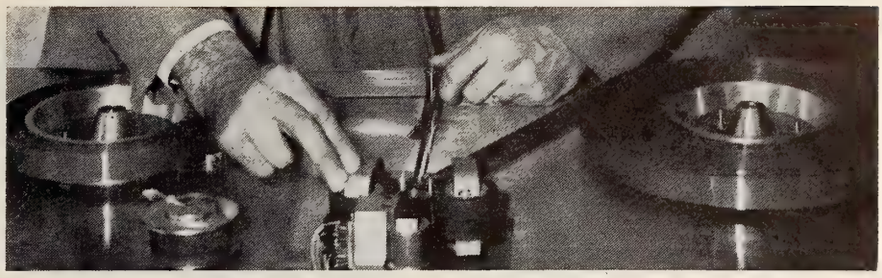
Station WEEK-TV, Peoria, Ill., recently received a UHF Transmitter, the second UHF unit to be shipped by G.E. It operates at lower power (100 watts). A special antenna was delivered by G.E. on January 23rd to boost effective radiated power many times and put WEEK-TV on the air Feb. 1.

The station has ordered a 12,000-watt amplifier from G.E. Installation will boost effective power to about 175,000 watts, with a coverage aim of 40 miles or more.

C.B. Akers, partner in WEEK-TV, explained: although the station is a basic NBC affiliate it will also carry programs of the DuMont and CBS television networks. All programs at the start will be either on film or originate in WEEK-TV's own studio. Akers expects the station to be tied into the nationwide TV network by May 1st.

FREE CALCULATORS FOR STATION ENGINEERS

Free UHF Television Range Calculators are now available. Station engineers only are eligible for this



offer and may receive a calculator (as pictured) by writing *General Electric Company, Section 223-16, Electronics Park, Syracuse, N. Y.*

Engineers will use these UHF TV range calculators to estimate coverage of transmitting stations on Channels 14-83. It also covers all G-E transmitter-antenna combinations. It will give answers for ERP's from 10-watts to 10,000 kilowatts. The coverage is based upon theoretical smooth earth curves as published in ELECTRONICS magazine and published FCC experience factors.

GENERAL ELECTRIC

TAPED TV

How it will work
What it will cost
How much it will save

By Frank Healey

AS FAR as we in the tape recording field are concerned, this is the "Electronic Age"—and we will continue to act accordingly, at least until we are commercially displaced by the "Atomic Age."

Electronics provided a fascinating challenge to scientists during and since World War II. Our initial foray into the field began here at Bing Crosby Enterprises Inc. shortly after that war, in the development of tape recording equipment for radio and recorders. This was in conjunction with Ampex Electric Corp. whose tape recorders are now standard equipment for leading radio stations, recording studios and many government agencies, including guided missile developments.

We at Bing Crosby Enterprises, however, felt that more was to be developed from this newest wonder of our day. The next natural step was to achieve magnetic recording of live TV on tape.

Under leadership of our chief engineer, John T. Mullin, practical video tape recording has been accomplished after only three years of research and experiments.

The first VTR (Video Tape Recorder) unit was demonstrated in late 1951 in our Hollywood laboratories at 9030 Sunset Blvd., Hollywood. This unit was sufficiently advanced in degree of picture production during last year to insure the manufacture of recording and playback equipment capable of answering every quality demand of the television and motion-picture industries. It may safely be declared now that such a commercial unit will be available within a year, despite predictions that success would not be achieved for five or ten years.

In addition, no problem is anticipated in handling color when it is introduced to the TV industry. Tests indicate that VTR will be readily adaptable to any of the color systems now being considered.

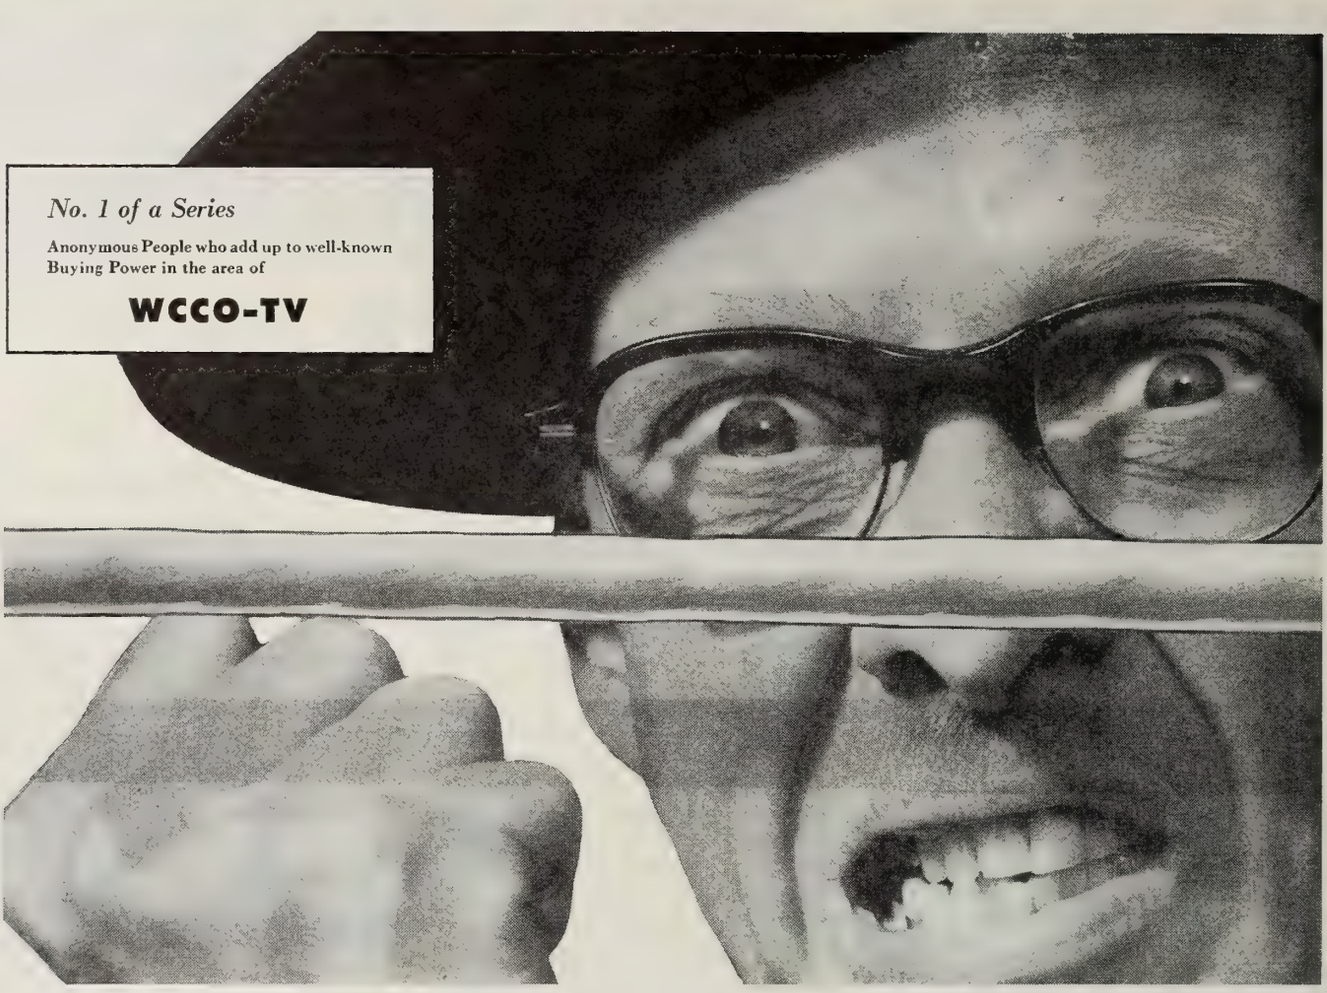
Electronics Staff

Working under Mr. Mullin's supervision are Wayne R. Johnson, TV project engineer of BCE, his assistant, Edward J. Corey, and a highly skilled staff of electronics experts who include Dean DeMoss, Chester Shaw, Eugene Brown and Robert Phillips.

Without dwelling in detail on the technical phases of the development or describing the highly involved circuit pattern of our recorder, we can reveal, for the first time, the general specifications of our recorder and how it operates.

In physical appearance it is similar to the tape sound recorder with which everyone in the radio-TV industry is familiar. To achieve a sound-picture tape outwardly appears as simple as the recording of sound alone on tape.

This is the way a VTR functions:



A one-inch tape, similar in outward appearance to that now employed on commercial tape recorders, is used. Sound recorders run at 15 inches per second. Our recording speed for video is 100 inches per second. This may seem excessive by contrast, but is not. The secret is that our engineers have demonstrated the ability to record 260 times the "information" that has heretofore been possible to capture under any tape system now in general use. Therefore, a non-bulky roll adequately provides for recording a 15-minute program. In "scanning" the video picture to our tape, we record on 12 tracks—one for sound and 11 others for picture.

Tape in present use is made by Minnesota Mining & Manufacturing Co. It is composed of an acetate base material coated with a special magnetic oxide. A new base will shortly be produced by this company. It will be known as "Mylar," a development of duPont. Although thinner, it will be a stronger tape. In preparation also is a half-inch tape of thinner stock which will assimilate all the electronic pulses now recorded on our one-inch tape.

In a typical operation, the sound and

The old groaner will be able to croon a happy tune if the Video Tape Recorder turns out as well as promised. Here the chairman of the board of Bing Crosby Enterprises Inc. (extreme right) is brought up to date on VTR technical development by (l to r) John T. Mullin, chief engineer; Frank Healey, electronics division executive director and author of this article, and Wayne R. Johnson, TV project engineer.

Why Do 200,000 of them like Wrestling?

● The 6,000 people who jam the Minneapolis Auditorium Tuesday nights are just a corporal's guard compared to the more than 200,000 at ringside in their homes—via WCCO-TV.

Why do they like wrestling? A big part of the answer is in the skill of WCCO-TV sports announcers who (a) know the sport (b) know the viewers needs and tastes and (c) talk just enough—authoritatively, on what is going on in the ring.

It takes skill and experience to do good sports reporting . . . like the skill and 15 years experience of Rollie Johnson, Sports Director, in covering Northwest sports. And his staff know their jobs . . . from ringside to camera to transmitter to Northwest homes . . . the job is done *right* . . . on WCCO-TV.

For dominant coverage of the Northwest Market

Though operation of the Video Tape Recorder will be simple, the device itself is complex. A VTR circuit is being checked by Edward J. Corey (r), assistant TV project engineer, and Dean DeMoss, electronics engineer, of the electronics division of Bing Crosby Enterprises Inc.

picture to be recorded on magnetic tape are picked up in a studio by the normal video procedure of the TV camera and microphone. Through the camera and sound equipment, an electrical signal is transferred by coaxial cable to the recorder. The machine may be on the stage where the picture is made, in a sound truck, elsewhere in the studio, at a laboratory some miles distant, or even across-country. The picture transferance over such remote distances suffers no more loss in fidelity than that incurred in present micro-wave movement.

The recording action is truly push-button. The operator has only to press a "start" signal and the "recording" button and the tape travels through recording heads just as it does in a sound-tape recorder.

Quick Playback

The recording is taken instantly, but by inclusion of a built-in playback device or "monitor" the taped picture and sound may be inspected visibly and audibly only one-tenth of a second later on this close-at-hand viewer.

Here is one of the many tremendous advantages of the system. An immediate view of an originating production is made available. There is no delay of processing, such as is necessary in motion picture filming. Thus the program producer or supervisor, in the case of a TV production, may be *immediately* assured that the recorded program is without flaws. Eliminated are tape re-winding, later inspection on playback and such delays as viewing the "rushes" on the following day.

It is conceivable that a director or producer sitting in his Hollywood office, might supervise production of a play at Rockefeller Center in New York, as efficiently as though he were present on stage there.

He could take and retake scenes, without intermittent delay, to suit the demands of his personal taste and assure himself of immediate satisfaction with program quality. Editing and timing would be merely a matter of a watch, a pair of scissors and some Scotch tape.

The program, now having been taped for later telecast needs only to be passed through the VTR. The playback machine which previously was the recorder, now "reads" back to the audience that which was recorded, recreating identically that which the video camera saw, the microphone heard, without loss in any respect either in quality of sound or picture. This picture and sound may be fed to the TV transmitter or even simultaneously distributed, via coaxial cable or micro-wave, to other areas.

One of the greatest advantages of VTR, as we have developed it, is the cost comparison. Our device will record for $50 the 15-minute 35 mm hot kinescope that now costs some $150 to produce. A regular 30-minute kinescope negative and one positive on 16 mm film now cost some $600 to produce. The Crosby VTR promises a quality picture and virtual permanence for $100, with additional dupes at the same price in any quantity desired without loss of fidelity.

The magnetic tape, of course, is erasable. Thus, not only are substantial savings in material costs achieved, but promise is made that costly delays in laboratory processing are eliminated. It is obvious that the many headaches and hazards of delayed telecasts will be a thing of the past. VTR equipment is also about half the size of kinescope equipment, therefore more portable.

In summary, some of the advantages to be enjoyed through taped television are:

Tape may be de-magnetized and re-used, thus effecting savings in material costs. Fades, dissolves and special effects may be recorded from the TV screen without use of optical printers or special-effects equipment. Since sound recording is coincident with that of picture, the dubbing process is eliminated. VTR tape will cost one-fourth to one-tenth less than motion picture film. The one-tenth of a second viewing after filming of results through the monitor will result in time and material savings since errors may be immediately detected and corrected.

Guesswork as to quality of scenes, whether in lighting, dialogue, action, camera work and other production aspects is eliminated. Thus, any defects are *immediately* visible to the VTR producer since he views the end result of his production at a split second after it is recorded.

Additionally, inserts in previously recorded programs may be easily made; scripts may be given even greater elasticity both for time and material, and production may proceed without excessive materials used.

Where film production may have proved costly, tape recording of TV shows will be comparatively simple and inexpensive. Actors will have the opportunity to participate in other activities or enjoy prolonged holidays. And their work before the tape recording camera will be accomplished under less strain, since their director will have an immediate view of their work as it will be seen by the audience. He will be able immediately to determine the quality of the scene and make the retakes where necessary without fear of "burning up film."

Finally, with both sound and picture side by side on the tape, editing is quickly and easily effected, with a single operation removing the undesirable material.

These glowing promises of great savings in production costs naturally give rise to one final question. What will the Crosby VTR cost?

A complete unit with recording and playback will sell for approximately $50,000 according to present estimates. It is contemplated that production of these machines will be under license to Ampex Electric Corp. Whether the machines will be sold or leased to TV stations, networks and motion picture studios is yet to be determined. Present progress indicates that the machines will be available by January of next year.

ABOUT THE AUTHOR

MR. HEALEY has been executive director of the electronics division of Bing Crosby Enterprises Inc. since early 1951. He received his electronics indoctrination while serving as a lieutenant-colonel in the Air Force during World War II. After the war he headed his own Hollywood radio-TV production company for four years, gave it up to join the Crosby company. Before the war he was RKO Radio Pictures director of radio-TV and before that was in the publicity and program departments of NBC, New York, for several years.

HOW TO SET YOUR

The musical commercial has become a standard advertising technique. Like all other techniques, it must be carefully planned and skillfully created. Here an expert tells how some of the most successful jingles have been prepared.

BEFORE attempting to analyze and detail the makeup of an effective musical commercial, it might be wiser first to define what an effective musical commercial is. It is a musical device that acts as a three-way stimulant to sales; first, by sales impact of performance; second, by sales impression created; and last, by the over-ride, or bonus impression, that accrues to a sponsor every time someone whistles, hums, or sings the tune thereafter.

In short, an effective musical commercial should sing sales, and more sales are usually sung when a musical commercial is conceived—not as an afterthought—but as an integral part of planned advertising strategy for all media, as, for example, Lucky Strike's "Be Happy! Go Lucky!", Falstaff Beer's "Sing Out for Falstaff!", Chesterfield's "Sound Off!" Genesee Brewing's "More People Like Genesee!"

Musts in Musicals

For a musical commercial to be effective, it must command attention; it must establish emotional acceptance; it must get over the sales message; it must have high remembrance value; it must have musical individuality, and it must sing! The first three "musts" are the basic elements of impact. The latter three "musts" are the basic elements of impression.

In order to achieve these "musts," an effective musical commercial should have the following characteristics: The first is a device to command attention, which may utilize either instrumental effects (bagpipes, drums, whistles, bells, etc.); mechanical effects (echo, filter, Sonovox, etc.; vocal effects (whispers, yodels, chorals, etc.); or word devices ("Stop—Whatever you're doing!").

The second characteristic involves the emotional acceptance factors, which are: Class, type, and age group of potential buyer; product characteristics and appeal; program association (sporting event, dramatic show, newscast, etc.), and medium use—radio, television, or both.

The factors involved in the third characteristic that puts the sales message across are: Name of product, basic message, facts, advantages, and bid for action. The high remembrance value, which is the fourth characteristic, may be built on a product's unusual or distinguishing features, as, for example, new discovery ("No Rinse Surf") or exciting action or result ("Zest").

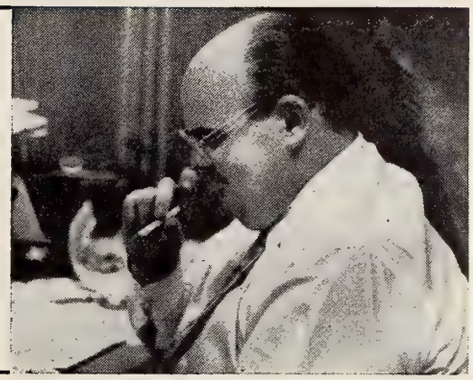
Or, perhaps, high remembrance value may be found in trademark characterization like Goebel Beer's "Brewster, the Goebel Rooster," or product characterization illustrated by "Chiquita Banana," or the title gimmick method, "Hey, Mabel — Black Label!" used by Carling's Black Label Beer.

The Gimmick

Or high remembrance value may be achieved through a musical gimmick, which may be either descriptive of action, typified by Ajax's "Foams the dirt right down the drain—Bu-bu-bu-bu-bum," or descriptive of result as Johnson's Wax's "Makes Your Floor Shine, Shine, Shine—Shine!"

Another illustration of the high remembrance characteristic is the musical trademark for Tide that opens with an ascending musical note, vocally picked up with "Tide's In!" and followed by a descending musical note and the vocal climax, "Dirt's Out!"

The fifth characteristic centers around musical individuality. To realize this, it is necessary to establish a musical association in character with the product. It is also necessary to establish a theme that is recognizable even without lyrics. And for quick identification use, it is also necessary to individualize several notes or short phrases.



The final characteristic is that an effective musical commercial sings! And it sings when the lyrics, rhymes, rhythm and tune are good, when it is novel enough to be catchy, interesting enough to wear well, and simple enough for everyone to sing.

In writing musical commercials, a ques-

SALES TALK TO Music

By Phil Davis

ABOUT THE AUTHOR: Phil Davis Musical Enterprises Inc. is one of the leading producers of musical commercials for radio and TV. Among accounts for which Mr. Davis and company have created jingles are Zest, Falstaff Beer, Hudson Paper Napkins, Goebel Beer, Camay, No-Rinse Surf, Genesee Beer, Crisco, Bab-O, Dodge, Carling's Black Label Beer and Johnson's Wax. Mr. Davis is a veteran broadcast musician, was musical director of WLW Cincinnati for 12 years, has led orchestras on many NBC and MBS programs.

tion frequently asked is: "Which comes first? The music or the lyrics?" Yet, the very nature, or *raison d'etre* of musical advertising, dictates that the lyrics come first, and logically so. In the first place, the lyrics are the sales story.

Another salient reason for writing the lyrics first—the one most frequently overlooked by non-professionals—is that products, like individuals, have musical rhythms peculiarly theirs. Beer, for example, has a light, gay, fun-loving, dancing rhythm. Beauty soaps, on the other hand, suggest lushness, dreaminess, soft lights and sweet music. Detergents have a brisk rub-a-dub-dub rhythm and so forth.

Meter and Tempo

But whatever rhythms the product suggests, it's the spoken words of the sales story that indicate the natural meter and tempo, which, in turn, provide the clue for the rhyme pattern. In order for the melody to emphasize the name of the product, accentuate the important sell words, and punctuate the sales message with the spirit and character of the product, the lyrics should be written first.

Generally speaking, the best lyrics are those that clearly and simply express the sense and meaning of the basic copy theme and follow, as closely as possible, everyday speech. Lyrics built around too many advertising points, or lyrics that are too cute, dissipate a sales message.

On the other hand, not all copy points make good lyrics, as, for example, the "No-shift ease" copy point of the '53 Dodge. The medium itself dictates that no matter how excellent a copy point may be for printed media, it is no good if it is not singable.

Lyrics that stimulate the listener's inner world of thought, appealing to his senses of touch, smell, sight, taste, or movement, usually increase the impact of the sales message. Adjectives, however, tend to weaken a sales message, for they describe only one characteristic of a product and not the whole.

Verbs and verbal derivatives (the "Do" words) are hard-hitting, for they tell the listener to use the product, taste the product, try the product, or what the product will do if he buys the product. To say a product is something or like something ignores one of the primary interests of man—self interest!

It's for this reason that the second person "You" appeal has more force than the first person "I" or third person "He" appeals that are not aimed at the ego, or the self-interest that motivates the majority of us.

Keeping the listener's self-interest in the forefront provides the key, in the majority of instances, to a musical commercial's basic copy theme. What does the product do? What has the listener to gain by buying and using the product? In illustration, let's take the lyrics of Johnson's Wax musical commercial for Hard Gloss Glo-Coat that tells the listener:

"Glo-Coat! Use Hard Gloss Glo-Coat!
Waxes Clean! Waxes Bright!
Waxes the Easy Way! Waxes Right!
It's a Johnson Wax
That'll make Your Floor Shine—
Shine! Shine! Shine!
A Johnson's Wax
That'll Make Your Floor Shine!—
Hard Gloss Glo-Coat!"

Actually, lyrics without music are like a bride without a groom. It's the wedding of the two that makes the union. Earlier in this article, we referred to rhythmic idioms as being as natural to products as to individuals. The rhythm suggested by Johnson's Wax products has a sparkling, bright, work-is-easy-and-over-with-in-no-time quality.

The music should fit the product, suggesting not only what the product is, but what the product does. It's the music that creates the initial impact and paves the way for the acceptance of the words.

Not only does the music put across the sales message and bring out the hidden meanings within words, but it also sets the listener pleasantly, establishing his willingness to listen. Needless to say, a musical commercial, like a popular tune, does not catch on with the public unless the words make a joint impact with the music.

Words and Music

It is this joint impact of words and music that often militates against the use of public domain tunes. It is difficult to get clear-cut sponsor identification. For no matter how frequently, for example, a sponsor sings his sales story to "Shortnin' Bread," a large majority of listeners, consciously or unconsciously, will sing the words associated with the original tune, words that may be superficially forgotten, but, emotionally, they are remembered.

Another reason it's difficult to get clear-cut sponsor identification with a public domain tune is conflict of sponsorship. Let's assume, a national manufacturer of shortening decides to use "Shortnin' Bread" as his musical trademark. There's nothing he can do to stop a regional or local shortening manufacturer, baking company, or any other company, for that matter, from using the identical tune.

He can neither protect his investment, nor build equity in a public domain musical trademark that should be, but usually isn't,

as individually his as his brand name; yet his investment may run into many thousands of dollars.

The cost of a musical commercial, be it original or public domain, is an important item. And a musical commercial should not be considered unless a budget is more than adequate to provide a smooth, professional recording; for in this day of disc jockey programs and juke boxes, the public is well aware of the difference between professional and non-professional recordings.

Too, national users of musical commercials have established a standard of quality equal to the popular recordings of name bands. When a regional or local musical commercial falls below this standard, it stands out like a sore thumb. By the same token, when it meets this standard, it acquires prestige through association.

Music Costs Money

Though production costs are no small item, a musical commercial should not be considered unless a budget is large enough to buy enough time on radio, television, or both, to allow the public to catch on to it.

Assuming that the budget is large enough to provide a top recording and buy enough time, here are the step-by-step mechanics that go into the making of a musical commercial:

1: Repeat the name of the product and sales message, or slogan, with proper accent and emphasis. As previously mentioned, the rhythm of the spoken words should indicate the natural meter and tempo and provide a clue for the rhyme pattern.

2: Determine the most suitable approach, the type and character of the material, using the characteristics detailed in those factors that outline emotional acceptance and high remembrance value.

3: Plot out lyric pattern to incorporate the "musts" as set forth in the third characteristic, which is to put the message across.

4: Explore the possibility of incorporating—as an attention getter—one of the devices enumerated in the first characteristic.

5: Write the music to fit the lyrics, using the fifth characteristic as a guide. Be sure that the melody gives the best possible emphasis to the name, accentuates the right words, and punctuates the message with the spirit and the character of the product.

6: Polish it up and check with the requirements of the sixth characteristic: It must sing!

Tangibles & Intangibles

No doubt, these mechanics are an oversimplification of the many intangibles that go into any creative effort. Background and experience carry some weight. Inspiration may on occasion illuminate. But on the whole, the intangibles come as a result of constant application of pencil to paper, many false starts, and much sifting of ideas to find *the one!*

Discounting the intangibles, if your musical commercial passes inspection on all six characteristics that the majority of effective musical commercials share in common, you may be certain that the odds are pretty good that your musical commercial will be effective—will sing increased sales!

FOR CLORETS TV IS KISSING SWEET

WHEN the American Chicle Co. was ready to introduce its Clorets Chlorophyll Gum on a national basis in the fall of 1951, the company had some very specific demands to make of its advertising media.

To a country accustomed to purchasing gum with a single 5-cent coin, American Chicle was attempting to sell a product involving the unprecedented expenditure of two coins, totaling 15 cents. And its new product contained an ingredient relatively unknown at that time—Clorets was the first nationally distributed chlorophyll gum.

Heavy promotion was needed to back up its sprinkling of newspaper and radio advertising. And that promotion had to be directed to the entire family, not just single segments, such as housewives or children. Of first importance, too, was the company's desire not to become involved in a long-term contract that might not bring immediate results.

To meet these requirements, Clorets, through Dancer - Fitzgerald - Sample, bought *Rocky King, Detective* on nine stations of the DuMont Television Network in September, 1951.

Starring veteran actor Roscoe Karns, the mystery series had been telecast since January, 1950, earning comfortable ratings and good cost-per-thousand results for its previous sponsors. (During the last eight Nielsen national report periods for instance, the program averaged a 22.0 rating.) This equals 10,697,330 viewers. (Source: Videodex April 1952 Audience Composition Report.)

"Our answers were there from the outset," said R. L. Harris, American Chicle's advertising manager. *Rocky* reached the entire family; we still think the show has one of the best balanced audience compositions of all TV mystery programs. It was and is a moderately priced show, costing us at that time $5,147.50 per week as co-sponsor. As the show continued to prove its selling power, we increased our network to 35 stations, with a weekly tab of $9,921.87."

ROCKY KING

Beneath the sheet, a corpse

CLORETS COMMERCIALS

These two keep kissing sweet

The commercial is hard-sell, built around the slogan, "Kissing Sweet." Two hearts "palpitating" on the screen dissolve to a young man and woman kissing, as the announcer says:

"Two hearts beat as one when your breath is 'Kissing Sweet.' To make your breath 'Kissing Sweet' in seconds, use new Clorets Candy Mints, or chew delicious Clorets Chewing Gum."

Copy, which is prepared by Dancer-Fitzgerald-Sample's Estelle Mendelsohn, goes on to tell viewers that both Clorets products are "rich in chlorophyll, that magical green purifier. It is *active* cholorophyll—true water-soluble chlorophyll. Not synthetic. Not an imitation. Delicious minty Clorets make breath 'Kissing Sweet' in seconds."

Rocky brought results for American Chicle almost immediately. After one month of co-sponsorship (with Procter & Gamble Co.'s Ivory Flakes), more Clorets were sold in certain markets than had been sold in five months before Clorets went on TV.

Based on the December Nielsen, these high sales results cost Clorets 99 cents per thousand viewers, or 66 cents per thousand viewers per commercial minute.

"*Rocky King* has given us more listeners to our commercial per dollar than any other TV show or other advertising medium," Mr. Harris added. "The program enables Clorets to get one and one-half minutes of commercial time with the entire family—something we could not possibly attain any other way."

Proof of the pudding—Clorets recently signed for a similar DuMont co-sponsorship deal (with Bauer & Black's Curads) on the network's weekly *Twenty Questions.*

Chicago: 111 W. Washington
Los Angeles: 1330 Wilshire Blvd.

To broadcast verse

A recent amendment to the U. S. copyright law adds new complications to copyright clearance for program producers and radio and television broadcasters. Here's what you can and can't do under the revised law.

Breathes there the man, with soul so dead,
Who never to himself hath said,
This is my own, my native land!

THOSE immortal lines by Sir Walter Scott (1771-1832), plucked from "The Lay of the Last Minstrel," may be read on a George Washington's Birthday program to be produced by mythical station WOF—and WOF-TV, too.

They may be read without fear of damage suits for copyright violation.

The whole poem may be read, without any danger of court action.

Now, suppose WOF-AM-TV wants to use "The Gift Outright," one of six New England poems by Robert Frost (1875—). It deals with the spirit that inspired the nation's founders and opens with this intriguing statement:

The land was . . .

Wait a minute! There's danger ahead—real danger, with process servers and lawyers and other complications.

Why is it perfectly safe to use the Scott poem and equally unsafe to quote all or a substantial part of the Frost verse?

The answer is found in a paragraph—one long sentence, replete with commas, semicolons and a liberal garnish of legal gobbledegook.

That paragraph is known as 1(c), a new addition to the U. S. Copyright Act that became effective Jan. 1, 1953 (see separate box on opposite page).

Because of that paragraph the Frost poem, or a substantial part of it, can't be read on WOF-AM-TV without permission of the copyright proprietor (publisher, author or literary agent, usually).

Shakespeare's Safe

On the other hand, there's absolutely nothing to worry about in reading parts of, or the entire works of Milton, Scott, Shakespeare, Keats, Longfellow or any of their contemporaries.

After all, copyrights last only 56 years and these classic writers belonged to another century though their works are ageless.

Since all literary works more than 56 years old lie in the public domain, there's no copyright problem involved in reading them on the air.

Now, what about paragraph 1(c), the new copyright gimmick?

Obviously "The Gift Outright," Frost's poem, is a nondramatic literary work. That's what the new copyright amendment covers, and it's important that all radio and television stations know what it means and how it works.

To read "The Gift Outright" on the air, or a substantial part of it, might make a station liable to suit if it is copyrighted, unless proper permission is obtained.

The obvious procedure is to find out if the poem is protected by copyright.

"The Gift Outright" is included in *The World's Best,* a collection of literary works compiled by Whit Burnet and published by Dial Press, New York. Dial Press has no control over use of "The Gift Outright," since it had to get permission to reprint the poem.

The "acknowledgements" department of *The World's Best* carries this paragraph:

> Frost, Robert: Copyright 1930, 1939, 1943, 1947, 1949 by Henry Holt & Co. Copyright 1936, 1942 by Robert Frost. Used by permission of the author and publishers.

There's no question about it. If WOF reads the whole poem on its George Washington's Birthday program without getting permission of either the author or publisher (it's hard to tell which in this case), the lawyers are likely to take over.

Quotable Lines

It might be reasonably safe, however, to quote a line or two from "The Gift Outright," under a legal rule that allows exceptions. This rule is known as the "fair use doctrine." It was created over a long period by the courts to cover a "use" of a copyrighted work that doesn't lessen its value or compete with it, and helps to advance culture and education.

The new copyright law:

1—Prevents reading copyrighted nondramatic literary works on radio or TV programs without a license.

2—Makes it illegal to record a copyrighted nondramatic literary work without consent of the copyright proprietor.

Those are the main worries confronting radio-TV executives under the new law. Therefore the above passage from Scott can be used freely. There's nothing to worry about—and any copyright problem that is worry-free is refreshing to the harassed broadcaster.

Of course, even prior to last Jan. 1 it was illegal to perform a copyrighted dramatic work publicly without the consent of the copyright proprietor.

Moreover, it was illegal to perform publicly for profit a copyrighted musical work, or a lecture, sermon, address, or other work originally written for oral delivery, without due consent.

Even before the law was passed, it was illegal to dramatize a literary work or to broadcast a dramatic version of a literary work. Even the process of casting the dialogue to different actors for reading might be a dramatization.

There's nothing in the new law that changes the "fair use doctrine," according to a report that accompanied it. Broadcasters can take advantage of this doctrine by using brief quoted material from speeches, lectures, sermons and reports of events.

Though it has always been illegal to print or reprint nondramatic literary works, newspapers have printed portions of speeches and documents in the process of normal news reporting.

As a practical matter, the nondramatic literary material that broadcasters might want to read on the air fall into three groups:

1. Newspaper and magazine material.
2. Short stories, novels and recipes.
3. Poetry.

In broadcast programs that explain the comics to children, or quote newspaper editorials, there is an appreciated benefit to newspapers. There seems no practical reason why stations should change their methods.

As to short stories and novels, few stations read them on the air in nondramatic form. If they want to do this in either nondramatic or dramatic form, then they must (a) use public domain material or (b) get consent from the copyright owner.

Poets and Publishers

This leaves copyrighted poetry as the field most likely to affect broadcasters. Until recent years many publishers didn't bother to get in their contracts public reading rights in poetry. These rights frequently remain with the poet. In the last few years, though, most publishers have been using contract forms that carry radio and TV reading rights. Thus the rights may be either in the publisher or author, depending on the particular contract.

The usual procedure is to ask the copyright proprietor, normally the publisher, for permission. If the publisher does not have the rights, the request will be referred to the poet or his literary agent.

Some publishers and poets will grant free reading rights in poetry to a station for a limited period. They will generally require that the poems be broadcast without any change, with credit to both poet and publisher. Others will want to be paid for use of the poems, sometimes just a nominal fee.

If the station wants to record a nondramatic work, in addition to broadcasting it, consent must be obtained. Under industry custom in use of music, broadcasters normally don't bother to ask for consent when

Can be a curse

By J. Frank Beatty

the recording is intended merely for archive and audition purposes.

Where the recording right is licensed, the copyright owner is not limited to the statutory 2-cent maximum applying to musical works, even though this seems illogical.

A report accompanying the new copyright law says clearly that words and music of a song are regarded as indivisible, and the 2-cent fee applies where lyrics are recorded with music of a song.

An argument can be made that the new law does not apply to sustaining programs, but only to commercial programs. The court decisions on public performance of music for profit make it perfectly clear that all broadcasting by stations that sell time constitutes public performance for profit.

In one of the drafts of the new law, language had been included which prohibited only public performance for pecuniary profit. The word "pecuniary" was thereafter removed. The statement of the conference report which accompanied the new law said that in striking out the word "pecuniary" it was "with the understanding that the word 'profit' as used in the bill refers only to a pecuniary remuneration." There is no pecuniary remuneration for sustaining programs but other language in the same report is not as clear as the quoted sentence.

Who Wants To Fight?

It may be assumed, therefore, that few broadcasters will wish to invite a test of the law on this point, although, clearly, a broadcaster who has inadvertently broadcast a copyrighted nondramatic literary work on a sustaining program would be ill-advised not to raise this point in his defense.

One of the provisions of the new law is that damage for infringement by broadcasting should not exceed $100 where the broadcaster shows that he was not aware that he was infringing, and that such infringement could not have been reasonably foreseen.

This throws on the broadcaster the burden of proving that he had no knowledge that he was infringing, and that reasonable care on his part would not have disclosed that he did not have rights in the work that he used.

The limitation of damages obviously will not serve a broadcaster who has been put on notice by the copyright proprietor. Similarly, it will not justify the action of a broadcaster who embarks on a regular course of using material without making a serious attempt to check the ownership. It is to be hoped, however, that the courts will construe this provision to have some usefulness to the broadcaster and that maximum damages will not exceed $100 in cases where the broadcaster did not proceed with guilty knowledge or in wanton disregard of the rights of others.

This article has not mentioned another field of literary material, namely, jokes, anecdotes and gags. Such material is, of course, frequently included in collections, anthologies and magazines, etc. These are seldom, even purportedly, the original creation of the compiler. It is difficult to say how a broadcaster, unless he were to shut humor off the air entirely, could attempt to ascertain the original authors of jokes, many of which go back to folk lore. Therefore, while broadcasters should be careful not to recite jokes in the precise language in which the broadcaster finds them in a copyrighted printed publication, the broadcaster, it would appear, would have to take his chances and continue to use stories and gags that usually date back to before Joe Miller.

As to recipes, which are used on many homemaker programs, there seems to be no great problem. In the first place, the recipe is seldom read exactly as printed, and most homemaker personalities include their own innovations and additions.

If the same recipe book is to be used over and over on the same program, it might be advisable to get permission from the copyright proprietor, who undoubtedly will be happy to get free publicity for the book.

A PERILOUS PARAGRAPH WORTH REMEMBERING

Here's the amendment to paragraph 1 (c) of the U. S. Copyright Act, effective Jan. 1, 1953, which introduced new hazards to the broadcasting of non-dramatic literary works:

(c) To deliver, authorize the delivery of, read, or present the copyrighted work in public for profit if it be a lecture, sermon, address or similar production, or other nondramatic literary work; to make or procure the making of any transcription or record thereof by or from which, in whole or in part, it may in any manner or by any method be exhibited, delivered, presented, produced, or reproduced; and to play or perform it in public for profit, and to exhibit, represent, produce, or reproduce it in any manner or by any method whatsoever. The damages for the infringement by broadcast of any work referred to in this subsection shall not exceed the sum of $100 where the infringing broadcaster shows that he was not aware that he was infringing and that such infringement could not have been reasonably foreseen;

This La Crosse, Wis., grocer cut back his newspaper budget to buy radio time. Was it a wise move? The answer is that volume in his three stores is up 18%.

SHOPPING NEWS PLUS MUSIC EQUAL SALES INCREASES

RADIO'S PAYOFF formula—entertainment plus information which the listener can use profitably—has netted another jackpot for an advertiser in La Crosse, Wis.

A quarter-hour morning music strip, interspersed with grocery marketing data of ever-increasing concern to the budget-married housewife, is drawing shoppers to three Harold Cram supermarkets.

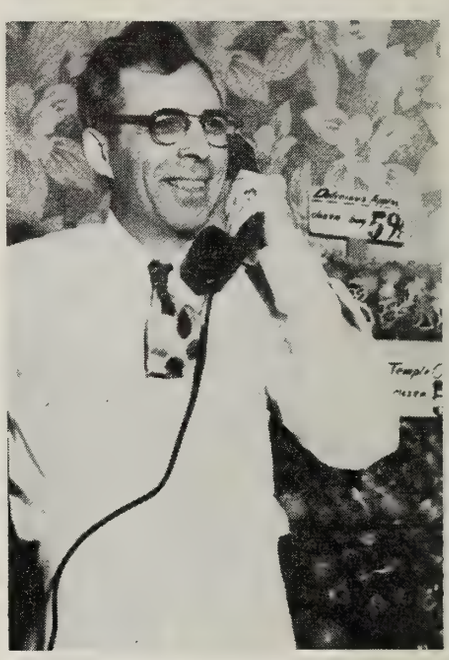
Mr. Cram, at the suggestion of Verl Bratton, general manager of WKTY La Crosse, began a five-a-week show eight months ago which featured a morning appearance of Mr. Cram chatting to housewives about the day's best food bargains. He talks each day from one of the three Cram supermarkets, pointing out such homey and practicable information as "The lettuce looks bad this morning, so we've cut the price 'way down," or, "Strawberries just came in and they look real fine. The price is lower than last week, too."

Volume Up 18%

Volume in the three stores, after only eight months of radio usage, is up an average of 18%, and one of the trio has increased its sales by 39%. Monthly totals show a continuing gain, Mr. Cram reports.

Mr. Cram, as "star" on the WKTY *CRAMarketeers,* announces specials daily. Last summer, during the canning season, he sold seven carloads of fruit. The score the year before: One and one-half carloads. Radio, he admits, made the difference.

Last Thanksgiving, he chatted to listeners about buying their holiday turkeys, saying he had arranged to buy all of those produced for market by 4-H youngsters within the county. He sold 500, all the county youngsters produced, and could have sold more. The 1951 sale: Fewer than 300.



Boom in Orange Sales

After checking a morning shipment of oranges which had just arrived, Mr. Cram announced a good buy on them. Orange sales soared 500% almost immediately.

With "very few exceptions," Mr. Cram says, "exceptions which are bound to face any retailer, I can invariably count on a customer-run on items which I talk about during the show."

Well aware that listeners take him on his word, and buy according to his recommendations, Mr. Cram says, "You can be plenty sure I never knowingly offer a bum steer!"

The supermarket-owner telephones WKTY studios every morning from a store location, and his report is aired directly with use of an electronic beeper device. He spends from two to four minutes reporting notes he has taken on the quality and prices of fresh vegetables, fruits, meats and other foodstuffs which have just been delivered.

SUPERMARKET owner Harold Cram speaks to housewives each morning during the program he sponsors on WKTY La Crosse, Wis. He gives them hints on food bargains and reports on conditions of fresh foodstuffs just stocked in his three stores.

Pessimistic about the value of radio as a sales tool until this format was suggested to him, Mr. Cram cut his newspaper budget "considerably" to sign his broadcast agreement. The expenditure, long since, has been "well-justified."

Immediate Reaction

"From the very first, each of my three stores perked up with listener-customers," many just stopping in to see what the "talking grocer" looked like and remaining to buy. A merchandising man also, Mr. Cram says, "If WKTY can get people into our stores in such numbers, it's up to us to turn them from visitors into customers."

To make shopping more convenient and pleasant, Mr. Cram is remodeling one of the supermarkets to encourage a smoother and faster traffic flow through the aisles and past the check point counters. Similar expansion may be needed for the other stores, as "I'm sure our program is responsible in great measure for creating the need for remodeling."

Mr. Cram, whose first year of business showed a $50,000 gross sales figure, is now looking forward to that day in the future when his gross exceeds $1 million.

PROGRAMS & PROMOTION —

TEEN-AGE PROGRAMMING

SPECIAL Saturday afternoon program beamed at teenagers is being presented by WCMW Canton, Ohio, and the YWCA in that city. Disc jockey Nick Barry broadcasts his *Tip Top Tunes* from the Y recreation hall from 2 to 5 p.m. before a teenage audience. Prior to the broadcast WCMW staff members preside at a Radio Workshop in one of the Y club rooms when students are given pointers on the broadcasting business.

PLANET PROGRAMMING

DRAMATIC story of interplanetary research, *Frontier To Space,* has debuted on KROD-TV El Paso, Tex. Station describes the weekly series as the first of its kind in the U. S. Programs will tell the story of planet-to-planet development through interviews, roundtables and in-studio demonstrations. Dr. Russell K. Sherburne and James S. Arnold, both of Physical Science Labs. of New Mexico A & M College, will serve as nucleus personnel on the telecasts bringing in other scientists from time to time.

TV PROMOTES OPENING

TELEVISION was used by United Artists to promote its new movie "Moulin Rouge" which opened in New York on Feb. 10. The company used 125 spot announcements on WJZ-TV New York. Promotion was described as the largest 10-second announcement campaign within one-week period on WJZ-TV. Agency for United is Donahue & Coe, N. Y.

WLWT (TV) 'FORECAST'

NEWEST programming in the farm field at WLWT (TV) Cincinnati is *Forecast,* show slated for interest to both city and farm residents. Script for the Monday through Saturday show incorporates the latest market reports, news and weather as well as interviews with farmers and suggestions to the women on best household buys of the week.

SAFETY ANNOUNCEMENTS

IN AN effort to cut down the great number of winter highway accidents, WHAY New Britain, Conn., together with schools in the city, is waging a campaign of education by radio. Last fall students entered a "winter safety message" contest. They were asked to submit one-minute spot announcements of their own creation. Winner in each school recorded his message at the station. A total of 14 announcements were recorded, WHAY reports, and they are being used as part of the station's safety drive.

CORRECTION

In the map (pages 78-79) accompanying the article by John B. Crandall, media director, Sherman & Marquette, entitled "How Big Will TV Be?" in last week's BROADCASTING • TELECASTING, three TV market areas were omitted by an engraver's error. The Charlotte and Greensboro areas should have been included in those on the air as of last Dec. 1, and the Lexington, Ky., area should have appeared as a future TV market which will be predominantly uhf.

The RCA 833-A, the Power Triode for 1-Kw AM transmitters

"Old Reliable" of the 1-KW's

WIDELY USED in 1-Kw AM transmitters, the RCA-833-A has become famous over the 14 years of its existence for its superior performance at low cost.

This power triode features a giant zirconium-coated anode for greater dissipation, shielding that eliminates bulb bombardment, and a husky filament that has tremendous emission reserve for peak loads.

It's hard to beat the dependability of operation, long service life, and operating economy of the 833-A; and it's harder still to beat the price. RCA-833-A's now cost you less than 60% of what they did originally.

For fast tube service, call your local RCA Tube Distributor.

RCA® RADIO CORPORATION of AMERICA
ELECTRON TUBES HARRISON, N. J.

FEATURES 'STUDIO ONE'

TO PROMOTE the first U. S. TV network show to be piped into Canada, Canadian Westinghouse Co., Hamilton, Ont., distributed 300,000 matchbooks among Toronto and Montreal dealers featuring *Studio One* and Monday evening times it is heard on CBLT Toronto and CBFT Montreal.

SHOW MOVES TO CAMPUS

WLS Chicago sent its *Dinner Bell Time* show to the U. of Illinois Feb. 2-3 for broadcasts in "Farm & Home Week." Carl Neuman, WLS assistant farm director, and Dick Albrecht, Illinois field editor of *Prairie Farmer*, conducted programs direct from the university's radio studios at Urbana. Rising farm costs were discussed by various authorities on the broadcasts.

DISC JOCKEY CONTEST

WISN Milwaukee, Wis., has announced a winner for its "So You Want to Be a Disc Jockey" contest, aired Saturday from 3 to 3:30 p.m. The winner, Bob Firnhaber, received an Admiral radio-phonograph combination on the station's *Cannon-Fodder* program emceed by Steve Cannon. Any listener may enter by writing, a letter in 100 words or less, telling why he or she wants to become a disc jockey. Winner is then given 15 minutes of the Cannon show. Winner each week is chosen by mail ballot and appears following week. Each person who appears receives a Columbia record album each time and five-time winners get radio-phonograph combination. Ten-time winners receive above-mentioned prizes, $100 defense bond and a week's paid job as a disc jockey on WISN.

STUDENT PRESS PARTY

SOME 200 high school newspaper editors from the metropolitan New York area attended a press party at WOR-TV New York's studios on Feb. 6 as guests of the Coca-Cola Bottling Co. of New York. The youngsters toured the studios, met newsmen and witnessed a rehearsal and telecast of *Do You Want to Be a Star?*, teen-age talent program, which is sponsored by the Coca-Cola Bottling Co., New York.

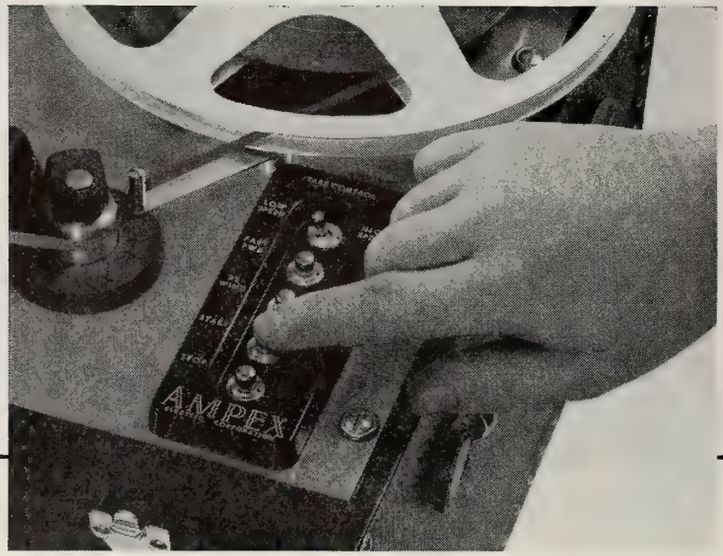
TREASURE DISCOVERY

PRIVATE participation in a hunt for buried treasure somewhere in Canada was part of a teaser campaign to announce representation in eastern Canada of CHUB Nanaimo, and CJAV Port Alberni, both on Vancouver "Treasure Island", by Stephens & Towndrow, Toronto. Mail mystery campaign to advertising agencies in the Toronto and Montreal area was completed with skull key ring and ended with a mail piece showing location of "Treasure Island" stations on a map of Vancouver Island.

CHORAL CONTEST

FOR the second straight year, WPTF Raleigh will sponsor a choral contest offering prizes amounting to $150 for winners in mixed voice and women's voice groups. Last year 21 counties entered the competition. This year's event has already drawn 26 entries. Contest gets under way Feb. 21 when the first group will be heard.

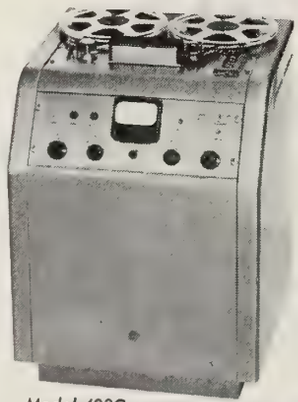
CHILDREN'S SERIES



SERIES of programs designed for young tots was launched Feb. 2 by WLS Chicago. Titled "Freddie the Fabulous Field Mouse," the program is part of the station's *School Time* which has been on the air for 16 years. "Freddie" recites verses and conducts tours of the zoo and other places of interest each Monday, 1:15-1:30 p.m. Series, aimed at children of kindergarten and primary grade age, was planned by Josephine Wetzler, WLS director of education.

LIVING ROOM SHOPPING

MAY Co., L. A. department store chain, has started *The Complete Department Store of the Air* on KLAV-TV Hollywood to enable the viewer to "shop in the comfort of her own home." Telecast five times weekly for an hour, the program is scheduled on a trial basis. Complete department store set, including aisles and counters, has been constructed. There are 105 telephone operators available to take orders and answer questions. The promotion idea, a year in the making, was devised by Frances Corey, publicity and advertising director of May Co., Don Fedderson, station vice- president and general manager, and Bernard Weinberg, owner of Milton Weinberg Adv. Co., Los Angeles, agency servicing the account.

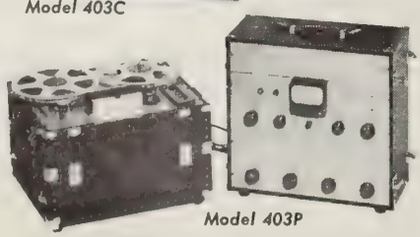


ICE CAPADES BENEFIT

ICE CAPADE stars appeared in an hour-long remote telecast benefiting the March of Dimes drive on WJAR-TV Providence Jan. 16. To achieve mobility with two cameras, Norman Gittleson, manager of operations, ordered a ramp constructed which permitted close-up

AN AMPEX IS ALWAYS READY TO GO

— Even after thousands of hours of service



Model 403C

Supreme reliability is the most important quality your tape recorder can have — whether your station is 250 watts or 50,000 watts. Countless operators have found that AMPEX eliminates the fussing, the adjustments and the uncertainty they had previously suffered in using tape recorders that were "built to a price."

The AMPEX 400 Series Recorder is the one outstanding bargain in tape recorder service. It costs least per hour of use; it minimizes maintenance and adjustment; it protects your programs from the hazard of sudden failure; and its reliability frees your engineer's attention for other tasks.

Even after thousands of hours of service, your AMPEX Recorder will be reliable in these important ways:

- *When you press the button, it operates*
- *Program timing stays accurate*
- *Starting, stopping and rewind will operate smoothly*
- *Fidelity will still be high*
- *Maintenance costs will still be low*

Model 403P

If you plan for tomorrow, buy an AMPEX today

IN-STORE displays offered to food and drug advertisers by WMAL-AM-TV Washington, D. C., as part of its "Customer Contact" plan are discussed by (l to r): William D. Murdock, president of advertising agency which bears his name and handles Food Town grocery chain account; Kenneth D. Berkeley, vice president and general manager of *Washington Evening Star* stations, and Alan R. Klompus, advertising manager and buyer for grocery chain. Advertisers who buy time on stations get product displays in Food Town stores and/or Peoples Drug Stores [B•T, Jan. 26].

shots on the ice and backstage switching. More than $2,500 was donated within five days after the showing.

DALLAS RELIGIOUS SERIES

PREPARATIONS are under way for national distribution of a religious TV program, *The Pastor Calls*, which has been produced by the First Methodist Church of Dallas and presented over KRLD-TV Dallas for the past three years. A 13-week filmed series of the program, which will be made by the Radio and Film Commission of the Methodist Church, will be turned over for distribution to the National Council of Churches of Christ in the U.S.A.

BLOCK MIAMI SHOW

HAL BLOCK, gagwriter and comedy star of CBS-TV *What's My Line?*, stars in his own late-night show *Miami Block Party* over WTVJ (TV) Miami starting last Thursday. Program runs from 12 midnight to 12:30 a.m. Monday through Friday and features guest interviews with the many show business personalities currently appearing in Miami and Miami Beach. The show is programmed from the WTVJ main studio, which will be arranged so it can accommodate an audience of about 300 guests. Mr. Block will continue to make his regular weekly appearance on *What's My Line?*. He will fly to New York each weekend for the program.

PROMOTION FOR DJ

WAVZ New Haven, Conn., promoted the arrival of a new station disc jockey, Bob E. Lloyd, by mailing postcards to 1,500 regular listeners, and by photographing Mr. Lloyd with a groundhog for publication in weekly newspapers on the date of his first program, Feb. 2 (Groundhog Day). Advance on-the-air promotion was made by the broadcasting of riddles concerning the new disc jockey's arrival, causing listeners to telephone the station for the answer to the riddle. Result was that Mr. Lloyd was receiving fan mail before he went on the air.

WKRC-TV SPORTS EXTRA

WKRC-TV Cincinnati is giving viewers of Wednesday night boxing matches over that station something extra. The station follows up the fights by showing *Sports Parade*, in which a prize-ring figure discusses the preceding bout. Immediately afterward a Joe Palooka full-length movie is shown.

WEWS (TV) AIDS TRIO

WEWS (TV) Cleveland was responsible for a local entertainment trio being signed up for an engagement with a Cleveland night club when the night club owner, visiting station studios, saw the trio performing on the station's *Steps to Stardom*, local amateur show.

survey after survey

1952 International Public Opinion Research Inc., whose President is Elmo (Bud) Wilson, former CBS Director of Research, conducted a survey among 541 leading agency and advertising executives Lists came from Blair, Weed and Free & Peters.

BROADCASTING • TELECASTING was first as the journal "most read"; first as "most useful"; first as "most dependable"; first as "most effective for station advertising."

1951 Fact Finders Associates conducted the first personal interview study of agency-advertiser readership. Petry, Katz and CBS Radio Sales supplied the lists.

BROADCASTING • TELECASTING was first by 313% for news; first by 445% for advertising effectiveness.

1950 WTOP, 50,000 watter, Washington, D. C. asked 800 national advertisers and agencies which radio-TV publication "would you use if you were in our place trying to reach YOU?"

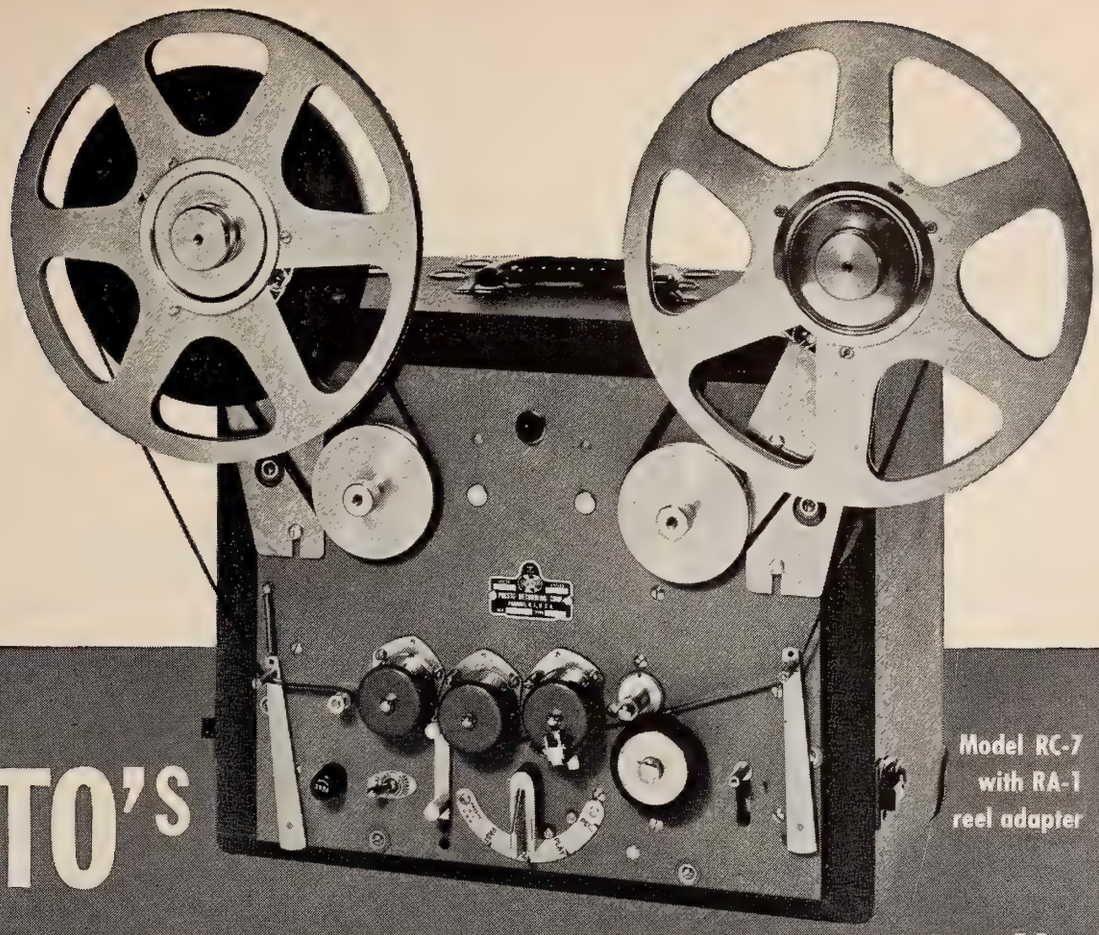
BROADCASTING • TELECASTING was first by 196%.

AND DOWN THROUGH THE YEARS

They started in 1936 and someone surveyed somebody every year. Regardless of the questions, regardless of the list, **BROADCASTING • TELECASTING** has been first in every category. Whether news, accuracy, dependability or advertising effectiveness.

WKNX-TV Exposition

THEY'RE hankering for television in the Saginaw-Bay City-Midland area of Michigan, according to WKNX Saginaw, which plans to go on the air with WKNX-TV on Ch. 57 in March. The station reports it sponsored a four-day television exposition Jan. 13-16 which drew audiences of more than 15,000.



The exposition, held at the Saginaw Civic Auditorium, featured 11 professional stage acts shown live via closed circuit, with WKNX-TV equipment televising the performances to TV sets displayed in booths on the main floor. Films were televised between live shows.

Continued promotion by WKNX and newspaper ads sent attendance zooming, with the first day's abbreviated performance (6 to 10 p.m.) drawing 2,000. Succeeding days' exhibitions lasted from 2 to 10 p.m.

Every seat in the auditorium was taken and station personnel were forced to coax the crowd from the stage where WKNX-TV equipment was on view, according to President William J. Edwards and Secretary-Treasurer Howard H. Wolfe, who planned the event.

WKNX reports the exposition's cost was about $18,000, with an admission charge of 50 cents for adults, and that ticket stubs were good for some $6,000 in TV equipment. Local dealers, numbering about five or six for each of the 15 distributors who rented space at the exposition, sold sets and built up prospect lists.

Names represented included Alliance Tenna-Rotor, Arvin, Capehart, Crosley, DuMont, Emerson, General Electric, Hallicrafters, Motorola, Olympic, RCA Victor, Silvertone, Spartan, Wells-Gardner and Westinghouse.

Model RC-7
with RA-1
reel adapter

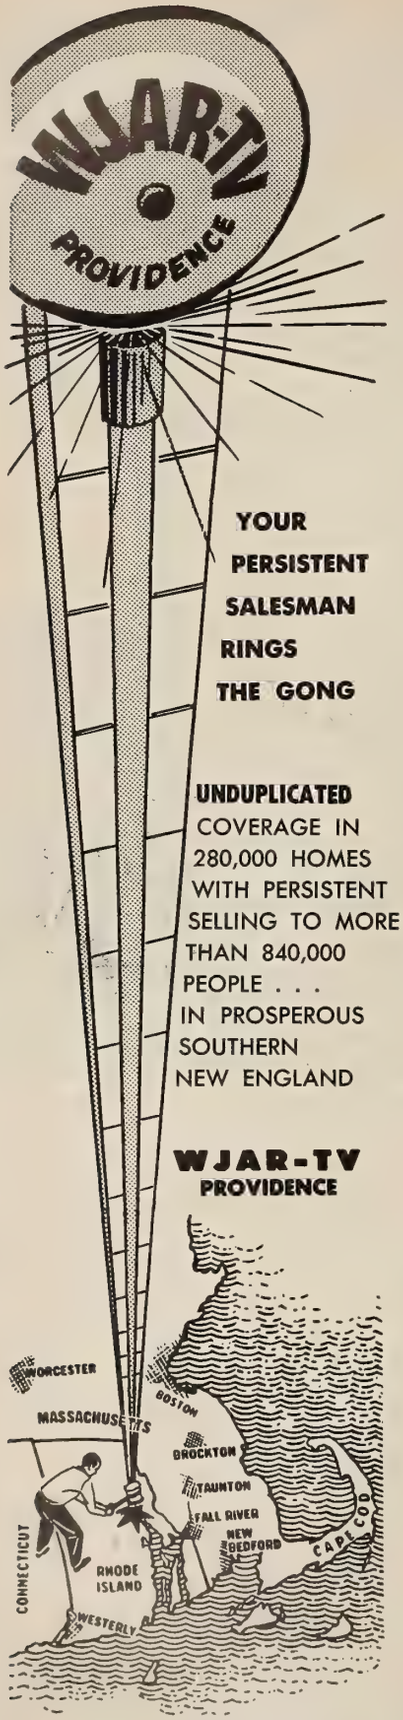
PRESTO'S "LONG PLAYING" PORTABLE TAPE RECORDER

The PRESTO RC-7 has already been acclaimed "the finest tape recorder of its size available." Although portable in size, the RC-7 embodies features and heavy duty construction found only in larger, more expensive, studio-type machines.

Now, with the new RA-1 reel adapter, this precision recording instrument becomes an indispensable piece of equipment for every station and recording studio. With this adapter, the RC-7 accommodates reels up to 10½" diameter, providing continuous long-period recording or playback.

If you are contemplating a portable tape recorder, don't buy any—until you see the PRESTO RC-7 with 10½" reel adapter (RA-1). Without a doubt, it's the *best buy in professional tape equipment!*

Present PRESTO RC-7 owners may convert their machines with this adapter for just $39.00. Write today for details!



Compare the RC-7 with any studio-type recorder

- Instantaneous speed accuracy
- Dynamic range better than 50 db. at 3% distortion
- Three-motor drive
- No friction clutch or friction brakes
- Heavy duty construction throughout
- Separate erase-recording-playback heads
- Twin speed: 7½"/sec or 15"/sec.
- Frequency response to 15,000 cps.
- Reel size: to 10½" (with RA-1 adapter)

James Witherell, research director, Russel M.

WORKSHOP...

*is proud to announce its new UHF antenna**

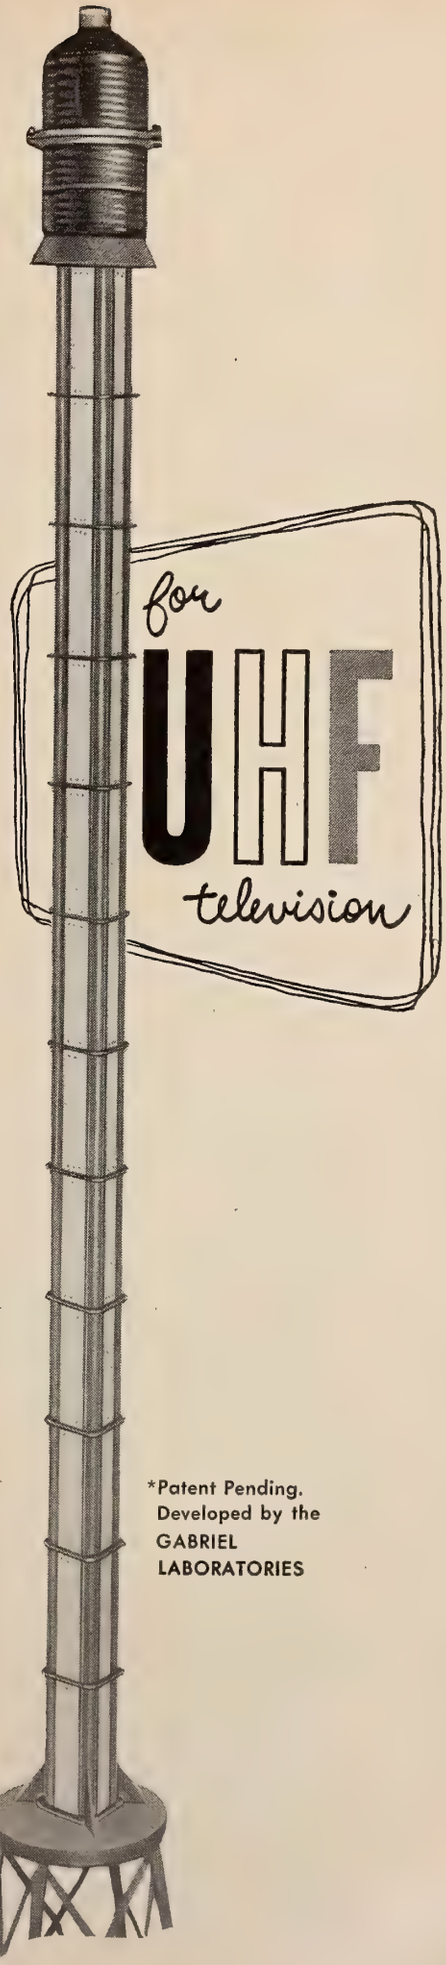
the ultimate in–

SIMPLICITY
RUGGEDNESS
RELIABILITY

Simplicity—because the radiating and structural portions are coincidental. Cross sectional view at lower left clearly illustrates its clean cut revolutionary design.

Ruggedness & Reliability—come from complete elimination of small, delicate connectors and breakable insulators. Antenna breakdowns are virtually impossible.

High Gain of 11 db over a tuned dipole for the 12 wavelength model. Power gain of 14.



Perfect Circularity—maximum variations of less than 0.5 db from mean value in horizontal pattern.

Vertical Pattern . . . 4.2° . . . VSWR less than 1.1 to 1 with best match at video carrier frequency . . . will handle 50 KW power . . . and a host of other features.

This is only part of the story on this new development. Specifications indicate its unusually high performance and operating dependability. Write or call for complete information.

Cross-sectional view showing the four vertical tubes that form the radiating system. These tubes are actually slots and are further subdivided into resonant sections. They are fed by a single vertical inner conductor.

*Patent Pending.

WHAT PRICE KENAUYAKSAIT?

1. For hundreds of years the coast of Baffin Island in Northern Canada has been an Eskimo home and hunting ground. The Baffin Island Eskimos were known throughout the North for their skill as seal hunters and fishermen. They lived on raw seal meat and raw fish. Their existence, while primitive, was a happy one.

2. Eight years ago the Canadian government set up a system of family allowance under which the Baffin Island Eskimos received $5 a month for each child—as did all other Canadians. These allowances, called "kenauyaksait" by the Eskimos, represented more money than most of them had ever seen at one time.

3. To the Eskimos, their new-found wealth meant they didn't have to hunt seals or catch fish any more. Most of them left their hunting and fishing grounds and moved in close to the trading posts where they received their monthly handouts and could buy the niceties of civilization.

4. The Eskimos' new life was soft and easy—for they had complete *security*. But because they no longer needed to provide for themselves they lost all *vigor* and *ambition*. As a result, the government is now trying to get them to move away from the trading posts and start producing or forfeit their allowances. But this is next to impossible to accomplish. For the Eskimos have grown to *depend* on their *security* so much that they have no desire to return to their former life of *freedom* and *independence*.

5. The important point of the story is this: enslavement by *security* isn't something that happens only to Eskimos. In fact, millions of people all over the world see nothing wrong with a welfare society. But welfare plans are like dope. The doses are small and pleasant at first, but they eventually enslave us. For that reason, we Americans must maintain our *self-reliance*, our *productivity* and our *freedom*. For these things, after all, are responsible for America's greatness.

Happy Valentine

YOUNGSTERS from broken homes in the Warren-Youngstown, Ohio, area had a happy Valentine's party with the aid of WHHH Warren and general manager Carl J. Raymond. Mr. Raymond, cooperating with the Optimist Club and the Mary Carr American Legion post, aired a three-day request for unsigned Valentines for the children's party. Six thousand greetings were mailed from surrounding towns and as far away as Ontario, Canada. Mailing benefited 73 children in the Thumbull County Children's Home.

Neighbor Calls WKIC

TWO mentions on WKIC Hazard, Ky., brought help to a local family which had been burned out of their home by a fire. Because most of the furnishings had been destroyed, a neighbor asked WKIC to broadcast an appeal for donation of a washing machine. That same day, six listeners offered a washing machine and a seventh volunteered a radio.

Ear for 'Good' News

WHEN vandals damaged a high school in Tacoma, Wash., during a weekend, causing temporary closing down of the school, KMO that city aired a message that students needn't show up Monday. Result was that of 2,000 students only six appeared at school that day.

WLEE Blood Drive

BUOYED with its earlier success in a drive to encourage blood donations upon the first visit of the Red Cross Bloodmobile, WLEE Richmond, Va., saturated its day and night schedule with announcements designed to spur pledges. When the Bloodmobile first came to the city, WLEE sports director Joe Mason reported, the station was credited by local Red Cross directors with raising one-third of all donations received.

KWOS 'Pledge-a-Pint'

COLE COUNTY, Mo. passed its quota of blood in the Red Cross Bloodmobile campaign early this month, thanks to KWOS AM-FM Jefferson City. When other appeals failed to bring in the necessary 388 pints, station officials stepped in to conduct an intensive spot campaign for one week before the Bloodmobile arrived, five-minute direct pickups from the truck during its two-day stopover and a four-hour *Pledge-A-Pint* program on which professionals donated their time.

WTVJ Blood Drive

WHEN WTVJ (TV) Miami, Fla., turned its studio into a branch of the Dade County Blood Bank, it collected more than 150 pints of blood. The blood bank moved equipment and beds into the studio. Several donors made their contributions before the TV camera. Project was instituted by Alex Gibson, star of WTVJ's *Alex Gibson Show.*

"MOVING THE GOODS" IN THE Memphis Market

The mighty Mississippi is another important factor that keeps the Memphis Market growing, as evidenced by nearly 100,000 automobiles and over two million tons of freight handled annually at the port of Memphis.

Many alert advertisers are moving more goods at less cost by concentrating on the "better half" audience covered by WREC. You get **both** rural and metropolitan listeners and cover the entire 76-county area with one schedule. Ask a Katz man to show you the latest Standard Audit and Measurement Report, and Hooper ratings that **prove** this important point!

CAB Sessions March 9-12 Feature Programs, Talks

U. S. speakers to highlight forums during first part of CAB's annual convention. Closed business sessions will take up last two days.

PROGRAMMING will feature the first two days of the annual convention of the Canadian Assn. of Broadcasters at Montreal's Mount Royal Hotel, March 9-12, with closed business sessions the last two days. U. S. broadcasting executives will be the main speakers during the first two days at forum sessions, according to the advance agenda.

CANADA

Among speakers will be Mrs. Harriet Moore, psychological services director, Social Research Inc., Chicago, who will discuss, "Pitfalls to Avoid in Programming"; Harold Fellows, NARTB president, Washington, "How to Live With Television and Survive"; Wallace Wulfeck, William Esty Co., New York, "Behavior Dynamics for Business," and Ted Cott, NBC New York, "Programming for Audiences."

The first two days also will include advertising agency matters, a business forecast and review of public service programming by Canadian stations. Social functions will include a fashion show and luncheon for ladies, a cocktail party by Canadian Pacific and Canadian National Telegraph Cos., and the annual dinner March 10. Awards to be presented include the John J. Gillin Jr. Memorial Award, Canadian General Electric Co. award, and quarter-century awards to CAB members.

Business sessions March 11-12 will include a report by General Manager T. J. Allard, Sales Manager Pat Freeman, discussion on surveys and survey companies, revision of the constitution, discussion on editorialized broadcasting, financial reports and annual elections.

New Strategy for VOA

VOICE of America launched a new broadcast offensive to peoples behind the Iron Curtain last week, following the lead set by Secretary of State John Foster Dulles in a diplomatic letter to the Communist government in Poland.

Attempting to take a positive position, VOA broadcasts offered sympathy and understanding to Communist-dominated peoples, pointing out that the U. S. is interested in "any genuine struggle of men to be free and masters of their own thoughts and souls."

JOAK on 3,000

TV TOOK the air in Japan Feb. 1, just 25 years after radio was introduced by the government-owned Japanese Broadcasting Corp. Three-day opening events on JOAK were estimated to have been seen in 3,000 television homes in the Tokyo area.

JAPAN

U. S. TV Show Ratings Up In Canada's Toronto Area

INCREASING interest in American TV programs in shown in the January report of Elliott-Haynes Ltd., Toronto, for viewers in the Toronto-Hamilton-Niagara area, who own more than half the TV sets in Canada.

CANADA

During January the WBEN-TV Buffalo share increased from 77.1% to 78.5% of the audience, highest since CBLT (TV) Toronto began operating in September. CBLT's audience dropped from 22.9% in December to 21.5% in January. The WBEN-TV increase was due in part to its power boost and new tower.

Most popular CBLT (TV) Canadian programs were *NHL Hockey* with rating of 51.6, *The Big Revue* 31.6, and *Canadian Sports Film* 23.1. Most popular U.S. programs were *TV Playhouse* 80.8, *Dragnet* 78.1, *Ford Theatre* 75.9, *Comedy Hour* 75.8, and *Circle Theatre* 75.5.

Sets-in-use ratio in January was the highest on record, 82.2.

For the first time a survey was made in the Montreal area, which contains about a sixth of Canada sets, and one station, CBFT (TV) Montreal. Average sets-in-use rating was 47.2 for January. Most popular programs, with ratings, were *NHL Hockey* 68.9, *French Quiz* 53, and *The Big Revue* 52.4.

Jennings to Head Programs In Executive Shifts at CBC

CHARLES JENNINGS, assistant director general of programs of Canadian Broadcasting Corp., Toronto, has been elevated to director of programs, succeeding E. L. Bushnell, who recently became assistant general manager.

CANADA

Along with Mr. Jennings a new assistant director has been named, Marcel Ouimet, who was formerly director of CBC's French network. Both will deal with national programs, while Mr. Bushnell will act as coordinator of TV for CBC besides other duties.

Rene P. Landry, CBC personnel and administrative services director, has been moved up to regional director for the province of Quebec, and is succeeded in his former post by Marcel Carter, until now executive assistant to the CBC general manager, J. A. Ouimet. Ira Dilworth, supervisor of program production, has been appointed regional director for the province of Ontario. Both Messrs. Landry and Dilworth will be management representatives in the CBC.

Cuban Station Changes Reported Under NARBA

CUBAN government has notified FCC of the following changes in its broadcast authorizations, under terms of the 1950 North American Regional Broadcasting Agreement (NARBA).

CUBA

Bayamo, Oriente, new AM station on 1260 kc, 250 w fulltime, to be synchronized with CMCI Havana; Class IV. Effective March 14.

CMJS Ciego de Avila, Camaguey, 1580 kc, 250 w fulltime; assigned call letters, change in location and characteristics. Effective March 14.

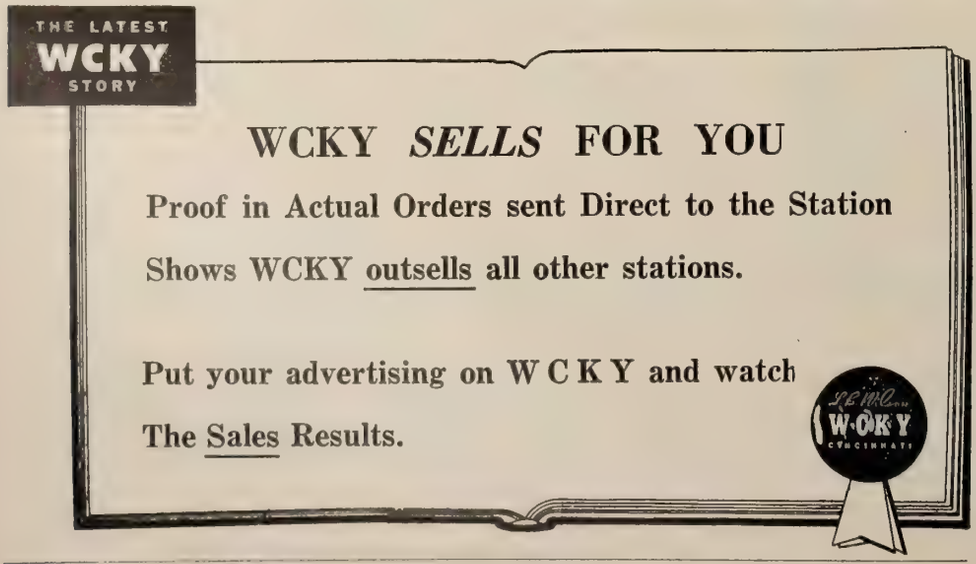
CMKI Guantanamo, Oriente, change to 1110 kc, 250 w daytime, 100 w night; Class II. (Changed from 1400 kc.) Effective upon entry into force of the agreement.

MAB Elects, Changes Name At Annual Convention

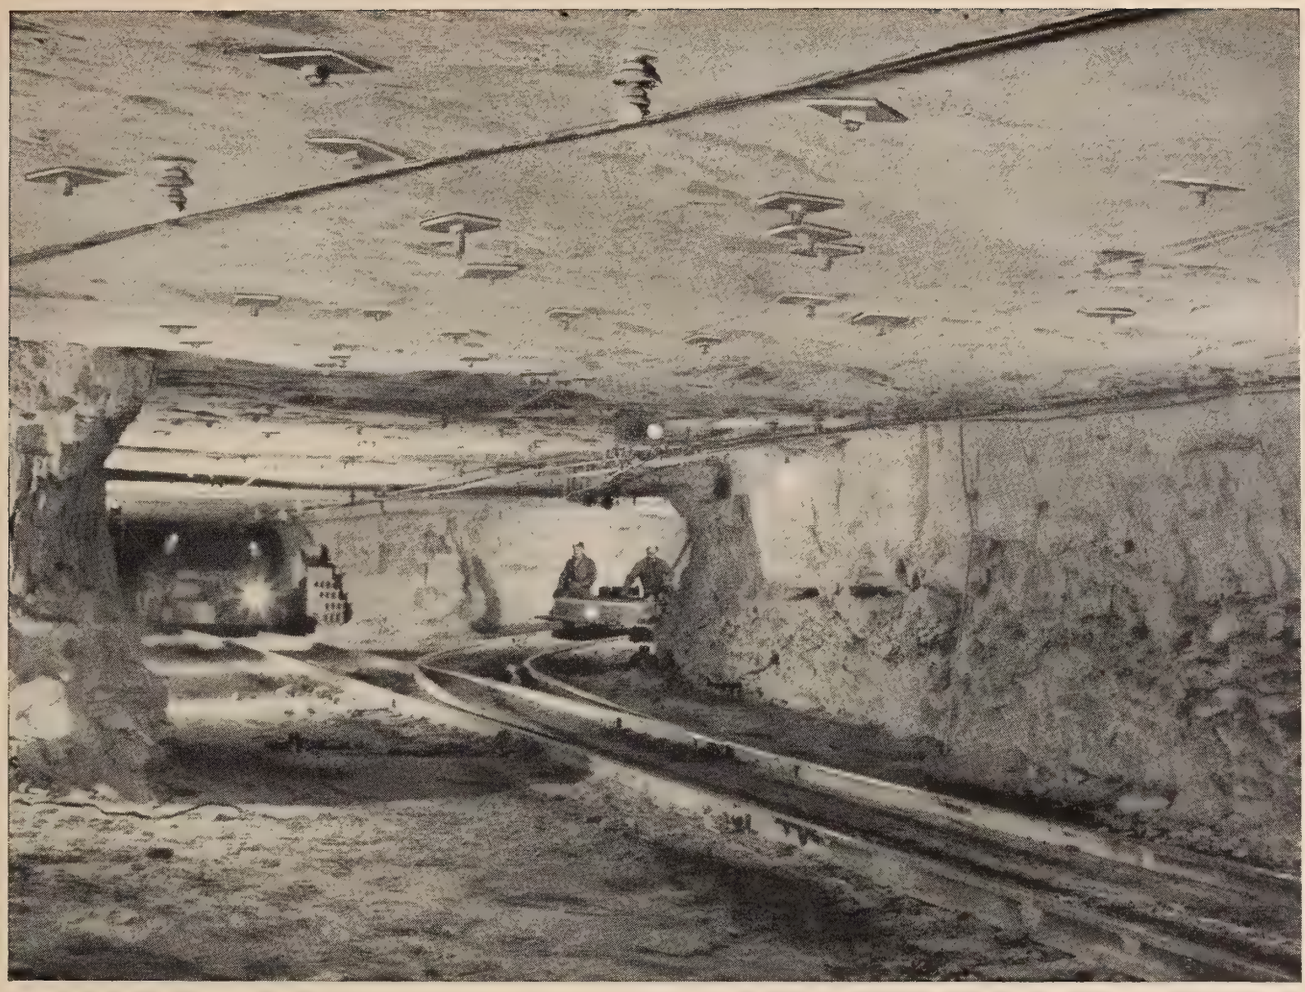
FINLAY MacDONALD, CICH Halifax, was re-elected president of the Maritimes Assn. of Broadcasters at a recent annual meeting [B•T, Feb. 2]. Malcolm Neill, CFNB Fredericton, and Mr. MacDonald were re-elected MAB representatives on the board of directors of the Canadian Assn. of Broadcasters, and Gerry Redmond, CHNS Halifax, was re-elected secretary, with Fred Lynds, CKCW Moncton, as treasurer.

CANADA

Name of the association has been changed to Atlantic Assn. of Broadcasters. It includes independent stations in the Newfoundland, New Brunswick, Nova Scotia and Prince Edward Island provinces.

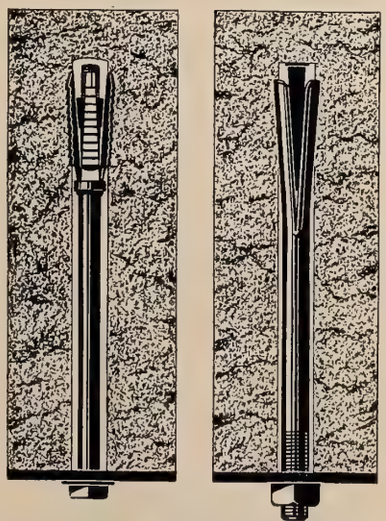


CBC Budget Estimates Decline Slightly



ESTIMATES for government expenditures on the Canadian Broadcasting Corp. for the fiscal year 1953-54 total $8,431,550, down from $8,517,408 for fiscal 1952-53 ending March 31. This includes the annual grant of $6,250,000 recommended by the Massey Commission in 1951, and funds for national television programming. It does not take into consideration any sum to replace the annual $2.50 listener license fee which brings CBC about $6 million.

CANADA



4A's Aids 'Truth' Drive

AMERICAN Assn. of Advertising Agencies (AAAA) announced last week that more than 50 agencies are cooperating in the State Dept.'s "Campaign of Truth" by sending surplus magazines to U. S. Information Centers in 42 foreign countries. AAAA has sent to each of the 199 centers a packet of materials telling the story of American advertising and agency business.

"Sky Hook" Roof Supports Are Boon to Mine Safety

Bethlehem makes two types of roof bolts: the square-head bolt with expansion shell (*left*) and the wedge-type or slotted bolt (*right*). With either type, when the bolt is installed the upper end expands, gripping the sides of hole.

One of the mining engineer's oldest problems is how to provide sure, solid support for roofs. Miners have long had to put their faith in makeshift timber roof props that necessarily were haphazard and undependable. Records of the U. S. Bureau of Mines show that half of all mine accidents have resulted from collapsing roofs.

Now there is a better, more dependable way to support mine roofs — the mine-roof bolt. The roof bolt is ingenious — the nearest thing to the fabled "sky hook" that you're ever likely to see.

When Bethlehem Mine-Roof Bolts are used, the roof actually supports itself. What happens is that the roof bolts, which come in lengths of from 2 to 8 feet, consolidate the strata of rock to form what amounts to a single, deep, tremendously strong beam.

The best proof of how mine-roof bolts improve safety and operating efficiency is the way that mines are going for them.

The Bethlehem Steel plant at Lebanon, Pa., is turning out our two types of roof bolts by the thousands. More and more mines are changing to roof bolts, with the result that efficiency is improving and accidents due to roof-falls, once the bane of mining, are growing fewer every day.

Station Data to Agencies

A NEW weekly service to keep advertising agencies up-to-date on Canadian stations represented by All-Canada Radio Facilities Ltd., has been announced by that representation firm. Each CANADA week agencies receive from All-Canada offices throughout Canada, a file folder on one station represented by the firm. The folder contains complete data on the station—its broadcast policy and history, personnel, coverage, market, feature programs, promotion activities and success stories.

A personal call by a sales representative of the firm to the various agencies follows up the folder. From time to time the agency will be sent new data sheets to replace outdated sheets in each folder.

British Transmitter Ordered

FIRST order for a British TV transmitter has been placed by Canadian Broadcasting Corp. with Canadian Marconi Co., CANADA Montreal, for construction by Marconi Co. in England. The transmitter will be 5 kw for the CBC Ottawa outlet. It will use a high gain antenna on Ch. 4, and will have an effective radiated power of 55 kw. Late spring delivery is scheduled for possible use by the time of the June 2 coronation of Queen Elizabeth II.

Local Radio Advertising Statistics Planned

PLANS are under way to obtain for the first time a monthly figure on local radio advertising in Canada. Independent stations will forward data to regional broadcaster associ- CANADA ation committees on how much time is sold to local advertisers next November, classifying the material according to merchants. Regional totals will be sent to Canadian Assn. of Broadcasters where various classification totals will be tabulated.

Educational TV Topic On Atlantic City Agenda

EDUCATIONAL TV was to have a large place at the convention of American Assn. of School Administrators in Atlantic City Feb. 14-19. Joint Committee on Educational Television set up consultant service at Ambassador Hotel with JCET committee, staff members and special consultants in attendance, plus TV studio and architectural exhibits at Convention Hall. TV studio was to be used for live educational programs, followed by evaluation discussions three times daily.

Among those scheduled to be present at convention were Belmont Farley, National Education Assn.; Franklin Dunham, U. S. Office of Education; Ralph Steetle, JCET executive director; Walter B. Emery, JCET special consultant; E. Arthur Hungerford Jr., JCET engineering consultant; Richard Hull, Iowa State U. (WOI Ames), and I. Keith Tyler, Ohio State U. (WOSU).

Mass. State TV Group

MASSACHUSETTS state commission studying educational television and possibility of a state-owned station has asked the state legislature for $100,000 and continuance of the commission for another year.

If approved, this would give the 13-man commission of senators, representatives and private citizens until Feb. 15, 1954, to complete its video survey. The $100,000 would go toward preparation of plans for acceptance of the FCC-assigned Ch. 2 before the June deadline. The possibility of proposing an extension of the FCC-set deadline is expected to be reported on to the legislature by the new special TV commission before May 15.

RCA Grants Fellowships

THREE RCA scientists and engineers have been granted fellowship awards by RCA to enroll for graduate work toward a doctor's degree, Dr. C. B. Jolliffe, vice president and technical director, announced last week. The men are Kenneth W. Robinson, Los Angeles, who will study electrical engineering at Princeton U.; Robert M. Hansen, Baton Rouge, Louisiana State U., and Ivan H. Sublette, Haddonfield, N. J., electrical engineering at the U. of Pennsylvania.

Pupils Like Inaugural TV

INTENSE school interest in NBC's six-hour TV coverage of the Presidential inauguration Jan. 20 has been reported by network affiliated stations throughout the country.

WFAA-TV Dallas officials said school authorities there reported that 59,600 pupils watched inaugural proceedings on TV. In Fort Worth, according to WBAP-TV, the figure was an estimated 30,000.

WBRC-TV Birmingham reported about 20,000 of Jefferson County's 45,000 pupils watched the event. Total of 157,000 youngsters in Grand Rapids and Kent County saw the inauguration telecast, according to WOOD-TV Grand Rapids estimates.

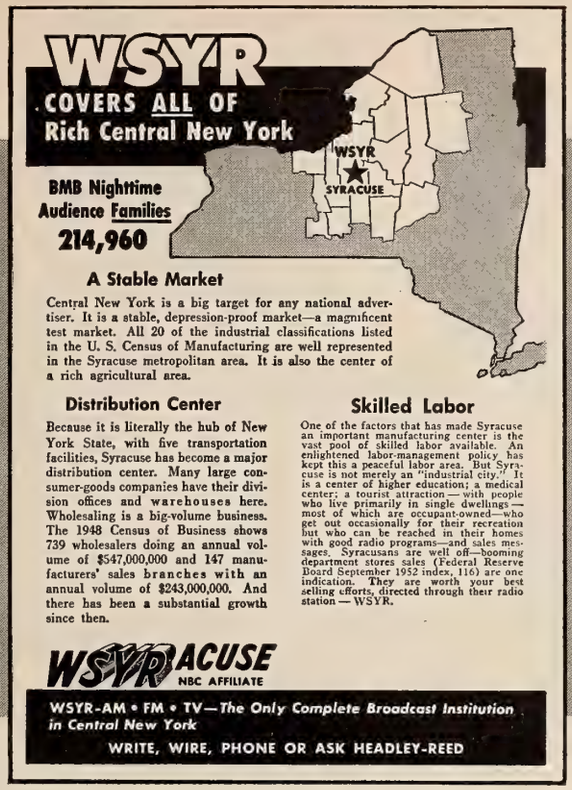
Other NBC-TV stations which noted strong school interest in the special coverage were WOI-TV Ames, Ia., KNBH (TV) Los Angeles, WOC-TV Davenport, WAVE-TV Louisville and WSPD-TV Toledo.

Opposition to N. Y. Plan

OPPOSITION to proposed state-operated educational TV stations in New York was voiced Monday at the opening of the New York State Society of Newspapers Editors winter meeting. Despite recommendation of the State Board of Regents, Garth A. Shoemaker of Elmira, president of the Citizens Expenditure Committee, said the proposal was "a shotgun approach to education," and that the state had no more reason to operate a TV network than a newspaper chain.

Dr. Lewis A. Wilson, state commissioner of education, said the 10 proposed stations would not operate as a network, and would not be used for propaganda or "thought channels." Others taking an affirmative stand were Dr. Cornelius W. Kiewiet, president, U. of Rochester, and Benjamin Wollis, Buffalo's superintendent of schools.

Educational TV Advisors



ADVISORY committee of 30 California citizens has been appointed by Gov. Earl Warren to assist in development of the state's proposed eight educational TV stations. Among the appointments were Arthur Westlund, president, California State Radio-TV Broadcasters Assn. Inc., Oakland; Donn B. Tatum, director of TV, ABC Western Div.; Dr. William H. Sener, director of telecommunications, Allan Hancock Foundation, U. of Southern California; Lewis S. Frost, director of public relations, NBC Western Div., and Charles L. Glett, vice-president, CBS Hollywood.

NW School Buys KBOK

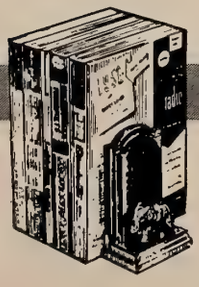
KBOK Waterloo, Iowa, has been sold to the Northwestern Theological Seminary and Bible Training School, Minneapolis, for a reported sale price of $56,000. BROADCASTING • TELECASTING of Feb. 2 incorrectly reported KBOK's call letters as WBOK.

service (SRDS) ads help **sell** spot time

SERVICE-ADS like this help advertisers and agency people learn more about a station's market and its coverage of the market. They provide this information at the very time it is wanted and needed.

by helping SRDS users **buy**

Radio station managers who place SERVICE-ADS next to their listings in STANDARD RATE have good cause to believe that this supplementary information is heartily welcomed by many SRDS users.



In the course of exploring the needs and practices of SRDS users we have, over the years, encountered many comments like the following direct quote from an interview with an agency vice president:

"When I go to client conferences I always take STANDARD RATE with me. It is not unusual for the client to bring up a question about this paper or that radio station and ask, 'What do you know about it?' I can always turn to SRDS; and if there is a good ad—an ad that gives me a clear picture of the facility—I can at least give him a good outline of the publication or radio station from its listing in STANDARD RATE."

If you would like to see the results of hundreds of interviews with advertisers, account executives, media directors and others who influence radio selection, send $1.00 for a copy of "Spot Radio Promotion Handbook." It is organized to tell you *who* influences station selection, *what* they want to know about individual stations, *where* they turn for information.

► WOR New York will celebrate its 31st anniversary Feb. 22 by special programming which will outline the history of radio on its regularly scheduled shows. Station started as a 250 w outlet atop Bamberger's department store in Newark and is currently a 50 kw operation.

► WTIC Hartford, Conn., last Tuesday observed its 28th anniversary and announced it is inaugurating a 12-hour daily music schedule on its FM outlet, WTIC-FM.

TWENTY-YEAR service pin goes to J. Grant Carey (r), supervisor of the 50 kw transmitter for WBT Charlotte, N. C., from Charles H. Crutchfield, executive vice president of Jefferson Standard Broadcasting Co. and general manager of WBT-WBTV (TV).

► MARK TOALSON, production manager of WSB-TV Atlanta, has been elected to the 25-year-club of the Atlanta *Journal-Constitution*, published by Atlanta Newspapers Inc., station licensee. He joined WSB's engineering department in 1927.

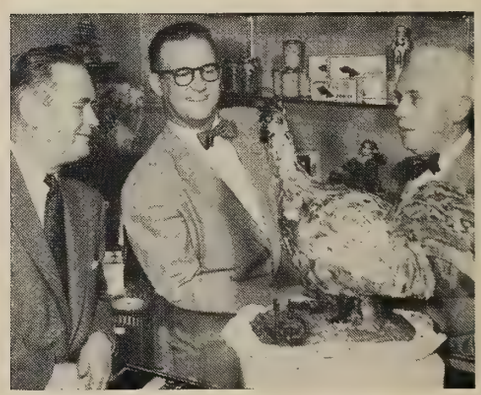
► JOHN DePROSPO, executive officer of the Municipal Bcstg. System, which operates WNYC-AM-FM New York, has completed 35 years of service with the City of New York. He was transferred to WNYC in 1937, after serving in a city clerk post.

► WEAV Plattsburg, N. Y., celebrated its 18th anniversary Feb. 3. In 1953 the station was known as WMFF operating on 1340 kc with 100 w. A year later, FCC granted a power boost to 250 w and to 1 kw in 1948. WEAV is affiliated with ABC and now operates on 960 kc. George F. Bissell has been president and general manager since the station went on the air.

► OPEN HOUSE was to be held by WCAL Northfield, Minn., last Wednesday for Dr. Martin Hegland, station promotion director, upon his 30th year of broadcasting sermons on the station. He was director of WCAL, licensed to St. Olaf College, from 1927 to 1946, when he became promotion director. He is widely known for his Sunday services on WCAL in the Norwegian language.

► PROGRAM Director Frederick P. Laffey, WLAW Boston, who resumed duties with the station at the first of the year after completing two terms of service with the Army as a captain in the radio department of the Psychological Div. at Tokyo, Japan, is marking his 15th year of association with WLAW.

► KSFO San Francisco is paying respects to Blenda Newlin, secretary to Alan L. Torbet, station general manager, upon Miss Newlin's completion of 19 years with the station. Miss Newlin, senior staff member, has worked in various capacities with every department of KSFO.



WLS CHICAGO honored a 20-year continuous sponsor, the Keystone Steel and Wire Co., Peoria, Ill., at a dinner which brought together this trio (l to r): Glenn Snyder, WLS vice president and general manager; R. E. Sommer, president of Keystone, and James E. Edwards, WLS president. The dinner was followed by a visit to the WLS *National Barn Dance*, portion of which Keystone has sponsored for two decades. Agency is Fuller & Smith & Ross, Chicago.

CEREMONY celebrating five years of television in Cleveland is attended by managers of the city's three video stations (l to r): Franklin Snyder, WXEL (TV) (which went on the air Dec. 17, 1949); James C. Hanrahan, WEWS (TV) (Dec. 17, 1947), and J. Hamilton Shea, WNBK (TV), NBC-TV outlet (Nov. 1, 1948).

Stepping up COPPER PRODUCTION

Pictured here is the headframe of Anaconda's Kelley Shaft at Butte, Montana . . . engineered to increase copper production by tapping the vast deposits of low-grade copper ore in "the richest hill on earth".

This 178-foot headframe straddles the huge new Kelley Shaft at Butte, Montana . . . focal point of Anaconda's $27,000,000 Greater Butte Project.

Beneath it lie at least 130 million tons of proved low-grade copper ore, not economically practical to mine heretofore. The process used is an adaptation of the mining method called "block-caving". The Greater Butte Project is already producing at a rate of more than 7,500 tons of ore per day, with a steady increase scheduled until a daily output of 15,000 tons is achieved . . . all in addition, of course, to Anaconda's present production from other areas of Butte hill.

This $27,000,000 project is but one phase of Anaconda's company-wide expansion, improvement and modernization program. Increased zinc capacity . . . a new open pit copper mine being readied for production at Yerington, Nevada . . . an immense new sulphide plant now starting to produce additional copper in Chile . . . an aluminum reduction plant . . . modernization and expansion of fabricating plants . . . are other phases of this Anaconda program.

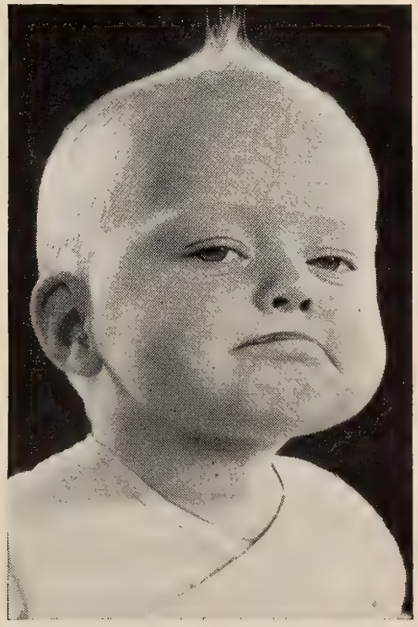
6 Billion Dollars? Yes, Buster, that's a bill you inherit. It's the cost to date of government power—federal-government-in-the-electric-business—the money put out for electric power plants, electric lines and all that goes with them.

Big Baby, Eh? You bet. Government power has grown like a giant. It's 35 times bigger than it was 20 years ago. In money, that's a big chunk of the whole U. S. debt. Just paying interest on it costs Americans over $150 million a year.



Who Gets Nicked? Well, your parents do. And everyone else. In the taxes they pay on food, clothing, smokes, income—even baby powder. That means that everybody's taxes help pay the electric bills of the people served by government power.

Is This Necessary? Not a bit. Most people get electric service from an independent electric light and power company. They pay for what they use, and at low rates—for electricity is a real bargain. And no one else has to pay part of their bills.

Why Can't Somebody...? Do something about it? Everybody can. By objecting to any more unnecessary government power projects, and helping Congress resist those who want a $45 billion tax-supported federal monopoly of electricity.

I'll Yell Bloody Murder! Even better than that, Sonny. Encourage your family to help get the federal government out of all business as much as possible, so you won't grow up to be just another helpless subject of a socialist nation.

America's Electric Light and Power Companies*

From where I sit
by Joe Marsh

Pretty "Foxy" Terrier

Talking about dogs the other night —and Sandy Johnson topped everything off with a tall story about his fox terrier, "Boscum."

According to Sandy, "Comes bird season and that dog won't stir if I take down my rifle. *Same if it's deer season and I go for my* shotgun—*he won't move, but he's scratching at the door if I so much as look at my rifle!"*

One day, Sandy decided to fool him. He took down *both* his shotgun and his rifle—and swish, Boscum was on his way! So Sandy put the guns back and took out his fishing rod. He went outside and there was Boscum—digging like crazy for worms!

From where I sit, a dog that can outguess humans is as rare as a human that can outguess other humans. For instance, I like a glass of beer with lunch but I wouldn't think of pouring you one without first asking. Everybody has preferences—and it's finding out what they are and respecting them that keeps freedom from "going to the dogs."

Joe Marsh

Theatre Television; Allocation of Frequencies—Before Commission *en banc*.

New Petitions . . .

February 5

Champlain Valley Bcstg. Corp. (WXKW), Albany, N. Y. Modification of CP 850 kc, 10 kw fulltime, DA (Docket 9515, BMP-4580) KOA Denver and WHDH Boston are protestants.—Motion by Metropolitan TV Co., new licensee KOA, to postpone for three weeks oral argument, set Feb. 16, because of illness of counsel.

Amendment of Sec. 3.606 of TV Rules—Suffolk Bcstg. Corp. (WALK), Patchogue, N. Y., files opposition to Jan. 26 petition of American-Republican Inc. (WBRY), Waterbury, Conn., requesting that FCC allocate Ch. 54 to Patchogue in lieu of Ch. 75 sought by Suffolk. American-Republican contends use of Ch. 75 might prevent use of Ch. 83 at Waterbury.

Aladdin Radio & TV Inc. (KLZ) and Denver TV Co., Denver, Col. New TV, vhf Ch. 7 (Dockets 9041, 10240; BPCT-426, 951)—Aladdin takes exception to Jan. 28 order of examiner granting petition of Denver TV Co. to reopen record to correct its exhibit 54 to show signature of John M. Wolfberg and to substitute word "signed" for "sent" on line 2 of page 1178 of transcript of proceeding.

Rollins Bcstg. Co. (WJWL), Georgetown, Del. CP increase power from 1 kw to 10 kw, operating daytime on 900 kc—Rollins petitioned for waiver of clear channel rule Sec. 3.25(d) to allow use of 10 kw. Station claims it will deliver less signal to Mexican border than present operation of several stations operating on 900 kc or on other Mexican clears.

Amendment of Sec. 3.606 of TV Rules (Docket 10373)—Supreme Bcstg. Co. (WJMR), New Orleans, filed support of FCC proposal to correct allocation errors by substituting Ch. 69 for 39 at Bogalusa, La., and Ch. 65 for 29 at Newton, Iowa, and requested dismissal of comment by Miss-Lou Inc. filed Jan. 26 which objected to substitution of Ch. 69 for 39 at Bogalusa.

WGAL-TV and Peoples Bcstg. Co. (WLAN), Lancaster, Pa. New TV, Ch. 8 (Dockets 10366, 10365; BPCT-910, 654)—Petition by Peoples supporting its request of Jan. 16 to enlarge and change hearing issues and replying to opposition of WGAL-TV to this request filed Jan. 26.

February 6

Lawrence A. Harvey and Spanish International TV Inc., Los Angeles. New TV, uhf Ch. 34 (BPCT-1525, 1527) — Supplemental petition by Harvey for oral argument or other relief respecting his petition of Jan. 12 requesting dismissal of Spanish International application on grounds of being defective.

Harbenito Bcstg. Co. (KGBS), Harlingen, Tex. CP for 850 kc, 5 kw fulltime, DA (Docket 8836, BP-6350)—Petition by Metropolitan Bcstg. Co. (KOA), Denver, to postpone oral argument set Feb. 16 to earliest available date. Conflict of other cases cited. Opposition to request filed Feb. 9 by Harbenito.

Amendment of Sec. 3.606 of TV Rules and Hearst Radio Inc. (WISN), Milwaukee. New TV, Ch. 10 (Docket 8955, BPCT-383)—Statement filed by Board of Vocational and Adult Education of City of Milwaukee supporting reservation of Ch. 10 for educational use and asking dismissal of Hearst petition for rehearing of FCC opinion of Dec. 17, 1952. Oral argument on Hearst petition set Feb. 16.

Amendment of Part 3 of FCC Rules (Docket 10369)—Comments filed by W. R. G. Baker, director RTMA Engineering Dept.

Brush-Moore Newspapers Inc. (WHBC) and Stark Bcstg. Corp. (WCMW), Canton, Ohio. New TV, uhf Ch. 29 (Dockets 10272, 10273; BPCT-264, 949)—Petition by Stark to continue hearing set Feb. 18 until some date subsequent to April 10. Stark plans to organize new applicant in view of illness of its 50% owner, J. Irvin Schultz.

February 11

WBKB (TV) Chicago—Petition filed by Zenith Radio Corp. to stay effectiveness of FCC memorandum opinion and order of Feb. 10 granting assignment of WBKB's license from Balaban & Katz to CBS. Stay of switch of WBKB from Ch. 4 to 2 also requested. Zenith plans to petition for reconsideration, to be filed not later than Feb. 20.

Routine Roundup . . .

February 5 Decisions

BY COMMISSION EN BANC

Designated for Hearing

KDIA Auburn, Calif., Charles E. Halstead—By order, designated for hearing at Auburn on March 2, 1953 application (BR-2544) for renewal of license.

License Renewal

Following FM stations granted renewal of licenses for regular period:

KALB-FM Alexandria, La.; KCRA-FM Sacramento, Calif.; KFEL-FM Denver, Col.; KFPW-FM Fort Smith, Ark.; KLCN-FM Blytheville, Ark.; KNBC-FM San Francisco, Calif.; KPFM Portland, Ore.; KSCJ-FM Sioux City, Iowa; KSEI-FM Pocatello, Ida.; KSO-FM Des Moines, Iowa; KWKH-FM Shreveport, La.; WBBM-FM Chicago, Ill.; WBCM-FM Bay City, Mich.; WBSM-FM New Bedford, Mass.; WCAE-FM Pittsburgh, Pa.; WCRS-FM Greenwood, S. C.; WCSC Charleston, S. C.; WDBJ-FM Roanoke, Va.; WBDO-FM Orlando, Fla.; WDEL-FM Wilmington, Del.; WDOD-FM Chattanooga, Tenn.; WELD Columbus, Ohio; WFMY Greensboro, N. C.; WGH-FM Newport News, Va.; WGPA-FM Bethlehem, Pa.; WHBS-FM Huntsville, Ala.; WHOO-FM Orlando, Fla.; WHPE-FM High Point, N. C.; WIBX-FM Utica, N. Y.; WIOD-FM Miami, Fla.; WISC-FM Madison, Wis.; WJAC-FM Johnstown Pa.; WMBH-FM Joplin, Mo.; WMBO-FM Auburn, N. Y.; WMBR-FM Jacksonville, Fla.; WMRC-FM Greenville, S. C.; WMVA-FM Martinsville, Va.; WNAC-FM Boston, Mass.; WNAO-FM Raleigh, N. C.; WNBC-FM New York, N. Y.; WNEX-FM Macon, Ga.; WOHS-FM Shelby, N. C.; WPAD-FM Paducah, Ky.; WPAM-FM Pottsville, Pa.; WQXR-FM New York, N. Y.; WROY-FM Carmi, Ill.; WTAG-FM Worcester, Mass.; WTAR-FM Norfolk, Va.; WTIC-FM Hartford, Conn.; WTOP-FM Washington, D. C.; WVBT South Bristol Township, N. Y.; WVJS-FM Owensboro, Ky.; WWCF Greenfield Twp., Wis.; WXHR Cambridge, Mass.; WFAM Lafayette, Ind.; WJMC-FM Rice Lake, Wis.; WPDX-FM Clarksburg, W. Va.

Advised of Hearing

KSJV Sanger, Calif., John Poole Bcstg. Co.—Is being advised that application (BP-8410) for CP to change frequency from 900 kc to 1150 kc and hours of operation from d to unl involves interference to existing stations and indicates necessity of hearing.

Replace Expired CP

WAGS Bishopville, S. C., Lee County Bcstg. Co.—Granted application (BP-8703) for CP to replace expired CP (BP-8203) which authorized new station on 1380 kc 1 kw d.

WJWS South Hill, Va., Mecklenburg Bcstg. Corp.—Granted application (BP-8710) for CP to replace expired CP (BP-8332) which authorized new station on 1370 kc 1 kw d.

Move Studio Site

KFDA Amarillo, Tex., Amarillo Bcstg. Corp.—Waived Sec. 3.30 of rules and granted application (BML-1533) for mod. license to move main studio to site outside city limits.

Advised of Hearing

Luther M. Jones, Jackson, Ohio—Is being advised that application (BP-8435) for new AM on 1280 kc 1 kw D, involves engineering questions involving trans. site and ant. system, and indicates necessity of hearing.

WAVA Ava, Ill., Ava Bcstg. Co.—Is being advised that application (BML-1519) to change main studio location to Du Quoin, Ill., indicates necessity of hearing to determine if such a move would adequately serve city of Du Quoin as required by sec. 3.30(c) of Commission's rules.

Prosperity Land Bcstg. Co., Lubbock, Tex.—Is being advised that application (BP-8221) for new AM on 580 kc 500 w D involves interference with existing stations which indicates necessity of hearing.

Brownfield Bcstg. Co., Brownfield, Tex.—Is being advised that application (BP-8540) for new AM on 1250 kc, 1 kw, D, indicates necessity of a hearing because of daytime interference which would be caused to station KLVT Levelland, Texas.

Remote Control Operation

WTIP Charleston, W. Va., Chemical City Bcstg. Co.—Waived sec. 3.165 of rules to permit continued remote control operation from WTIP studios, until Aug. 1, 1953.

Designated For Hearing

Darlington Bcstg. Co., Darlington, S. C.—By order, designated application (BP-8158) for new AM on 590 kc 500 w D, for hearing; made WGTM Wilson, N. C., and WAYS Charlotte, N. C., parties to proceeding.

February 5 Applications

TENDERED FOR FILING

Change DA

WWJ Detroit, Evening News Assn.—CP to make changes in DA system to accommodate TV ant.

February 6 Applications

ACCEPTED FOR FILING

License Renewals

Following stations request renewal of license:

KGLN Glenwood Springs, Col.—Western Slope Bcstg. Co. *Dismissed* request for frequency change from 1340 kc, 250 w, to 970 kc, 1 kw day and 500 w night, change ant. system (BP-7975).

PARAMOUNT CASE

Selected portions of FCC decision on the merger of ABC with United Paramount Theatres Inc. and on finding Paramount Pictures Inc. controls Allen B. DuMont Labs. (See story this issue)

21. This part of the proceeding involves the proposed merger of American Broadcasting Company, Inc. (ABC) into United Paramount Theatres, Inc. (UPT), the merged company to be known as American Broadcasting-Paramount Theatres, Inc. (AB-PT). The particular applications before us in connection with the proposed merger are applications for assignment of ABC's authorizations for television, AM and FM stations in Chicago, Los Angeles, San Francisco and New York, and for the transfer of control over ABC's wholly-owned subsidiary WXYZ, Inc. (licensee of television, AM and FM broadcast stations in Detroit) to AB-PT, and the application by UPT to transfer to AB-PT its negative control over WSMB, Inc., licensee of WSMB and WSMB-FM in New Orleans. While the particular applications we must pass upon are related, strictly speaking, only to the stations referred to above, in applying the statutory standard of "public interest" we must consider the effect of the merger not simply upon the owned and operated stations but also upon the ABC radio and television network and its competitive status.

22. We have long recognized that network broadcasting is an integral and necessary part of radio,[5] and we have more recently extended this recognition of the benefits of network broadcasting to the field of television.[6] We have also recognized that the public interest is served by competition among the networks, both radio[7] and television.[8] Indeed, it was our concern with the necessity of stimulating competition in network broadcasting, as discussed in detail in paragraph 99 of the findings, that led to the establishment of ABC in 1943 as an independent, competitive network. However, while ABC has been aggressive in securing AM affiliates, in obtaining its full quota of owned and operated television stations in major markets, in pioneering with respect to certain practices now standard network usage, and in developing special events and news programs which could be produced at moderate cost, it has not been able to compete effectively with NBC and CBS either in radio or television.

23. The dominant positions of NBC and CBS in network broadcasting, both in radio and in television, together with some of the reasons for their position, have been discussed in detail in paragraphs 105 to 110 of the findings and that discussion need not be repeated here. ABC has been unable to compete effectively with NBC and CBS, principally because it lacks the financial resources, the working capital, and the diversity of revenue-producing activities of the other networks or the companies with which they are associated. Increased financial resources are essential to enable ABC to improve its program structure, build larger audiences, and thereby attract and retain sponsors and affiliates. ABC has attempted from time to time to secure additional capital but with only meager success. The methods by which large amounts of capital can be attracted to a non-diversified and somewhat speculative enterprise are limited, particularly where the enterprise, in nine years of operations, has never paid a dividend. Attempts to secure equity capital through public issues of stock have been only partially successful. Short term bank loans, already resorted to by ABC, afford no permanent answer, and such loans have recently been obtained only through the personal endorsement of ABC's principal stockholder. The management of ABC therefore decided to seek a merger with another company and, after unsuccessful discussions with other organizations, finally initiated negotiations with United Paramount Theatres, Inc., which resulted in the proposed merger.

24. The financial, organizational and operational details of the proposed merger are set forth in paragraphs 113 to 126 of the findings. They indicate that the merged company will have an ABC Division which will be a self-contained unit having full charge of the day-to-day broadcast operations and following existing ABC program and public service policies, and which will continue to have as its president Robert E. Kintner; that the merged company will have adequate resources to enable the ABC Division to strengthen its programming and improve its physical properties, and thereby compete more vigorously with the other networks; and that the ABC Division, while retaining substantially its existing personnel organization, will secure the benefit of the full-time efforts of four of UPT's top executives, including Robert H. O'Brien, a former member of the Securities and Exchange Commission. ABC will have representation on the Board of Directors of the merged company and Edward J. Noble, organizer and presently majority stockholder of ABC and chairman of its board of directors, will be a director of the merged company, chairman of its finance committee and the largest individual stockholder.

25. Thus far, we have been concerned with the affirmative aspects of the proposed merger, chiefly the increased competition that ABC would be able to provide to the other networks. We now turn to a consideration of the possible adverse effects arising from the merger of a theater chain and a radio and television network.

26. One possible adverse argument is that the merged company could dominate the field by virtue of its size. However, ABC combined with UPT would still be dwarfed by the Radio Corporation of America, and the organizations now enjoying network supremacy are too strong to warrant any fear that the competition to be afforded by AB-PT, while formidable, would place it in a dominant position. Another possible adverse argument is that UPT is entering into a merger with ABC in order to suppress ABC and thereby cripple television. The obvious answer to this is that pursuing such a course would have only a relatively minor adverse effect on television, would cripple UPT financially, and produce only a minute increase in attendance at UPT's own theatres. There are, however, elements of competition presently or potentially existing between ABC and UPT as separate organizations which will probably suffer to a degree should the merger be effectuated, and these elements require and have received serious consideration. Paragraphs 127 through 142 of the findings contain a brief analysis of the competitive factors involved in the merger, particularly with respect to competition for audience and competition for product, the availability and future use on television of motion picture feature film in comparison with films made specially for television, and the effect upon competition of theatre television and pay-as-you-see television. The autonomous operation of the ABC Division and the decentralized operation of UPT's theatre subsidiaries and the obvious determination of the AB-PT officials to promote both media should serve to preclude the elimination of the competition for audience that probably exists between UPT theatres and ABC television stations and affiliates; on the other hand, we do not for a moment believe that some lessening of competition may not inevitably occur. However, we feel that there will not be any substantial lessening of competition, in view of the external competition facing UPT theatres and ABC radio and television stations and affiliates in every area, as pointed out in paragraphs 131 to 135 of the findings, and in view of the reasonable expectation that this competitive situation will continue, for the reasons stated in paragraph 136 of the findings.[9] Furthermore, this external competition, particularly in radio and television, is sufficiently strong to compel AB-PT, even if it were not already so committed, to promote vigorously its activities in each medium; failure to develop strong ABC programming would more probably result in greater

[5] *Report on Chain Broadcasting* (Docket No. 5060, 1941), page 88. The benefits of network broadcasting, as set forth in this Report, are referred to in paragraph 97 of the findings *supra*.

[6] Notice of Proposed Rule-Making, Docket No. 9807, adopted October 5, 1950.

[7] *In re Radio Corporation of America*, 10 FCC 212.

[8] Notice of Proposed Rule-Making, *supra*.

[9] It has been suggested that the Commission's decision on the merger will eventually permit the motion picture industry to take over television. This argument ignores the fact that the operation of television stations is conducted pursuant to a statutory licensing plan. No transfer of a license may be made without Commission consent. This consent is also required for the renewal of a license. Both require determinations as to the public interest. The fear of domination of television by motion picture interests, therefore, is unwarranted in view of the Commission's continuing supervision of the growth of television.

audience for programs of its broadcast competitors than for AB-PT theatres.

27. It is the aforementioned factors, among others, which distinguish the proposed merger from the situation which existed within NBC at the time it operated two networks, the Blue and the Red, a situation which the Commission regarded as adversely affecting competition. Specificially, the competition, or more accurately, the potential competition between the Blue and Red networks could have been direct and on "all fours", whereas the competition, present or potential, between a television network and a theatre chain is by no means as direct and complete as that between two independent networks. Secondly, whereas AB-PT will face the competition of other theatres, and of other networks in a dominant position, and will have to promote both of its activities vigorously, NBC was the dominant company in the field, had no great need to promote both networks vigorously, and, as a matter of fact, did not promote the Blue Network as vigorously as it did the Red. In fact, as we pointed out in the Network Report (page 45) the Red and Blue networks were not "even two distinct operating divisions or departments within NBC," and there was no real competition, as indicated in part by the policy of granting discounts on combined billings of the two networks (page 45). Finally, whereas the proposed merger offers the affirmative benefit of fostering competition between ABC and the dominant networks, the preservation of the two networks under NBC would not have promoted competition but would have limited it and maintained the dominant position of NBC.

28. Turning to the question of competition for product, we find that there is little, if any, competition presently existing between theatres and television for films, and the sources from which theatres and television secure films are separate and distinct. Any expectation of competition between television and theatres for films assumes that current motion picture feature films produced by the major producers would be made available to television; based upon the financial and other problems referred to in the findings, particularly paragraphs 61 to 65 and 128, we do not anticipate that the "majors" will initiate during the next few years a general release to sponsored home television of current feature film produced for motion picture theatre exhibition. In any event, we must bear in mind that the ABC network does not regard motion picture feature films as having much value for networks, and that the trend, for reasons outlined in paragraph 130 of the findings, is to film made specially for television. Such films are presently being produced by independent companies (as distinguished from the "majors") and three of the networks are either actually engaged in making them or, as in the case of ABC, preparing to do so. The "majors" may find that their high costs of production, high standards of technical perfection, late start in making films specially for television and the existence of other sources for such film give them only a modest role in the television film market. In summary, it appears unlikely that the "majors", who are the principal source of film for UPT theatres, will be the principal source or even a substantial source of film for the ABC network or ABC owned and operated stations. To the extent that the "majors" may in the future be a source of film, either substantial or minor, for both UPT theatres and the ABC network and owned and operated stations, to that extent, the merger might reduce the competition between them that might otherwise exist, but then only to the extent that the merged company's pledge to promote both media aggressively and the autonomous operation of ABC and decentralized operation of the theatre subsidiaries prove ineffective to maintain that competition.

29. While UPT, through its theatre subsidiaries, has been a substantial purchaser[10] of film (amounting to approximately $30,000,000 in 1951), its so-called purchasing power must be considered in the light of the requirement of the consent judgment that pictures must be licensed, picture by picture and theatre by theatre, solely upon the merits and without discrimination in favor of affiliated theatres, circuit theatres or others. Furthermore, the announced policy of AB-PT is to make no package deals for theatre and television, and as stated above, its proposed organization is designed to effectuate this policy. Under these circumtances and in view of all of the uncertainties concerning the purchase by television and theatres of films from the same sources, we cannot credit with reasonable probability any suggestion that an unfair competitive advantage might accrue to ABC in the purchase of films, as a result of being associated with UPT.

30. The competition between theatre and home television for audience and product, as it exists today, is analyzed briefly in paragraphs 138 and 139 of the findings. Paragraphs 79 to 83 of the findings refer to the number of theatre television installations in theatres of UPT subsidiaries, the number of events televised, the financial results of theatre television events, the use of theatre television by the Civil Defense Administration and its projected use by business corporations for meetings. On the basis of the facts and findings on this record, we do not believe there is any reasonable probability that the merger of the home television and theatre television interests here involved will result in a substantial lessening of competition. As far as the future of theatre television is concerned, we do not propose to anticipate here what will develop in the pending rule-making proceeding (Docket No. 9552).

31. As far as pay-as-you-see television is concerned, to evaluate its role in the competitive situation in view of its experimental status, calls for stacking one assumption upon the other. This we have done in paragraph 140 of the findings. However, the competitive situation assumed is too remote and speculative to require or warrant any conclusions. The competitive situation with respect to stories and talent is referred to in paragraphs 141 and 142 of the findings; it is sufficient to state here that no competitive problems arise as far as stories are concerned and, as for talent, it is unlikely that the merger would substantially lessen competition in that respect.

32. Upon reviewing the competitive factors hitherto discussed, we conclude that while the merger may result in some lessening of some aspect of the competition that exists, either presently or potentially, between ABC and UPT as separate companies, there is no reasonable probability that the merger will substantially lessen competition or tend to monopoly in any section of the country or in any line of commerce. We believe that the merger meets the test of Section 7[11] of the Clayton Act, 15 U.S.C. 18, as amended on December 29, 1950, as well as the test of issue No. 9[12] of the Commission's Order of August 27, 1951. In our opinion, the merger will not only fail substantially to lessen competition but will promote competition. The merger will provide ABC with the financial resources to carry out its plans to strengthen its programming and improve its physical plant and thereby provide substantial competition to the other networks, enabling both its owned and operated stations and its affiliates to improve their service to the public, and stimulating the other networks and stations to compete in turn. Furthermore, the increased competition which the merger will foster appears certain, substantial and immediate whereas the lessening of competition which may occur would be minor, limited and remote. We therefore conclude that the merger will be in the public interest.

Control Issue

5. The rights which Paramount holds in DuMont constitute both negative control of important phases of DuMont's corporate existence and potential affirmative control over all phases. It is the largest single stockholder, holding all 560,000 shares of the "B" stock and 2.4% (43,200 shares) of the "A" stock. Dr. DuMont, the largest single "A" stockholder, owns only 3%. Its ownership of the "B" stock gives it an automatic uncontestable right to name three of the eight directors as well as three officers. The practical consequences of these facts in terms of influence, and potential and negative control, are clear. No amendment can be made to the Certificate of Incorporation, nor can any other provision affecting the voting or other rights and privileges of either class of stock be made, without the affirmative vote of Paramount's "B" stock. The following additional corporate actions cannot be taken without the affirmative vote of Paramount's "B" stock; reduction of capital, dissolution and liquidation, consolidation or merger (a matter of obvious importance in view of our decision on the merger approved in this proceeding), and sale of assets and franchise.[2] Furthermore, the corporation's by-laws can only be amended, repealed or adopted by unanimous vote of all of the directors, including the Paramount directors, or by a majority vote of both classes of stock. Whatever the likelihood that any of these actions will be considered in the immediate or distant future, Paramount is clearly in a favored position, by virtue of its ownership of all the class "B" stock and a substantial block of class "A" stock, to dominate the corporation in any situation where it determines that such domination is essential to serve Paramount's corporate interests.

* * *

9. Paramount, through the corporation's charter, has assured itself of a position of influence which no other DuMont stockholder is given. We have found that the day-to-day operation of corporate affairs is predominantly in the hands of Dr. DuMont, and that he has consistently solicited and secured a majority of "A" proxies. We have also found that, with rare exceptions, the "A" and "B" directors have agreed in their voting. We are not unmindful of these findings.[3] They cannot, however, change the realities of Paramount's existing negative and potential positive control, and influence of the very type which must be recognized if Section 310(b) and Section 3.636 (b) are to be effective. Their impact is also diminished by the necessity of evaluating Paramount's actions in the light of the Commission's past determinations that DuMont was controlled by Paramount and the pendency of the present proceedings. See Television Pro-

[10] UPT does not produce or distribute film. As for its relationship to Paramount Pictures Corporation, see paragraphs 28 and 29 of the findings and paragraph 37 of the conclusions.

[11] No "corporation engaged in commerce shall acquire, directly or indirectly, the whole or any part of the stock or other share capital and no corporation subject to the jurisdiction of the Federal Trade Commission shall acquire the whole or any part of the assets of another corporation engaged also in commerce, where in any line of commerce in any section of the country, the effect of such acquisition may be substantially to lessen competition, or to tend to create a monopoly."

[12] "To determine whether the effect of the proposed merger of American Broadcasting-United Paramount Theatres, Inc., if consummated, would substantially lessen competition or tend to monopoly in any line of commerce in any section of the country."

[2] It has been asserted that the Commission need not be concerned about this aspect of Paramount's control, since before such a merger or transfer of assets could be consummated the Commission's approval would have to be sought under section 310 (b) of the Act, but Paramount's control in these matters is negative, not positive. It could, for example, prevent a merger between DuMont and one of its moving picture competitors, and this exercise of control would not be reviewed by the Commission. For the Commission passes upon transfers and assignments agreed to by a licensee or permittee, not upon the possible transfers and assignments which the controlling element in a licensee have vetoed.

[3] We have given careful consideration to the Hearing Examiner's findings on these matters. His conclusions are reversed because we find control as a matter of law in the legal position of Paramount in DuMont, and because we disagree, in light of the whole record, with his evaluation of the impact of these facts upon that legal position.

Help Wanted

Managerial

General manager. If you have a record of successful management and sales in a small market here's an opportunity for you to qualify for similar position in large metropolitan market. Box 750S, B•T.

Florida network station desires to employ experienced radio station manager preferably with money to invest, although not essential. Box 787S, B•T.

Salesmen

Salesman. $50. weekly salary plus 10% commission. Must be experienced. Southeast area, lucrative market. Good for $10,000. Box 685S, B•T.

Sales manager wanted. Unusual opportunity for aggressive sales manager with good past record to obtain promotion in metropolitan market. Box 751S, B•T.

If you are not making as much money as you should, your inquiry into this opportunity of a permanent sales career in a large metropolitan market may reward you with unlimited success. Salary plus commission. Box 799S, B•T.

Salesman-announcer. Two and one-half hour weekly evening announcing shift and sales days. Salary plus commission. Really good and permanent smaller market deal for really good man. Southern Minnesota. Box 813S, B•T.

Sales manager qualifications? If ready to move up, looking for security, recognition and challenge, here is unusual opportunity. New York state major network affiliate seeks high caliber responsible worker with established record local sales. Healthy two station market, right size community for family life. Top organization, TV interests. Every benefit, company paid retirement plan. Salary incentive arrangement. Send complete presentation including references. Confidential. Box 830S, B•T.

Wanted: Salesman and announcer who is experienced in competitive southern market and who has earned in excess of $6,000 per year. We want a man who is on his way up and who wants to grow with us. Send full details in first letter to Box 835S, B•T.

New York transcription firm desires station relations representative with radio and/or television business background. Must own car, free to travel. Will interview in New York. Submit complete personal and business resume. Box 847S, B•T.

TV account executive for new Illinois station on air late March. Guarantee and commission arrangement. Man we are looking for probably is in TV sales with middle market station and is interested in joining new operation that offers him opportunity for advancement. Write qualifications in reply, will be treated in confidence. Photo. P. O. Box 865, Rockford, Illinois.

Local salesman for 5000 watt fulltime Mutual affiliate. Top station in excellent market. Write full details with photo to: Manager, KWHN, Fort Smith, Arkansas.

Announcers

Announcer-disc jockey with proven successful DJ record in competitive large market operation. $85.00 start with regularly scheduled increases to $100.00 weekly. Station located large central-south market. TV future. Send audition, photo and complete background. Confidential. Box 369S, B•T.

Comedy DJ, flowing, non-hesitant ad-lib. "Cue-in"gimmicks. Movie-star impersonations, dialects. Single preferred. Box 703S, B•T.

Announcer. Experienced, warm, sincere, versatile. If you've got it—we'll buy it! $65.00 for 45 hours. Box 729S, B•T.

Announcer-engineer. Stress on announcing that's experienced, sincere, versatile and saleable. $80.00 for 45 hours. Box 730S, B•T.

Help Wanted—(Cont'd.)

AM-TV station in southeastern market of 100,000 has opening for qualified announcer. Salary open. Prefer applicants from this region only. Complete information, photo and tape or disc to Box 732S, B•T. All applications will be acknowledged.

Versatile announcer-newsman for Michigan station. Must be capable gathering local news and covering special events plus general announcing duties. Good conditions, excellent future. Send audition, photo, complete resume. Box 756S, B•T.

Michigan station wishes versatile staffer with leaning to sports. Send tape. Photo, full details. Box 785S, B•T.

Announcer-technician wanted. Emphasis on announcing. Good network station in southwest. Want clean-cut experienced young man. Send full info, voice audition and photo. Box 796S, B•T.

Announcer-salesman. Two and one-half hour weekly evening announcing shift and sales days. Salary plus commission. Really good and permanent smaller market deal for really good man. Southern Minnesota. Box 813S, B•T.

Progressive Iowa independent has an opportunity for a good morning man with ad-lib ability and relaxed commercial style. Send only resume and picture with first letter. Box 815S, B•T.

Announcer-engineer with first phone. Emphasis announcing. 1000 watt independent in progressive Texas market of 35,000. $350.00 per month. Send letter and audition. Box 817S, B•T.

WKY RADIOPHONE COMPANY
OKLAHOMA CITY, OKLAHOMA

ductions, Inc., 11 F.C.C. 812(1946); New England Theatres, Inc., 4 Pike & Fischer, R.R. 1025 (1948). While Paramount may not have chosen or attempted to exert its influence in recent years, its considerable power to do so remained. Failure to exert power openly does not destroy it. See *Universal Carloading Co.* v. *Railroad Retirement Board*, 71 F. Supp. 369.

10. This record therefore shows that as a matter of basic organization. Paramount has been given a dominating position in DuMont which sets it apart, in terms of influence, from all of the other stockholders. This position derives from the particular stock plan adopted and is reflected in the selection of the Board of Directors, selection of officers, the functions of the officers, and veto control of basic matters of corporate activity which require the consent of both classes of stock. We conclude that Paramount Pictures Corporation controls Allen B. DuMont Laboratories, Inc. within the meaning of, and for the purposes of, both Section 310(b) of the Communications Act of 1934, as amended and Section 3-636(b) of the Commission's Rules and Regulations, and that Paramount Pictures, Inc. possessed this control at the times it arranged to and did transfer its stock in DuMont to Paramount Pictures Corporation.

Introductory Statement of Comr. Hennock (Dissenting)

Since in my opinion the record in this proceeding is clearly inadequate to support most of the majority's conclusions, as well as the findings necessary thereto, I must dissent in large part to the Commission's decision. Only with respect to the determination that Paramount Pictures Corp. controls DuMont do I concur with the Commission's decision; in all other respects I do not. It is my firm belief that the great weight of the evidence before us and the necessity of protecting the public interest require that we find:

I. The proposed merger of the American Broadcasting Company and United Paramount Theatres would not serve the public interest, convenience and necessity, and therefore should not be approved.

II. That Paramount Pictures Corp. and United Paramount Theatres, Inc., their officers and directors, cannot on this record be held to be qualified from the standpoint of character and conduct to be licensees of radio and television stations, and that the hearing should be reopened and completed on this issue.

III. That the unauthorized transfers of control of radio and television licenses from Paramount Pictures, Inc. to Paramount Pictures Corp. and United Paramount Theatres were in willful violation of the Communications Act and the Commission's Regulations, and that a grant of their applications for transfer of control without prior settlement of the entire issue of character qualifications would be contrary to the public interest.

IV. And while I am in complete agreement with the Commission's decision that Paramount Pictures Corp. controls DuMont within the meaning of Section 310 (b) of the Communications Act and the five-station Rule, 3.636 (b), I believe that the Commission has erred in not requiring as a consequence thereof that renewals of DuMont's licenses should not be granted unless and until Paramount Pictures Corp. divests itself of all right and interest in DuMont, such divestiture to be accomplished within a reasonable time and in a manner approved by the Commission as in the public interest.

While these particular matters are treated separately in this dissent, the Commission's action must be viewed as a single entity in order to appreciate in full its enormous significance. And such a view makes clear that the Commission has built what was at most a foothill of difficulty into a mountain of trouble for itself and our entire broadcasting system.

To arrive at its conclusions approving the ABC-UPT merger and finding Paramount Pictures Corp. and UPT to be qualified licensees, the Commission has smashed—often beyond repair—precedents, procedures and policies which have carefully been built up over the years of its regulatory process. In areas without established precedent, the Commission has taken an undue risk with the future of broadcasting by permitting the introduction therein of a new and potentially deleterious force and by setting in motion a series of events that must be productive of harmful future consequences upon our radio and television services. There is no disguising the fact that such consequences will hamper and stunt the growth of that most vigorous and flourishing competitive broadcast system which the American people need and deserve. And I am certain that there will scarcely be an occasion or area for Commission action in the future which will not be vitally affected, if not bound, by those unfortunate decisions it makes today.

I fail to see any real need or substantial justification for the Commission's approval of the proposed ABC-UPT merger. Nor am I able to ascertain any sound basis upon which the Commission could, on this record of their antitrust activities and violations of the Communications Act and Commission Regulations, find Paramount Pictures Corp. and UPT to be qualified as licensees. And given the Commission's decision that Paramount Pictures Corp. controls DuMont, there is, in my opinion, no more reason to permit a continuation of such control of a leading broadcasting network by major motion picture *production* interests, than there is to permit the creation of a combination of another such network with motion picture *exhibition* interests, as is involved in the proposed ABC-UPT merger.

Since my disagreements with the majority in this proceeding are so fundamental, and as most important issues of the public interest are involved herein, I am compelled to spell out, in what unfortunately must be such great length, the basis for my position and decision.

Feb. 23-24: NCAA TV Committee meets on controlled football video plan details, Chicago.

Feb. 27-28: Third annual Regional TV Seminar (for TV-minded college students), WAAM (TV) and Johns Hopkins U., Baltimore.

March 1-3: American Public Relations Assn. eighth annual conference, Mayflower Hotel, Washington.

March 6: Eighth annual Michigan State Radio & TV conference, Michigan State College, East Lansing.

March 9-12: Canadian Assn. of Broadcasters annual convention, Mount Royal Hotel, Montreal.

March 15-16: Arkansas Broadcasters Assn., annual spring membership meeting, Marion Hotel, Little Rock.

March 23-26: Institute of Radio Engineers annual convention, Waldorf-Astoria Hotel, New York.

March 26-28: Alabama Broadcasters Assn. annual spring meeting, Florence, Ala.

April 12: Seventh annual Frances Holmes awards luncheon, Hotel Statler, Los Angeles.

April 16-19: Twenty-third Institute for Education by Radio-TV, Deshler-Wallick Hotel, Columbus, Ohio.

April 18: Seventh Annual Spring Technical Conference, Cincinnati.

April 27-May 1: Society of Motion Picture and Television Engineers, 73rd semi-annual convention, Statler Hotel, Los Angeles.

April 28-May 2: First national television news seminar, co-sponsored Radio-TV News Directors Assn. and Northwestern U.'s Medill School of Journalism, Orrington Hotel, Evanston, Ill.

April 29-May 1: Electronics Symposium, Shakespeare Club, Pasadena, Calif.

April 29-May 2: NARTB Convention, Biltmore Hotel, Los Angeles.

April 30-May 2: Annual convention, American Women in Radio and Television, Atlanta Biltmore, Atlanta.

May 19-21: Annual convention, Pennsylvania Assn. of Broadcasters, Bedford Springs Hotel, Bedford, Pa.

June 6: New England Chapter of American Women in Radio and Television annual meeting, Hotel Statler, Boston.

June 11-12: Kentucky Broadcasters Assn., Seelbach Hotel, Louisville.

June 14-17: Advertising Federation of America 49th Annual Convention, Hotel Statler, Cleveland.

June 17-19: NARTB Combined Boards of Directors, Washington.

Sept. 1-3: International Sight and Sound Exposition and Audio Fair, Palmer House, Chicago.

Sept. 28-30: National Electronics Ninth Annual Conference, Hotel Sherman, Chicago.

Mixed Blessing

THE FCC's decision in the ABC-United Paramount case opens the way for gratifying expansion by the new AB-PT and by CBS, which acquires WBKB (TV) Chicago as a by-product to the merger. What it means for the DuMont Television Network is not as easy to predict.

In reversing its hearing examiner's recommendations, which we thought to be eminently sound, the FCC decided that DuMont is controlled by Paramount Pictures. The immediate effect of this, of course, is to deprive DuMont and Paramount Pictures of owning more than five TV stations between them. The longer-range effect is harder to foresee.

The operating history of DuMont and Paramount Pictures has been that they have gone virtually their own ways as far as television broadcasting was concerned. Paramount owns and operates KTLA (TV) Los Angeles; DuMont, WABD (TV) New York, WTTG (TV) Washington and WDTV (TV) Pittsburgh. It is an indication of the separateness of the operations that KTLA is not even an affiliate of the DuMont network.

Here we have two large companies whose broadcasting histories are quite disassociated but who are now adjudged to be in business together. Plainly they either must get into business as a single operating entity, or split apart so distinctly that even the myopic FCC can be shown the gulf between them. Neither course would be easy.

In approving the ABC-United Paramount merger, the FCC found that it would achieve the stimulation of competition which that agency professes to desire. We cannot help but point out that the FCC's decision with regard to DuMont and Paramount Pictures seems to promise the exact antithesis and indeed carries the threat of hampering the DuMont Television Network at a time when its competition has been unleashed for new advances.

No reasonable person can disagree with the soundness of the Commission's approval of the merger and the transfer of WBKB to CBS. There is room for serious disagreement, however, with its decision regarding DuMont and Paramount.

Good Fellows Regime

PERHAPS NO enterprise has had more crises than broadcasting. There are still plenty of them. But they're hitting in different areas.

Ten days ago, the NARTB (nee NAB) held its regular quarterly board meeting at Belleair, Fla. Business was handled without a single burning issue, and with no fireworks. Time was when an NAB board session invariably meant controversy, invective and probably reorganization.

The NARTB is in good health, mentally and financially. In the year and one-half that Harold Fellows has served as president, he has succeeded in welding into a smoothly working team a group of experts who heretofore hadn't worked together too well. The *esprit de corps* is at its highest.

We were happy to see the board elevate to vice presidential status such NARTB executives as Bob Richards, Dick Doherty, Ralph Hardy and Thad Brown Jr. They were given security hitherto unknown in NARTB, through three-year contracts.

The principal function of the broadcasters' trade association has always been in two fields—legislation and regulation. Today relations are better both with Congress and with the FCC. The association has unprecedented acceptance and prestige. It speaks nobly for the Fellows regime.

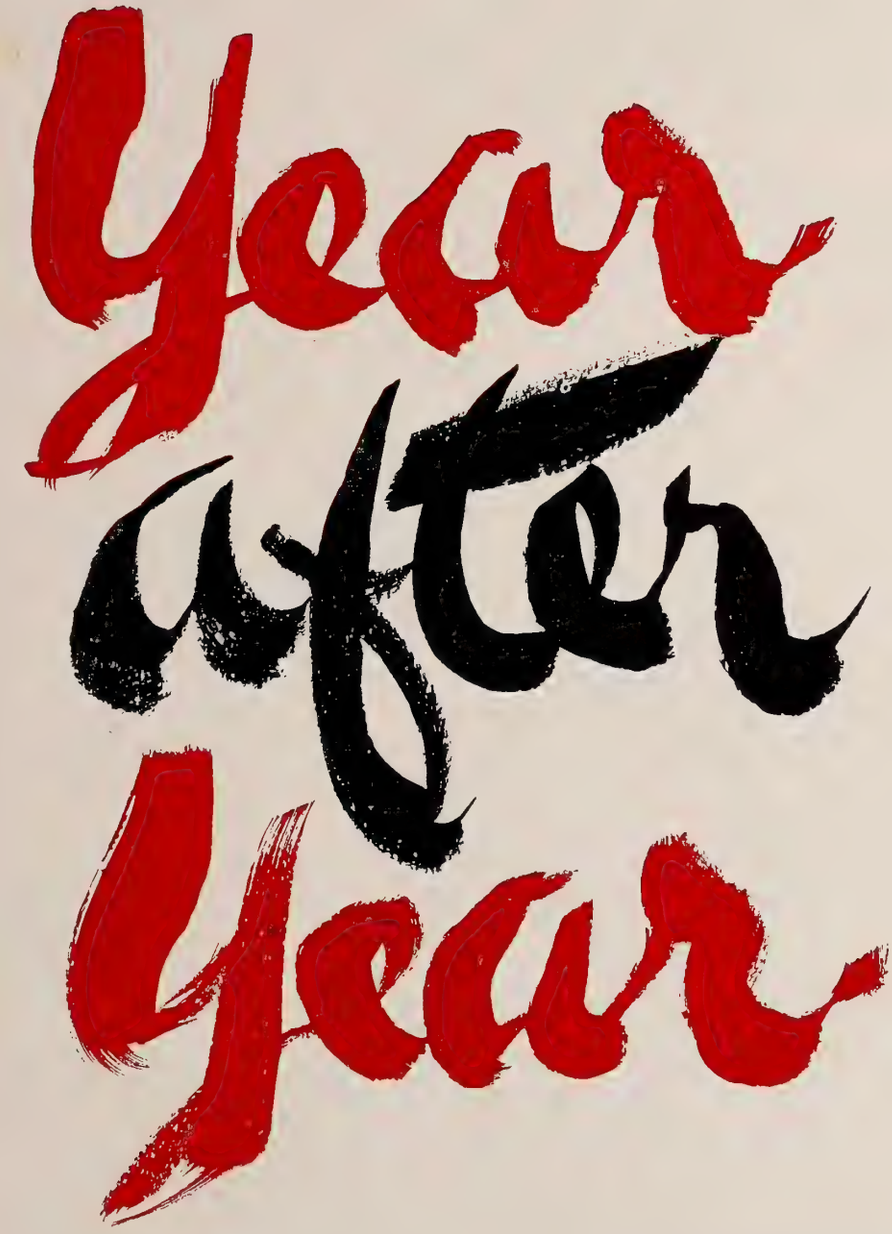
Cradle to Grave TV

SEVERAL issues have elapsed since we last discoursed on educational television and the excesses that have been committed in its name against the taxpayer. Evidently radio and television broadcasters feel that the fight isn't worth the candle; else how can we explain the almost complete silence from broadcasters' ranks?

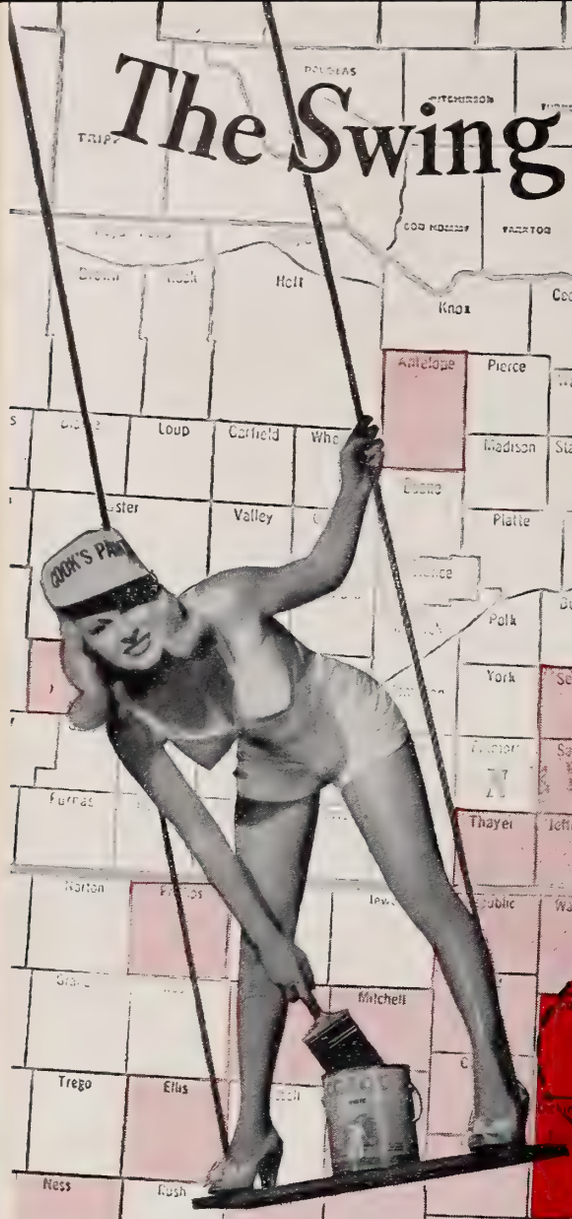


Fortunately, there is one organization about to speak out. The Illinois Broadcasters Assn. has in preparation a brochure which it intends to submit to the Illinois Legislature, urging assemblymen to make no commitments for state funds for educational television stations until they have heard testimony on cost, plans and possible results. We've seen the first draft and we commend it to all broadcasters and all legislators as "must" reading.

The brochure cites the unrealistic costs used by educators in estimating their installation charges and in operation. It points out that the initial cost isn't important, but that taxpayers' money must be pledged in perpetuity. It recites the failure of schools to provide low-cost programs or utilize the time offered by commercial stations, which have the established audiences. And it points out that educational stations in radio cannot show a single example of outstanding audience acceptance. It cites the 60-mile coverage limitiation in TV, and that most of the people footing the TV bill in any given state would get no service.

All these reasons have been cited before. The real hooker, however, comes in a projection of what could happen if several hundred educational stations are authorized. Says Leslie C. Johnson, WHBF-TV Rock Island, chairman of the TV Committee of IBA:

"In the background is the spectre of a giant coast-to-coast educational network of 500 to 600 stations, operated and controlled by educators, either immediately or ultimately of necessity by state and federal Governments. Its purpose: Controlled adult education. What a propaganda weapon! * * * * An educational job from the cradle to the grave. * * * * The hand that controls the purse strings is all-powerful in politics."



We think Mr. Johnson spoke an erudite mouthful.

. . . for three decades, the great audience and fine facilities of WLW, the nation's most merchandise-able station, have afforded advertisers sales depth unavailable anywhere else. Now, the WLW-Television stations in Cincinnati, Dayton and Columbus offer advertisers this same leadership. For the finest facilities, greatest circulation and market dominance, buy the WLW stations —best buy . . . year after year.

CHICAGO MARKET

WLS—FEATURE FOODS

RADIO PROGRAM AND MERCHANDISING SERVICE

THE PROGRAM

HALF-HOUR DAILY
MONDAY THRU SATURDAY

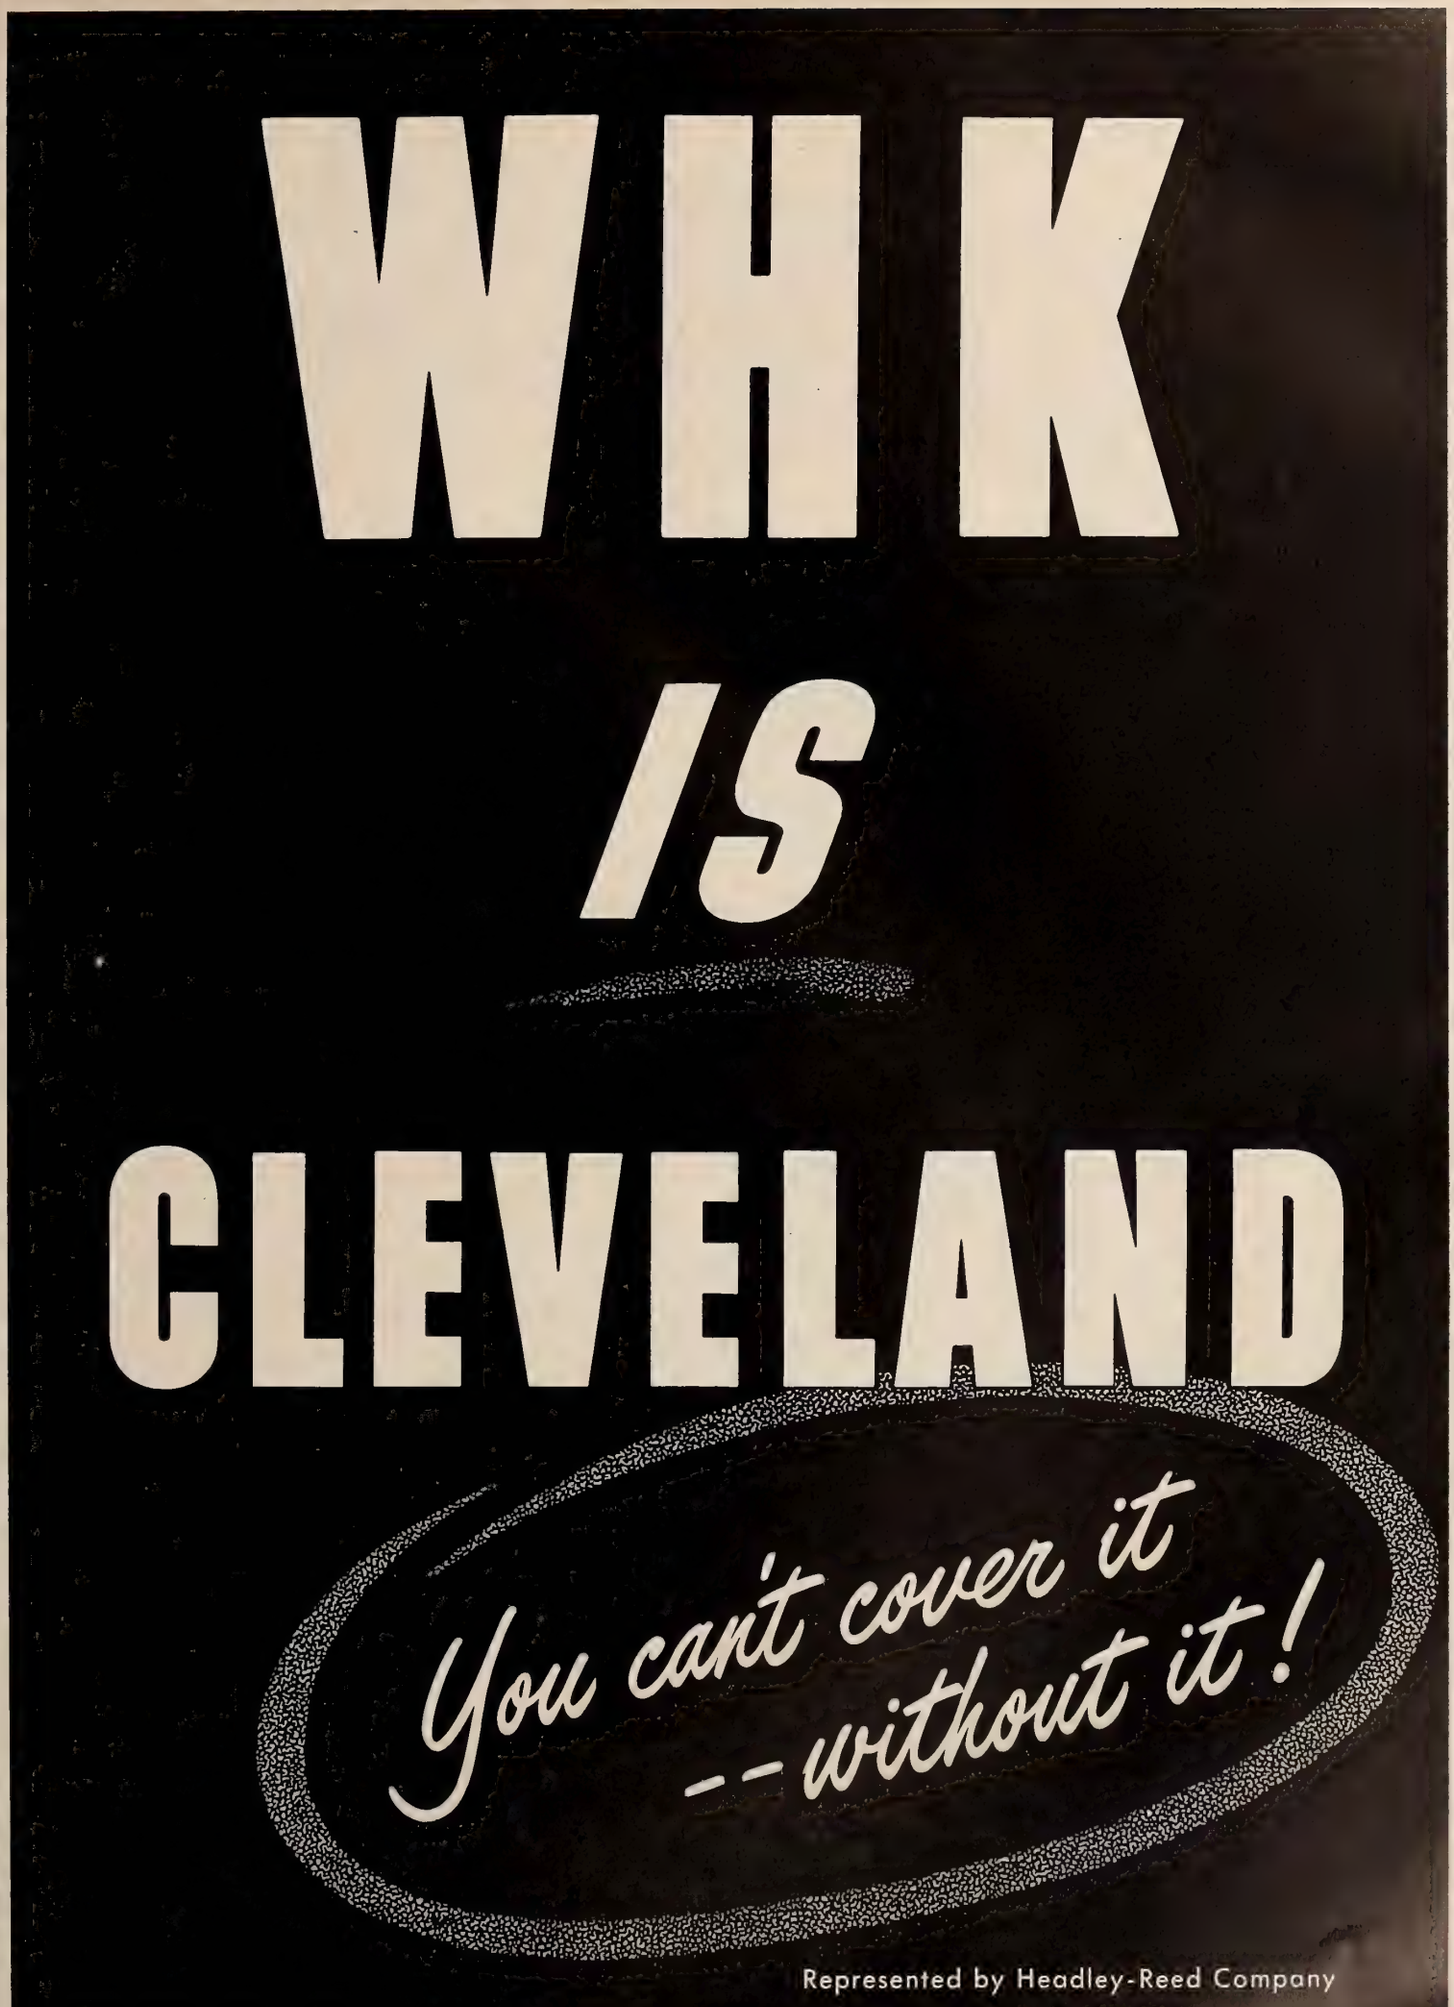
By far the oldest Homemaker program on any Chicago station, FEATURE FOODS today is more responsive than ever before! Now in its 18th year, the program has outlived dozens of "gimmick" programs . . . because Martha Crane, the "voice of the program" visits with thousands of homemakers as one woman to another, about all the things they are mutually interested in. Loved and respected by millions of women for her practical advice and philosophy, Martha has developed a loyal, believing following of housewives throughout the Chicago Midwest.

Aiding Martha Crane on FEATURE FOODS is Jack Holden, veteran Chicago radio personality, who adds the male element to the program. Both Martha and Jack handle all commercials, weaving them informally into the basic pattern of the show.

NOW GUARANTEED GREATER EFFECTIVENESS

Every 13 weeks each participating advertiser is guaranteed:

- 600 merchandising calls on large and medium "A" stores
- 100 checks on corporate chain stores showing distribution and exposure
- 60 special displays in a group of 60 top Metropolitan Chicago Supermarts . . . with shelf extenders, stack displays, etc.
- 35 BARGAIN BAR promotions in chain and independent supers
- Demonstrations, sampling or couponing available upon request
- 3 reports on distribution, exposure, rate of sale of products—with special comments



PROVIDING CONTINUOUS MERCHANDISING SERVICE TO ALL SPONSORS

STANDARDS for "radio shorts," as station Representatives Assn. designates 8-second spots, being worked out by SRA in cooperation with its members and agency time buyers and are expected to be ready for distribution to country's radio station operators within week. In proposing industry standards for midget radio announcements, SRA is following line pursued successfully last year when it set standards for TV station identification announcements.

★ ★ ★

WHITE HOUSE expected to reach independent agency level, including FCC, on reorganization any day now. Despite "new faces" approach advocated by some GOP leaders, it looks as though Rosel H. Hyde will get chairmanship under GOP, since he has almost unanimous endorsement of industry and of most GOP stalwarts.

★ ★ ★

"BE SMART" line being used by supporters of former FCC Comr. Robert F. Jones, who espouse his appointment to FCC chairmanship. They say that Mr. Jones should be supported now for short-term (until June 30 when Walker tenure would expire) and way would be open for elevation of Vice Chairman Rosel H. Hyde, Idaho Republican, and present front-runner, to succeed Mr. Jones, who by then would have handled staff reorganization, and returned to private law practice.

★ ★ ★

WHITE HOUSE liaison on FCC (and other administrative agency) personnel, is C. F. Willis Jr., one of trouble-shooters for Assistant to President Sherman Adams. Among top names reportedly before him for two FCC vacancies (assuming Comr. Hyde's elevation to chairmanship) are: Paull Marshall, Washington attorney; Charles Garland, manager of KOOL Phoenix; Lewis Allen Weiss, Los Angeles, former Mutual and Don Lee chairman; Thad H. Brown Jr., NARTB vice president and counsel for TV; Fred Palmer, radio consultant of Columbus, Ohio.

★ ★ ★

ELIMINATE name of Ex-Congressman Albert D. Cole (R-Kan.) as prospective appointee to FCC. Now serving as director of personnel division of Republican National Committee (patronage), Mr. Cole will accept appointment as director of Federal Housing Authority. He had been urged to seek FCC appointment which he could have had hands down.

★ ★ ★

WHILE scattered information seeps out of Minnesota Mining and Crosby laboratories about progress of TV tape-recording research, there's growing interest in strictly secret development work being done by several groups under government contract at behest of Pentagon. Signs appearing that new DuPont tape base may help bring transition of movie industry from optical to magnetic film because of money savings and promise of improved fidelity.

FCC'S 9 a.m. schedule for hearings, ordered fortnight ago, isn't working out. Both its staff people and outside practitioners have argued impracticability of getting going an hour ahead of normal schedule, in view of necessity of handling mail, office routine and coaching of clients. Likely results: Return to 10 a.m. schedule, effective this week. Comr. Eugene H. Merrill had successfully fostered 9 a.m. start.

★ ★ ★

UPCOMING SOON will be naming of former Senate Democratic Leader Ernest W. McFarland as counsel for three international communications carriers—RCA, IT&T and Western Union—looking toward ultimate consolidation of external communications operations. Project, espoused by former Sen. McFarland for decade, entails lengthy preliminary planning prior to legislative action. Fusion has been advocated by government and carriers alike.

★ ★ ★

WHEN WILL James C. Hagerty, news secretary to President, name his radio-TV assistant? Apparently it's up in air, because White House staff now is bigger than its predecessor under Truman administration. One of names mentioned heretofore has been that of Col. E. M. Kirby, Army radio-TV chief and former NARTB (then NAB) public relations director. Col. Kirby expected to muster out of service within few weeks.

★ ★ ★

PREMATURE disclosure of biggest single-station sale in history—$8.5 million transfer of WPTZ (TV) Philadelphia from Philco to Westinghouse (see story page 27)—almost occurred three times in last fortnight during Portland, Ore., competitive hearing for TV Ch. 8. With Gwilym Price, Westinghouse president on stand, opposing counsel asked about Westinghouse negotiations for acquisition of TV stations and he mentioned Atlanta, Jacksonville and Philadelphia. But counsel didn't follow up. Same thing happened twice with Joe Baudino, Westinghouse Radio Stations Inc. executive v.p., on stand, but there was no follow up.

★ ★ ★

FACT THAT there's been no formal word emanating from FCC on so-called "shakedown" applications in TV, doesn't mean that effort to root out "strike application" blight has been dropped. Top FCC investigator now is in field on one case, and it reportedly has resulted in leads on others [B•T, Feb. 9]. FCC obviously won't disclose where investigator is working lest suspects drop out. But likelihood is one or more quick hearings will be called as soon as adequate evidence is in hand.

★ ★ ★

FLORIDA-INSPIRED campaign under way to hold 1954 NARTB convention at Miami Beach. C. E. Arney Jr., secretary-treasurer, has made official inspection of resort, which has large number of small hotels and auditorium suitable for exhibits.

ABC Realigns Programs; Advisory Group Meets Feb. 27

NEW MOVES in its rejuvenation program under new ownership by American Broadcasting-Paramount Theatres (also see story page 65) being announced today (Monday) highlighted by realignment of Saturday-Sunday-Monday radio evening programs to make music and news predominant.

On each of those nights starting March 14, name star will preside over two hours of varied musical programming: Singer Margaret Whiting on Saturdays, 8-10 p.m.; actor Burgess Meredith on Sundays, 7-9 p.m. plus his *Adventurer* program, 9-30-10.; opera star Jan Peerce on Mondays, 8:30-10 p.m. including *Metropolitan Opera Auditions on the Air*. News programs and summaries will be integrated in and around musical shows in new music-news format, which Charles T. Ayres, vice president in charge of radio network, said makes "the best possible use of one of radio's strongest potentials."

Plans for meeting of ABC radio stations advisory group in New York on Feb. 27 [B•T, Feb. 16], first since merger of ABC and United Paramount Theatres, also being announced, with stations group slated to get first official details of ABC hopes and plans under merged ownership at that time. Date for similar session of network officials and TV stations advisory board, originally set for March 26, was uncertain late Friday but was expected to be scheduled in early March.

IKE GREETS VOD WINNERS

BATTERY of television newsreel cameras caught President Eisenhower Friday afternoon during quarter-hour session with four young winners of Voice of Democracy contest (story page 44, feature article page 79). Movie and still photographers also filmed proceedings as contest winners gave President gifts and plaque. Robert K. Richards, chairman of VOD committee and NARTB administrative vice president, presented students to President.

CBS Plans Multiple Sponsor Weekend Sales Plan

CBS RADIO working on new multiple-sponsor weekend sales plan, combining features of its "power plan" and its "checkerboard." Subject to change if any programs involved are sold in meantime, tentative blueprint calls for two quarter-hour, one ten-minute and two five-minute news shows, all on Saturday and Sunday, to be made available for three advertisers, each of which would get one spot on each quarter-hour program and have one five-minute segment of others to itself, on rotating basis. Tentative program lineup: Saturdays, Larry Leseuer, 6:45-7 p.m., and Edward P. Morgan, 10:30-35 p.m.; Sundays, Bill Costello, 12:45-1 p.m.; Mr. Leseuer, 5:45-55 p.m., and Mr. Morgan, 10:30-35 p.m.

Commerce Committee Probes FCC Problems

HOUSE Commerce Committee spent full day Friday quizzing FCC Chairman Paul A. Walker, with questions running gamut from why fees could not be charged by Commission to one member's implication that Commission should refuse TV permits to newspapers, motion picture interests and even to radio broadcasters "in the interest of diversification of the media of mass communication."

Flanked by all members of Commission, except Comrs. Rosel H. Hyde and Frieda B. Hennock, and with top staff executives in attendance, Chairman Walker read 41-page statement describing problems of FCC (mainly blamed on lack of personnel) then answered questions for remainder of day. Session was adjourned, to be resumed "sometime in the near future," according to Chairman Rep. Charles A. Wolverton (R-N. J.).

Highlights of day's testimony follow:

- Commission will ask Congress to amend McFarland Act to require 30 days action on protests to grants, instead of 15 days now.
- Most worrisome question at present regarding McFarland Act provision permitting "parties in interest" to protest is definition of party in interest.
- Study of Chain Broadcasting Rules is contemplated by Commission, which has asked for special funds to set up task force in 1954 budget request.
- Speed up in TV hearing cases hoped for with revision of procedures [B•T, Feb. 9], but Mr. Walker said prospects for actual expediting on "gloomy side."
- Explanation of what happens June 2 when one-year ban on amendments to allocation plan runs out satisfied number of Congressmen who apparently were informed ungranted TV educational reserved channels would be "destarred" automatically then. Mr. Walker said Commission has not made up mind whether to extend ban, modify it or permit applications to be filed for changes.
- Strong recommendation that Commission set policy on "diversification" urged by Rep. William L. Springer (R-Ill.), who suggested FCC should deny TV grants to broadcasters because radio and TV are "competitive." He also implied same prohibition should apply to motion picture interests and newspaper groups.
- Subject of "strike" application [B•T, Feb. 9] found Mr. Walker pointing out that Commission could act only if it had evidence of false filing, but that FCC would need investigation staff to run down allegations. He admitted that Commission was looking into one reputed shakedown case, but did not identify the applicant.
- Commission was asked to supply House Commerce Committee with recommendations on changes in Sec. 315 (see earlier story on page 52).

• BUSINESS BRIEFLY

SATURATION SPOTS • Instant Maxwell House Coffee, through Benton & Bowles, N. Y., placing radio saturation spot campaign using chain breaks and minutes each day starting March 16 for 2½ weeks in several markets.

MANHATTAN SOAP CAMPAIGN • Manhattan Soap Co., N. Y. (Blue White flakes), through Scheideler, Beck & Werner, N. Y., placing radio campaign to start March 30. Agency lining up daytime minutes, chain breaks, five, ten and fifteen-minute programs.

PEN FIRM DRIVE • Paper-Mate Eastern (Paper-Mate pens), through Erwin, Wasey & Co., N. Y., preparing radio-TV spot announcement campaign in 15 eastern markets effective March 2 for 17 weeks.

COHEN TO BE NAMED • Protam Corp., N. Y., mail-order products, expected to name Harry B. Cohen Adv., N. Y., as agency. Dowd, Redfield & Johnstone, N. Y., has been handling account.

NEW MARKET FOR ZEST • Procter & Gamble, Cincinnati, for Zest (bar detergent), through Benton & Bowles, N. Y., adding another market, Austin, to radio spot campaign test area.

FRENCH ANNOUNCEMENT • French Chamber of Commerce of U. S. Inc. to start special six-week campaign March 9 announcing Paris International Trade Fair in May. Radio will be used in 14 cities. Agency: Hicks & Greist, N. Y.

CADILLAC ON NETWORK • Cadillac Div. of General Motors, in first use of network radio in 16 years, signs for sponsorship of *Cadillac Choral Concert* on CBS Radio, Sun., 5:30-45 p.m., starting March 15. Program will present orchestra and chorus under direction of Dr. Frank Black. Agency: MacManus, John & Adams, Detroit.

WEIDEMANN BUYS ZIV • Weidemann Breweries, Newport, Ky., has bought Ziv TV program *Favorite Story*, for Cincinnati, Dayton and Columbus, increasing total markets on show to 68.

TV Group To Report

SELECTION of subcommittee to map proposed program for new NARTB TV Information Committee reported Friday, following day-long session of full committee in New York Thursday. Subcommittee, due to meet within next month and submit recommendations to Harold E. Fellows, NARTB president and chairman of committee, composed of Richard A. Borel, director of WBNS-TV Columbus, and public relations executives of four TV networks: Edward D. Madden, NBC; John Pacey, ABC; David Jacobson, CBS-TV, and Gerald Lyons, DuMont. Group assigned to pool ideas on such questions as positive approach to show TV's contributions to culture, education and entertainment, and to counteract charges that TV is overrun with crime and violence and lacks on educational programming.

Interference Rule Comments

Comments received by FCC Friday from CBS and RTMA on Commission's proposed rules to restrict interference to TV reception on vhf Chs. 4 and 5 from nonbroadcast fixed stations operating in 72-76 mc band [B•T, Oct. 20, Sept. 8, 1952]. CBS offered more specific counter-proposal. RTMA submitted detailed technical report on receiver sensitivity and alternative methods of interference measurement. KSL-TV Salt Lake City asked FCC for additional time to file respecting local interference from fixed stations.

Zenith Petition Filed

Zenith Radio Corp. late Friday petitioned FCC to reconsider order dismissing Zenith application for TV Ch. 2 in Chicago, issued concurrent with approval of ABC and United Paramount Theatres Merger (see early story page 65).

KXLY Protest Dismissed

Protest of KXLY Spokane against grant to KGAL Lebanon, Ore., of change from 1 kw daytime on 930 kc to 1 kw fulltime on 920 kc, dismissed by FCC. In opinion issued Friday, Commission found KXLY airs insufficient "unique" programs to entitle it to protection from KGAL interference beyond normally protected contour.

TV BOOSTS MUSEUM

TELEVISION is credited with increasing attendance at Chicago Natural History Museum 18.5%. Live TV spots aired by WNBQ (TV) Chicago received credit for increase, according to Christine Tardy, museum public relations director. "We find the live breaks an excellent method of stimulating interest," she said. Boost was recorded for four-month period over same time last year.

FCDA Asks Manufacturers To Build Low-Cost Sets

SMALL low-cost AM radio set will be developed by members of Radio-Television Mfrs. Assn. in cooperation with Federal Civil Defense Adm. Receiver will be of "family protection" type enabling public to receive civil defense information despite power failures and other handicaps.

Manufacturers were asked by FCDA to show Conelrad plan emergency settings via suitable markings on AM radio dials. FCDA will encourage public to buy AM receivers and portable battery sets. Frequencies 640 kc and 1240 kc are utilized in Conelrad plan, which goes into formal operation this spring.

KFMB Sales Signing

PRINCIPALS in $3.15 million sale of KFMB-AM-FM-TV San Diego, Calif., were to meet in New York over past weekend to execute formal papers for filing with FCC for its approval [B•T, Feb. 2]. Seller is John A. Kennedy, buyers are J. D. Wrather Jr. and Helen M. Alvarez, owners of KOTV (TV) Tulsa. Transfer application to be filed at FCC this week, according to Leonard Marks, Washington radio counsel.

KVTV (TV) CBS-TV Affiliate

KVTV (TV) Sioux City, Iowa, will become CBS-TV affiliate starting March 29, B•T has been informed by Robert R. Tichenor, of Cowles Broadcasting Co. Mr. Tichenor said story in Feb. 16 B•T, based on CBS announcement, in error. This story indicated KVTV was to join CBS April 1 as primary, supplementary noninterconnected affiliate. KVTV is assigned to vhf Ch. 9.

WMBR-AM-TV to CBS Spot

WMBR-AM-TV Jacksonville named CBS Spot Sales and CBS-TV Spot Sales as national sales representatives, effective March 1. Appointments follow transfer of stations to *Washington Post,* majority (55%) owner of WTOP-AM-TV Washington (CBS is 45% owner) also represented by CBS Radio and TV Spot Sales divisions. WBBM-TV Chicago, newly acquired by CBS, expected to name CBS-TV Spot Sales shortly.

Canada Drops Listener Fee

CANADA'S annual $2.50 radio listener license abolished in pre-election budget announced at Ottawa late last week. Canadian Broadcasting Corp. will receive $12 million annually, replacing license fee revenues and annual grant from present 15% excise tax on radio and television sets.

PEOPLE

THREE vice presidents of Ruthrauff & Ryan elected to board of directors: **F. M. SCHWEMMER,** with R&R in N. Y. since 1946; **C. L. SMITH,** since 1940, and **HAAKON GROSETH,** with Chicago office since 1939.

Appointment of **ARTHUR GROSS** as manager of advertising and publicity department of Guild Films Inc., N. Y., in connection with all-out exploitation campaign of Guild's series of 117 26-minute films featuring Pianist Liberace, was announced by President Reub Kaufman last week. Series has already been purchased for showing in 11 cities. Mr. Gross has been associated with Smallen-Ross Adv., N. Y., and Skouras Theatres Corp. in promotion and managerial capacities.

FOUR men added to Chicago staff of Calkins & Holden, Carlock, McClinton & Smith. They are: **JAMES EHRILICHER,** former public relations director of City of Chicago, who will head public relations for agency office; **WAYNE FICKINGER,** advertising manager of Sears, Roebuck, to writing staff; **ROY KOSINSKI,** Mall Tool Co., who will supervise production, and **RICHARD BEHERENDS,** Raymond Loewy Organization, who becomes art director.

GEORGE B. ADKISSON, formerly with Chicago office of Henry I. Christal Co., station representation firm, and before that with KSTP St. Paul and other stations, to Chicago office of Free & Peters, station representatives, as radio account executive, effective tomorrow (Tues.).

Sarnoff Gets Medallion

BRIG. GEN. DAVID SARNOFF, RCA board chairman, among seven leaders in communications and amusement fields receiving "Brotherhood" medallions for promoting understanding among Protestants, Roman Catholics and Jews at dinner of National Conference of Christians & Jews in New York late last week. Others honored: Jack R. Howard, Scripps-Howard Newspapers; Spyros P. Skouras, 20th Century-Fox Film Corp.; William Randolph Hearst Jr., Hearst Corp.; John Golden, theatrical producer; Walter D. Fuller, Curtis Pub. Co., and star Danny Kaye.

WAKR-TV Buys Theatre

WAKR-TV Akron, Ohio, has bought Copley Theatre, that city, and will start at once to convert it into $500,000 television center, according to S. Bernard Berk, WAKR-AM-TV president.

KXLY-TV's Debut In Spokane

KXLY-TV Spokane, Wash., was to go on air officially at 3 o'clock yesterday (Sunday) afternoon following program and equipment tests, according to Ed Craney, general manager and operating partner of station.

Harkins Buys DuMont

NEWLY granted Ch. 12 TV outlet of Harkins Broadcasting Co., licensee of KTYL Mesa, Ariz., plans April 15 commencement using all DuMont equipment, Red Harkins reported Friday. Mr. Harkins filed his own application, he said, at total cost of $30.

B • T Receives Citation

CITATION "for emphasizing the value to radio and TV stations of the important listener and audience interest and advertising potential of the 2½ million U. S. employes" awarded BROADCASTING • TELECASTING Feb. 20 by *Government Standard,* national weekly newspaper of American Federation of Government Employes (AFL). Series of citations to radio stations and press announced Friday during WTTG (TV) Washington *Your Government and Mine* TV program.

BLOOD OUT OF A TURNIP!

That's getting more than is expected —True WBBW is not first with the most listeners in Youngstown, at all times. But then considering the cost involved—they shouldn't be. In spite of this fact WBBW IS FIRST part of the time and NEVER LESS THAN SECOND. First or second it delivers the lowest cost per thousand.

Here's the guy people buy from in Memphis

One of the truly great radio personalities in Memphis is Aubry Guy.

Heard daily over WMC from 7:00 to 8:00 A.M., his bright chatter, and selected popular recordings make it the top morning show in Memphis.

For 15 years, Aubry Guy has been synonymous with "sell" in Memphis.

Today his style is paying off bigger than ever before.

Selling Southern Style
DIXIE Merry-Go-Round
featuring
Aubry Guy
Memphis' leading disc jockey
7:00-8:00 A.M. Daily

Reprinted from the December 10, 1952, issue of the Memphis Commercial Appeal.

WMC TO BROADCAST SERVICE INTERVIEWS

Far East Sailors Will Talk To Relatives

MERRY-GO-ROUND SHOW

Aubrey Guy of WMC, WMCF and WMCT, The Commercial Appeal stations, will report on his visit to Pearl Harbor on Dixie Merry-Go-Round at 7 this morning on WMC.

Tomorrow morning on the same program Mr. Guy will discuss his trip to Wake Island, whose commander at the time it was attacked by the Japanese was Rear Admr Winfield Scott Cunningham (U. S. Navy retired) of Memphis.

Mr. Guy

Mr. Guy is making the trip with George Sis... report... Appeal.

During the Christmas holidays just past, Aubry Guy went to Korea.

There, he made hundreds of recorded interviews with Memphis and Mid-South servicemen.

He sent these recorded interviews back to play for the families of these servicemen throughout the Mid-South area, direct on his morning broadcasts.

Merchandising features like this keep Aubry Guy and the Dixie Merry-Go-Round on top of the news, and in tune with the vast audience the program enjoys.

If you have something to sell in Memphis, Aubry Guy is the "guy" to do the job.

MR. PEEPERS

Sun. 7:30-8 p.m. on NBC-TV.
Sponsor: Reynolds Metals Co.
Agency: Russel M. Seeds Co.
Producer: Fred Coe.
Director: Hal Keith.
Writers: Jim Fritzell, Everett Greenbaum.
Musical Director: Bernie Green.
Cast: Wally Cox, Marion Lorne, Tony Randall, Patricia Benoit, Ernest Truex.

ORIGINALLY brought to television as a summer replacement, then elbowed off the air by the more assertive crowd of "regular" programs returning in the fall, and finally restored to the NBC-TV program schedule at the insistence of its comparatively small but enormously loyal audience, *Mr. Peepers* could be commended for its durability alone.

Happily, it has other merits, more, indeed, than any other comedy of its kind. It is made of flimsy stuff—gentle satire and sentimentalism in its nicest sense—which would disintegrate if handled clumsily. As managed by the skillful hands of the writers, production men and cast who have been assembled here, the material is carefully shaped into as pleasant a half hour as can be found on anybody's picture tube.

These observations were generally made by critics at the time of the show's original appearance and again when it returned to the air by popular demand. They seem the more valid now, after it has run through a full test against the opposition of "regular" programming. *Mr. Peepers,* it may be said with certainty, has achieved that most difficult of assignments, maintaining a freshness of approach and a subtlety of presentation week after week. It is a television classic.

The Personable Cox

Mr. Peepers would not, of course, be the appealing show it is without the delicate personality of Wally Cox in the title role. His part is rooted in a theatrical stereotype, the teacher who is long on learning but short on knowledge of worldly goings-on. Mr. Cox, however, has left the stereotype for lesser talents to play. His teacher is a complex and full-dimensional person, combining shyness and tenacity, naivete and sophistication, certainty and uncertainty. He is a very human being.

Mr. Cox's skilled characterization was the principal support on which the series was built in its earlier stages. It is a tribute to the imaginativeness of the creators of this show that it now has been given additional support from other characters almost as finely drawn and almost as cleverly played as Mr. Peepers.

Chief among these are Mrs. Gurney, the addled English teacher, and Harvey Weskit, a male member of the faculty, both performed impeccably by Marion Lorne and Tony Randall, respectively.

Weskit, who pretends to the cosmopolitanism that Peepers lacks, is a natural running mate for Peepers. Mrs. Gurney provides a fluttery and effuse off-beat to Mr. Peepers' low-key behaviour and Weskit's faltering attempts to be the man-about-town. A fourth character, the school nurse, with whom Peepers carries on one of the most subdued love affairs of theatrical history, brings still another personality to the show, a quiet, warm and somehow attractive plainness.

The addition of other important parts to assist the central character has guaranteed even greater longevity to *Mr. Peepers.* Mr. Cox and company seem destined to be around forever, and as far as this reviewer is concerned that run will be all too short.

SEE IT NOW

Sun. 6:30-7 p.m. on CBS-TV.
Sponsor: Aluminum Co. of America.
Agency: Fuller & Smith & Ross.
Co-producers: Edward R. Murrow and Fred Friendly.
Director: Don Hewitt.
Editor: Edward R. Murrow.

WHILE Edward R. Murrow's experiment Feb. 15 in televising a session of the Arkansas House of Representatives may not have set any new highs in public entertainment, it undoubtedly did the thing that Mr. Murrow intended.

It established the fact that television, at least the Murrow brand, can bring to the people the deliberations of a legislative body without interfering in any way with those deliberations. It also gave a nationwide audience a large-as-life character study of duly elected representatives of the people at work.

In this case the "work" was a floor debate on a resolution to investigate Erskine Caldwell's controversial play, *Tragic Ground,* which had moved to that state after being chased out of Tennessee by the "law".

Gamut of Lawmakers

Since the debate was supposed to be unstaged it is presumed that Mr. Murrow had no hand in picking the legislators who took part. But no carefully selected cast of character actors could have played a more widely diversified cross-section of typical lawmakers. There was the earnest public servant doing his best, according to his convictions, to protect the people of the sovereign state of Arkansas from immoral influences. There was a southern orator of the old school. And there was a speaker who gave as good an interpretation of a ward heeler as you could find on any Broadway stage.

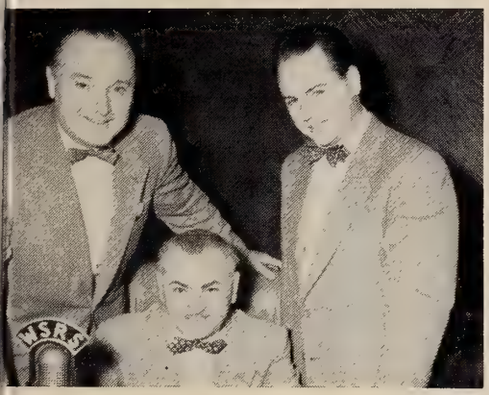
The resolution to appoint a commission to see the play and report back was defeated. Presumably *Tragic Ground* is still playing to capacity crowds just across the river from Memphis.

Electric Voting

One incidental bit of public education on a national scale was the practical demonstration of the Arkansas Assembly's electric vote tabulater which made possible the calculation of the total in seconds after the vote was taken. Memories of the televised proceedings of the interminable voting at the recent national conventions are in sharp contrast.

Altogether there can be no doubt that CBS' "distinguished analyst" did the nation a good turn. The short statement he made at the conclusion of the program summarizes the event in typical concise Murrow fashion.

He said:



"While our cameras were in the House of Representatives (in Arkansas), action was taken on 39 bills. There were no complaints about the lights, about the cameras, about the cables, no complaints of interference in the ordinary processes of the House of Representatives.

"Perhaps you do not care about Mr. Caldwell's play. Neither do we, but each week important action is being taken on important matters in the House and in the Senate in Washington. We rather believe that if it can be done in Arkansas, perhaps this type of reporting can also be done from the House and from the Senate in Washington."

RADIO NEWSREEL

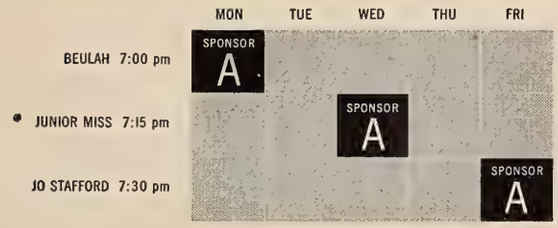
Checkerboard



CBS Radio introduces a new pattern of sponsorship—a way to reach nighttime listeners at a *daytime* cost-per-thousand. It works like this:

TAKE THREE TIME SLOTS—three quarter-hours of the early evening—ideal for listening:
(7:00 to 7:45 EST, Monday through Friday.)

TAKE THREE STAR ATTRACTIONS—three of radio's most popular nighttime programs:
Beulah, Junior Miss, and Jo Stafford.

NOW STAGGER YOUR USE OF THESE SHOWS—for example:

CHECKERBOARD spans a wide range of listening tastes and the varied routines of early evening. A sponsor using the plan attracts more *different listeners.* It offers a new freedom to work out time and program combinations best suited to an advertiser's needs.

Here is audience-building strategy as sure of success as Beulah's throaty wisdom... the charm of Junior Miss (in a new party-dress format)... the delight of a Jo Stafford song.

With its "Power Plan" now completely sold, CBS Radio's CHECKERBOARD is a new use of radio's flexibility to take advertising into more and more homes.

our respects

to BEN LUDY

A MAILING campaign, trademarked by the gadget with a message, has kept the coy glances of agency timebuyers turned for nearly 16 years toward a Kansas radio station and its entertaining general manager.

Master of these three-dimensional billets doux — which have given WIBW Topeka a unique fame while adding to the station's good will, its new accounts and its renewed contracts—is Ben Ludy, general manager of WIBW and of KCKN Kansas City, Kan.

Agency executives since 1937 have been showered several times yearly with WIBW mailing pieces, enclosing such items as coathooks, yardsticks, egg timers, grapefruit spoons, screwdrivers, Christmas Carol books, biscuit cutters, fingernail polish and brass tacks—each keyed to a sales point made by WIBW in an accompanying message.

Mr. Ludy entered radio engineering and construction work in 1922 after attending the U. of Iowa. He was born Oct. 25, 1900, at Cedar Rapids, Iowa, where his father was in the jewelry business.

In the mid-twenties he branched out to the sale of advertising novelties, thus acquiring a background for his present gadgeteering promotion. In 1929 he joined KOIL Omaha, and in 1933 went to WIBW.

When WIBW's gadget mailing campaign started in 1937, Mr. Ludy was assistant station manager and the next year became manager. The three-dimensional mail campaign was originated for the station by Carter Advertising Agency of Kansas City, which still creates and prepares for the station an average of six mailings a year. Mr. Ludy and his staff confer frequently with the agency on ideas for the gadgets.

Gadget and Sales

The first WIBW gadget, mailed in 1937, is a good example of the tie-in of the gadget and the sales message. The gadget was a plastic desk ruler [see feature story, B•T, Sept. 15, 1952]. On the ruler and the folder were printed: "By the yardstick of LISTENERS . . . WIBW is TOPS!"

The direct mail campaign has won Mr. Ludy and WIBW six major awards—the last by National Advertising Agency Network, which gave WIBW a high award in its national competition in 1952.

Realizing that countless pieces of mail are thrown into the wastebasket before they reach the executive for whom intended, WIBW combined gadget and sales message to fetch attention from the right person. And the effectiveness of the mail pieces in getting attention is attested to by the requests that go to WIBW asking for "extra" gadgets.

Since WIBW began keeping records four and a half years ago, some 37,305 extra gadgets have been requested by return reply cards the station encloses in each package. The mailings are sent out regularly to a selective national mailing list of 2,200 to 2,300 names.

Hundreds of gadgets have been used by WIBW since 1937, and WIBW was the cause of one postal regulation being issued. The regulation was passed against the use of windows in mailing envelopes for anything other than the address—after WIBW mailed out envelopes whose windows gave recipients a peek at the gadget inside—but which gave postal employes trouble in handling.

The WIBW gadget promotion was the subject of a BROADCASTING • TELECASTING cartoon on May 21, 1945, which showed a postman delivering a bathing beauty to an advertising executive, and which was captioned: "What'll those WIBW promotion people think of next!"

National Recognition

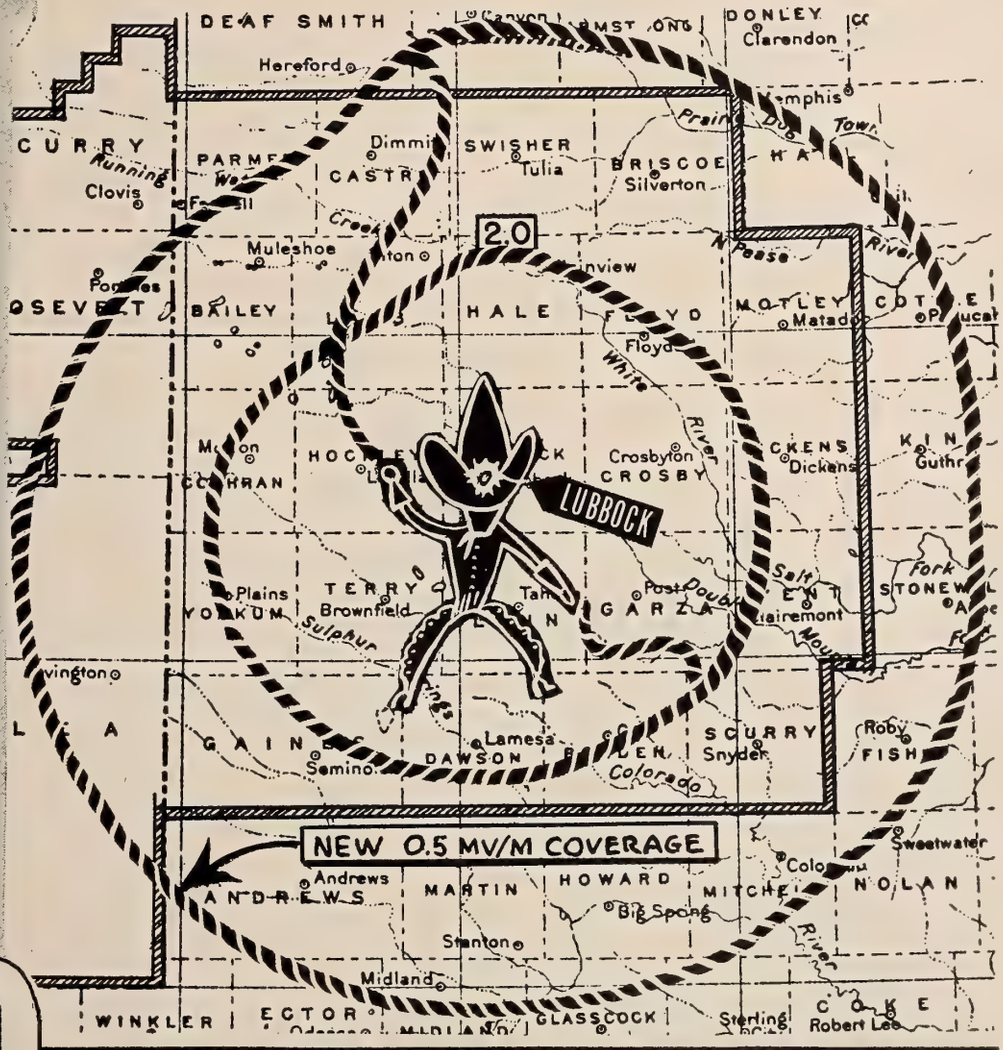
Mr. Ludy and his staff have fun themselves in thinking up new gadgets to illustrate WIBW sales messages. "We're proud of the 'fan mail' the mailings have brought us, and we appreciate the national recognition that has come to us for the campaign," he says.

"The primary purpose of any kind of advertising is, of course, to get sales results, and without such results we would not have been justified in continuing the campaign," according to Mr. Ludy.

"I'm happy to say that our direct mail campaign has played an important part in achieving for WIBW a proved nation-wide acceptance among its trade. Our sales representatives continually report to me that this advertising has helped them substantially in landing important specific new accounts, and in renewing contracts," he says.

Mr. Ludy is a Mason and Shriner. He married Elizabeth Harris in 1944 and they are the parents of a daughter, Joy Ann, 7.

He is serving his second term as president of the Kansas Broadcasters Assn., which he helped organize in 1951.



His recreation time is spent on his Osage County, Kan. farm, where he raises cattle and other livestock. The Ludys all are fond of horses and Joy Ann has her own pony.

International Coverage

EDITOR:

The International Broadcasting Service of the United States Department of State would like to secure permission to make radio use of material contained in the article "They Can Put a City in Your Parlor," by Rufus Crater, which appeared in the Feb. 2, 1953 issue of BROADCASTING • TELECASTING, page 77.

This would be used in connection with our non-commercial broadcasts to and within worldwide areas, exclusive of the United States. . . .

Evelyn Eisenstadt

United States Department of State
New York

Left Out

EDITOR:

Please do not construe this letter as a querulous whining voice from out of the dark, but the personnel at this station feel that your publication overlooks the excellent TV services which we afford the Lower Rio Grande Valley of Texas and the adjoining territory in Mexico.

First omission came with a survey of important television markets and coverage published by you that covers every crossroads and junction in the entire U. S., it seems, except the four counties which we serve in Texas. If my memory serves me, there was even a listing of Potter County with its four TV sets, or maybe that's a slight exaggeration.

In your current issue, Pages 78-79, there is a map which locates TV markets and future markets. Surely the thousands of people who watch our programs daily attest to the fact there is a television service down here, and a pretty good one too. I do think we rate something more than a marginal footnote.

Bert Metcalf
Director of Operations
XELD-TV Matamoros, Mexico

[EDITOR'S NOTE: Neither of these stories was a B•T survey. The first was report of a survey by J. Walter Thompson Co. and the second an article by John Crandall, media director of Sherman & Marquette, New York.]

Community TV

EDITOR:

That was a splendid round-up article on community TV [B•T, Feb. 9] and I want to thank you for it. It has certainly given me some new slants on the problem which I was studying because of the growing interest of publishers in this form of communication. . . .

Cranston Williams
General Manager
American Newspaper Publishers Assn.
New York, N. Y.

Heedless Headline

EDITOR:

I was disappointed at B•T's handling of the story of my appearance before the education and legislative group in Hartford on non-commercial educational television in Connecticut.

The "opposed to educational TV" headline was wrong and particularly unfortunate since it created a thought that we at WNHC do not share. I, personally, and my principals, are not opposed to non-commercial educational television in Connecticut. As property-owners and tax-payers we feel it only fair that a realistic approach be made to costs of operation (including and especially depreciation) personnel, programming, replacement, etc., and that a more nearly true tax figure be revealed to the people of the state before legislative action is taken.

While the body of your story modified and, in essence, reversed the headline, wouldn't it have been better to have avoided the malapropism in the first place?

Edward C. Obrist
Manager
WNHC-AM-TV New Haven, Conn.

Yippee

EDITOR:

[Here is an] action shot taken during the Jan. 31 Fat Stock Show rodeo that WBAP-TV fed to NBC-TV for the first nationwide tele-

cast of a rodeo. Appropriately, it was WBAP-TV's first feed to the network.

To date over 2,500 cards and letters have been received by WBAP-TV complimenting us on the origination . . .

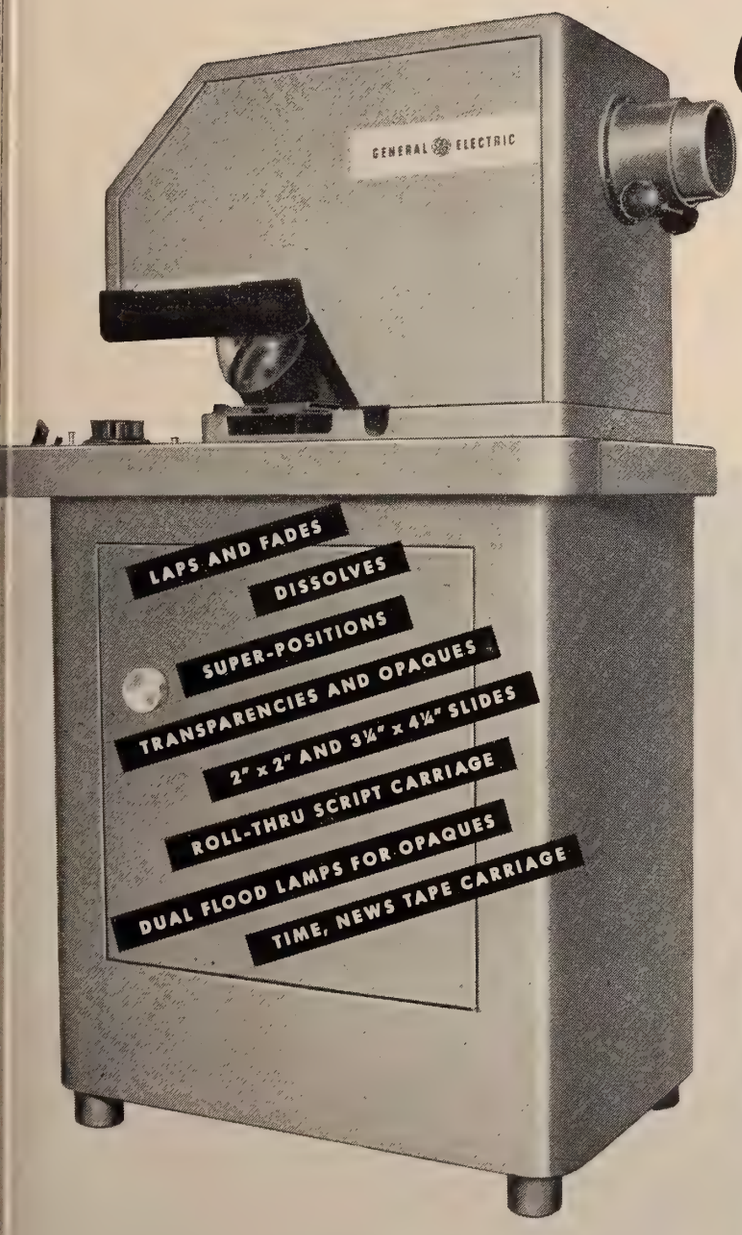
Red Tape

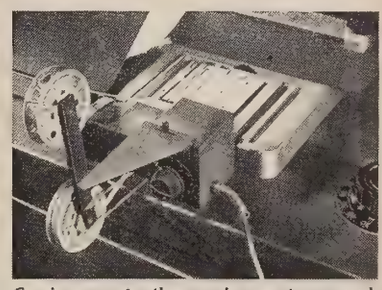


EDITOR:

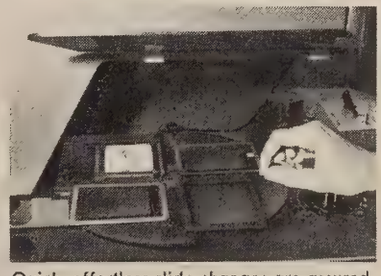
It was interesting and amusing to me to read your editorial in the Feb. 9 issue of BROADCASTING • TELECASTING on *Faster TV Decisions*. It seems to me that no matter how much *red tape* is taken out of the FCC's rules and regulations one Commissioner of our governmental group, Comr. Hennock, will always dissent for some reason or another. In the Feb. 2 issue of BROADCASTING • TELECASTING (page 48), we find an article concerning the ABC-UPT merger, and low and behold, we find it reported that Comr. Hennock has written a 90-page thesis concerning her reasons for the downing of the merger. Now, I 'thinks' that it's well and good that Miss Hennock takes the pains to give such a full explanation of her reasons for dissent, but I'm quite sure that 90 pages are quite a lot of pages, and I'm sure also that Miss Hennock could have shortened her 'thesis'. That's what I call red tape, or is that just one man's opinion.

Wallace M. Bradley
Syracuse U. Radio and TV Center
Syracuse, N. Y.

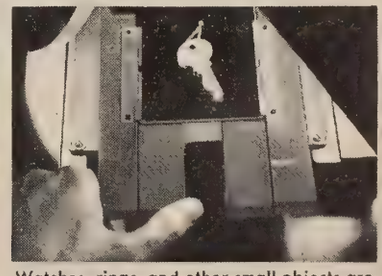
[EDITOR'S NOTE: For the record, Miss Hennock's dissent was 63 pages, but the editors suspect that even that length falls within Mr. Bradley's description.]



Compare G-E Television Slide Projector Versatility



Only G.E. offers such an advanced TV slide projector. You'll find an unlimited variety of laps, fades, dissolves, super-positions, etc., are now possible. You are also able to get additional special effects produced by accessories like the roll-thru and the motor-driven news tape carrier. This dual projector—with its single lens optical system that prevents keystoning—will handle both 2" x 2" and 3¼" x 4¼" slides. For the most versatile, the most advanced money-making piece of TV equipment—insist on a G-E Slide Projector. Write for complete information: *General Electric Company, Section 223-23, Electronics Park, Syracuse, New York.*



Convenient optical or electrical dissolve and lap controls put a great variety in the treatment of still shots.

Coming events, time and news tapes and commercials receive smooth treatment on large capacity roll-thru carriages.

Quick, effortless slide changes are assured with the four-slide rotary head supplied by General Electric as standard equipment.

Watches, rings, and other small objects are effectively and attractively presented in the G-E Slide Projector.

Projector for 2" x 2" slides or strips and optical box provide another picture source for this piece of equipment.

Individual switch and variable transformer control of each lamp allows quick switching or fading from transparencies to opaques.

● Generous work surface and convenient storage space is a special feature of G-E's Television Slide Projector. The roomy storage cabinet will hold your accessories safely... reduce breakage, help you avoid mishandling and miscuing.

Complete Television Equipment for UHF and VHF

GENERAL ELECTRIC

AN AYE FOR AN EYE

That's the verdict for Jeffrey Jones, TV's fastest-moving private eye. And it's unanimous with viewers and sponsors, *the country over.*

In less than eight months on the air, "Files of Jeffrey Jones" has soared into Telepulse's Top Five syndicated film shows. Current ratings: Chicago, 20.4, Boston, 16.6, San Francisco, 17.8, Pittsburgh, 50.5 (December, 1952).

And sponsors in more than 25 TV markets concur. Jeff has successfully sold biscuits, bread, pharmaceuticals, radios, automobiles, gasoline, beer, milk, laundry service, many other products.

With "Files of Jeffrey Jones," you have action that gets a big reaction...from the cast (starring TV-movie-and-Broadway hero Don Haggerty) through scripts (39 half-hour mystery adventures of a sports-minded private eye whose favorite game is murder) to production (by Hollywood's Lindsley Parsons).

For top TV results in your local and regional markets—at a cost that'll make *you* cheer—ask the CBS Television Film Sales representative nearest you about Jeff now.

Robert Brewster

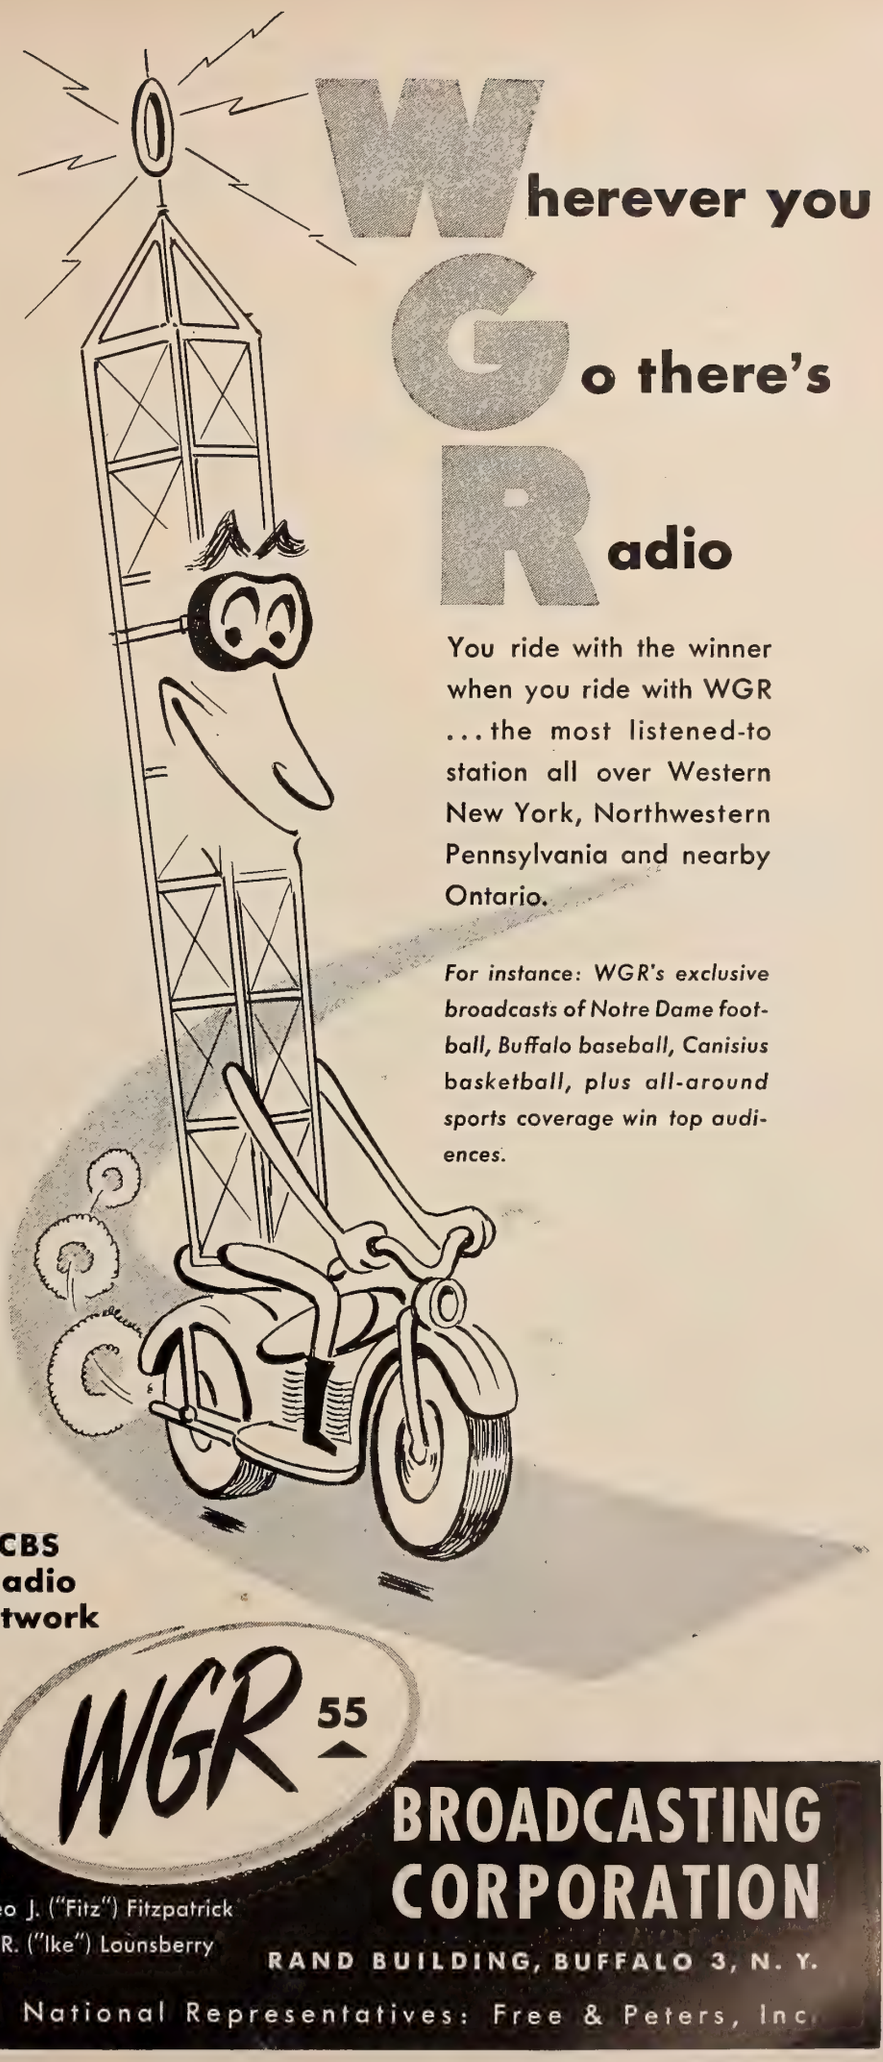
on all accounts

A NATIVE of Belfast, Ireland, Robert Brewster has come a long way, figuratively and literally, to his present post as assistant to the vice president in charge of radio and television at McCann-Erickson, Chicago.

Mr. Brewster is in charge of administration for several radio-TV clients. In this post, he makes use of his experience in the production end of the broadcast media. McCann-Erickson ranked eighth last year among advertising agencies in AM-TV billings.

He was born in Belfast March 14, 1914. Five years later, the Brewster family traveled to St. Louis where young Brewster received his early schooling. He moved east in the early '30s and attended Princeton U.

Upon his graduation in 1936, Mr. Brewster entered the agency field as an apprentice with J. Walter Thompson Co., New York.



JWT's Hollywood office beckoned in 1937 for what was described to Mr. Brewster as a "summer hiatus" stint. He stayed eight years, during a period when name radio performers increased on the West Coast. Among his production laurels are *The Kraft Music Hall* (with Bing Crosby), and many other shows with big name stars.

Returning to New York in 1945, Mr. Brewster became an executive on the RCA account. In April 1948 he left J. Walter Thompson to join WOR New York, where he was an executive producer and later radio program manager.

In May 1950, he came to McCann-Erickson in Chicago, taking on production chores. Among the accounts on which he rides administrative herd are Standard Oil (of Indiana), Muehlbach Brewing Co., Maytag Co., Bell & Howell, Allied Vans, Swift & Co. (chicken products), Chrysler-Plymouth Dealers of Cook County, Chicago Milk Foundation and others. The agency handles considerable spot radio and TV as well as network for its clients.

There has been heavy emphasis on regional TV network commitments, too, particularly for newscasts, musical shows and football. Mr. Brewster cites the regional Wayne King show as an example of a high quality TV program turned out for a minimum production cost. He feels that more and more advertisers will turn to package shows using the music format, and also to localized newscasts.

Mr. Brewster married the former Sheila Witherspoon, a native of Manhattan. They have a daughter, Sheila Jane, born in Los Angeles. The Brewster family lives on Chicago's near north side. Mr. Brewster has no particular hobbies—he likes the outdoors—and is a non-joiner of fraternal groups.

Like a cat goes for milk

Just like a cat goes for milk, local merchants go for W-I-T-H in Baltimore. W-I-T-H carries the advertising of twice as many of them as any other station in town. These smart retailers know that W-I-T-H produces big results at low cost. Because W-I-T-H delivers more listeners-per-dollar than any other radio or TV station in town.

W-I-T-H can produce big results for you, too—at low cost. Get your Forjoe man to give you all the details.

February 23, 1953 Vol. 44, No. 8

WESTINGHOUSE BUYS WPTZ(TV) FOR RECORD $8.5 MILLION

Pioneer WPTZ Philadelphia, which began in 1932 as Philco's experimental outlet, is to join the ranks of Westinghouse Radio Stations Inc. Move expands WRS' TV operations to two outlets.

A NEW HIGH price in television station transactions—$8.5 million—was established last week when Westinghouse Radio Stations Inc. bought the Philco-owned WPTZ (TV) Philadelphia.

The transaction, announced jointly Saturday by E. V. Huggins, president of WRS, and James H. Carmine, executive vice president of Philco, and subject to the usual FCC approval, tops by $2.5 million the previous $6 million paid by CBS for the facilities of WBKB (TV) Chicago a fortnight ago following FCC approval of the ABC-United Paramount Theatres Inc. merger [B•T, Feb. 16].

Acquisition of the 20-year-old WPTZ gives Westinghouse its second TV station. It is the licensee of WBZ-TV Boston, which went on the air in 1948.

WPTZ began operating experimentally in 1932. It was the third commercial TV station in the U. S. when it was given an FCC permit in 1941. It is an NBC-TV affiliate and operates on vhf Ch. 3 with 16.2 kw visual power, charging $1,500 for a one-time Class A hour program and $300 for a minute spot. It is represented by NBC Spot Sales.

Profit for '52

The TV-only Philco station, it is understood, grossed nearly $4 million and showed a profit of almost $2 million in 1952.

WRS has had, for the last five years, a working arrangement with WPTZ that virtually amounted to first refusal rights in the purchase of the Ch. 3 station. Westinghouse's 50 kw clear channel KYW (on 1060 kc) and the Philco TV outlet have cooperated in their operations through the use of similar background identifying announcements.

"This is another step toward the completion of our plan to bring additional service to the millions of people living in areas served by Westinghouse," Mr. Huggins said Saturday. "Since KDKA [Pittsburgh] first went on the air with its first scheduled broadcast Nov. 2, 1920 —the Harding-Cox presidential election returns —it has been Westinghouse practice to broadcast a comprehensive schedule of programs in the public interest."

Mr. Carmine said: "Television broadcasting, on an experimental basis, was undertaken 20 years ago in order to augment the company's early research and engineering program on television receiving sets.

"Sale of station WPTZ at this time will enable Philco to concentrate its activities in its principal fields of research development and the production of television receiver sets, radios and major appliances which are merchandised through its distributors and dealers, and the manufacture of electronic equipment for government and industry."

Contract for the record transaction calls for $500,000 on agreement and the balance in cash on FCC approval of the sale.

Preliminary negotiations over a period of months were carried on by Joseph E. Baudino, executive vice president of WRS, and Ernest B. Loveman, vice president and general manager of the Television Broadcasting Division of Philco. Mr. Loveman will remain with WPTZ.

Messrs. Baudino and Loveman have assured the WPTZ staff that personnel and operating policies would not be affected by the ownership change.

Other recent TV station sales include the still pending buy of Edward Lamb's WTVN (TV) Columbus by the Taft family (WKRC-AM-FM-TV Cincinnati) for $1.5 million [B•T, Jan. 29], the pending purchase of John A. Kennedy's KFMB-AM-FM-TV San Diego by Jack D. Wrather Jr. and Helen Marie Alvarez, who own KOTV (TV) Tulsa, for $3.15 million [B•T, Feb. 2] and the recently approved sales of WLTV (TV) Atlanta from a group of Atlanta businessmen to Crosley Broadcasting Corp. for $1.5 million [B•T, Feb. 2], and of WMBR-AM-FM-TV Jacksonville, Fla., to *Washington Post* (55% owner of WTOP-AM-FM-TV) Washington for $2.47 million [B•T, Feb. 2].

Application for FCC approval of the sale will be made in about a week, it was understood. Upon FCC approval, WPTZ and KYW will move toward integration of their operations, but some months may be entailed, since separate locations are involved. Since 1947 WPTZ has occupied two floors and additional studio space in the KYW building on Walnut St. KYW is affiliated with NBC and is represented by Free & Peters.

All Westinghouse radio and television properties are operated by subsidiary Westinghouse Radio Stations Inc. WRS grossed $9,280,300 with an operating profit of $2,107,193 in 1952.

TERMS of arrangement to buy WPTZ (TV) Philadelphia are discussed by Westinghouse Radio Stations' President E. V. Huggins (l) and Philco Executive Vice President James H. Carmine.

WRS owns and operates KDKA-AM-FM Pittsburgh; KEX-AM-FM Portland, Ore.; WBZA-AM-FM Springfield, Mass.; WOWO-AM-FM Fort Wayne, Ind.; KYW-AM-FM Philadelphia and WBZ-AM-FM-TV Boston.

Westinghouse is a TV applicant in Pittsburgh, where KDKA is competing with WJAS and WWSW for vhf Ch. 11, and in Portland, Ore., where KEX is competing with North Pacific Television Inc. and Portland Television for vhf Ch. 8.

KYW is an applicant for uhf Ch. 17 in Philadelphia. This will be withdrawn upon FCC approval of the WPTZ purchase.

Earlier application by WOWO for uhf Ch. 21, Fort Wayne, has been withdrawn.

CBS-TV GETS C-P-P SHOWS; LEVER BROS. MOVES SURF ACCOUNT

Struggle for "Strike It Rich" ends in renewal contract for CBS-TV as well as capture of "Big Payoff." Big Surf account, including $3 million in annual billings, moves from N. W. Ayer & Son to BBDO. Other changes pending in program lineups.

A ROUND of switching activity, affecting both programs and agencies, last week highlighted advertising developments of two major soap-detergent manufacturers, Colgate-Palmolive-Peet and Lever Bros.

The tug-of-war between CBS-TV and NBC-TV for Colgate's daytime *Strike It Rich* and *Big Payoff* programs [B•T, Feb. 16, 9] ended in victory for CBS-TV, which not only won renewal of the former program, representing two hours a week, but also pulled the latter show, totaling an hour and a half a week, away from NBC.

Lever Bros., meanwhile, moved its Surf account, representing approximately $3 million in annual billings, from N. W. Ayer & Son, New York, to BBDO, also New York. Although BBDO also handles Breeze, another Lever product and competitive to Surf, BBDO will service both accounts.

Other Changes in Works

Aside from the blow which NBC-TV suffered through the loss of *Big Payoff*, there were reports that another loss was impending — possible dropping by Lever of the *Hawkins Falls* quarter-hour daytime TV strip. NBC had wanted the *Strike It Rich* show particularly to bolster its TV daytime schedule, of which *Big Payoff* and *Hawkins Falls* are a part.

Surf, along with other Lever products, currently sponsors, in addition to *Hawkins Falls* (Mon.-Fri., 5-5:15 p.m.), CBS Radio's *Aunt Jenny*, a quarter-hour strip; a quarter-hour of *House Party* on CBS-TV three times a week, and spots on the Arthur Godfrey CBS-TV morning shows.

In addition to switching the Surf account to BBDO, Lever also named G. M. Basford Co., New York, as agency for its new Industrial Sales Division, which handles the sales of bulk shortening, glycerine, hotel soaps, and industrial soaps and detergents.

In retaining *Strike It Rich*, CBS-TV kept an account which, in 1952, represented gross time sales of approximately $2.1 million, while in acquiring *Big Payoff* it got a series whose 1952 gross time charges amounted to almost $2.5 million.

Volume Discounts

It was understood that, net, the two contracts would mean approximately $800,000 each to CBS-TV, and that, through discounts under the CBS-TV structure, Colgate stood to save almost $790,000 as a result of a contiguous rate by having both shows on CBS-TV. Colgate also sponsors *Mr. and Mrs. North* on CBS-TV, Fri., 10-10:30 p.m.

Colgate sponsors the Mon., Wed., Fri. portions of *Strike It Rich* (Mon.-Fri., 11:30-12 noon) and also a Wednesday evening version (9-9:30 p.m.) of the show. *Big Payoff* is scheduled to go into CBS-TV's Mon.-Fri. 3-3:30 p.m. spot, with Colgate sponsoring Mon.-Wed.-Fri. segments, starting March 30.

But CBS-TV still had some arrangements to complete late last week. Lever's Surf—a competitor of Fab, which Colgate plans to promote on *Big Payoff*—sponsors the quarter-hour of *Art Linkletter's House Party* Mon., Wed., Thurs. immediately preceding the 3-3:30 p.m. time set aside for *Big Payoff*, thus raising the possibility of a product conflict on Mondays and Wednesdays. CBS-TV officials said, however, that they were confident Surf would agree to switch quarter-hours with other sponsors to avoid this conflict.

Both *Big Payoff* and *Strike It Rich* are Walt Framer productions. William Esty & Co., New York, represents Colgate for both programs.

FOUR A's operations committee of the board of directors meets for the first time in a new conference room at the American Assn. of Advertising Agencies' New York headquarters. Seated are (l to r): E. E. Sylvestre, Knox Reeves, Adv., Minneapolis; Earle Ludgin, Earle Ludgin & Co., Chicago; board chairman John P. Cunningham, Cunningham & Walsh, New York; vice chairman Henry M. Stevens, J. Walter Thompson, New York; Henry G. Little, Campbell-Ewald, Detroit; president Frederic R. Gamble; standing, Carl K. Tester, Philip J. Meany Co., Los Angeles; J. Paul Hoag, Hoag & Provandie, Boston; Dan W. Lindsey Jr., Lindsey & Co., Richmond; John M. Willem, Leo Burnett Co., Chicago; Lawrence Valenstein, Grey Adv., New York; George P. Richardson Jr., J. Walter Thompson, Detroit; Gordon E. Hyde, D'Arcy Adv., New York; George Link Jr., association counsel; Robert E. Grove, Ketchum, McLeod & Grove, Pittsburgh; William R. Baker Jr., Benton & Bowles, New York; and Clifford L. Fitzgerald of Dancer-Fitzgerald-Sample, New York.

King-Size Success

SALES SUCCESS of the month-old king-size version of Philip Morris is credited greatly to the impact of its *I Love Lucy* show on CBS-TV, the firm announced last week. The first commercial announcement of the Philip Morris king-size cigarette was made by Desi Arnez on the Jan. 26 show to an audience estimated at approximately 50 million. Since then the new product has been promoted by other Philip Morris radio and TV shows. Success of the cigarette was based on reports from many areas which ran out of the new product. Demand for the king-size cigarette was so great that the firm had to use a "sellout! be patient" advertising campaign. Biow Co., New York, is the agency.

$8 Million Contract Signed By Philip Morris for 'Lucy'

With a new king-size product to be sold, Philip Morris last week signed a king-size contract for its Monday night TV show, already with a king-size audience of nearly 50 million.

SIGNING of Lucille Ball and Desi Arnez by Philip Morris & Co. and CBS-TV to an $8 million non-cancellable contract for 2½ more years of the top-rated *I Love Lucy* television series was reported last week by the network, which hailed it "the largest single contract ever signed in television."

On the basis of 39 shows a year, it was estimated the cost per show under the contract would approximate $80,000 and that about $35,000 of this would go for time charges and about $45,000 would represent talent and production costs.

The contract, which Miss Ball and Mr. Arnez, her husband, signed on behalf of their Desilu Productions, will carry the film series through 1955. Featuring the Ball-Arnez team under Philip Morris sponsorship, the program is on CBS-TV on Mondays, 9-9:30 p.m.

'No Option' Provision

The agreement is a "no option" document, containing no cancellation provisions. It was signed Wednesday in Hollywood in the presence of Harry W. Chesley Jr., vice president of Philip Morris; Harry Ackerman, CBS-TV vice president in charge of network programs Hollywood, and Terrance Clyne, vice president of Biow Co., agency for the cigarette company.

Stars of the show are slated to return to General Service studios in Hollywood to resume filming the series about March 20, after a filming hiatus occasioned by the birth of a son to them last month on the same day a son was born to them in the script of the program.

At the contract signing, Mr. Chesley said on behalf of the sponsor:

"We are delighted to sign this contract. With the introduction of the king-size Philip Morris cigarette [see above box] and the guarantee of presenting Desi and Lucy for the next 2½ years, Philip Morris is looking forward to an all-time high in sales."

AM-TV ACTIVITY AMONG BREWERS PREVIEWS SPRING CAMPAIGNS

Beer and ale companies continue to follow their long-set pattern of buying heavy baseball and sports schedules, with some concentrating on spots and network shows.

MOST ACTIVE group of advertisers in the radio-TV industry last week were the brewers, with at least a dozen of the beer accounts underwriting baseball sponsorship, spot announcement schedules and network programs, most of them to begin in the spring.

Falstaff Brewing Co is preparing a radio spot announcement campaign to start March 9 on the West Coast for 13 weeks. Falstaff also will sponsor home games of the St. Louis Browns on a regional radio network, and assume co-sponsorship of the Chicago Cubs games on a 25-station custom tailored regional radio network in Illinois.

The firm has renewed sponsorship of *Game of the Day* on Mutual and will continue local sponsorship of wrestling matches, several sporting events and newscasts in about 20 TV markets. Dancer-Fitzgerald-Sample, New York, is the agency.

Prepare Spot Campaign

Pabst Sales Co., Chicago, for Pabst Blue Ribbon beer, is preparing a radio and TV spot announcement campaign to start March 16 in Florida, Texas and the Middle West. This adds to the year-round sponsorship of *Blue Ribbon Bouts* Wednesdays on CBS-TV, 10 p.m. EST. Warwick & Legler, New York, is the agency.

Standard Brewing Co., Cleveland (Erin Brew), will sponsor coverage of the Cleveland Indians for the fifth straight year on WERE Cleveland. The same games will be sponsored on a tailor-made regional network of some 30 stations in the Cleveland area. Gerst, Sylvester & Walsh, Cleveland, is the agency.

Oertel Brewing, Louisville, will underwrite broadcasts of games of the Louisville Colonels, of the American Assn., on WINN Louisville.

Schlitz Brewing Co., Milwaukee, continues to sponsor its *Schlitz Playhouse* on CBS-TV, Fridays, 9-9:30 p.m., and will supplement the network operation with a spring campaign in Wisconsin and other areas. Lennen & Newell, New York, is the agency.

Gulf Brewing Co., Houston (Grand Prize beer), through Foote, Cone & Belding, Houston, is known to be buying programs for a regional campaign in southwest markets.

Blatz Making Plans

Blatz Brewing Co., Milwaukee, through William H. Weintraub Co., New York, is pondering the future of its *Amos 'n' Andy* program on CBS-TV, with indications the program will be renewed. The company also is expected to start a limited supplementary spot radio and TV campaign. Blatz is expanding its distribution and the spot activity is designed to broaden with market-by-market expansion.

Narragansett Brewing Co., Cranston, R. I., will co-sponsor broadcasts of the Boston Red Sox home and road games on WHDH Boston. Broadcasts will be fed to a New England network of 32 stations.

P. Ballantine & Sons, Newark, will sponsor once again the New York Yankee games on WPIX (TV) New York and on WINS (radio) New York. Both home and road games will be heard on a special network in New York State, Pennsylvania and Connecticut. Ballantine continues to use a 52-week radio spot announcements campaign in Boston, Philadelphia and New York. BBDO, New York, is the agency.

Piel Bros., New York (Piel's beer), has added two more TV shows in the New York area, bringing its total of local video programs to eight [B•T, Feb. 16]. Young & Rubicam, New York, is the agency.

F. & M. Schaefer Brewing Co., Brooklyn (Schaefer beer), which sponsors the Brooklyn Dodgers baseball games on WOR-TV New York and WMGM (radio) New York, will start a regional spot announcement radio-TV campaign March 1. Length of contract varies in different markets. Firm also sponsors *Favorite Story* on WNBT (TV) New York and *Schaefer Headline News,* five minutes, five times weekly on WJZ New York. Agency is BBDO, New York.

Jackson Brewing Co., New Orleans (Jax beer), through Fitzgerald Agency, New Orleans, carries a quarter-hour musical program on a 15-station lineup in the Texas area and during the spring expands its budget to include news programs.

G. Kruger Brewing Co. is planning the largest advertising campaign in its history with a radio spot schedule. Grey Adv., New York, is the agency.

Practice Is Preaching

RADIO will take at least half the advertising budget to be spent in behalf of one client during 1953 by the Burke Co., Seattle agency. The client: The Burke Co.

"We tell everybody else to advertise, and we believe we should advertise ourselves," says William M. Burke, agency partner.

The agency's self-advertising started on KOMO Seattle about a year ago.

"Even though advertising is a specialized business," says Mr. Burke, "radio has proved in these few months that it has a value for us." The agency believes it must expand its own promotion, and its 1953 budget includes an allocation for media advertising, of which at least 50% will go into radio.

PARTICIPATIONS are bought on NBC-TV's *Today* by Trailer Coach Mfrs. Assn., Chicago, on once-a-week basis starting in April. At signing (l to r) are Gordon Mills, NBC account executive; James B. Keithley, account executive, J. Walter Thompson agency; Edward L. Wilson, managing dir., Trailer Coach, and Edward Hitz, NBC Central Div. sales mgr.

New Godfrey Show Buy

ANOTHER Arthur Godfrey program—a new Sunday afternoon half-hour to be sponsored by Vitamin Corp. of America (Rybutol)—was set by CBS Radio last week to start March 1, bringing total weekly Godfrey time to nine hours on CBS Radio and five and a half hours on CBS-TV.

The new show will be heard 4:30-5 p.m. The Rybutol show will be known as *The Arthur Godfrey Hour.*

Agency for Rybutol is Kastor, Farrell, Chesley & Clifford, New York.

Admiral Bouts on 92 Outlets

WHAT DuMont claims is "the largest television network ever assembled for any program or event," totaling 92 stations, has been ordered by Admiral Corp. for its coverage of the Golden Gloves New York-Chicago intercity Boxing Bouts on DuMont TV on March 26 [B•T, Feb. 9], the network has announced. Fights will be carried 9:30 p.m. EST to conclusion. Admiral also is sponsoring the Chicago finals on 34 DuMont stations on March 6, and is sponsoring radio coverage of both events on Mutual. Agency is Erwin, Wasey & Co., New York.

Television commanded the third largest share of Admiral's advertising budget from 1946 to 1952, with last year rated as "TV's best year" in point of expenditures, reports the radio-TV set firm in commenting on its new 1953 $20 million outlay, largest in its history.

Admiral spent $69 million in the previous six-year period, of which $40 million (nearly 60%) was for printed space. Company spokesmen report that this year's TV budget is probably just as large—an estimated $1 million for the Bishop Sheen DuMont show, *Life Is Worth Living,* plus a liberal slice for special events (the Golden Gloves boxing tournament, all-star College-pro football classic). Dealers also buy local radio coverage as in the past.

GENERAL MILLS PLANS SPOT PUSH

The firm's long-range spot saturation plan has already received approval of "20 of the better stations" with many others seeking additional information, reports GM's Lowry Crites.

GENERAL MILLS Inc. last week was reported to have received approvals—"tantamount to options"—from at least 20 major stations and letters from many others expressing interest in its plan for a long-range saturation spot campaign in key markets throughout the country.

At the same time it was revealed that the company would pace its spot plan "almost entirely" to radio spot announcements—with very little television involved—and retain "most or all" of its present radio and TV network properties.

The plan and one or two alternative proposals were to have come up for discussion at General Mills last Thursday, but a meeting of key officials, including Lowry Crites, GM advertising manager, was sidetracked at the last minute. Announcement of the campaign is anticipated sometime this week.

Heard From 20 Stations

Mr. Crites told BROADCASTING • TELECASTING that the firm has heard from "20 of the best stations" on the saturation blueprint—stations with "top listenership," but belonging to no particular network or group. Others had written in asking when it would become operative and for details.

This year's drive—expected to be similar to the one last year which provoked considerable controversy but was far different from GM's forays into network rate structures in 1950—is pegged to start in the spring, advent of the cereal season, thus indicating that cereal products—probably Wheaties or Kix—would be advertised. The campaign will extend through the summer months.

Details have not been worked out, Mr. Crites said. He explained that last year General Mills used over 900 announcements, split among two stations in many individual markets, at an average of 10 per day over a 17-week period.

Stations accepted the plan individually and by groups, with "many" CBS Radio o & o stations and some affiliates of the Yankee Network participating, he said. About 100 other individual or non-group markets were involved. He declined to estimate how many stations had evinced interest in the plan this year.

Last Year's Plan

Last year stations were asked to take four-fifths of the GM schedule in Class A time. The overall rate was based on one-half the station's daytime one-time rate. Mr. Crites declined to say flatly whether this percentage would be followed this time. Under the old formula the discount to the client was estimated in some quarters to be about 60%. Mr. Crites added that spots would be purchased around baseball where there are availabilities.

Radio station representatives in Chicago were reluctant to comment on the proposal pending its announcement. One station representative executive thought it conceivable that General Mills might seek perhaps one-third of each station's daytime one-time rate. This possibility was discounted, however, indirectly by Mr. Crites. He added that there might be no set formula at all covering all markets.

Another station representative said flatly he would refuse to offer the plan to his clients or take the initiative in any way.

Mr. Crites said the campaign will get underway early in March but denied that station representatives would be bypassed on any discussions.

An official of Knox Reeves Advertising, Minneapolis, GM agency, said earlier that "we will try to establish the same sort of plan as last year, but with modifications." He said a "great many" stations—he described it as "enough"—had evidenced interest in it.

Neither the agency executive nor Mr. Crites felt at this time that the single daytime-nighttime rate card adopted by some stations, including ABC's o & o properties, would have an immediate bearing on the plan for 1953—and probably not, in fact, until an established trend takes place.

Video Costs Going Up, Pabst's Fraser Says

TELEVISION costs are going up and still are far from the top. Television, in fact, is a "tremendous, beautiful, frightening and expensive medium" and advertisers must maintain a balance between expenditures and actual returns.

Mr. Fraser

These opinions were expressed by Forrest Fraser, vice president of Pabst Brewing Co., in a luncheon address before the Chicago Federated Ad Club last Tuesday.

Mr. Fraser, who coordinates his firm's advertising, sales and merchandising activities, said advertising by itself will not sell products. He suggested a "sales hook" at the point of selling and follow-through on advertising programs.

Citing Pabst's sponsorship of the Gavilan-Davey championship fight on CBS-TV, he said the firm had used newspaper ads asking readers to buy Pabst beer "because we brought you the fights."

Toni Mulling New Daytime Buy

TONI division of the Gillette Co., which has earmarked over $9 million for radio-TV in its 1953 advertising budget, last week was understood to be in the early stages of negotiation for a new quarter or half hour daytime segment, across the board, on ABC radio.

This move was reported to be under study as the Toni firm laid the groundwork for cancellation of *Crime Letter From Dan Dodge* on ABC Fridays to make room for *Fun For All,* now Saturdays on CBS Radio. The program would continue on CBS Radio, it was understood. Latter features Bill Cullen and Arlene Francis.

The identity of the product and the agency was not known. Toni also has reportedly been considering the dropping of *It Happens Every Day,* 3:55-4 p.m. daily, and sponsored four times weekly by Toni, on CBS Radio, and substituting another show, though the format was undetermined.

Toni is expected to spend about $3 million on TV and about $6.4 million on radio this year [B•T, Feb. 16].

NEW BUSINESS

Spot

Dixie Distributors, Birmingham, Ala. (Norge appliance distributors), has started *Uncle Bob's Dixie Varieties* on 22 Alabama stations for 13 weeks.

City of Cars, L. A. (used car dealers), started two 75-minute feature films weekly and half-hour weekly *Freddy Martin Show* on KLAC-TV Hollywood, for 13 weeks from Feb. 11 and 13, respectively. Also started were weekly feature films on KNXT (TV), KTLA (TV) and KHJ-TV that city. Firm is using TV spot announcements on KTLA (TV), KNXT (TV) and KNBH (TV) with similar campaigns on radio, using KFWB, KMPC, KECA, KBIG and KGFJ. Agency: Irwin Co., L. A.

Network

American Bakers Assn., Chicago, started *Bakers Theatre of Stars* on CBS Radio, Feb. 22, 6-6:30 p.m. EST. Agency: Foote, Cone & Belding Inc., Hollywood.

River Brand Rice Mills Inc., N. Y., sponsoring 3:30-3:40 p.m. EST Wednesday portion of *The Paul Dixon Show* (DuMont, Mon.-Fri., 3-4 p.m. EST), for 13 weeks, effective last Wednesday. Agency: Donahue & Coe, N. Y.

Philip Morris & Co., N. Y., renews *My Little Margie* on CBS Radio, Sun., 8:30-9 p.m. EST, for 13 weeks from April 5. Agency: Biow Co., Hollywood.

General Baking Co., N. Y., has renewed *Hopalong Cassidy,* NBC-TV film series, in 23 markets. Agency: BBDO, N. Y.

T. H. Estabrooks Co., Ltd., St. John, N. B. (Red Rose tea and coffee) on March 6 for 13 weeks starts *Treasure Trail* on 30 Dominion network stations, Fri. 8:30-9 p.m. Agency: McConnell, Eastman & Co., Montreal.

Animal Foundation Inc. (Hunt Club dog food) signs to sponsor the *Galen Drake Show* on CBS Radio, Sat., 10-10:15 a.m., effective March 1. Agency: Moser & Cotins, Utica, N. Y.

Blue Jay Products Div., Kendall Co., placing one-minute radio spot campaign on 309 Keystone Broadcasting System stations on 13 and 26 week schedule beginning today (Monday). Agency: Leo Burnett Co., Chicago.

Agency Appointment

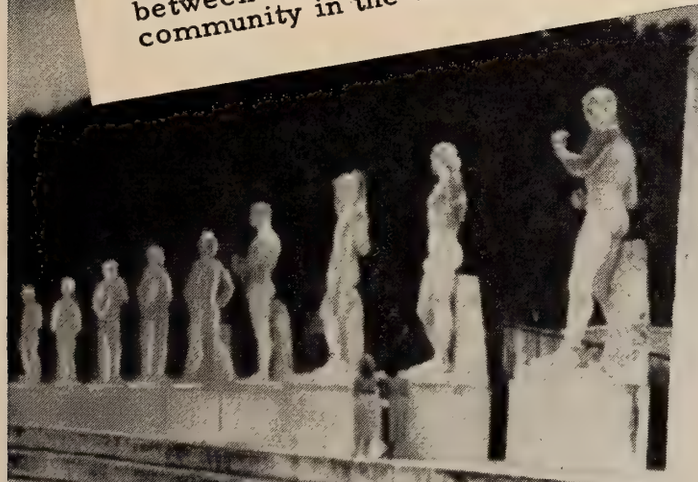
Storer Bcstg. Co., N. Y., appoints Wexton Co., N. Y. Account executive is **Larry Schwartz.**

Carroll Dunham Smith Pharmacal Co., New Brunswick, N. J., appoints Doherty, Clifford, Steers & Shenfield, N. Y.

Taylor Provision Co., Trenton, N. J. (Taylor pork roll), appoints Al Paul Lefton, Phila., to handle advertising.

G. G. Inc., San Gabriel, Calif. (Pinwae home permanent), appoints Byron H. Brown & Staff, L. A. Radio-TV will be used. Account executive is **John M. Farrell.**

La Premiata Macaroni Corp., Connelsville, Pa., appoints Adv. Syndicate of America, Pittsburgh. TV will be used.



The Italian Influence

In the world of fashions, as in films, food, furniture and American industry and the arts in general, Italian creativeness continues to play a more and more important role in satisfying our demands for better living.

The Italian influence on fashions in clothes, motor cars, home decoration and cuisine has received wide spread publicity and recognition in the past few months.

To you the advertiser, this has a special meaning. More than two million Americans of Italian origin live in and around New York. To them, WOV is the link between the old world and the new. And it is upon this tremendous group that the Italian Influence makes its first and most penetrating impact.

When planning your advertising in New York give careful consideration to the intimate association between WOV and the largest Italian-speaking community in the world.

1952 POLITICS BRING TV NETWORKS $4.5 MILLION IN GROSS REVENUES

Political groups buy $1,448,092 in network TV time, while Admiral, Philco and Westinghouse tabs total $3,074,810 for conventions and election coverage and related programs, Publishers Information Bureau reports. Much of the time was reclaimed from other sponsors, however, and the appliance trio might have bought other programs.

POLITICS, directly and indirectly, contributed more than $4.5 million to gross revenues of the four TV networks last year, according to data on gross network time sales compiled by Publishers Information Bureau.

Political parties, committees and organizations supporting Presidential and other candidates during the 1952 campaign season purchased a total of $1,448,092 in TV network time at gross rates. Admiral Corp., Philco Corp. and Westinghouse Electric Corp. spent $2,444,553 in sponsoring network telecasts of the Democratic and Republican political conventions in Chicago in July and $213,370 for TV network time to report results of Nov. 4 voting. In addition, Westinghouse bought $416,887 in TV network time for its *Pick the Winner* series, presenting candidates and party spokesmen during the interval between conventions and Election Day.

All the more than $4.5 million in time sales was not that much additional revenue for the TV networks, however. Some of the time used for campaign speeches, convention and election coverage was reclaimed from other advertisers normally sponsoring programs during those periods and so represented no additional income, nor profit, for the TV networks.

P&G Top Client

Also, if Admiral, Philco and Westinghouse had not sponsored these political events, they might have purchased TV network time for other programs. But it is a reasonable conclusion that the Presidential campaign of 1952 left the TV networks richer in dollars as well as in experience in political telecasting.

In December, Procter & Gamble Co. was again top client of the TV networks and again the only advertiser to purchase more than a million dollars' worth of time from them (at gross rates). For other top TV network advertisers see Table I. Leading advertiser for each category of TV network advertising is shown in Table II. Table III lists total expenditures of each advertising class for TV network time during December and the complete year of 1952, compared to the same month and the full year of 1951.

'Lucy' Leads 'Hooperade'

FOR THE second straight month, CBS-TV's *I Love Lucy* placed first in all six cities covered by C. E. Hooper Inc.'s January "Hooperade of Stars", and *Dragnet, Groucho Marx Show,* and *Colgate Comedy Hour* with Bob Hope, all on NBC-TV, and *Our Miss Brooks* on CBS-TV placed among the first 15 in all the cities. Cities were New York, Chicago, Los Angeles, Philadelphia, Boston and Detroit.

NIELSEN REINSTATES TV PERCENT IN HOMES

A. C. Nielsen Co., Chicago and New York market research firm, has reinstated its practice of listing percentage of homes reached by programs appearing in its TV ratings.

The reversal was prompted by the interest shown in the percentage listing, it was understood. The table was dropped fortnight ago [B•T, Feb. 9] because of "misunderstanding" over the comparative popularity of ratings, particularly with reference to the number of one-station TV markets, it was explained.

The practice of listing TV percentages was dropped with the ratings for the two weeks ending Jan. 10. It was reinstated with ratings for the week of Jan. 24, released last week.

Total Jan. 24 report follows:

NUMBER OF TV HOMES REACHED

Rank	Program	Homes (000)
1	I Love Lucy (CBS)	15,015
2	Inaugural Day Ceremonies (General Motors Corp.) (NBC)	13,148
3	Arthur Godfrey & Friends (Liggett & Myers Tobacco) (CBS)	11,449
4	Texaco Star Theatre (NBC)	11,010
5	Colgate Comedy Hour (NBC)	10,881
6	Arthur Godfrey & Friends (Toni-Gillette Razor Co.) (CBS)	9,908
7	Dragnet (NBC)	9,451
8	You Bet Your Life (NBC)	9,170
9	Arthur Godfrey & Friends (Pillsbury Mills Inc.) (CBS)	9,088
10	Pabst Blue Ribbon Bouts (CBS)	9,025

PER CENT OF TV HOMES REACHED IN PROGRAM STATION AREAS

Rank	Program	Homes %
1	I Love Lucy (CBS)	71.7
2	Inaugural Day Ceremonies (General Motors Corp.) (NBC)	67.6
3	Arthur Godfrey's Scouts (CBS)	64.5
4	Texaco Star Theatre (NBC)	58.0
5	Arthur Godfrey & Friends (Liggett & Myers Tobacco) (CBS)	57.8
6	Colgate Comedy Hour (NBC)	52.2

NEW RTMA DATA SHOW SHIPMENTS OF TV SETS TO DEALERS

For first time, destination of TV sets after leaving factory is disclosed by trading areas. Figures, however, are not to be confused with tables showing number of TV homes in areas served by each TV station.

FIRST television set figures showing where manufacturers have shipped video receivers since 1946 have been compiled by Radio-Television Mfrs. Assn.

The new figures were made public over the weekend by RTMA, based on compilations by William F. E. Long, RTMA director of statistics. They cover the period from 1946 through the third quarter of 1952.

Since production of TV sets started after the war, manufacturers have shipped 19,175,738 receivers to dealers in the United States (through September, 1952), according to Mr. Long's tabulations.

This breakdown of shipments it based on Rand McNally trading areas. Rand McNally breaks down the nation into 60 arbitrary trading areas. These areas bear no relation to the metropolitan area classes used by the U. S. Census Bureau in publishing results of the 1950 decennial census.

Mr. Long makes clear that the RTMA figures do *not* attempt to show TV circulation—that is, the number of TV homes in any given area.

On the other hand, they show for the first time total sales to dealers. In other words the data reveal the areas where TV sets have gone after leaving the factory. Their basic purpose is to show each manufacturer what percentage of an individual market he has, based on shipments to dealers.

The RTMA figures have been condensed by BROADCASTING • TELECASTING to show 60 major trading areas, as classified by Rand McNally, with principal subdivisions. This table, however, does not show detailed county and city breakdowns in some of the major areas, since the RTMA figures are not broken

NOW 225,000 TELEVISION HOMES IN KRLD-TV'S EFFECTIVE COVERAGE AREA

EXCLUSIVE CBS TELEVISION OUTLET FOR DALLAS-FORT WORTH AREAS

This is why KRLD-TV is your best buy

Channel 4... Represented by The BRANHAM Company

down that fine.

Mr. Long told BROADCASTING • TELECASTING that broadcasters should be careful to distinguish between these figures and set circulation figures covering major cities having TV stations as shown in the circulation table on page 35 and in other circulation estimates.

He emphasized the need of recognizing what the RTMA figures do not show. These "do not show" factors, he said, are: Obsolescence of sets; trans-dealer shipments from one trading area to another; TV set inventories on the shelves of dealers; kits or parts made and installed a few years ago (now produced in relatively small quantity); exports to other countries.

RTMA has no reliable information concerning these "do not show" factors, according to Mr. Long, nor does it attempt to show movement of population.

The new RTMA figures will serve as benchmarks (foundation points for future projections), according to Mr. Long. He said work is moving ahead on revised tables showing set shipments through the entire year of 1952. These will be ready in a month or so, he estimated.

The Rand McNally trading area breakdown is illustrated by Area No. 1, Albany, N. Y. In the RTMA set shipment data, Albany trading area is split into three main subdivisions—Albany; Bennington, Vt., and Plattsburg, N. Y. Troy and Schenectady are included in the first of the three subdivisions, Albany.

The Rand McNally list of major and basic trading areas is published separately by RTMA for use in connection with studies of TV set shipment figures.

Albany Subdivision

This list includes the following areas for the Albany subdivision: Albany; Berkshire, Mass.; Columbia, N. Y.; Fulton, N. Y.; Greene, N. Y.; Hamilton, N. Y.; Montgomery, N. Y.; Rensselaer, N. Y. (includes Troy); Saratoga, N. Y.; Schenectady, N. Y. (includes city of Schenectady); Schoharie, N. Y.; Warren, N. Y.; Washington, N. Y.

The Bennington, Vt., subdivision includes only Bennington.

The Plattsburg, N. Y., subdivision includes Clinton, Essex and Franklin, N. Y.

As a basic figure, RTMA took the Census Bureau's official count of TV sets in every county, city and area in the U. S. as of April 1950. At that time fewer than 5 million TV sets had been manufactured but the Census Bureau's compilation has been generally accepted as accurate (as of April 1950). By the end of 1952 TV circulation was at the 20 million mark, four times the figure at the time the census was taken.

When census data were collected, RTMA had figures showing set shipments by counties as made available by RTMA member manufacturers (estimated at about three-fourths of total TV set production).

Starting Jan. 1, 1951, RTMA began assembling monthly dealer figures for the entire manufacturing industry, using what it considered reliable projections to include non-member production. These figures were collected by a private auditing firm. Since Jan. 1, 1952, RTMA has handled its own statistics, though not even RTMA officers and members have access to production figures of individual manufacturers. These individual figures are carefully safeguarded to prevent any disclosure.

Mr. Long and his staff of nine faced the job of tracing set shipment data back to 1946 and projecting the figures to cover the entire industry, members and non-members. Then, taking the April 1, 1950, U. S. Census Bureau TV figures, RTMA has added set shipment figures for the last nine months of 1950; all of 1951; three quarters of 1952.

The total figures are those shown in the attached table. Since they are set shipment figures, they do not show dealers' stocks. RTMA explained that retail inventories were high in the third quarter of 1952 but that they are now declining.

The table shows trading areas by 60 areas and major subdivisions; number of radio homes (April 1950); total TV sets shipped to area (to Oct. 1, 1952), and percentage of TV sets shipped to Oct. 1, 1952 compared to total radio homes in 1950:

Trendex's Feb. 1-7 Listing

TOP 10 evening sponsored network TV programs for the week of Feb. 1-7, as listed by Trendex, were as follows:

	Program	Rating
1	I Love Lucy (CBS)	68.1
2	Godfrey's Talent Scouts (CBS)	47.9
3	Dragnet (NBC)	43.0
4	Godfrey's Friends (CBS)	42.0
5	Texaco Star Theatre (NBC)	41.4
6	Colgate Comedy Hour (NBC)	37.0
7	What's My Line? (CBS)	35.8
8	You Bet Your Life (NBC)	34.0
9	Our Miss Brooks (CBS)	32.9
10	Strike It Rich (CBS)	31.1

Watered Ratings

NEWS REPORTS from St. Louis and Hartford indicate a connection between sudden drains on the cities' water supplies and the intervals or commercial periods between TV and radio programs.

In both cities, the drain on water supplies coincides with intervals between shows, indicating dishwashing, baths, water drinking and other use of the plumbing is postponed until after shows. The St. Louis Water Co. blames commercials for the jumps in water usage.

Water gauges at the Hartford Water Bureau even measure the ratings of TV shows by the amount of extra water used. With most programs drawing an average of 500,000 extra gallons, *I Love Lucy*, at the show's end, registers 800,000 extra gallons.

Viewing for specific days of the week also may be measured, with Monday, Tuesday and Wednesday ratings about the same until the Wednesday fights on TV, when the water gauge goes up. Thursday and Friday are drier with the exception of the Friday fights. Saturday in Hartford is "pretty damp" and becomes a "flood" after the wrestling. Sunday is the wettest night of the week.

The Gavilan-Davey fight Feb. 11 drew one of the largest ratings ever—900,000 to a million gallons.

Joe Ward Outlines Radio Approach to Retailing

PSYCHOLOGICAL gulf between retailers and radio was cited by Joseph B. Ward, president of Advertising Research Bureau Inc., Seattle, speaking before a Radio Executives Club of New England luncheon earlier this month. Blaming radio executives for the breach, he decried their use of Hooper, Pulse and Nielsen ratings as the basis for sales approaches, adding that retailers are not interested in ratings.

They want results, he said, and are interested in a medium which brings customers to their stores. Mr. Ward, speaking on "Putting the Dollar Sign in Sales," and "It's the Results That Count," referred to 201 radio-newspaper comparison studies from all parts of the U. S. except New England. These studies, he said, show there are two, evenly-split markets, one reached by radio and the other by newspapers, with a small overlap which developed more than 10% of store traffic and sales volume.

Commending radio executives on the flexibility of the medium, he recommended that they learn to speak the language of the retailer in order to increase revenue from that advertising quarter.

AMONG those at a Radio Executives Club of New England luncheon are (l to r) Edward R. Mitton, president, Jordan Marsh Co.; Joseph B. Ward, president, Advertising Research Bureau Inc., Seattle, a speaker, and Rudolph Bruce, president of the club and advertising manager of New England Coke Co.

'Lux Theatre' Tops Nielsen

TOP network radio show in number of homes reached for Jan. 11-17 was *Lux Radio Theatre*, according to A. C. Nielsen Co. ratings. Others:

Extra-Week Jan. 11-17, 1953
EVENING, ONCE-A-WEEK—NIELSEN RATING*

Rank	Program	Homes Reached (000)
1	Jack Benny (CBS)	5,729
2	Amos 'n' Andy (CBS)	5,460
3	Charlie McCarthy (CBS)	5,147

FILM

Studios Allowed Delay For Antitrust Answers

DELAY until March 11 for answering the Dept. of Justice antitrust suit to force release of 16 mm films to television was obtained last Wednesday by RKO Radio Pictures, Columbia Pictures Corp. and its subsidiary, Screen Gems Inc.

Extension of the deadline (last Wednesday) was set after Leonard Kaufman of the law firm of Mitchell, Silberberg & Knupp, said he had been engaged constantly in court appearance since the deadline was set last Jan. 19 [B•T, Jan. 26].

General denial of the charge of conspiracy to withhold the films was filed last week by other defendants, 20th Century-Fox, Warner Bros., Republic Pictures, Films Inc., Pictorial Films, Universal-International Pictures and its subsidiary, United World Films Inc.

The Justice Dept. earlier had clarified specific charges and amended slightly its original action filed July 22, 1952 [B•T, July 28, 1952].

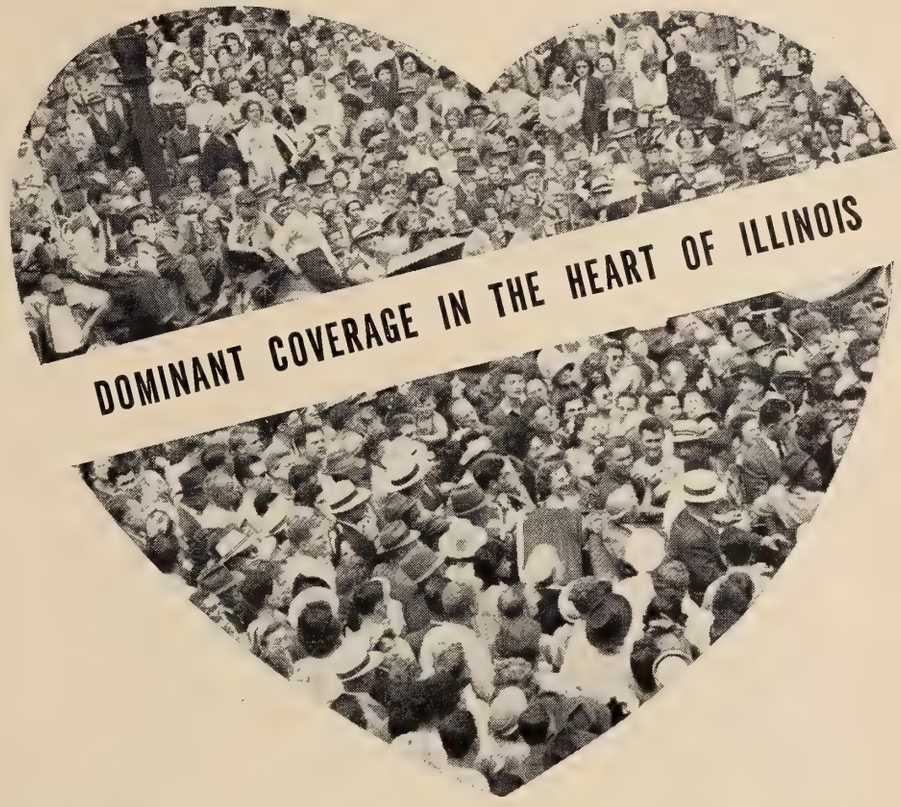
GT Withdraws Suit on Lease Of Musical Films to KLAC-TV

GENERAL Teleradio Inc., operator of Don Lee Broadcasting System and KHJ-TV Los Angeles, last week withdrew its Los Angeles Superior Court suit to prevent United Television Programs Inc. from leasing 750 Snader Telescriptions to KLAC-TV Los Angeles.

The suit was withdrawn with signing of a new two-year "dual exclusivity" contract giving KNBH (TV) Los Angeles and KHJ-TV continued exclusive rights to the filmed musicals.

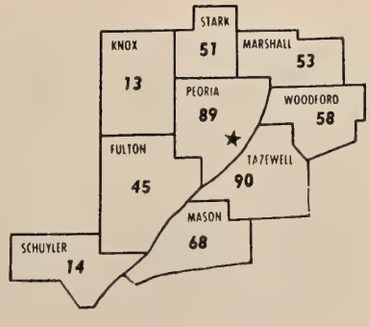
The suit, filed in January [B•T, Jan. 19], had charged a breach of contract was threatened by lease of the Telescriptions to another station. It asked declaratory relief as well as specific performance.

Tabakin's Films Off 'List'



PRODUCER Bernard Tabakin has been removed from AFL Hollywood Film Council's "unfair" list after agreeing to confine his future TV film production to the U.S. In its campaign to halt video film production abroad, the council had protested the six programs in the *Affairs of China Smith* series which were shot in Mexico [B•T, Feb. 9]. Series, produced by Mr. Tabakin, is sponsored on KECA-TV Los Angeles by Thrifty Drug Stores.

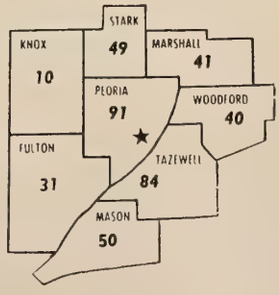
New Beverly Subsidiary



TELEVISION Exploitation Co., new subsidiary of Beverly Pictures, New York, was opened officially Thursday by Beverly's president, Oliver A. Unger, who also is president of the new firm. According to Mr. Unger, TV Exploitation expects to have 27 "exchanges" in operation shortly.

Other new officers: Seymour Scott, treasurer; Harold Goldman, national sales director, and Milton Gettinger, counsel. New company already has acquired 52 half-hour Roller Derby TV films and 22 TV feature films, and within a month officials expect to begin production on *Gulliver and the Little People,* to be produced by the Roller Derby owner, Leo A. Seltzer, and directed by Ron Ormond.

Obviously OUTSTANDING . . .



The new STANDARD STATION AUDIENCE REPORT shows once again how WMBD dominates the rich Peoriarea market. With an audience of 87,328 daytime radio families, WMBD reaches 89% of the Peoria County total . . . 90% of the total in adjoining Tazewell County. WMBD audiences in the 9-county market account for 68% of 127,870 daytime radio families. Nighttime figures show equal dominance.

Snader Talks Resume March 2

FURTHER arbitration sessions in the case involving Louis D. Snader and his ex-partners, Alexander Bisno and Samuel Markovitch, in Snader Telescriptions Corp. and interlocking companies, have been postponed to March 2, giving an additional two weeks for the parties to prepare briefs. [B•T Feb. 9].

Film Sales

Increase in sales during past few weeks have brought total subscribers to *TV Disc Jockey Films,* produced and distributed by **Screen Gems Inc.,** New York, to 20 stations, the firm announced last week. New station subscribers include: WCAU-TV Philadelphia, WNOK-TV Columbia, S. C., and CBL-TV Toronto. The increase is due in part to "the many new stations going on the air," John H. Mitchell, Screen Gems' vice president in charge of sales, reported.

* * *

DuMont Film Sales, New York, announces the signing of **Tide Water Associated Oil Co.** to sponsor *Madison Square Garden* for 13 weeks over KGMB-TV Honolulu, T. H. This was 11th sale of the program by DuMont in recent weeks. The sports film show is under contract now in 20 domestic and four foreign markets. **Winik Films,** New York, produces the series.

* * *

United Television Programs has sold the Studio Transcription Library of musical shorts to three additional TV stations, bringing total subscribers to 83, according to sales director, **Aaron Beckwith.** Latest sales were to WJIM-TV Lansing, WEEK-TV Peoria and KGNC-TV Amarillo.

* * *

KTLA (TV) Hollywood has leased a new-to-TV group of feature films from **Robert L. Lippert Productions,** that city, for approximately $80,000. Films, which were released in 1951 and 1952, may be shown over a two-year period on an unlimited basis. Programming is scheduled for Saturday, 9-11 p.m., and Sunday, 7:30-9 p.m. All exploitation used in the theatrical release goes to the station.

Distribution

Cornell Film Co., New York, has signed to distribute films produced by **Kenfilm,** Israel production firm, in TV, theatrical and non-theatrical fields.

Availabilities

Alexander Film Co., Colorado Springs, Col., is releasing two new "package series" of TV film commercials, one on bread and the other on milk. Both series employ combination cartoon animation and live action scenes, both include 13 20-second and four 60-second films, and are designed to give local and regional sponsors personalized film commercials. Series is available to dairies and bakeries on an exclusive basis. Sponsors are given rights to unlimited use of the films for six months.

Production

Family Theatre, Hollywood, is in production on an hour-long TV film for Easter week release. Filmed by **Roland Reed Productions,** Culver City, and titled "Trial at Tara," script is based on the religious story of St. Patrick. **Arthur Pierson** is director.

* * *

Video Pictures Inc., 1515 N. Western Ave., Hollywood, has been formed as a self-packaging, self-financing TV film production firm. Headed by **Hank McCune,** one-time NBC-AM-TV comic, the firm is producing 13 half-hour situation comedy films, *The Hank McCune Show.*

Film People

Brandt Enos, business manager of Transfilm Inc. and former business manager of the March of Time, has resigned to launch **Brandt Enos Assoc.,** New York, TV film and motion picture management consultant firm.

* * *

Martin Leeds, chief of business affairs department for CBS-TV West Coast network programs, joins **Desilu Productions Inc.,** Hollywood, as executive vice president in charge of production. Firm, which films CBS-TV *I Love Lucy* and *Our Miss Brooks,* plans production expansion with enlargement of commercials department in addition to several new TV film packages.

* * *

Eugene Wooten, independent Hollywood motion picture producer, joins **Bo-Mor Productions,** that city, as executive producer, succeeding **Richard Morley.** Firm is in pre-production on *Don Willson Show,* half-hour TV film series.

* * *

Siegfried M. Herzig, playwright and motion picture scenarist, has been signed by **Filmcraft Productions,** Hollywood, to assist **Robert Nathan** in preparing scripts for *Mark Twain Television Theatre.*

GLORIA SWANSON discusses business in New York before returning to Hollywood, where she will emcee and star in *Crown Theatre,* a 26-time half-hour dramatic film series which goes into production shortly at Bing Crosby Enterprises' studio. With her (l to r) are Wilbur S. Edwards, general sales manager, CBS-TV Film Sales; Merle S. Jones, vice president in charge of CBS owned stations and general services; Everett Crosby, president, Bing Crosby Enterprises, and Fred J. Mahlstedt, operations director for CBS-TV Film Sales, distributing group.

World Hikes Budgets 35%; Predicts Boom for Local Radio

World Broadcasting notes its business last year was 40% higher than the previous year, giving basis for its vice president's notation: " . . . local radio is a better investment than ever . . . "

PREDICTING a boom year for local radio, Robert W. Friedheim, vice president of World Broadcasting System Inc., last week announced that World's 1953 budgets for production, advertising and merchandising have been increased by 35%. He said:

"We are spending this additional money and enlarging our sales department because of our faith that local radio is a better investment than ever, for a growing list of advertisers at the local level and for those of us who have cast our lot in this business."

Pointing out that 1952 local radio sales were up more than 7% over 1951 on a nationwide basis, Mr. Friedheim noted that World's 1952 business was 40% higher than 1951. He predicted this year's sales will top the 1952 record level.

New Birthday Show

Some of the "name" personalities included in World's 1953 programming are: David Rose, Judy Canova, Dick Haymes, Mimi Benzell, Ray Block and the New World Singers Male Chorus. World is releasing special half-hour holiday programs for St. Valentine's Day, Washington's Birthday and St. Patrick's Day. A new show is *Whose Birthday Is This?,* a human interest program centering around the birthdays of more than 1,500 world-renowned persons.

'Assignment' Principals Sued

RADIO and TV film actress Joan Miller last Tuesday filed suit in Los Angeles Superior Court for a total of $300,000 against NBC, program packager Don Sharpe, NBC *Dangerous Assignment* radio star Brian Donlevy, Donlevy Development Corp. and others. Miss Miller charged the defendants damaged her professional standing in "willfully and maliciously" using her name as that of a Nazi spy depicted on the NBC radio program Feb. 18, 1952. Miss Miller said she did confidential work in World War II with the Office of War Information and the Office of Strategic Services.

McKean Gets New Post

GILBERT S. McKEAN, merchandising manager of Columbia Records' Masterworks Div., has been named director of the company's newly-created special products division, which will handle promotion and market development of current and new products for Columbia Records and its transcription division. Douglas H. Duer, assistant merchandising manager of Masterworks Div., succeeds Mr. McKean as merchandising manager.

FCC OKAYS TV TIME-SHARING FOR KSBW, KMBY ON CH. 8

Commission authorization is for sharing of time on a single vhf channel in the Salinas-Monterey area in California. Approval apparently based on fact AM stations do not overlap in competing for sponsors.

FIRST authorizations for sharing of time on a single TV channel by two stations—considered one practical solution to application deadlocks particularly in "hyphenated" cities—were issued by FCC last week to KSBW Salinas and KMBY Monterey, Calif.

Previously competitors for Ch. 8, allocated to the Salinas-Monterey area, the two stations now will share the same transmitter facilities but will maintain separate studios in their respective markets. Their mutually-exclusive applications were amended a fortnight ago to specify sharing of time pursuant to Sec. 3.622 of the Commission's rules which permit voluntary sharing of TV facilities [B•T, Feb. 16].

FCC's approval of the plan is understood to have been based upon the fact Ch. 8 is allocated to a twin-city area in which the two AM stations involved serve their respective markets without competitive overlap for local sponsors. The TV stations will serve both cities on the vhf facility, FCC noted.

One Commission spokesman indicated, however, there may be policy questions involved should two AM stations in the same market propose to share time on the same channel. He noted that while there have been several outstanding successful share-time operations in radio, notably WENR and WLS Chicago and WBAP Fort Worth-WFAA Dallas, the history of share-time since the medium's early days has weighed against such a policy.

The Commission representative cited the waste of dual transmitter and studio facilities, disproportionate cost of operation over available time to earn income, the eventual demands of the share-time operators for full time facilities and administrative headaches for FCC.

He indicated though, respecting TV, that the Commission will consider each share-time proposal on its individual merits.

KSBY and KMBY plan to use the same transmitter facilities, sharing the cost, and will operate with the same effective radiated power of 10 kw visual and 5 kw aural. The site is on Baldy Peak, some nine miles from Salinas, providing antenna height above average terrain of 2,630 ft. Separate studios will be maintained in Salinas and Monterey, about 14 miles apart.

Each station will program 42½ hours a week, according to the present plan, with a two-week cycle scheduled in which each will have evening hours for every night of the week over the period.

KMBY is owned 30% by President Kenyon Brown, 24% by Vice President-Treasurer Bing Crosby and 30% by Vice President-Secretary George L. Coleman. KSBW is owned 25% each by President-General Manager John C. Cohan, Secretary-Treasurer and Assistant General Manager William M. Oates, Vice President Lewis A. Terven Jr., and The Chronicle Pub. Co., licensee of KRON-AM-FM-TV San Francisco.

The share-time grant came on the heels of other Commission actions approving the joining of forces of previously competitive applicants. These were the grant of Ch. 47 at Macon, Ga., to Macon TV Co., comprising stockholders of both WBML and WNEX there, and the grant of Ch. 10 to WIS-TV Corp., Columbia, S. C., owned chiefly by WIS Columbia with minority interest held by a group of stockholders withdrawing from WMSC there [B•T, Feb. 16].

At Tulsa, competitors for Ch. 2, have joined in a common TV application under the name of Central Plains Enterprises Inc. They are Sen. Robert S. Kerr (D-Okla.), with his wife chief owner of KRMG, and W. G. Skelly, owner of KVOO (see Actions of the FCC, page 99).

The respective licensees of KRMG and KVOO will each hold a major interest in the new firm, with balance of control vested in a minor interest to be shared by Tulsa U. and Oklahoma A & M. Separate, competitive AM operations are promised.

Although the merger bid removed competition between the two stations for Ch. 2, FCC last week received two other new applications for the facility. Oil Capital TV Corp. filed for Ch. 2 while Fryer TV Corp., previously seeking uhf Ch. 23, amended to Ch. 2.

Principals in KUGN and KORE Eugene, Ore., competitors for Ch. 13 there, have joined in a consolidated application soon to be filed with FCC, the stations reported last week. A group of local businessmen not identified with the radio stations are included in the proposed new applicant.

Bills in N. Y. Legislature Would Cut Radio-TV Liability

BILLS were introduced in the New York State legislature last week to limit the liability of radio and television stations in suits for slander and libel based on the programs they broadcast.

Sponsors of the measures, Sen. William S. Hults Jr. of Port Washington, L. I., and Assemblyman Joseph F. Carlino of Long Beach, L. I., explained the bills would make the sponsors of the program, rather than the station that carries it, responsible for any slander or libel, unless the station examined the script before it was broadcast.

Messrs. Hults and Carlino pointed out that on network programs particularly, local stations often have no knowledge of program content until the actual broadcast or telecast is made and therefore have no opportunity to correct a statement they may consider libelous or slanderous.

Idaho Enacts Liability Law

NEW LAW enacted in Idaho fortnight ago relieves Idaho broadcasters of liability for defamatory statements broadcast by candidates for public office, according to Henry H. Fletcher, KSEI Pocatello, president of Idaho Broadcasters Assn. IBA shepherded the bill (H-51) through both House and Senate, with Gov. Len Jordan affixing his signature. Walter E. Wagstaff, KIDO Boise, chairman of the IBA Legislative Committee, and Earl Glade Jr., KDSH Boise, were active in contacting legislators and explaining reasons why the libel injustice should be corrected.

TV Tower Report

ONLY 19 applications requesting approval of the Airspace Subcommittee of the Air Coordinating Committee for TV tower locations or heights were turned down during 1952, the Air Coordinating Committee has indicated in its annual report.

The Air Coordinating Committee is composed of representatives of the State Dept., Defense Dept., Commerce Dept. and the Civil Aeronautics Board.

Annual report said the nine regional Airspace Subcommittees had handled 190 cases regarding TV towers during the last year and had recommended disapproval of only 10%.

VOD Winners End Tour

WEEK of events involving prominent personages in official Washington was concluded Friday as the four winners of the Voice of Democracy radio-TV essay contest received the acclaim of government and industry (see VOD article, page 78).

The students received $500 scholarships and radio-TV receivers at the annual awards luncheon held Wednesday at the Mayflower Hotel, Washington. Sen. Margaret Chase Smith (R-Me.) made the presentations. MBS picked up the program. Dr. Earl James McGrath, U. S. Commission of Education, presided at the affair.

The four winners were Robert Davis, Maui, Hawaii; Frank Lammedee, San Marino, Calif.; Adelaide Nacamu, Peekskill, N. Y., and Thomas J. Walsh, Washington, D. C.

FCC ENDS PUSH ON UNCONTESTED BIDS

Commission begins processing hearing applications, explaining backlog of cases is lightening. Side result is slowing of FCC's TV station grant pace.

THE TEMPORARY expediting policy — effected by FCC last Oct. 15 to push processing of uncontested TV applications by passing over contested bids—quietly died last week.

The Commission, concurrent with issuance of grants for eight more TV outlets, disclosed it once again is sending McFarland letters to applicants notifying them they are mutually exclusive with the bids of others for the same facility.

Last week's grants were less than the number the Commission usually has been issuing in previous weeks because its staff once again is processing bids which must go into hearing. The new grants included two permits for the sharing of Ch. 8 at Salinas-Monterey, Calif., by KSBW Salinas and KMBY Monterey, former competitors for the assignment (see story page 42).

The Commission's resumption of processing hearing applications was explained by FCC representatives last week to indicate the backlog of cases now before examiners is beginning to lighten and some may be able to take new cases soon. They also noted that at the present pace of grants, not counting incoming applications, the Commission staff would have handled most remaining uncontested bids in the next couple of months.

With last week's grants, the total number of TV stations authorized in the U. S. and its territories stands at 363, including 2 vhf and 12 uhf noncommercial, educational outlets. Since lifting of the freeze last spring, FCC has issued permits for 74 vhf and 177 uhf stations. Of all stations authorized, 124 vhf and 12 uhf outlets are in operation commercially.

More than 1,000 applications have been filed with the Commission since lifting of the freeze and resumption of processing, of which some 750 remain to be acted upon. A large number represent competitive bids for the same channels, many of which already have been, or are expected soon to be, set for hearing.

FCC officials, however, are hopeful that with the revision of hearing procedures the new cases will be disposed of more quickly than those to date [B•T, Feb. 9]. One spokesman guessed at least 500 TV CPs by year end.

Under the streamlined hearing procedure, effective Feb. 4, FCC processes an application thoroughly respecting basic legal, financial and technical qualifications prior to the competitive hearing, thus leaving for such proceeding only comparative issues relating to the applicants' experience, proposed operating policies and program service.

McFarland Letters

Several dozen McFarland letters have gone out to mutually exclusive applicants during the past fortnight pursuant to the new hearing procedures. The majority were sent by the FCC Broadcast Bureau. Virtually all were new, more detailed letters to contested applicants who were among the first to receive such notices last summer shortly after provisions of the McFarland Act took effect.

Here are last week's eight new grants:

Wichita, Kan. (City priority Group A-2, Number 6)—The C. W. C. Co. (Stanley H. Durwood, theatre operator), granted construction permit for uhf Channel 16, effective radiated power 200 kw visual and 105 kw aural, antenna height above average terrain 960 ft.

Monterey, Calif. (Group A-2, No. 164)—Monterey Radio-Television Co. (KMBY), granted vhf Ch. 8, ERP 10 kw visual and 5 kw aural, antenna 2,630 ft.; station to share time with Salinas Broadcasting Corp. (KSBW).

Salinas, Calif. (Group A-2, No. 164)—Salinas Broadcasting Corp. (KSBW), granted vhf Ch. 8, ERP 10 kw visual and 5 kw aural, antenna 2,630 ft.; station to share time with Monterey Radio-Television Co. (KMBY).

North Adams, Mass. (Group A-2, No. 240)—Greylock Broadcasting Co. (WBRK Pittsfield, Mass.), granted uhf Ch. 74, ERP 1 kw visual and 500 w aural, antenna 570 ft.

Hannibal, Mo. (Group A-2, No. 250)—Courier-Post Publishing Co. (KHMO), granted vhf Ch. 7, ERP 10.5 kw visual and 5.4 kw aural, antenna 620 ft.

McAllen, Tex. (Group A-2, No. 263)—Texas State Network Inc. (KRIO), granted uhf Ch. 20, ERP 86 kw visual and 49 kw aural, antenna 500 ft.

Mesa, Ariz. (Group B-3, No. 178)—Harkins Broadcasting Inc. (KTYL), granted vhf Ch. 12, ERP 27 kw visual and 13.5 kw aural, antenna 400 ft.

New Orleans, La. (Group B-4, No. 184)—Supreme Broadcasting Co. (WJMR), granted uhf Ch. 61, ERP 200 kw visual and 100 kw aural, antenna 410 ft.

Storer Broadcasting Co.'s WSPD-TV Toledo, operating on Ch. 13, was granted boost in effective radiated power from 24.5 kw to 316 kw, antenna height substantially unchanged, 520 ft. above average terrain. Concerning overlap with proposed increased power operation by WJBK-TV Detroit, Chairman Paul A. Walker in a concurring opinion stated, "As a matter of principle I believe that the overlap in this case is objectionable. In view of the Commission's prior grants of the Crosley applications, however, I do not believe that withholding a grant from Storer Broadcasting Co. would be warranted" [B•T, Dec. 15, 1952].

FCC also directed Meco Realty Co. and the co-owners of WQAN Scranton, Pa., Edward J. and Elizabeth R. Lynett, to elect in 15 days which of two TV applications there they wished to prosecute. Meco and the Lynetts are principals in Electric City Telecasting Co., Ch. 16 applicant, and also MCL Telecasting Corp., which proposes to purchase a majority interest

NEW Library of Congress service, catalog of recordings including radio documentaries, was officially unveiled by Luther Harris Evans (r), Librarian of Congress. First card entered in catalog is "Mr. President," edited and narrated by James Fleming (l), news editor of NBC-TV program, *Today*.

WSAU Protest Dismissed In Move of WLIN (WOSA)

PROTEST by WSAU Wausau, Wis., against the move of WLIN Merrill, Wis., to Wausau as WOSA was dismissed by FCC last week as untimely.

WSAU objected to the Commission's grant to WOSA, owned by Rep. Alvin E. O'Konski (R-Wis.), on the grounds of economic injury [B•T, Feb. 16].

WSAU also alleged Rep. O'Konski made misrepresentations to the Commission in his acknowledgment of certain preliminary premature construction at the WOSA transmitter site. These were denied by the Congressmen who in turn questioned the accuracy of statements made to FCC by representatives of WSAU.

Grants Power Boost

In addition to approving move of WLIN to Wausau as WOSA, the Commission granted the station a boost in power on 550 kc from 1 kw fulltime to 5 kw day, 1 kw night, directional. The grant was made Dec. 4, 1952, but after acknowledgment by Rep. O'Konski of the premature construction, FCC on Jan. 2 approved a modification of the permit which constituted the condition that none of the pre-grant construction might be used by WOSA. This condition was suggested by Rep. O'Konski, pursuant to the condition included in the TV grant to TV Colorado Inc., permittee for vhf Ch. 11 at Colorado Springs [B•T, Dec. 1, 1952].

WSAU earlier protested the Dec. 4 grant and was turned down by the Commission.

Legislature on TV

WSAZ-TV Huntington, W. Va., has reported it received permission to film proceedings of West Virginia State Legislature for late TV presentation over the station.

My, how you've grown!

SCANDIA COSMETICS SALES BOOM!

WWDC in Washington makes businesses grow. Here's another factual story to prove that statement.

Scandia Cosmetics reports more than $5,000 in sales for January alone—supposedly the slowest month in the year.

All this by using *only* WWDC to advertise its line of beauty aids.

All this with *only one* cosmetics outlet in town—Julius Garfinckel & Company.

All this by concentrating its sales story on *only one* WWDC program feature — "The Hazel Markel Show," heard daily on WWDC.

Says KAROL LINDBERG, Vice-President in charge of sales for Scandia Corporation:

"WWDC has done a phenomenal job for Scandia in the Washington market. From the first week of our operations in Washington, our sales have risen steadily. And the rate of increase is amazing. January, 1953 was our biggest month of any we have enjoyed in Washington. We are enthusiastic about the results WWDC has produced."

WWDC can help *your* sales in the big Washington market, too. Let your John Blair man give you the whole story.

WWDC'S HAZEL MARKEL

SCANDIA'S KAROL LINDBERG

In Washington, D.C. it's

WWDC

REPRESENTED NATIONALLY BY JOHN BLAIR & CO.

SENATE PROBE OF VOA OPERATION CONTINUES THIS WEEK

While the State Dept. and its Voice of America ready new testimony on charges of "mismanagement, waste, corruption and possible sabotage" made in McCarthy group hearings, IIA's Dr. Compton resigns, and reports indicate Secretary of State Dulles is considering transfer of VOA jurisdiction outside his department.

SENATE investigation last week of "mismanagement, waste, corruption and possible sabotage" in Voice of America and its parent body, the State Dept., was highlighted by these developments:

- Resignation of Dr. Wilson Compton, former president of the U. of Washington and administrator of the State Dept.'s International Information Administration (VOA) for the past year, who said he had submitted it early in January.
- Charges of extensive waste in all VOA divisions, with specific mentions of broadcast operations in Latin America and Ceylon and the proposed Baker East and Baker West stations in the U. S.
- Hints that selection of sites for Bakers East and West in transmission locations affected by magnetic storms and "auroral absorption," was deliberate sabotage, followed Monday by cancellation of work on both.
- Reports that Secretary of State John Foster Dulles is considering transferring Voice of America jurisdiction from the State Dept. to a separate propaganda agency.
- Issuance of State Dept. orders Wednesday that no material used by VOA and allied information services can be written by persons accused of Communism or "fellow-traveling." The order rescinds the opinion of an educational and professional book publishing advisory group.

The State Dept. and its Voice of America division were preparing testimony and witnesses for appearance before the Senate permanent subcommittee on investigations, headed by Sen. Joseph McCarthy (R-Wis.), late last week.

Testimony Prepared

Up to late Thursday, officials had not explained the many charges against operative heads. However, it was learned detailed statements are being worked out carefully.

All testimony since the committee hearings started, on Feb. 13, was critical of operations and policy, with the exception of one witness who appeared Thursday morning.

Hearings opened in New York, in closed executive session, continuing through Feb. 14, and then moved to Washington for open sessions last Monday.

An attorney for the investigation group predicted hearings may continue "for two months." He refused to disclose names of people subpoenaed to testify.

A major point in the investigators' attack was revealed in testimony that transmitter locations for two high-powered propaganda stations, Baker East and Baker West, near Wilmington, N. C., and Seattle, Wash., respectively, were spotted in areas which reduced their transmission effectiveness 90% because the signal passed through the 1,000-mile-wide "auroral absorption" zone, affected by the aurora borealis and causing magnetic interference, thus making it easier for the Soviet's jamming operation.

McKesson's Views

Lewis J. McKesson, former electrical engineer for VOA, said the stations should have been located farther south in the U. S., suggesting California and Florida as preferable for both transmission and cost reasons.

Programs to have been aired by these stations were to reach Iron Curtain countries via short and medium wave relay through Munich and Manila. Construction, in which waste of many thousands of dollars was charged, was suspended Monday on orders from Secretary Dulles.

Sketchy reports emanating from the State Dept. and VOA conflict with testimony before the subcommittee, and are not expected to be amplified until witnesses appear formally at the hearings. These sources seem to agree choice of transmitter sites is made by the State Dept. after various considerations, one of which is national security, and the final selection is based on recommendations by engineers outside the government.

Jim Berryman in *Washington Evening Star*

Mass.) reportedly worked out basic propagation studies for the two controversial stations in cooperation with the Central Radio Propagation Labs. of the U. S. Bureau of Standards, RCA, the Army Signal Corps and private engineering consulting firms, although MIT was reported last week as having repudiated its initial recommendations on the two Baker stations.

Private broadcast engineers are expected to testify at future proceedings. One leading Washington engineer told BROADCASTING • TELECASTING the charges by Mr. McKesson were "absurd," and that any station at any site in the U. S. would have a certain amount of "auroral absorption" interference. He is not involved in the investigation. Outside engineers have, in the past, handled much of the VOA work on a sub-contract basis with the general contractor, and have worked on any of several projects.

"Loyalty" of a top VOA official was touched upon and challenged by a subcommittee witness at the Thursday morning session, when John C. Caldwell, former deputy director of the U. S. Information Service in South Korea and who also worked in China and Washington, discussed his official duties with W. Bradley Connor, assistant administrator for policy and plans under Dr. Compton in the IIA.

Mr. Connor's name was introduced earlier in the week when a directive bearing his signature and advising use of work by controversial authors, in limited instances for propaganda purposes, was submitted. Mr. Connor, in his testimony, said the directive was not issued by him.

Stupidity rather than subversion was blamed for mismanagement of Latin American broadcasting by Stuart Ayers, acting assistant chief of that division for VOA, who charged almost all of his 1952 budget was "squandered" on a "juvenile" program, *Eye of the Eagle*, with no propaganda value. The show, which cost $50-60,000, he said, featured a scientist who used a helicopter as fast as a jet plane, and was able to see through buildings with aid of an "atomic eye."

Other witnesses: Dr. Newburn Smith, chief, Central Radio Propagation Labs., Bureau of Standards; Wilson S. Compton; Gen. Frank A. Stover (retired), consultant, IIA; Charles B. Carrigan, government agent who negotiated the land purchase for Baker East; Frederick Freeman, acting chief of VOA's contract branch; Donald R. Creed, assistant chief of the domestic transmitter division, VOA; Howard Fast, author, New York; Edward Kretzmann, VOA policy advisor, Virgil Fulling, chief of Latin American news in VOA's central news bureau; J. M. Morgan, ex VOA engineer in Ceylon, and J. G. Watts, Portland contractor.

Future of FCC Hearings On Theatre TV Uncertain

FUTURE of theatre TV hearings before the FCC remained uncertain last week as the Commission studied the answers given to its questions by theatre TV attorneys two weeks ago [B•T, Feb. 16].

Just how the Commission might decide the worrisome problem of exclusive theatre TV frequencies—requested by motion picture producers and exhibitors—was undetermined last week. One close observer foresaw three possibilities:

● Commission might resume the two-days-a-week hearings with no change. Or, it might reframe the issues to speed up the proceedings.

● Commission might order the participants—Motion Picture Assn. of America and the National Exhibitors Theatre Television Committee—to submit the remainder of their case in writing, in order to conserve FCC's time.

● On the grounds that it was familiar with the issues involved, the Commission might issue a decision either granting the request for an allocation for theatre TV or denying that application. This would be based, it was felt, on the fact that all the engineering and accounting data were in and that the policy issues were aired by Attorneys Vincent B. Welch of MPAA and Marcus Cohn of NETTC at the oral argument two weeks ago.

At that time, attorneys for the theatre TV interests answered eight Commission questions regarding the possible use of common carriers for theatre TV, who might operate theatre TV services if the FCC approved a special allocation, and how much use the motion picture industry might make of the spectrum space if their request was granted.

In their oral statements, the attorneys argued that common carriers could not furnish the facilities requested, that they intended to present witnesses to discuss how and who will operate the TV services and how much use might be made of it.

Theatre TV hearings began last October with technical and accounting data [B•T, Oct. 27, 1952]. Requested for exclusive theatre TV frequencies were 360 mc in the 5925-6875 mc band (now allocated for common carrier use). As alternates the motion picture interests suggested use of the Industrial Radio frequencies, 6575-6875 mc extended down to 6425 mc., or a band beginning at 10,700 mc (band 10,700-11,700 mc is allocated to common carrier fixed circuits).

Sarnoff Says Military Can Save $5 Billion

SAVINGS totaling $5 billion, about 10% of the military budget, can be made in the opinion of the Citizens Advisory Commission on Utilization of Manpower, headed by Brig. Gen. David Sarnoff, chairman of the board of RCA.

The 10-man commission of industry leaders disbanded Wednesday after Gen. Sarnoff submitted a final report to Charles E. Wilson, Secretary of Defense. The report said the armed services could operate effectively with 500,000 fewer members.

The commission started its project last November. Gen. Sarnoff had been named Oct. 22 by President Truman to head the organization.

Secretary Wilson named a new committee Thursday to develop a plan to recommend ways of reorganizing the Defense Dept. Gen. Sarnoff was included in the seven-man group, which is to report by April 30.

Hearing Coverage

NBC-TV Washington's production crew sweltered daily in 180-degree temperature in the network's mobile unit outside the Senate Office Bldg. during Voice of America hearings. NBC installed video cameras, using two for live presentation each morning from 10:30 until 12 and a film camera for newsreel clips in its local and network features. NBC radio recorded all proceedings for a 50-minute edited version aired nightly five minutes after midnight. No estimate was available on the number of viewers. WMAL Washington also covered the hearing.

INDUSTRY TO FIGHT EQUAL TIME RULES

BROADCAST industry began to roll up its sleeves in earnest last week with the avowed purpose of taking the thistles out of Sec. 315 of the Communications Act.

This is the provision which requires broadcasters to give all political candidates equal opportunity on the air if they permit one to use their facilities and also forbids them from censoring a candidate's speech.

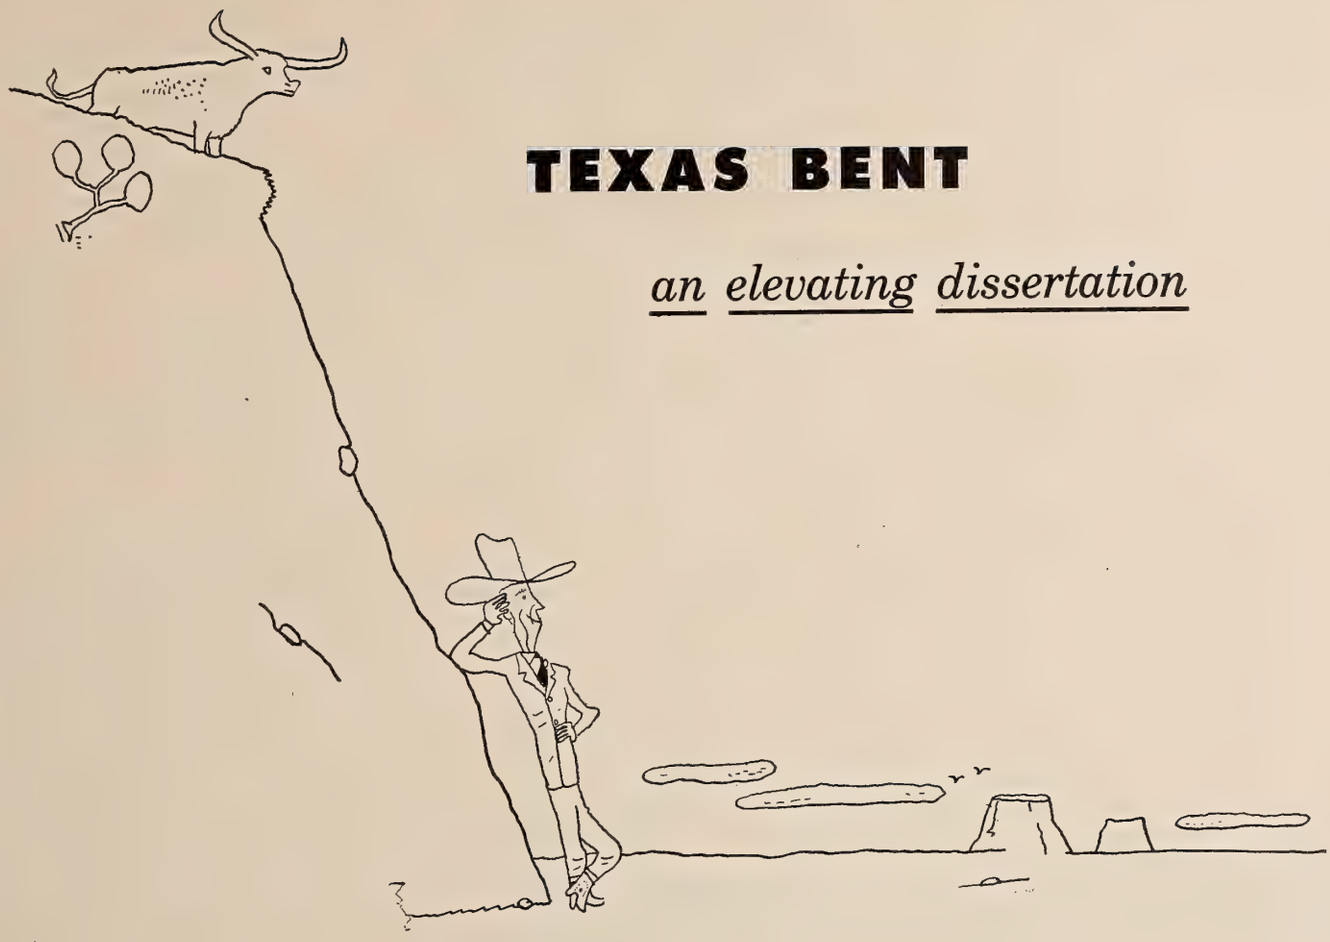
Approved by the joint board of NARTB at its Florida meeting three weeks ago, and cleared with non-NARTB members, the all-industry assault on the vexatious no-censorship provision has as its primary aim the elimination of that ban.

Ready for Compromise

Failing that, the industry is prepared to accept a bill which will permit broadcasters to delete libelous and slanderous material from the broadcast orations of political candidates.

This would, according to Ralph Hardy, director of NARTB Government Relations, who is captaining the fight, put broadcasters back in the position they occupied before the FCC's 1948 Port Huron decision. This said, in effect, that broadcasters may not touch the speech of a political candidate, whether or not it contained libel or slander.

It was this FCC dicta which put broadcasters on the horns of a dilemma. On the one hand they could be sued for libel and on the other hand they could not protect themselves by forcing obstinate politicos to delete the offending material.



Mr. Hardy has spent the last two weeks preparing the strategy for putting the industry's case before the Congress and the public.

Next steps, he said last week, were to seek a sponsor for a bill to eliminate the offending no censorship provision from Sec. 315.

He has conferred with Reps. Walt Horan (R-Wash.) and Joseph P. O'Hara (R-Minn.), both of whom introduced bills in the 82nd Congress touching on this subject.

Rep. Horan recommended that Sec 315 be changed to grant broadcasters immunity from libel if aired by a political candidate. This was included in the House version of the McFarland Act last year, but was stricken from the final version in conference. This was done, said the conferees, because the subject had not been explored in hearing.

Rep. O'Hara suggested that Sec. 315 be amended by giving the broadcasters the right

TEXAS BENT

an elevating dissertation

FLYING across the unfenced sky, or looking from the windows of transcontinental trains, you miss the up-and-downness of the Panhandle's picturesque barrancas. Back in the days when a mile still had meaning, land-hungry settlers bought countless acres cheap—and unseen. One such stopped in the Land Office, so a story goes, to get directions to his newly acquired property. He got back a month later, was recognized by the clerk, who asked if he had located his land without too much trouble.

"Yes," the settler said, "I found it, but I couldn't get over it. All I could do was lean up against it."

KGNC's 10,000 watts of power climb over, under, around, and through the tamed territory of Texas, New Mexico, Kansas, Oklahoma, and Colorado which makes up our market—78 counties in all—of oil-, gas-, cotton-, wheat- and cattle-rich country. Amarillo is the wholesale and shopping center for this enormous area. If you want to "lean up against" about two million prosperous people via radio we'll be mighty glad to help you. And soon this spring you can lean on TV.

REPRESENTED BY THE O. L. TAYLOR COMPANY

to delete defamatory material, but iterated that there should be no censorship of political material. This was voted down on the floor of the House during debate on the McFarland Act. Rep. O'Hara reintroduced the bill in this session of the 83rd Congress. It is HR 539.

It is understood that Rep. Horan does not intend to reintroduce his bill exempting broadcasters from damages for libel. General consensus of radio attorneys, as well as NARTB, is that there is doubt of the constitutionality of such a course.

NARTB supported Rep. Horan's bill last year, but only as a stop-gap measure to give broadcasters some protection during the 1952 elections.

NARTB will support Rep. O'Hara's bill, Mr. Hardy said, if it is changed to indicate that the deletion of slander or libel does not constitute censorship. This is if it becomes obvious that there is no chance to delete the whole provision regarding censorship.

Fundamentally, NARTB would like to see Sec. 315 eliminated entirely, Mr. Hardy explained. Realizing that this is a long-range objective—and not likely to be realized in this Congress—the next best step is the cancellation of the obnoxious no censorship section, he said.

NARTB will oppose vigorously, Mr. Hardy added, any attempt to extend the blanket of Sec. 315 to include spokesmen for candidates. This was part of the Horan bill which deleted from the final draft of the McFarland Act.

Spokesmen Excluded

That Sec. 315 does not encompass spokesmen for candidates was established in a 1949 U. S. Court of Appeals ruling in Philadelphia *(Felix v Westinghouse Radio Stations)*.

Reasons for giving broadcasters control over all that goes out over their station's transmitters, including the speeches of political candidates, was explained by Mr. Hardy in this wise:

The Communications Act now says that the licensee is responsible for what he broadcasts. Since he is responsible for operating in the public interest, he should be given the right to save himself from slander suits. As a responsible citizen of his community, the broadcaster can be trusted to deal with the problem of political candidates' censorship with extreme care. If any broadcaster were to act arbitrarily or capriciously, a candidate has every right to appeal to the FCC.

In addition to the constitutional question, another reason why NARTB has decided not to throw its weight behind immunity legislation is this, according to Mr. Hardy:

If broadcasters are declared immune to libel damages by legislation, it may be the first step in exempting broadcasters from any responsibility over what goes out from their stations. This logically leads to a common carrier concept (where the carrier is not responsible for the content of his "traffic") which is anathema to U. S. broadcasters.

That hearings may be held on this subject early in this Congress is virtually assured. It is known that Rep. Charles A. Wolverton (R-N. J.), chairman of the House Interstate & Foreign Commerce Committee, is anxious to put this problem at the head of his communications agenda.

ZENITH SUBMITS CH. 2 BID AGAIN

PETITION for reconsideration was scheduled to be filed late Friday by Zenith Radio Corp. asking the FCC to rescind its order dismissing the Zenith application for Ch. 2 in Chicago.

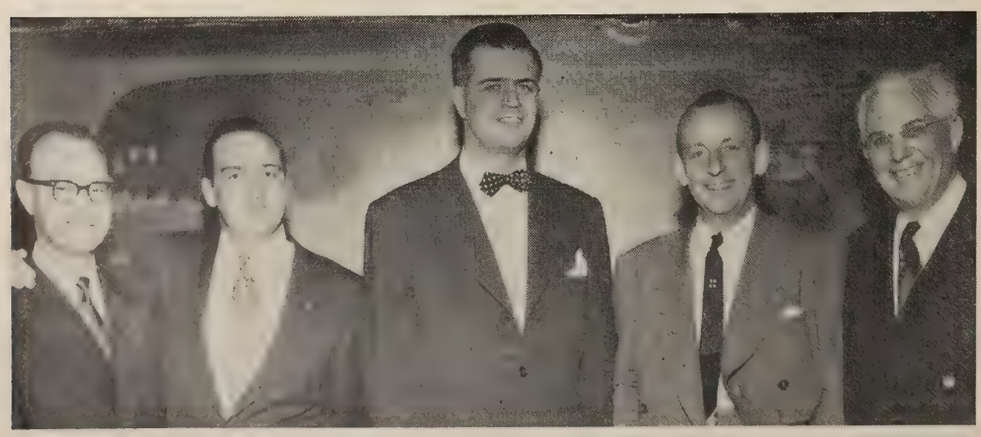
This was done two weeks ago in conjunction with the FCC approval of the merger of ABC and United Paramount Theatres Inc. [B•T, Feb. 16].

As part of the merger, CBS bought UPT's WBKB (TV) Chicago for $6 million. The merged company had to sell one of its two TV stations in Chicago (ABC owned WENR-TV) under the Commission's duopoly rules forbidding the ownership of more than one station in a market by a single company.

WBKB, now CBS owned and renamed WBBM-TV, is due to change from Ch. 4 to Ch. 2 under the FCC's Sixth Report and Order [B•T, April 14, 1952].

FCC's Reasons for Dismissal

The Commission dismissed Zenith's application for Ch. 2, which was filed in 1948, on the grounds that Zenith relinquished its rights by not participating in the allocations proceedings and in the WBKB renewal case (part of the multi-faceted Paramount case).



The Zenith petition, it is understood, will stress that it is being discriminated against. It will cite the Lancaster, Pa., case which it will claim is similar to its position.

In the Lancaster situation, the Commission ordered WGAL-TV to change from Ch. 4 to Ch. 8. WLAN Lancaster was an applicant for Ch. 8 and protested the change without hearing. The Commission ordered both applications to hearing, but granted WGAL-TV a conditional grant to operate on the higher frequency. The Lancaster station is now operating on Ch. 8, with WLAN having an appeal in the U. S. Court of Appeals against the Commission's conditional grant to do this.

Rumors that CBS and Zenith were working to keep both Ch. 2 and Ch. 4 in Chicago were dubbed unfounded by both CBS and Zenith officials. H. Leslie Atlass, CBS Central Division vice president, said they were "absolutely incorrect." He said that WBBM-TV had ordered a 100-kw Ch. 2 transmitter and that the transmitter was scheduled to go into operation in three or four months.

Ch. 4 is due to be used by Milwaukee's WTMJ-TV (now on Ch. 3) when WBBM-TV moves to Ch. 2.

The frequency changes, required by the FCC in 30 instances are to overcome interference in the light of the new allocations.

MICHIGAN VIPs greet Worth Kramer, WJR Detroit vice president and general manager, after Mr. Kramer's address at the annual VFW dinner in Washington. L to r are: Sen. Charles E. Potter (R-Mich.); Jasper Kohn, Michigan state VFW commander; Gov. G. Mennen Williams; Mr. Kramer, and Sen. Homer Ferguson (R-Mich.).

FCC Sets in Motion Procedure To Amend Contract Filing Rule

PROPOSED rule-making procedure was set in motion Thursday by FCC to amend its rule (Sec. 1.342) covering filing of contracts by broadcast licensees and permittees.

Two objectives are cited by the Commission in proposing the change—to define more clearly the types of documents it wishes to have in the files and to eliminate the need for filing some contracts required under the rule as it now stands.

Comments will be received through March 20, with another 10 days for replies. FCC will decide after reviewing these comments whether to hold a hearing or oral argument.

The Commission announced an order adopted Feb. 11 which deletes from its Form 323 (Ownership Report) paragraph 8, lines 7 and 8, requiring that licenses report annually the total sum paid by each stockholder for the stock and date of acquisition. This information is not needed and imposes an unnecessary burden on licensees, it was held. The action applies when the ownership report is used to render an annual accounting of ownership.

Sees Ambiguity

Purpose of the proposal to revise 1.342 is to give the Commission full information on contracts covering ownership, management and control of stations. Some of the provisions are ambiguous, the Commission believes, and experience has shown it has no need for some of the documents not filed.

The revision covers six main classes. These follow:

(a) Documents, instruments or contracts relating to network service, designed to keep FCC informed of compliance with chain broadcasting rules. Not required are transcription agreements; TV film contracts; BMI, SESAC or ASCAP documents; news association contracts. Only network affiliation agreements would be required.

(b) Contracts involving ownership or control of licensees or permittees, or of their stock, rights or interest therein. This is designed to inform FCC on ownership and control along with any changes. It is limited to partnership, association and incorporation instruments; by-laws affecting charter, control, number of officers or directors, voting rights, and any instruments affecting changes in by-laws. Agreements on ownership or voting rights involving transfers and new stock are covered as well as proxies for period over one year; mortgage or loan agreements specifying dividends, purchase of new equipment and maintenance of current assets; agreement showing changes in officers, directors or stockholders as specified in Sec. 1.343.

(c) Documents and contracts on sale of broadcast time for resale, including brokerage deals.

(d) Contracts covering functional music

WEMP

AM 1340 K.C. — MILWAUKEE'S 24-HR. A DAY STATION — FM 94.1 M.C.

WEMP SCORES NEWS BEAT AS AIR FORCE JETS CRASH

MILWAUKEE STATION SHOWS HOW NON-NETWORK PROGRAMMING PLUS WELL-STAFFED NEWSROOM PERMITS SUPERIOR NEWS COVERAGE.

Superiority of WEMP local news coverage demonstrated again January 31 when WEMP News Department broke tragic story of four F-86 Air Force Jets which crashed near Milwaukee.

Station kept ahead of competition during five-day search for planes and two missing pilots. Initial "trouble" flash on police radio January 31 at 6:53 p.m., was broadcast immediately by interrupting music program. Other bulletins followed.

WEMP News Director Don O'Connor hurried to scene of crashes, joined in search, and employed portable tape recorder to gather on-the-spot descriptive material and interviews.

Meanwhile, Newsroom personnel recorded and broadcast phone interviews with USAF Commanding Officer, Truax Field, Madison, home base of the lost jets. WEMP correspondents out in the State accompanied 650 Civil Air Patrol members, Military Academy students and Air Force personnel, plus 50 planes, and advised the newsroom of developments.

Station beat all competition handily with announcement 5 days later that the last plane and pilot's body had been found. News Department received special commendation from Milwaukee Radio Amateur's Club for early notification of crashes that enabled their mobile radio units to aid in search.

NOT CONTENT with wire service reports, WEMP News Director Don O'Connor goes to the scene of USAF jet crashes in Wisconsin with battery operated tape recorder. The disaster took the lives of two jet pilots, cost four planes and endangered the lives of a million people when the pilots bailed out near Milwaukee.

O'Connor joined the Civil Air Patrol and others in the five-day search for two of the pilots later found dead with unopened parachutes. Top news in Milwaukee for a week, WEMP coverage dwarfed other stations.

Advertisement

such as storecasting, transitcasting, background music and similar services.

(e) Time sales to the same sponsor for 2 hours or more per day, unless length of the events broadcast is not under control of the station (sports events, musical programs, etc.)

(f) Documents and contracts relating to the utilization in a management capacity of any person other than an officer, director, or regular employe but also including the latter persons in all cases where such persons receive either a percentage of the net profits or share in any losses incurred in the licensee's operation. With the exception of the two situations specified, this clause would not require filing of agreements with persons regularly employed as general station manager, with sales managers or salesmen, with program and technical officers and employes, with engineering consultants, accountants, attorneys, performers, station representatives, labor unions and similar agreements.

The proposed rule would not require verification of documents and contracts.

HEARST URGES CH. 10 MILWAUKEE CHANGE

THE TV station proposed by Hearst Corp.'s WISN Milwaukee on vhf Ch. 10 will put on more educational programs than are planned by the pending educational applicant there, FCC was told by the station last week in its plea for removal of Channel 10's reserved status and for immediate grant of the WISN bid.

WISN's application, filed five years ago, went through hearing and was in position to receive Commission action as the only applicant for Ch. 10 and then FCC imposed the TV freeze.

The Commission heard oral argument last Monday on WISN's petition, in effect a request for reconsideration of the Sixth Report and Order which finalized the TV reallocation plan and put an asterisk, or reserved-for-education tag, on Ch. 10 in that city. Also taking part in the argument were FCC's Broadcast Bureau, the Joint Committee on Educational Television and the Board of Vocational and Adult Education of Milwaukee, all three of whom supported FCC's reservation of Ch. 10 and opposed the WISN petition. The Board of Vocational and Adult Education last December filed for reserved Ch. 10.

William J. Dempsey, counsel for WISN, pointed out that even though the Sixth Report wiped out all previous hearings, the Commission in its discretion could just as well choose one of four possible uhf channels usable there and reserve it for education, thus freeing Ch. 10 for an immediate grant to WISN, the only long-pending bidder for it.

By this action, he said, FCC could "immediately institute service of a competitive character. We are prepared to go on the air within 60 to 90 days at the most, and will file immediately an application for maximum height and power."

WTMJ-TV, now on Ch. 3 but assigned Ch. 4 under the reallocation plan, is the only existing station there. A post-thaw grant for uhf Ch. 25 to WCAN there was made by the Commission a fortnight ago. FCC also has allocated vhf Ch. 12 and uhf Chs. 19 and 31 there, but multiple applications pend for these facilities.

Noting the educational application "provides an operation of five to ten hours a week," Mr. Dempsey stated in behalf of WISN:

We have committed ourselves to give more hours than that to the very same agencies and put on the very same programs, so that the people of Milwaukee will get exactly the same programs that the vocational school proposes, will get them on a competitive basis with, I think, a better listening audience, will get them without cost, and produced with far more equipment than the school is going to have available on the basis of its application.

Concerning the petition of WFOX Milwaukee to retain procedural rights should Ch. 10 be made available on a commercial basis, Mr. Dempsey pointed out that the pre-freeze Milwaukee TV hearing did not involve all channels "in one pot" as claimed by WFOX, but rather specific bidders for specific channels. He noted WFOX at that time asserted it sought only Ch. 8.

Joseph M. Kittner, assistant chief of FCC's Broadcast Bureau, asserted WISN no longer has procedural rights to Ch. 10 since the Sixth Report wiped out the hearing as it did 10 other similar proceedings. He argued that if FCC deviates from the allocation plan to grant WISN's plea, the basic principles of the whole allocation decision would be undercut.

Charles S. Rhyne and William F. Rasche, appearing for the Board of Vocational and Adult Education, supported FCC's basic legal authority to make the reservation and opposed giving "second class" uhf service to education.

Seymour Krieger, counsel for JCET, directing his argument to the legal issues involved, contended "it is absolutely crystal-clear that Hearst Radio has no rights whatsoever with respect to Ch. 10." He noted FCC has ruled on this point of an applicant's procedural rights four different times during the reallocation proceeding. "The only rights that mature to an applicant is when the applicant gets a grant and then he is given protection," he said.

WNDR vs. WSYR Case To Go to Trial

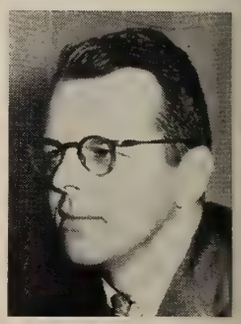
SUIT filed by WNDR Syracuse charging WSYR-AM-TV with antitrust violations will go to trial following rejection by Judge Stephen I. Newhouse, in U. S. District Court, of a motion by the defendants in which it was claimed WNDR's suit was not approved by its board of directors.

WNDR charges Samuel I. Newhouse, two Syracuse newspapers and WSYR-AM-TV with conspiring against it, and asks $1,088,112 in damages. The motion was argued last Dec. 26.

Judge Brennan ruled that "for the purpose of this motion it is sufficient to say that a lack of harmony appears to exist in the board of directors, at least insofar as the prosecution of this action is concerned. In the consideration of this motion there immediately arises the question of whether or not the defendants may attack the legality of the procedure taken by the plaintiff corporation as a basis for the instituting of this action."

The court ruled lack of jurisdiction and insufficiency of process had not been shown. The complaint had not been signed, as required by federal court rules, but the court gave permission to remedy the omission.

FCC Grants KWEM Move



KWEM West Memphis, Ark., 990 kc, 1 kw day, was granted permission last week to move its main studios across the river into Memphis, Tenn., when FCC set aside an earlier action which designed KWEM's request for a hearing.

The application was set for hearing on issues which FCC said related "primarily to future programming policies . . . with particular reference to the needs for expression of the inhabitants of West Memphis." KWEM replied in a petition which contained "all the information" which could be obtained from oral testimony, and which stated that a hearing would delay the decision for an exratordinarily long time. FCC granted the petition and original application.

Hollis Seavey Named Director Of CCBS; Succeeding Quaal

Clear Channel group in Washington will have its new director "in the immediate future." Mr. Seavey leaves MBS as director of its Washington operations.

HOLLIS M. SEAVEY, MBS director of Washington operations and retiring president of Radio-TV Correspondents Assn., has been named director of Clear Channel Broadcasting Service, headquartering in Washington.

Mr. Seavey

In announcing the appointment Edwin W. Craig, WSM Nashville, chairman of CCBS, said Mr. Seavey will assume his new duties "in the immediate future," possibly within a fortnight.

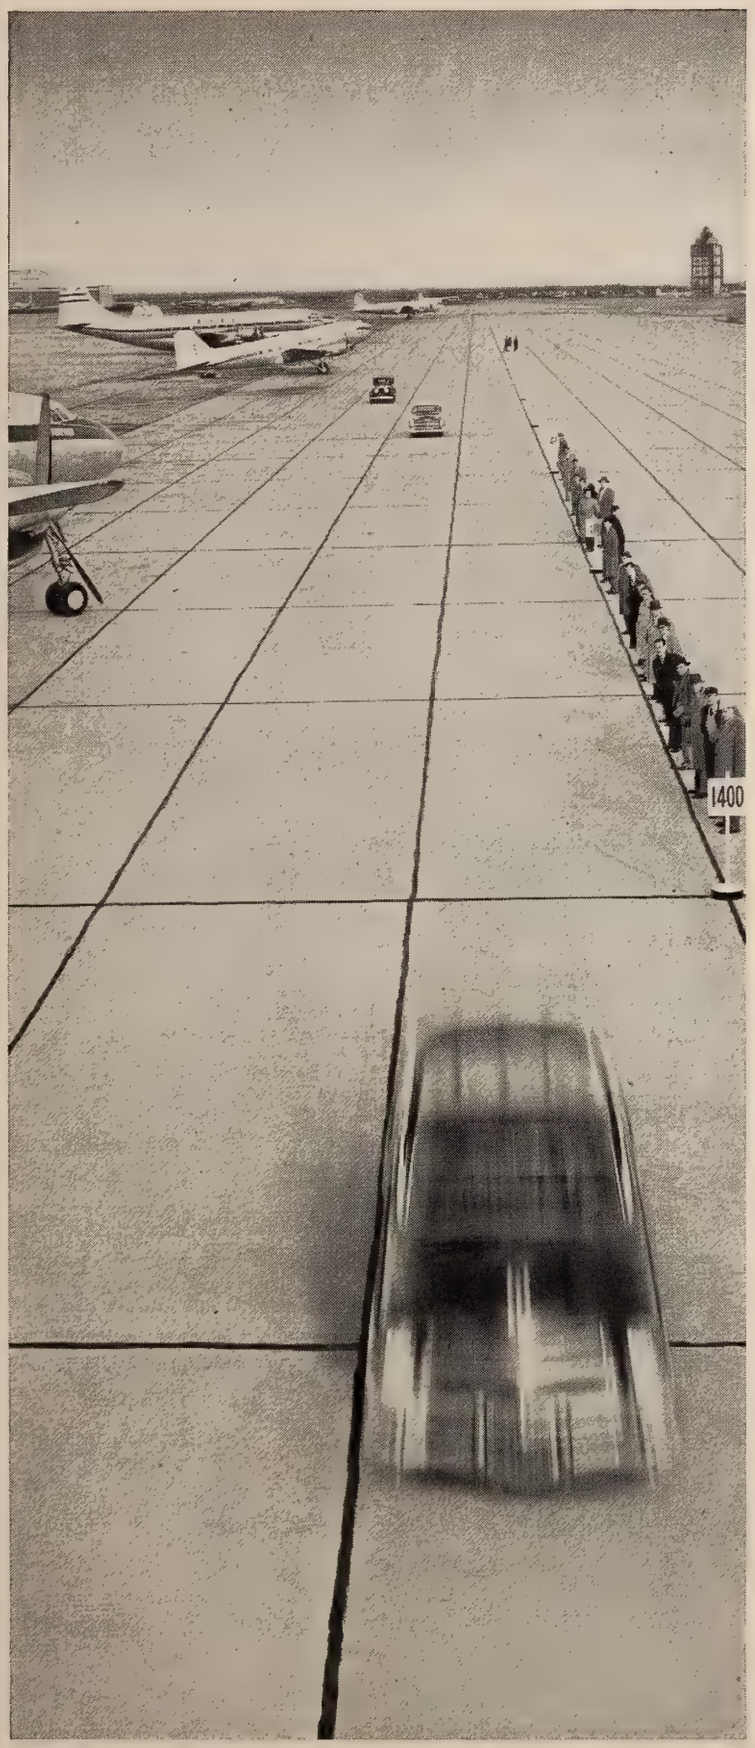
Mr. Seavey succeeds Ward L. Quaal, who resigned last summer [B•T, July 21, 1952] to join Crosley Broadcasting Corp. as assistant general manager. Prior to Mr. Quaal the CCBS directorship had been held by Victor A. Sholis, now vice president of WHAS-AM-TV Louisville.

For three years Mr. Seavey has been Washington operations director of MBS. He had been with WOL Washington when the station was operated by the Cowles interests.

Two weeks ago Mr. Seavey completed his term as president of Radio-TV Correspondents Assn., in which he had been active four years.

Mr. Craig, in announcing the appointment, made this statement: "CCBS has acquired in Mr. Seavey a director with extensive radio experience. We are confident he will carry on with efficiency and skill the functions performed in the past by Messrs. Quaal and Sholis."

The law firm of Kirkland, Fleming, Green, Martin & Ellis serves as CCBS counsel. Norma MaDan continues as assistant to the CCBS director at Washington headquarters in the Shoreham Bldg.



ANA Spring Meet Set March 18 in Hot Springs, Va.

SPRING meeting of Assn. of National Advertisers will be held March 18-20 inclusive at The Homestead, Hot Springs, Va., with programs stressing the role the advertising department can play in making an even greater direct contribution to company profits, ANA president Paul B. West announced last week.

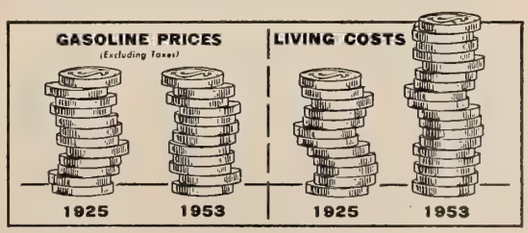
Mr. West

George J. Abrams, advertising manager of Block Drug Co., is chairman of the program committee, whose composition this year is representative of several ANA steering committees and industry groups. Attendance at the spring meeting will be limited to members and invited advertiser guests.

20 SECONDS AFTER start of acceleration test, 1953 car with 1953 gasoline pulls far ahead of same model car using 1925 gasoline. Trailing both new cars is an automobile of the twenties fueled with 1925 gasoline. By every test, including ton mileage, today's gasoline proves 50% better than 1925 gasoline.

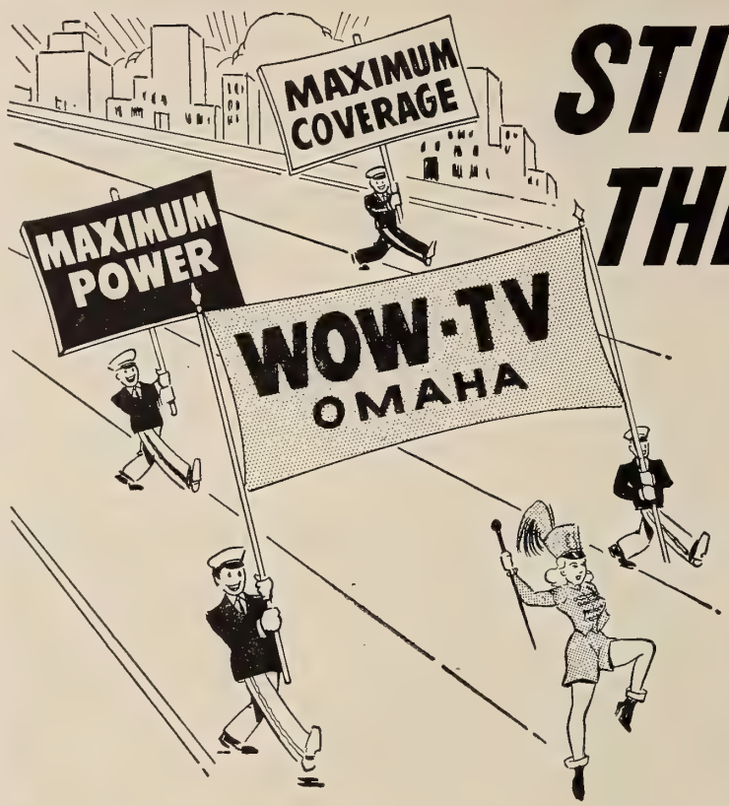
Runway Tests Prove Gasoline 50% Better Than in 1925

Priced the same as it was then, 2 gallons now do work of 3



Dramatic automobile tests at New York International Airport, "Idlewild," prove that 2 gallons of today's gasoline do the work 3 gallons did in 1925.

Today's gasoline, these tests show, is worth 50 percent more by every measure of automobile performance and economy — even taking into consideration the great improvement of car engines and designs. To make test results even more remarkable, today's gasoline still costs about the same as gasoline did in 1925 — *only taxes are higher.* In the same period the price of most things you buy has gone up sharply.



This increase in gasoline quality has been the direct result of constant competition in every branch of the oil industry. Every day, oilmen try to win your business by doing their jobs better, faster, more efficiently.

That's why you get the finest oil products at the world's lowest prices. And this is just one way you benefit from the American system of free competition where privately-managed oil companies have a chance to earn a profit while serving you.

For a free booklet about the improvements in today's gasoline, "2=3," write to Oil Industry Information Committee, American Petroleum Institute, Box 59, 50 West 50th St., New York 20, N. Y.

1953 GASOLINE is an outstanding buy. While general living costs in the U. S. have jumped 52.2% since 1925, gasoline today is priced about the same as gasoline was then — *only the taxes are higher.*

STILL LEADING THE PARADE!

A MEREDITH STATION — BASIC NBC & DUMONT AFFILIATE — Represented by BLAIR-TV, Inc.

AD COUNCIL, NARTB PRAISED FOR ROLES IN 'VOTE' CAMPAIGN

Advertisers, local and network radio-TV contributed heavily to the pre-election vote drive, sponsored by the American Heritage Foundation. From network radio: 308 million radio home impressions; from network TV, 557 million.

RUNDOWN on the contributions of the radio and television industry to the success of the American Heritage Foundation's national non-partisan "Register and Vote" campaign during 1952 was provided by the foundation last week.

Singled out for special praise were the Advertising Council, which mobilized advertising support of all media on behalf of the campaign, and NARTB, which enlisted the assistance of radio and television broadcasters throughout the nation.

The foundation outlined the long range results of the campaign as follows: The participation of 53 national non-partisan organizations with a combined membership of 26,800,000, without reward, from June until November; the assurance that a majority of these organizations will continue in the national effort to increase interest in registration and voting; and a reversal of the trend of non-voting with a majority of the adult citizens "reassuming the role of active participants to roll up a record-breaking registration and vote."

Pointing out that the Advertising Council has handled American Heritage campaigns in cooperation with the foundation since 1947, AHF declared that council efforts resulted in "millions of dollars worth of advertising [which] stressed the importance of registering and voting." Leo Burnett Co. Inc., Chicago, served as the volunteer advertising agency on the campaign.

Four-Month Breakdown

"Between July 4 and Nov. 4, network advertisers, advertising agencies and the four major networks—ABC, Mutual, CBS and NBC—cooperating with the Advertising Council's radio allocation plan, carried more than 1,100 network program messages," foundation officials said. "Register and vote messages reached every type of audience, during the morning and afternoon and night, in news, sports, daytime serial, dramatic, quiz, mystery, musical and comedy broadcasts."

Pointing up the scope of the network radio support, the foundation revealed that an audience study, made by the Advertising Council of 175 selected commercial network programs whose messages were heard by council monitors, indicated that the campaign received a circulation of 308,117,000 radio home impressions. This circulation on network-sponsored programs alone, the foundation stressed, "is more than 75 times the circulation of a single broadcast of the *Jack Benny Show*, one of radio's most popular nighttime programs.

Cooperating with the council's television allocation plan were the network television advertisers, advertising agencies and ABC, DuMont, CBS and NBC, the foundation reported, noting that these joint efforts resulted in the carrying of more than 300 network program messages on "Register and Vote."

"The council made a special audience study of selected commercial network programs whose register and vote messages were seen or heard by council staff monitors," AHF continued. "The study used the audience measurement figures provided by the A. C. Nielsen Co. Through these 150 sponsored network programs alone, the campaign received a circulation of 566,971,000 television home impressions."

The task of mobilizing the efforts of local and regional radio and television stations was assumed by NARTB, the foundation said. Cited as highlights of NARTB's accomplishments were 201,091 unpaid spot announcements donated by 718 stations; 8,173 non-commercial and locally-originated "Register and Vote" programs on the same stations; 172,868 "minute capsules" devoted to voting messages, and 118½ solid 24-hour days of time in the last 11 days before the election.

Highlights of special radio and television support of the campaign, as cited by the foundation, were distribution of a series of "Register and Vote" kits by NARTB and the foundation periodically to some 3,000 radio stations; broadcasting for five minutes daily for 50 days by NBC of radio messages obtained by the foundation from distinguished Americans; broadcasting of a 15-minute Lowell Thomas program, "What Every Voter Should Know," by CBS several days a week; MBS' "Lights On, Votes Out" project, and the carrying by DuMont of 130 vote messages between Oct. 7 and Nov. 4.

NARTB Exhibitors Sign

NARTB associate members have been notified of plans for the services and light equipment exhibits to be held during the annual industry convention April 28-May 1 at the Biltmore Hotel, Los Angeles, and are reserving space. The association has 90 rooms available on the second floor of the Biltmore, according to Arthur C. Stringer, exhibit manager. Four large exhibit halls will house heavy equipment.

Joint BMI-BAB Clinic Proposal Receives Station Acceptance

PROPOSAL for combined BMI-BAB sales-program clinics [B•T, Feb. 16] has been quickly accepted by station operators, and all 42 of the two-day meetings, starting May 25 and continuing through July 11, have been approved, according to Carl Haverlin, BMI president, and William B. Ryan, president of BAB.

Dates and hotels were set last week for seven of the two-day clinics and arrangements for the others were in the works, as well as the complicated travel schedule involved for the meetings, two of which will be in session concurrently approximately 80% of the time. Mr. Ryan stressed the fact that the BAB sales clinics, in the past restricted to personnel of BAB member stations, will be open this year to all broadcasters attending the BMI program sessions.

Clinics definitely scheduled to date are: May 25-26, Hotel Plankington, Milwaukee; June 10-11, Fort Shelby Hotel, Detroit; June 17-18, Seelbach Hotel, Louisville; June 24-25, Mulnomah Hotel, Portland, Ore.; July 1-2, Cosmopolitan Hotel, Denver; July 8-9, Roanoke Hotel, Roanoke; July 9-10, Radisson Hotel, Minneapolis.

WOR-TV Makes New Strides in Engineering and Programming

When FCC approves, WOR-TV will have its transmitter placed atop the Empire State Bldg. at an estimated cost of $484,830. Coincident with this move, station announces program expansion.

WOR-TV New York took two major steps last week—one in engineering, one in programming—to advance its claim to the title, the "Easy to See" station.

It signed for installation of its transmitter atop the Empire State Bldg., already in use by all other New York City TV stations, and applied to FCC for permission to make the change, which it estimated would cost a total of $484,830.

In the program field, the station announced that its pioneering policy of repeating live dramatic shows five nights a week would be expanded to include two "Matinee" performances, and that another block of live repeats on a five-night-a-week basis would be inserted into the regular evening schedule, effective March 7.

Subject to FCC approval, WOR-TV transmissions from the Empire State locations would start in early summer, Mr. O'Neil said.

The application for FCC approval of the change estimated that "acquiring or constructing buildings" would cost $110,000 and modification of existing equipment, $25,000, and placed total cost of change at $484,830.

It estimated the station's operating cost the first year after the change would amount to $3,240,000 and that revenues for that year would exceed the estimated operating cost by $260,000.

Station spokesmen said no plans had been made for disposition of WOR-TV's present tower in North Bergen, N. J., which was erected in 1949 at a cost of $300,000. They said it might be dismantled (at an estimated cost of $100,000) and sold to a new TV station, or might be retained as a supplementary tower.

THOMAS F. O'NEIL (r), president of General Teleradio Inc., owner of WOR-TV New York, signs contract for installation of transmitting equipment atop the Empire State Bldg. William J. Keary (l), president of the Empire State Bldg. Corp., points to scale model of the skyscraper.

DEAR TIME BUYER:

The station that SELLS is the station to buy in Cincinnati.

It takes more than AUDIENCE TO SELL.

It takes AIR SALESMANSHIP. WCKY gives you BOTH.

We at WCKY have the salesmen to do the job—salesmen like Rex Dale and the Makebelieve Ballroom, Leo Underhill and Breakfast Time, Nelson King and the Daily Hit Parade, Paul Miller and the Paul Miller Show, Nelson King and Marty Roberts on the Jamboree.

WCKY backs up the "know how" of its salesmen with solid, well established local programming of news and music.

Buy WCKY—the station that sells because of its "know how"—the station that concerns itself with your share of sales—the station that is known as THE SELLINGEST STATION IN THE NATION.

Sincerely,

L. B. Wilson

TY-FOUR HOURS A DAY • SEVEN DAYS A WEEK

NEW TV GRANTEES PREPARE PLANS

Both new and "old" TV station grantees summarize latest target dates, network affiliations, construction and other plans.

WHEN will last week's new television station grantees get on the air?

Here are their reports, as told to B•T:

WJMR-TV New Orleans, uhf Ch. 61 grantee, will begin construction immediately and the station will be rushed to completion, according to a joint announcement from Chester F. Owens, president, George A. Mayoral, executive vice president, and James E. Gordon, vice president and general manager.

Mr. Mayoral, who also is associated with General Electric as a TV advisory engineer, will supervise the construction.

The joint announcement said it was impossible to set a definite date, but earlier Mr. Owens reported to B•T that he hoped to have the new station on the air within 90 days. He declared negotiations were in progress for GE equipment. There has been no decision as yet in connection with either network affiliation or station representation, he said.

Time Saving

The announcement said much time will be saved because the TV antenna will be atop the present WJMR tower on the Jung Hotel, which, according to the station officials, is the highest tower in the city of New Orleans. Since the transmitter and studio equipment will be housed in the hotel, weather conditions will in no way hamper the construction, they said.

Gene Cagle, president of Texas State Network, told B•T that no definite target date yet could be set for the uhf Ch. 20 operation at McAllen, Tex. He is hopeful of placing the station on the air by September, he said, but this is dependent upon delivery of equipment. DuMont equipment was specified, Mr. Cagle reported. No national representative has been named and network affiliation has not yet been negotiated, he said.

The *Hannibal* (Mo.) *Courier-Post*, permittee of KHMO-TV, said last Wednesday, following FCC's action in granting vhf Ch. 7, that a target date for operation would be set as soon as problems in connection with the transmitter location are settled. It was thought the station would be on the air by fall. RCA equipment is specified. KHMO representative is John Pearson Co. Negotiations for network affiliation will be undertaken promptly, it was stated.

Leon Podolsky, president of Greylock Broadcasting Co., uhf Ch. 74 grantee for North Adams, Mass., said he has no plans for starting date, network affiliation or national representative.

Beloit Broadcasting Co., which was granted uhf Ch. 57 a fortnight ago, expects to begin telecasting sometime this fall, Sidney Bliss, president of WGEZ Beloit, said. The new TV station has named George W. Clark as national representative, Mr. Bliss added. He said equipment has not been ordered yet, nor had the type been determined. He will negotiate network affiliation within the next fortnight. The station, he said, would operate with a 1 kw transmitter, using a 500 to 600 ft. antenna.

Allen B. DuMont Labs. Inc., Clifton, N. J., said it shipped a 500 w transmitter last Thursday to KCJB-TV Minot, N. D., vhf Ch. 13 grantee. The station was to apply for special temporary authorization from FCC last week to begin operation, DuMont representatives said.

The equipment firm reported the station has been operating a closed circuit TV service to bars, eating places and hotels as an interim substitute for regular on-the-air operation, meanwhile training personnel to operate TV equipment.

Temporary Antenna

DuMont said that the station will build a 187 ft. temporary antenna tower atop KCJB (AM)'s building at 104 Main St.

John W. Boler is president and general manager of the station, target date of which is set for May 1, according to DuMont Labs.

WKNB-TV New Britain, Conn., which began operating Feb. 13, was hooked into the Bell System's nationwide TV network facilities the following day, AT&T, New York, reported. Network programs are sent to the station from the New York-Boston relay system, beamed over a new microwave link to a receiving tower near WKNB-TV, the announcement said. With WKNB-TV, AT&T now serves 120 TV stations in 76 cities, the telephone company said.

The official start of operations for WKNB-TV, on uhf Ch. 20, came when the station put its test pattern on the air at 11:55 p.m., Feb. 11, the station said (see picture).

The station went on with full 20 kw radiated power, it reported. WKNB-TV claimed it received 150 telephone calls "from all parts of central Connecticut reporting very good reception," during the midnight to 1 a.m. test pattern period the opening night.

WKNB-TV said it is New England's first uhf station, and it said first reports from dealers and distributors indicate a "tremendous" demand for uhf converters in the area.

WROV-TV Roanoke, Va., assigned uhf Ch. 27, aired its first test pattern at 12:35 a.m. Sunday, Feb. 15, Frank E. Koehler, general manager, told BROADCASTING • TELECASTING.

"Reception at five widely scattered pick-up points included the downtown area and various residential areas showed the best test patterns ever seen in this area—excellent," Mr. Koehler said.

"Some inside antennas—some outside" were used, he reported.

Mr. Koehler said test patterns would be aired daily from 10 a.m. to 5 p.m., and 7:30 p.m. to 9 p.m.

According to George Burgeon, chief engineer of WFPG-TV Altoona, Pa., that station, assigned vhf Ch. 10, is ready to go on the air as soon as an 86-foot General Electric 12-bay antenna is erected atop an 89-foot tower on Wopsy Mt., five miles northwest of Altoona. General Electric said the antenna height above average terrain will be 990 ft.

Network affiliation for two stations was announced last week:

KING-TV Seattle, Wash., a pre-freeze station on the air since 1948, has announced basic primary affiliation with NBC-TV in the Seattle-Tacoma area effective March 1.

Harold Cowgill, manager of WTVP (TV) Decatur, Ill., said his station would be affiliated with CBS-TV.

WBZ-TV Boston was to have increased its power to 100 kw last weekend, barring unforeseen delays, according to W. C. Swartley, manager of Westinghouse Radio Stations in New England. WBZ-TV is a pre-freeze station, having gone on the air in 1948.

Change in call letters for North Jersey's first uhf station was announced by the Atlantic Video Corp., Asbury Park, N. J., of which Walter Reade Jr., motion picture theatre circuit executive, is president.

The new call letters for the Ch. 58 outlet are WRTV (TV), which stand for the "Walter Reade Theatre of the Air," according to the station. Station officials claim there should be good reception in an area 30 miles from Asbury Park, which will include the lower portion of Manhattan, as far north in New Jersey as Newark, as far south as Toms River and as far west as Hightstown.

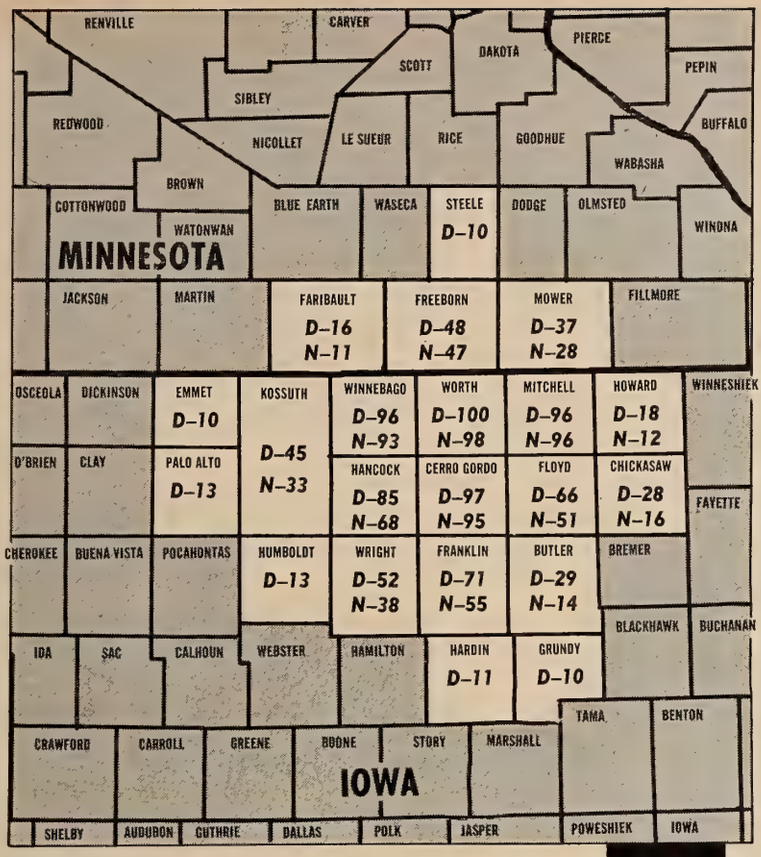
Harold C. Turke, appointed coordinating director for WRTV (TV), is formulating equipment and operational plans for the station.

THROWING switch to link new uhf Ch. 30 WKNB-TV New Britain, Conn., with CBS-TV on Feb. 13 is President Julian Gross (r), assisted by Manager Peter B. Kenney.

Further Staff Changes Made For CBS-TV's New WBBM-TV

APPOINTMENT of William L. Ryan as program director of WBBM-TV Chicago was announced last week by H. Leslie Atlass, vice president of CBS Central Div.

Mr. Atlass, who also is general manager of WBBM, will broaden his duties to include similar managerial responsibilities for WBBM-TV. Mr. Ryan has been production manager of the old Balaban & Katz WBKB (TV) Chicago.



Earlier, George J. Arkedis, CBS-TV central network sales manager, was named WBBM-TV sales chief [AT DEADLINE, Feb. 16].

Other changes at WBBM-TV involve Joseph Novy, who became chief engineer. He was replaced in this post at WBBM by William Fligel. Richard G. Cahill also joined the new CBS-TV outlet as an account executive.

Mr. Ryan's background includes legitimate stage and motion picture production, and radio and electronics engineering. He joined B&K's WBKB in July 1946 as a lighting technician, later became studio manager, and later, in 1947, production chief.

Mr. Arkedis was with CBS in New York prior to joining CBS-TV sales in Chicago in June 1949. He later was an account executive with CBS-TV Network Sales in New York. Previously he was associated with McGillvra Co., station representative firm.

Mr. Cahill formerly was with NBC-TV film sales and WNBQ (TV) Chicago, NBC television outlet.

WXOK Takes the Air; Third 'OK' Station

LOUISIANA Gov. Robert Kennon took part in dedication ceremonies for WXOK Baton Rouge. Station went on the air Feb. 16 with 1 kw on 1260 kc as the third in the "OK" group. Other outlets are KAOK Lake Charles and WBOK New Orleans, all owned and operated by Jules J. Paglin and Stanley W. Ray Jr.

Show, on which other civic leaders appeared, was aired by all three stations.

WXOK's tower and transmitter building are at Port Allen, near Baton Rouge, and station headquarters are in air-conditioned offices in the downtown area. Lee Bullis, formerly of WPNX Phenix City, Ala., is general manager; Eddie Bishop, formerly of WBOK, program director, and Charles Hogue, formerly of KEUN Eunice, La., chief engineer.

New Knoxville Station

WKXV Knoxville, Tenn., took the air Feb. 14 with a block program schedule which includes "gospel, race and hillbilly" formats. Station leases quarters occupied previously by WIBK, now off the air, and operates on 900 kc with 1 kw as an independent.

Station manager is Tom Carr, who will continue to manage the Georgia Assn. of Local Stations, Atlanta, which handles regional sales for the new outlet. He is part owner of the licensee, Knoxville Ra-Tel Inc., with his father, Roy Carr, city treasurer of Savannah, Ga., and Ben Akerman, chief engineer, WGST Atlanta, who is technical advisor of WKXV.

Storer Plans Own N. Y. Bldg.

STORER Broadcasting Co. is to move its New York office to a five-story building at 118 E. 57th St., which the company has leased under long-term contract and is renaming Storer House, around April 1 upon completion of alterations. Ground and second floors will be used for the national sales and executive offices. Upper floors, designed as living quarters, will be used by visiting executives. Pending the move, Storer New York offices remain at 488 Madison Ave.

TV 'Sneak Previews'

WLWT (TV) Cincinnati reports it is using the movies' "sneak preview" technique to pre-test audience reactions to projected new shows. Holdover audiences from live studio shows attend the preview of a new show and are given comprehensive questionnaires for audience remarks. If reaction is completely unfavorable, the show is dropped before being aired, the station reports. If reaction is favorable, the best suggestions from the questionnaires are incorporated into the show. Thus, the new show, when released, has public approval, according to the station.

WCBS-TV Increases Power

CBS-TV's WCBS-TV New York increased its effective radiated power by more than 2½ times Thursday and became the first TV station in the metropolitan New York area to broadcast its signal with the full power permitted by the FCC, it was announced by General Manager Craig Lawrence.

It was estimated that the cost of increasing the power of CBS-TV's transmitting station to 43 kw exceeded $100,000. Station is on Ch. 2.

Philip L. Jackson Dies

PHILIP LUDWELL JACKSON, 59, president of KPOJ-AM-FM Portland, Ore., and editor and publisher of the *Oregon Journal,* Portland, died Feb. 14 in that city. He had suffered a heart attack earlier.

Survivors include his wife, Mrs. Emma D. Ransom Jackson and his mother, Mrs. C. S. Jackson.

KSTP Adds 'Quickie' Spots

TEN-WORD announcements are included in Rate Card No. 37 released by KSTP Minneapolis. Each "quickie" spot sells without discounts for $20, Class A; $10, Classes B, C, and D. Station also is selling Saturday and week-long packages of 20-second and one-minute announcements. Five one-minute spots on Saturday for example, aired before 6 p. m., cost $75, with no discount allowed. Ten one-minutes per week, all in Class A time, cost $500.

SEVERE ice and wind storm destroyed AM-FM antenna tower of WLYC-AM-FM Williamsport, Pa., on Jan. 11. Chief Engineer Norman Briggs surveys the wreckage which resulted in a loss of eight hours programming on AM and 13 on FM before operation was resumed.

ABC PLANS ADDED POWER FOR TV; EXECUTIVE REALIGNMENTS MADE

At the end of its first week under the merged banner of American Broadcasting-Paramount Theatres Inc., the network had set up its plans for more power among its owned-and-operated outlets, taken first steps towards stronger programming, and assigned more executives to key posts within the organization.

FORTIFIED by United Paramount's financial resources, ABC began to flex its muscles last week, announcing plans for a $2 million-plus expenditure on power boosts for its owned TV stations [B•T, Feb. 16], negotiating for new program properties and making realignments in its executive roster.

In its first full week as a division of the new American Broadcasting-Paramount Theatres Inc., ABC officially declared its intention of becoming the nation's "first" network with "superpower television" for its owned stations, and followed with a series of moves on other fronts. These included:

- Acquisition of two "top" TV story properties, with pilot films to be produced before the end of April at costs of approximately $18,000 each.
- Election of John Mitchell, general manager of the network's WBKB (TV) Chicago, as a vice president of ABC [B•T, Feb. 16].

Mr. Mitchell

- Reassignment of William Phillipson to the post of general manager of radio and TV operations of ABC's West Coast Div., to assist the new vice president in charge of the division, Earl J. Hudson, in expanding ABC West Coast Activities. Mr. Phillipson, who has been Western Div. director, had been slated for transfer to New York as an assistant to ABC President Robert E. Kintner.
- Appointment of Don L. Kearney, national sales manager for ABC's owned TV stations, as assistant national TV sales manager for the network.

Story Properties

The new TV story properties acquired by the network are *Pride of the Family*, starring Paul Hartman, comedian and dance satirist, and an adventure movie melodrama "which will star a top-ranking movie personality, yet to be selected," according to Alexander Stronach Jr., vice president in charge of the ABC-TV network.

Music Corp. of America was signed to produce the pilot films and was scheduled to start work on the Hartman program last week and on the second pilot before the end of the month. Both pilot films will be available for showing to agencies and prospective sponsors before the end of April, ABC reported.

The power boost project for ABC's five owned TV stations is laid out in a series of stages scheduled for culmination with increases to the "ultimate" power for the stations in the fall of 1954, according to Frank Marx, vice president in charge of engineering and general services. General Electric equipment will be used.

Mr. Marx noted ABC's WJZ-TV New York already has an FCC grant to boost its power to 110 kw from its present 16 kw, and that applications are pending for grants covering boosts on the other owned stations: KECA-TV Los Angeles, from present 29 kw to 155 kw, and WBKB, KGO-TV San Francisco, and WXYZ-TV Detroit, from present 29 kw to 316 kw.

"Just as in 1948 when ABC was the first television network to put five owned TV stations on the air," Mr. Marx said, "our network again will be the first to have five stations of comparable superpower on the air."

Meanwhile, ABC plans "early" installation of 20 kw amplifiers in all five stations, "which will permit an immediate substantial power increase but by no means the ultimate power which will be available through FCC action," Mr. Marx continued.

Additionally, each of the five stations will get new type antennas "specially designed to render maximum service" in their respective areas. Described as "a decided departure from the standard television transmitting antennas," the new ones are based on designs made by ABC engineers from data which, to a great extent, was secured in connection with installation of KECA-TV's antenna atop Mt. Wilson and on helicopter signal-surveys in connection with WJZ-TV's antenna on the Empire State Bldg.

The new antennas are designed to "recapture" much of the signal ordinarily radiated skyward and concentrate it downward on the service area.

"The final step in the completion of ABC's superpower television program will be the installation of 50 kw transmitters in all five . . . stations," Mr. Marx said. "These will be of the very latest design and will incorporate all the latest engineering advances in tubes and circuitry.

Can Handle Color

"They will be able to handle the color signals as established by the National Television System Committee and will be the first 50 kw vhf transmitters on the air to use high power tubes designed specifically for these units."

Mr. Marx added that "all of the designs and data have been made generally available to both the television and the engineering industries, and already many consultants have recommended their adoption by their clients."

Among ABC's executive promotions and realignments, the election of Mr. Mitchell to a vice presidency, announced Thursday by President Kintner, came as no surprise. He has been general manager of WBKB (Ch. 4) since 1948 under the station's ownership by Balaban & Katz, a United Paramount Theatres subsidiary, and assumed supervision of WBKB

(Ch. 7) when the ABC-UPT merger was approved and ABC's WENR-TV took over the WBKB call.

As vice president in charge of WBKB, Mr. Mitchell will report to Slocum Chapin, ABC vice president in charge of owned TV stations, while John H. Norton Jr., vice president in charge of the ABC Central Div., will continue to supervise ABC's WENR Chicago and the ABC radio and TV networks in that area.

Before entering TV with WBKB, Mr. Mitchell had served in various other capacities with the Balaban & Katz organization, which he joined in 1931. He was in charge of Indiana theatres operated by Great States Theatres Inc., a B&K subsidiary, from 1939 to 1946, and then was in charge of the Central Div. of Great States Theatres for two years before transferring to WBKB.

Phillipson Appointment

The decision to make Mr. Phillipson general manager of the ABC Western Div.'s radio and TV operations represented a reversal of original plans, which called for him to become an assistant to President Kintner. The realignment was seen as a move to strengthen and expedite implementation of Western Div. expansion, utilizing the experience gained by Mr. Phillipson during his tenure as director of the division since November 1951. Officials said that with Mr. Hudson, vice president in charge of the division, he will take a major part in expansion activities.

Mr. Phillipson, a former counsel to the Rockefeller Committee on Inter-American Affairs and to the International Broadcasting Div. of the State Dept., joined ABC in 1950 as a member of the legal department and the following February was made assistant director of TV programming and operations. He continued in that post until his transfer to the West Coast.

Mr. Kearney, named assistant national television sales manager of ABC, assumes his new duties March 2. Formerly with the Katz Agency, representation firm, and with Mutual as co-op sales manager, he moved to ABC in July 1951 as manager of television spot sales. He will serve under Charles R. (Chick) Abry, ABC-TV national sales manager [B•T, Feb. 16].

MORE THAN 1,100 employes of the newly-formed American Broadcasting - Paramount Theatres Inc. met in New York's St. Nicholas Arena to hear details of the company's broadcast plans. Speakers included (l to r) Robert E. Kintner, ABC Div. president; Leonard H. Goldenson, president, AB-PT; Edward J. Noble, finance committee chairman, AB-PT; Robert H. O'Brien, ABC executive vice president; Robert M. Weitman, ABC vice president in charge of talent and programming; Robert H. Hinckley, vice president in charge of ABC's Washington office, and Walter W. Gross, vice president and general counsel of UPT Inc.

Schudt Named CBS Radio Station Relations V. P.

APPOINTMENT of William A. Schudt Jr. as vice president in charge of station relations for CBS Radio was announced Tuesday by Adrian Murphy, president of CBS Radio.

Mr. Schudt

Mr. Schudt, national director of station relations for CBS Radio since September 1951, moves into his new post, after appointment of Herbert V. Akerberg, former vice president in charge of station relations for CBS Radio and TV, as CBS-TV station relations vice president exclusively [B•T, Feb. 16].

The new CBS Radio vice president joined the network in 1929, as manager of publicity for WABC New York (now WCBS). He was appointed general manager of the CBS-owned WBT Charlotte in 1933, and general manager of WKRC Cincinnati in 1938. Mr. Schudt returned to New York in 1940 to serve with the radio transcription division of Columbia Records, a subsidiary of CBS Inc. He was named field manager of CBS station relations in June 1942, and later became eastern division manager and national director under Mr. Akerberg.

CBS Radio Starts Ad Series

CBS RADIO will launch an advertising campaign in leading food and drug publications, beginning next Monday (March 2), to sell network radio to local retail druggists and grocers, it was announced last week by George Bristol, CBS Radio director of advertising and sales promotion.

The significance of the ad campaign, Mr. Bristol said, lay in the attempt of CBS Radio to "talk to the man in the middle, the vital distribution link between the network's clients and its listeners." He noted that the network already reaches the sponsor through its advertising and listeners through its programs.

IN TOWERS—A LOT DEPENDS ON THE POINT OF VIEW

. . . but everything depends on quality design and construction

Whether you look at towers from the viewpoint of a station owner, manager or engineer, you'll appreciate the facts and the "specs" that follow. Let's take an imaginary trip up the new BLAW-KNOX type TG 1000-foot tower*. . .

SAFETY . . . Even at 100 feet, with the first set of guys still far above, you're as high as the average 8-story building. You'll gratefully recall the massive, welded steel base construction below you.

STRENGTH . . . At 500 feet (if you're still determined), you can properly appreciate the solid steel corner legs nearly seven inches thick . . . not to mention the factory pre-stressed, bridge-socketed guys, each proof-tested at full load before shipment.

DURABILITY . . . When you've reached the top of this 1000-foot giant, you'll be happy to know that there are no rust-weakened structural members to "let you down". Every inch of steel has been hot-dip galvanized after fabrication and you can be sure that your tower, with its TV antenna overhead will stand safe and steady.

**Blaw-Knox type TG towers are available from 300′ to 1000′ and over.*

Yes, a lot depends on the point of view, but we think you'll agree that only a quality-designed and manufactured tower is the best bet, in the final analysis. For safety, economy and uninterrupted service, you can always be sure with a Blaw-Knox type TG.

For complete details on Blaw-Knox towers — or on any other TV or AM need — consult with your near-by Graybar Broadcast Equipment Representative. You'll find one near you — in twenty-one principal cities. And, backing him, you can rely on scheduled or emergency deliveries via Graybar's offices and warehouses in 109 strategic locations. *Graybar Electric Company, Inc.*

RADIO'S SALES POWER, LOW COST CITED BY CBS RADIO'S JOHN KAROL

Armed with statistics to support assertions of radio's superiority, John Karol answered some of the claims of other media, particularly television, at a dinner last Wednesday in New York.

RADIO is a continuously growing medium that has proved it moves merchandise and does it at a cost that means profits for the advertiser, John Karol, vice president in charge of sales for CBS Radio, declared Wednesday at a dinner meeting of the Media Buyers Assn. of New York.

In a hard-hitting talk that challenged the allegation that television has superiority of impact over radio, Mr. Karol asserted that network radio is presently "the most efficient buy in the national media field although radio's research regularly measures *far, far less* than radio's complete universe."

He paid tribute to media men by proclaiming that radio "has largely moved out of the plush front offices of the agencies and into the media departments." He indicated that this change has removed radio from the area of "an emotional buy" and paved the way for its acceptance on the basis of audience and cost. But he added pointedly that "the front office is now the guest room of television."

Beside the Point

"It is, I believe, beside the point to say that TV's cost-per-thousand is getting lower or at least not getting higher," Mr. Karol contended. "It's like telling the $15,000 a year man that a Rolls Royce will last longer than a low-priced car. Even though this be true, the Rolls Royce just plain costs too much for him. And the low-priced car does very, very well as a means of comfortable transportation."

In support of his thesis that radio has demonstrated "unbounded ability to move merchandise" at a cost that is profitable for the advertiser, Mr. Karol cited the high percentage of nighttime radio sets-in-use in television homes in the most competitive areas in the country. In New York, Mr. Karol continued, radio sets-in-use in TV homes average "almost 20% straight through the week" and noted that "the four network stations account for over half the listening."

"On the basis of radio sets in television homes, we find more proof of radio's vitality," Mr. Karol declared. "Comparing October 1952 with October 1951, we discover these facts of nighttime radio usage in the four markets with more than one million TV sets: New York, radio listening up 37%; Los Angeles, radio listening up 18%; Chicago, radio listening up 29%; Philadelphia, radio listening up 2%."

Mr. Karol underlined the importance of big TV markets in radio advertising by noting that Colgate-Palmolive-Peet Co. recently added eight major TV markets to its CBS Radio line-up for *Mr. and Mrs. North*. By way of explanation, he quoted Les Harris, Colgate-Palmolive-Peet's radio-TV director as saying:

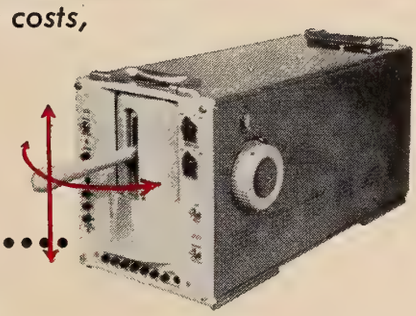
"We discovered that being out of these cities deprived us of a considerable audience and it began to show up in the ratings. We figure there is a 30% or better potential for nighttime radio in these markets."

As another example of radio's vitality, Mr. Karol referred to the more than 100 million radio sets that have been produced since the end of the second World War.

He stressed that radio is not now primarily "a living room medium" and cited 14 million sets in kitchens, 20 million in bedrooms, and more than 25 million radios in automobiles, adding that he believed radio to be "the greatest outdoor advertising medium in America."

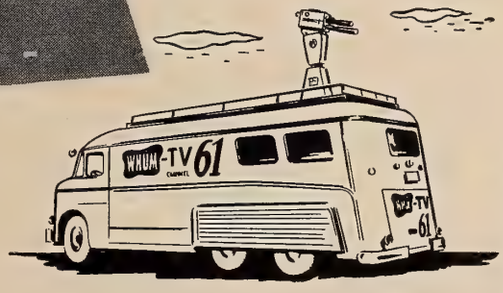
Shaken But Safe

ABC-TV Technical Director John Irvine was back on the job last week after a harrowing experience on Feb. 7 that parallels many TV thrillers. While driving to ABC's studios in New York, Mr. Irvine was stopped by four men who forced him into the rear of his car and sped toward New Jersey. Near New Brunswick, a state trooper halted the car for speeding and discovered the shaken-up Mr. Irvine. The men were arrested and charged with kidnaping.



EXECUTIVES at the CBS Television Affiliates Advisory Board meeting in New York Feb. 12-13 included (l to r) James C. Hanrahan, WEWS (TV) Cleveland; E. K. Jett, WMAR-TV Baltimore; Herbert V. Akerberg, CBS-TV vice-president in charge of station relations; J. L. Van Volkenburg, CBS-TV president; Glenn Marshall Jr., WMBR-TV Jacksonville, Fla.; Clyde W. Rembert, KRLD-TV Dallas, and Philip C. Lasky, KPIX (TV) San Francisco.

GPL REMOTE CONTROL CAMERAS



make debut as WHUM-TV puts UHF in Major Operation

Channel 61 in Reading uses 4 of new GPL chains to cut costs, improve studio-field efficiency

Humboldt Greig, president of WHUM-TV, says: *"We picked GPL cameras to gain a truly major reduction in costs by adding remote control. In fact, we feel these will be self-liquidating cameras due to the savings. We have tested them under the roughest conditions with our mobile unit in the past two months and encountered absolutely no difficulties."*

Marking two major milestones in television, WHUM-TV introduces both high powered UHF and remote control for new techniques in camera operation.

For the opening 30 live-hours per week from this 260,000-watt UHF station, 4 GPL image orthicon chains will be used with remote control pedestals. From as far as 1,000 feet away, all actions of pan and tilt, lens change and focus and iris are easily controlled.

Each camera has a "memory" of 6 pre-set positions. With a four-chain set-up, a director has a choice of 24 camera shots. Pushing a "pre-set" button automatically swings the camera on target . . . with lens, focus and iris in correct adjustment. Speed and ease of operation save time, camera handling, and dollars.

For field operations—covering sports and news—WHUM-TV uses the GPL studio-field interchangeability . . . again cutting costs. Two cameras, complete with remote control pedestals, fit atop the station's mobile unit. Pedestals disassemble in minutes for easy transfer between bus and studio.

WHUM-TV is the first station to equip all its cameras with remote control . . . for tops in quality, for utmost in economy.

STATION OWNERS

Our engineers will be pleased to show you, without obligation, how you can get maximum efficiency and economy in either UHF or VHF operations with GPL studio and field equipment. Write, wire or phone:

American Networks to Get Coronation TV Film at Cost

COVERAGE of the coronation of Queen Elizabeth II on June 2 by the American TV networks will identical so far as the actual ceremony in Westminster Abbey is concerned, all four networks having been promised prints of kinescopic films of the telecast made by BBC, which has exclusive video rights within the Abbey.

The BBC films will run about two hours, according to Alec Sutherland, North American program director of BBC, who said they would be edited from the full telecast which, including the procession, will take about five hours of air time. They will be made available to the U. S. TV networks with no charge except the actual cost of processing the films and making the prints, about $250, he estimated.

Radiowise, each U. S. network may carry the full coronation proceedings, including both the procession, for which each network has been assigned a vantage point along the way, and the actual Coronation ceremony within the Abbey, where the BBC will provide the description. As no commentator from any network will be able to cover the complete line of march of the procession, it is probable that the entire broadcast will be on a pooled basis, oustide as well as within the Abbey.

Willys-Overland will sponsor coronation coverage on CBS Radio and TV networks; General Motors will sponsor the NBC broadcast and telecast [B•T, Dec. 29, 22, 15.]

Radio-TV, Media's Advertisers Figure in Freedoms Awards

RADIO and television, and broadcast advertisers, figured prominently in the $100,000 1952 awards announced yesterday (Sunday) by Freedoms Foundation of Valley Forge, Pa.

Principal awards were presented yesterday by Vice President Richard M. Nixon at Valley Forge. More than 800 American individuals, schools and organizations were named to receive the Freedom Awards for outstanding contributions to a better understanding of the American Way of Life during 1952, according to Kenneth Wells, Freedoms Foundation president.

Winner of the top award for national advertising was Ford Motor Co., a radio and TV advertiser. Top radio award went to Robert Montgomery's *A Citizen Views the News,* sponsored by *Life* magazine, while Bishop Fulton J. Sheen's *Life Is Worth Living* was the top TV award winner.

Special 1952 awards went to ABC, CBS and NBC for radio and television coverage of the conventions and election. Other special awards went to National Committee for a Free Europe for its Radio Free Europe achievement, and to Armed Forces Information & Education Div., for Armed Forces *Talks* and radio programs.

Second place awards in the general category were made to MBS' press information service, for coverage of the conventions, to RCA Victor Div., for recruiting and training Negro engineers, and to Westinghouse Electric Corp., for candidate interviews and combined radio and TV advertising.

Distinguished Service Awards for having been selected for awards in four annual Freedoms Foundation programs were: Advertising campaigns—American Oil Corp., Baltimore; General Mills Inc., Minneapolis; John Hancock Mutual Life Insurance Co., Boston; Republic Steel Corp., Cleveland; Union Oil Co. of California, Los Angeles, and Timken Roller Bearing Co., Canton, Ohio; radio—E. I. duPont de-Nemours & Co., Wilmington, Del.; radio program—NBC and WJR Detroit; radio-television programs—Goodyear Tire & Rubber Co., Akron, Ohio, and WWJ-TV Detroit; television program—National Assn. of Manufacturers, for 16 mm motion picture.

The Foundation's George Washington Honor Medal went to the following radio programs:

National Series Broadcasts—*The People Act,* Ford Foundation Fund for Adult Education, New York; *Paul Harvey News,* Paul Harvey, New York; *Freedom Is Our Business: The People Choose,* World Broadcasting System, New York; *I Was a Communist for the F.B.I.,* Ziv Productions, New York.

National Single Broadcasts — "Mission for Mothers," American Legion Auxiliary, Indianapolis, Ind.; "Commentary on October 18, 1952," Earl Godwin, Washington, D. C.; "The Congressman's Temptation," The Hour of St. Francis, Los Angeles.

Local Series Broadcasts—*Sam Jones, American,* Bank of Douglas, Phoenix, Ariz.; *What Price America,* John J. Dixon, Rockford, Ill.; *On the Record,* KPOJ Portland, Ore.; *The Ohio Story,* Ohio Bell Telephone Co., Cleveland; *Seek The Kingdom,* WCAU Philadelphia; *Brown America Speaks,* WDIA Memphis; *Court of Public Opinion,* WHAM Rochester, N. Y.

Local Single Broadcasts—"George Washington Memorial," Albert Charles, Portland, Ore.; "Headlines from History," Radio Council of Chicago Public Schools, Chicago; "The Knight and the Lady," St. Michael's College, Winooski Park, Vt.; "Living Democracy," WBUR Boston; "Hour of Decision," WCNR Bloomsburg, Pa.; "Citizen Jane Doe," WGN Chicago; "The Story That Never Should Be Told," WHAS Louisville; "Who Killed Dr. Drew?" KOIN Portland, Ore.

George Washington Medals

The following television programs received the George Washington Honor Medals:

See It Now, Aluminum Co. of America, Pittsburgh; *Production for Freedom,* ABC-TV, New York; *Government Is Your Business,* The Christophers, New York; *Man of the Week,* CBS-TV, New York; *Keep Posted,* Curtis Publishing Co., Philadelphia; *Song of America,* General Electric Co., Schenectady, N. Y.; *Georgetown University Forum,* Georgetown U., Washington, D. C.; *The Whole Town's Talking,* Iowa State College of Agriculture and the Mechanical Arts, Ames, Iowa; *Operation Big Shot,* KTLA (TV), Los Angeles; *Longines Chronoscope,* Longines-Wittnauer Watch Co., New York; *Mama,* Maxwell House Div., General Foods Corp., New York; *Youth Wants to Know,* Theodore Granik, New York; *New York Times Youth Forums, New York Times,* New York; *Meet the Press,* Revere Copper & Brass Inc., New York; *Sohio Reporter,* Standard Oil Co. of Ohio, Cleveland; *Victory at Sea,* U. S. Navy, in cooperation with NBC-TV, New York.

Tempest Tossed, Robert W. Watt, Trenton, N. J.; *WCAU Summer School,* WCAU-TV Philadelphia and Board of Education, Lower Merion Township, Cynwyd, Pa.; *Tell It to the Mayor,* WFIL-TV, Philadelphia, Pa.

Headliners Awards

NINETEENTH annual national Headliners competition has been announced, including awards for outstanding news coverage during 1952 in four radio-TV classifications—network broadcasting, radio station, newsreel and television. Entries should be submitted by April 1 to Mall Dodson, executive secretary, Headliners, 2307 Boardwalk, Atlantic City.

TEEGARDEN ELECTED RCA EXECUTIVE V. P.

ELECTION of L. W. Teegarden, vice president in charge of technical products of the RCA Victor Div., to the executive vice presidency of RCA was announced last Thursday by President Frank M. Folsom.

Mr. Teegarden

The executive vice presidency has been vacant since Joseph H. McConnell, now president of Colgate-Palmolive - Peet, moved from RCA to the presidency of NBC in October 1949.

In his new assignment Mr. Teegarden will assist President Folsom in handling the presidential load of administrative matters.

"Under Mr. Teegarden's leadership," Mr. Folsom said, "the activtities over which he has had responsibility have attained new high levels of success. His election to the post of executive vice president of the RCA is fitting recognition of his administrative achievements over the many years he has been with RCA."

The new executive vice president joined RCA in 1930 as a district sales manager. A pioneer merchandiser, he became in 1936 the first to serve as regional manager with responsibility for the merchandising of all RCA Victor products. His success in this post led to the formation of a regional organization on a nation-wide basis.

Mr. Teegarden became assistant general sales manager of all RCA Victor product activities six years later, was named general manager of the Tube Dept. in 1944, and was made vice president in charge of the department in 1945. It was under his direction, spokesmen said, that the Tube Dept. achieved mass production of TV picture tubes for home receivers, contributing to the establishment of TV as a home entertainment medium.

In 1949 Mr. Teegarden's responsibilities were expanded to include supervision of RCA Victor Engineering Products Dept., which, officials reported, has established new sales records under his guidance.

A native of Salem, Ohio, Mr. Teegarden now resides with his wife and two children at Berwyn, Pa., a Philadelphia suburb.

NEREM Meet Set April 11

THE New England Radio Engineering Meeting, sponsored by the North Atlantic Region of the Institute of Radio Engineers, will be held April 11 at the U. of Connecticut, Storrs, Conn., A. M. Millard, publicity committee chairman, has announced.

Papers will be presented as follows: "Some Ancient Propagation Discoveries—Their Lessons," by Maj. E. H. Armstrong, "father" of FM; "New Cosmotron Instrumentation," Dr. Frederick Cowan, Brookhaven Labs.; "Field Tests of Compatible Color Television," Donald Fink, Philco Radio; "TD2 Microwave Systems," R. C. Glancy, AT & T; "Acoustical Design Including Strategic Locations of Loudspeakers," Prof. Robert Newman, consultant, Massachusetts Institute of Technology; "Servo-Mechanisms," Prof. P. M. Schultheiss and C. A. Wogrin, Yale U.

Armour Foundation Silent on Magnetic TV Tape Research

THE Armour Research Foundation of the Illinois Institute of Technology, in Chicago, is quietly pursuing the development of magnetic tape recording of live TV, not oblivious to the claims made by others in the industry but preferring to remain mum on its own progress.

Officially, the Foundation's tape recording experts have nothing to report on its continuing program of research and development, not alone on TV but also types of magnetic recording.

The Foundation professes to be embarked on a scientific venture, along with RCA and other firms, but won't talk about it in the same breath with the more-publicized pronouncements of commercial companies.

And it acknowledges that, if any pronouncements are to be made, its clients or sponsors will have to make them—clients with whom the Foundation maintains licensing agreements. Armour does claim that it has a substantial number of such agreements within the industry itself and conceded that, of course, it is working on magnetic tape recording for TV, as well as other types.

Armour officials had no comment on particular claims made by Bing Crosby Enterprises [B•T, Feb. 16].

Tressel Promotes New Model Of Its Projectall

TRESSEL Television Productions, Chicago, has distributed a circular listing stations using its new Super-300 Projectall equipment. Firm stresses advantage of "versatile low-cost TV programming" and special features. Model combines a double 35mm slide projector, a double 3x4" opaque projector and two 16mm motion picture projectors, projecting them under exact control into one iconoscope film camera. International News Service TV Dept. is sales agent for the company.

UNLOADING of new equipment WPIX (TV) New York will use to increase its power from 21.7 to 100 kw maximum is supervised by (l to r) Tom Howard, chief engineer, and Otis Freeman, assistant chief engineer.

Plamondon Charges Threat In Board Chairmanship Spat

A. D. PLAMONDON Jr., president, Indiana Steel Products Co., told a Federal District Court in South Bend, Ind., last Wednesday that he was threatened with the loss of his position as a result of a dispute over the creation of a board chairmanship in his company.

Mr. Plamondon, president and board chairman of Radio-TV Mfrs. Assn., testified during hearings on a stockholder's suit seeking a preliminary injunction to restrain a majority of five board members from removing him as president.

He charged the threat was made by Paul R. Doelz, Minneapolis securities executive, who opposed his taking the dispute to stockholders. He said he saw no value in the creation of a board chairman, adding that he also differed with Mr. Doelz and two other principals on a suggested refinancing program.

AT&T Requests Relay

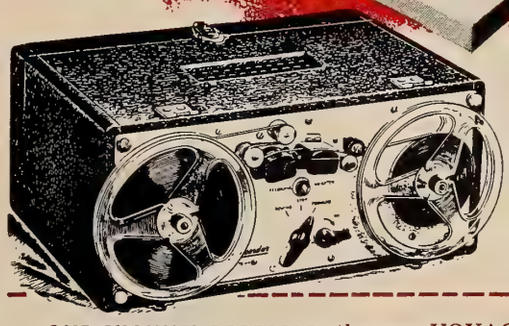
AT&T application filed with FCC Thursday calls for construction of a radio-relay system between New York and Albany which, hooked up with the new Albany-Buffalo relay, will provide a second radio-relay route westward from New York. System will be used initially for TV exclusively, AT&T said, with three of the seven channels devoted to northbound TV service and two to southbound, the other two channels being reserved for protection and maintenance in either direction. Five intermediate relay towers will be erected along the 177-mile skyway, three in Connecticut and two in New York. Present plans call for the route to be ready for TV traffic late this year.

James M. Skinner Dies

JAMES M. SKINNER, 64, retired president and board chairman of Philco Corp., died Feb. 13 at his home in Philadelphia after a heart attack. After graduation by the U. of Pennsylvania in 1911, he went to work for the old Philadelphia Storage Battery Co., later the Philco Corp., and became president in 1931 and board chairman in 1939. Survivors are his wife, the former Florence Sayre, a son, James M. Jr. and a daughter, Mrs. Karl deSchweinitz, Berkley, Calif.

IRE to Hear Sarnoff

BRIG. GEN. DAVID SARNOFF, RCA board chairman, will deliver the major address of the annual convention of the Institute of Radio Engineers, speaking Wednesday evening. Meeting is set March 23-26 at New York's Hotel Waldorf-Astoria.



Plan Engineering Meet

MORE THAN 1,000 engineers and technical workers are expected to attend the 1953 electronics components symposium at the Shakespeare Club in Pasadena, Calif., April 29-May 1. Event is to be sponsored cooperatively by the Radio-Television Manufacturers Assn., the American Institute of Electrical Engineers and the West Coast Electronic Manufacturers Assn. Dr. A. M. Zarem is chairman of the conference executive committee.

THERE'S A **magnecorder** FOR EVERY

Communications Monitoring

1-, 2-, and now 4-channel Magnecorder

ONE-CHANNEL MAGNECORDER—long accepted as the standard professional tape recorder in the communications and broadcast fields. Conversion kits quickly adapt your equipment for all special purposes.

ONE-CHANNEL PORTABLE—the new VOYAGER, a one-case truly portable recorder of professional quality. A standard PT6-AH Magnecorder is mounted back-to-back with line level amplifier which swings forward for instant use. Unsurpassed for remotes or field tests. Lightweight, rugged, reliable.

TWO CHANNELS—The acclaimed new Binaural Magnecorder provides either two-channel monitoring or brilliantly realistic 3-dimensional sound on one tape. Two simultaneous tracks accurately reproduce separate sounds or can provide stereo depth and direction, permitting one sound to be identified among many. The versatile dual channels can also be used for separate two-channel communications monitoring.

FOUR CHANNELS—The first *automatic* continuous recorder that monitors up to four channels at once on a standard ¼" tape. Originally engineered and JANized for the CAA, it is adaptable for utilities and carriers, fire and police calls, airports and civil defense.

Magnecord INC.

THREE-MONTH SAG STRIKE SETTLEMENT

First SAG dispute in 20 years ends as a new pattern for actors' "use payments" is adopted by union board and New York film producers.

SCREEN ACTORS GUILD's 12-week-old strike against producers of TV filmed commercials throughout the nation was at a virtual end Thursday as the union's board of directors and the Film Producers Assn. of New York announced they had approved a proposed contract.

The strike, which has affected some 8,500 SAG members since its beginning Dec. 1, will end officially when the entire membership ratifies the proposal. SAG noted that the tie-up will continue in effect at least until next Monday (March 2), when ratification is expected to be completed.

SAG declared that the contract will establish a new pattern for "use payments" for actors engaged in TV film commercials. It was disagreement over this issue principally that touched off the only strike in the 20-year history of the guild. Though the union modified its original demands [B•T, Dec. 1, 1952], an SAG spokesman told BROADCASTING • TELECASTING Thursday that "we are highly pleased with the proposed contract and especially for the inclusion of the use payment principle."

Highlights of the contract approved by SAG and the New York producers follow:

1. Minimum "production payment" to actors "on camera" will be $70 for each television filmed commercial delivered by producer to advertiser or his advertising agency.

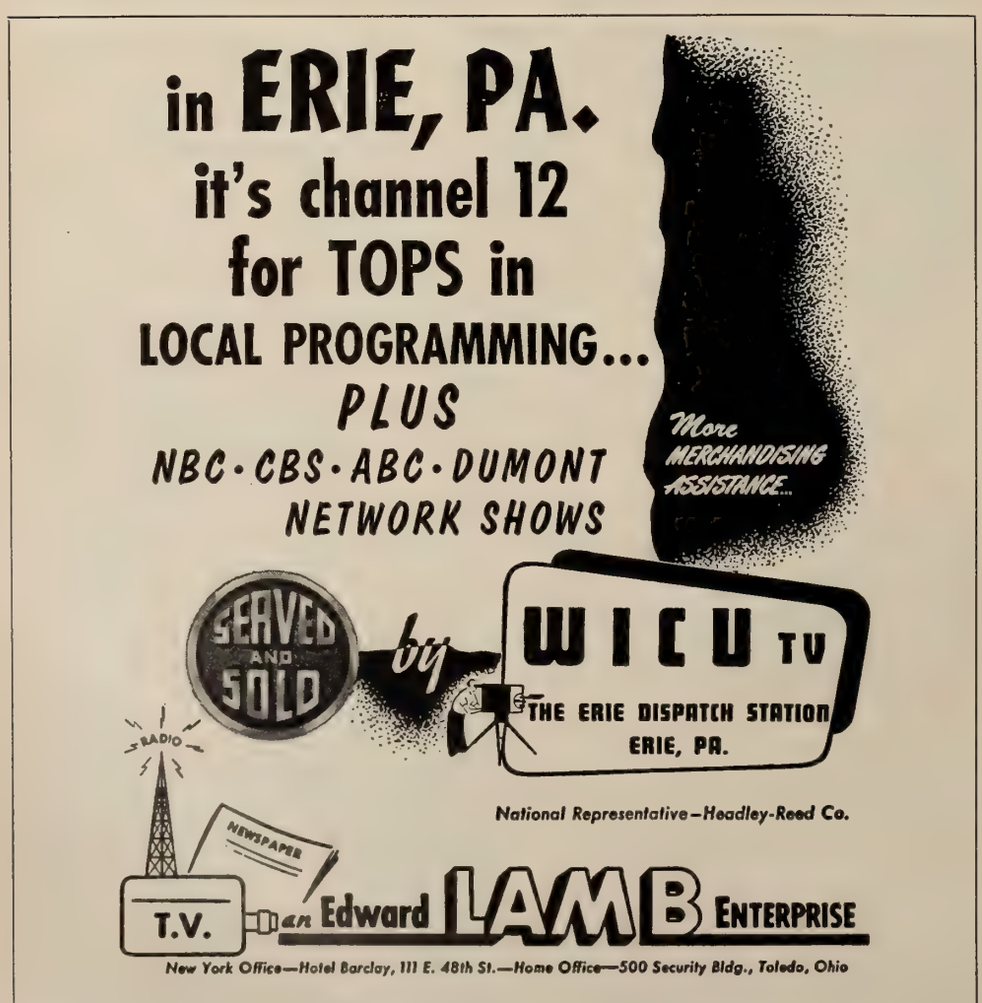
2. Minimum "use payments" for "on camera" on filmed commercial programs: Class A, defined as more than 20 cities, will be $70, single use; $50, each individual re-use; guaranteed payment for three uses prior to first use, $150; eight uses, $350; no further payment during 13-week period if actor has been paid $650. Class B, defined as 6 to 20 cities, $140 for 13 weeks; Class C, defined as one to five cities, $105 for 13 weeks; $185 for 26 weeks if guaranteed and paid prior to first use.

3. Minimum "use payment" for "on camera" for each film spot announcement: Class A, $140 for 13 weeks, plus $140 for each additional 13 weeks; Class B, $105 for 13 weeks, plus $105 for each additional 13 weeks; Class C, $70 for 13 weeks, plus $35 for each additional 13 weeks.

4. New York, Chicago and Los Angeles are counted as 7 cities each in defining class of "use payments" and any combination of two of these cities automatically puts the "use payments" in Class A.

5. Minimum "production payments" and "use payments" for actors "off camera" are graduated downward from the "on camera" rates with "production payments" based on two-hour recording sessions rather than eight-hour day.

6. All "production payments" are credited against "use payments."



7. Spot announcements are defined as commercials broadcast by non-interconnected single stations and used independently on any programs or used on local participating programs available to more than one advertiser but not "sponsored" by any advertiser. All other uses of a commercial are deemed to be program uses and carry program rates.

SAG said the membership meetings will be held in New York, Detroit, Chicago and Hollywood to ratify the board's approval of the contract. The guild expressed the hope that ratification would be completed by next Monday.

The contract will run for a two-year period. Though film producers are primary signatories, national advertising agencies have agreed to sign letters of adherence to the contract.

Peter Mooney, president of the Film Producers Assn. of New York, expressed gratification that the long strike was at an end. He said that "producers, as well as the actors, are anxious to get back to work." Mr. Mooney described the proposed contract as "the best agreement we could possibly reach with SAG" and hoped it would work out to the "satisfaction of all parties."

The three-month strike was marked by exchanges of sharp letters from both unions and producers. Outside of several interim agreements effected by SAG and the producers to permit production of vitally-needed TV commercials, output was at a standstill as some 35,000 members of unions belonging to the Associated Actors & Artistes of America lent assistance by refusing to accept work on such commercials.

Retroactive Pay Benefits 71 ABC, CBS and NBC Writers

Staff writers at the three networks are eligible for more than $85,000 total in back pay because of the government's order removing wage controls.

SEVENTY-ONE dramatic, continuity and news writers at ABC, CBS and NBC are eligible to receive more than $85,000 in back pay because of the removal of wage controls Feb. 6, Hector Chevigny, Radio Writers Guild president, announced last week.

Back pay represents salary increases and commercial fees included in a new contract between RWG and the networks after last summer's three-week strike [B•T, July 21, 1952]. According to Mr. Chevigny, pay rises of $15 per week from Oct. 1, 1951, to Oct. 1, 1952, and $20 per week thereafter have accrued to each writer.

Chevigny, Higley Comments

Mr. Chevigny said this was "the final step in activating the contract won by a three-week strike, the longest in the history of the broadcast industry . . . "

Philo Higley, the guild's eastern region vice president, said the new contract was "precedent-shattering" because it established "the principles of commercial fees for network news programs and a commercial writing differential for local news writers."

Mr. Chevigny estimated that each writer will receive at least $1,100 and in some cases nearly $2,000, in back pay.

KXYZ Union Election

ENGINEERS and technicians at KXYZ Houston will vote before March 5 on whether or not they want to be represented by the National Assn. of Broadcast Engineers and Technicians (NABET-CIO), according to the National Labor Relations Board, Washington.

Business is

in Detroit

MARKET-wise, Detroit is the sweetest sales-territory in the U.S.A. That was true in '52 . . . *and it'll continue to be in '53.* The rhythmic music of machinery in action, of men at work, of cars and trucks and tanks rolling off production lines, of money changing hands, of clinking coins and ringing tills . . . all blend into a "hum sweet hum" of 4½ billion dollars retail business annually . . . in a market where hourly and weekly earnings of factory workers are at an all-time peak.

MEDIA-wise, you can make your sales hum in this market by spotting or programming your campaign on WWJ, Detroit's NBC affiliate. For 33 years, WWJ has been *first* in programming, in public services, and in getting results for its advertisers.

MONEY-wise, you can buy WWJ for 14.5% LESS than the average cost-per-thousand listeners for radio time in Detroit.

MERCHANDISING-wise, WWJ offers a follow-through service, from distributor to dealer levels, to help keep everyone humming about your advertising program on WWJ.

MAKE '53 a humdinger. Put more "*sell*" into your Detroit campaign by putting more of your ad money into WWJ.

National Representatives: THE GEORGE P. HOLLINGBERY COMPANY

take a long look at these NBC-TV CO-OP* Programs

Advertisers and viewers alike are doing so in ever-increasing numbers with great satisfaction!

Who Said That? *(Mondays — 10:30 PM — NYT)*

Currently sponsored in 25 markets, WHO SAID THAT? has a current rating of 19.2. Walter Kiernan guides a panel of celebrities who attempt to guess quotes from the news in television entertainment continually proving its ability to create customers for a variety of advertisers.

American Forum of the Air *(Sundays — 2:30 PM — NYT)*

Public service, prestige, promotion, plus profits for any advertiser availing himself of the nation's best-known, most-honored forum show. Ted Granik moderates top leaders in vital, current discussions.

The Gabby Hayes Show *(Wednesdays — 5:15-5:30 PM — NYT)*

A foolproof Western film format, already proving itself for Quaker Oats on Mondays and Fridays. Excellent adjacency to Hawkins Falls and Howdy Doody. Tremendous merchandising and point of purchase aids.

**An NBC-TV CO-OP gives you all the flexibility of a syndicated feature with the added impact of live television. Exclusive sponsor identification in the market(s) of your choice at a surprisingly low cost.*

Among current NBC-TV CO-OP advertisers are:

Pure Oil Company
Pittsburgh Brewing Co.
Reynolds Metals
National Bank of Tulsa
Manor House Coffee
Rochester Gas & Electric
Philco Dealers (Portland, Ore.)
Indiana Motor Truck Ass'n.
Lone Star Gas Co.
Shenandoah Life Insurance Co.
First Fed. Savings & Loan (Wash., D. C.)

NBC Radio CO-OP Programs are:

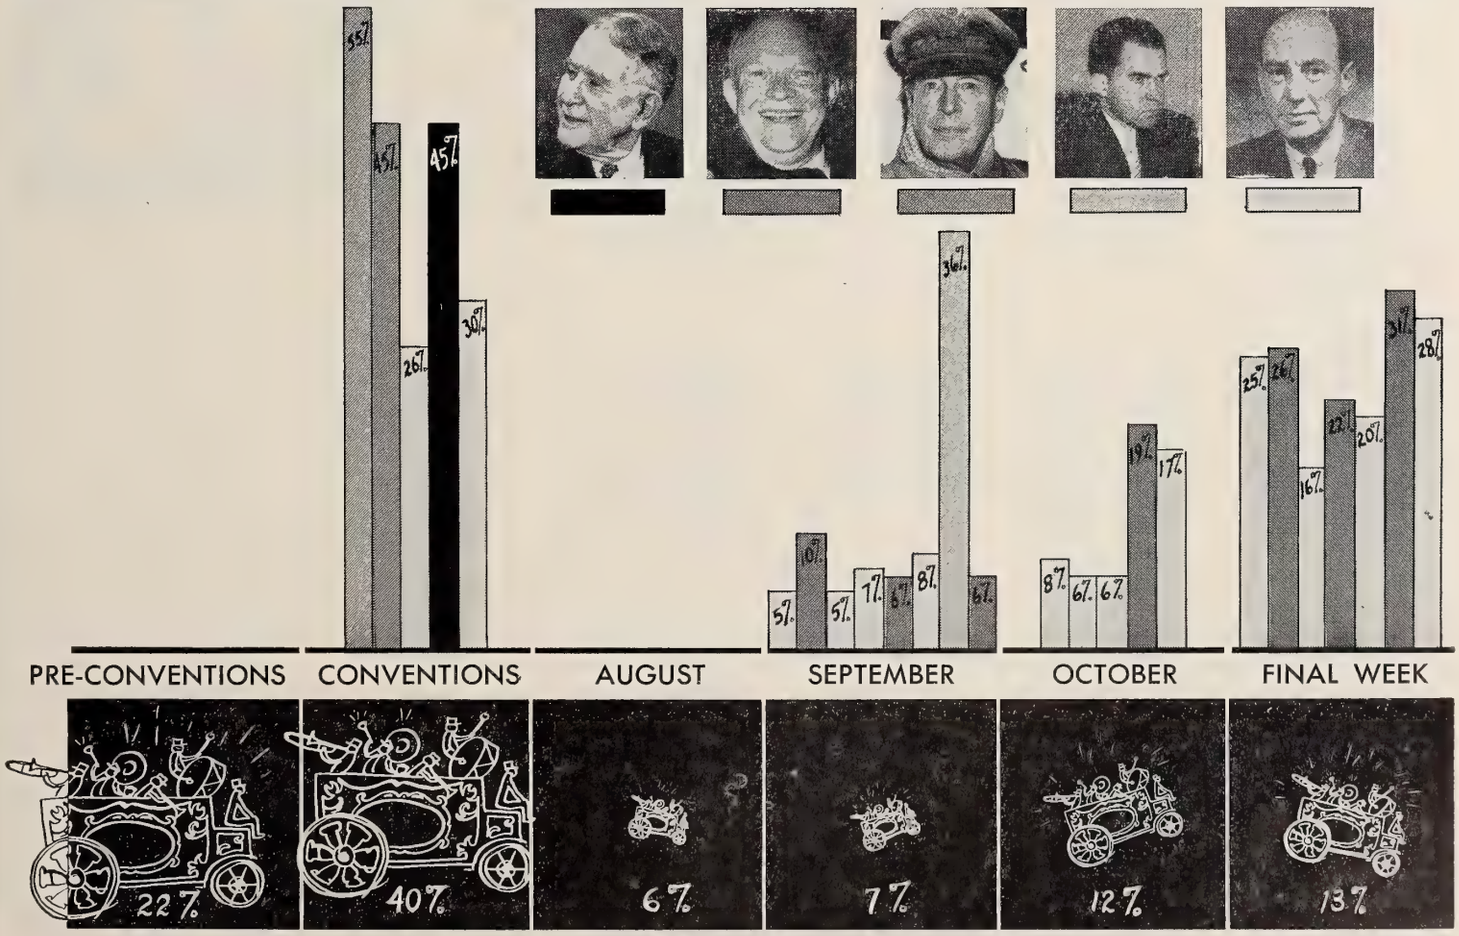
A new survey suggests changes in political TV

MAXIMUM benefit out of money spent for television during the last Presidential campaign came in the final 10 days, according to preliminary results of a six-month survey made public yesterday (Sunday) by Dr. Joseph C. Seibert, chairman of the marketing department at Miami U., Oxford, O.

The university conducted the study on a $10,000 grant made available by the Crosley Broadcasting Corp., Cincinnati. Crosley Board Chairman James D. Shouse said the grant was offered in anticipation of questions and speculation "certain to arise as the result of the first nation-wide television political campaign in history."

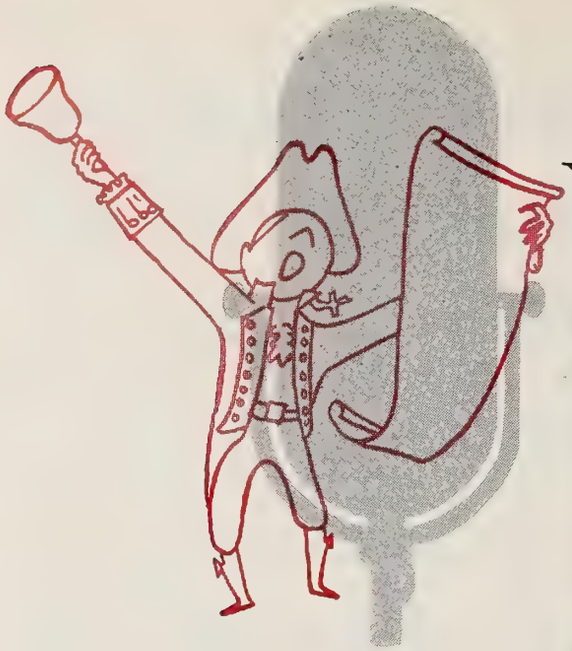
The Miami U. marketing department selected some 1,000 residents of the Miami Valley as a panel for its study. The two biggest urban areas in the valley are Dayton and Cincinnati. Panel members represented urban, smaller community and rural regions.

The survey, according to Dr. Seibert, revealed that peaks of television viewing came during the political conventions and the 10 days preceding Election Day. Between those high points, Dr. Seibert added, there was a decided let-down, with the exception of Vice President Richard Nixon's talk from Los Angeles in which he explained his financial problems.



"Mid-summer decline in interest could well indicate that candidates might profitably devote their efforts to personal appearances—whistle stops—confined to local areas," Dr. Seibert commented.

The survey also revealed, Dr. Seibert noted, that television viewers were better acquainted with campaign issues than non-viewers. He cited the case of the Democratic Party's opposition to a federal sales tax, pointing out that 19% of those who saw and heard the platform read to the convention were aware of the party's position, in contrast with 12% who received their information in other ways.



Dr. Seibert reported the survey indicated the ability of TV to project personality traits. Approximately four times as many TV viewers believed President Eisenhower to be more sincere than Mr. Stevenson while the latter impressed the TV audience with his humor and speaking ability.

A final report on the entire study will be published in June, Dr. Seibert said. The Miami U. survey is the third such study made under Crosley grants. In others, the U. of Cincinnati explored TV as a tool of education and Xavier U. of Cincinnati examined effects of TV on students' homework.

HOW MANY SAW TV SPEECHES; WHEN THEY CHOSE CANDIDATES

The upright bars in the chart above indicate the percentage of members of the Miami U. panel who saw particular TV speeches by key political figures. The bandwagons below the bars indicate the percentage of panel members who made up their minds about their choice of candidates in the periods shown. Note that 22%, all apparently party die-hards, had decided to support party nominees before they were selected. By far the most made their choice during the conventions, when, as shown by upright bars, viewing was also heavy. Each upright bar represents TV speech by political figure pictured in upper part of chart. The September Nixon speech, which outranked all other postconvention TV appearances of candidates, was, of course, his explanation of personal finances. MacArthur keynote got biggest audience of all.

YOUNG VOICES

In the past six years five million high school students have participated in the annual Voice of Democracy contest which is sponsored by the NARTB, RTMA and the U. S. Junior Chamber of Commerce. Both as public service and promotion, the project is without equal.

FOUR STUDENT winners of 1952-53 Voice of Democracy contest don wigs and other colonial dress for workshop in historic capitol at Williamsburg, Va. Depicting four episodes in history of free expression are Robert Davis, Hawaii; Adelaide Nacamu, Peekskill, N. Y.; Thomas J. Walsh, Washington, and Frank Lammedee, San Marino, Calif.

THE other day a demure immigrant girl of 14 raised herself to her full five-feet-one and spoke fervently on the blessings of democracy.

She stood on a hallowed spot—the Burgess' Chamber in the historic capitol at Colonial Williamsburg, Va. In ringing tones she said:

"Heading the privileges my country gives me are the right to express my personal opinion, the right to write what I think, and to worship in the way I believe. . . . Since that day, three years ago, when I became a citizen, I have been and still am proud to say that I am an American."

On that very spot 188 years ago Patrick Henry, unabashed by the cries of "treason" shouted by fellow legislators berating him for opposition to the Crown's Stamp Act, had uttered these famed words:

"Tarquin and Caesar each had his Brutus, Charles the First his Cromwell and George the Third may profit by their example. If this be treason, make the most of it."

Adelaide Nacamu, Italian born but 100% American, spoke as the voice of freedom as she stood in the historic Williamsburg chamber. She spoke as one of four high school students who last week held the national spotlight as winners of the radio industry's Voice of Democracy contest. The quartet had been picked out of a million young people who participated in the competition, itself symbolic of the American way of living.

All last week the four students associated with Washington's highest personages, from President Eisenhower to members of Congress, the Supreme Court and the Cabinet. This itinerary was preceded by participation in a Democracy workshop at Williamsburg.

Their pilgrimage was highlighted by the annual Voice of Democracy awards luncheon held Wednesday at the Mayflower Hotel. There they were given $500 scholarships, awards certificates and radio-TV consoles, with Sen. Margaret Chase Smith (R-Me.) making the presentations.

The sixth annual Voice of Democracy contest again represented the cooperative effort of three national associations, the National Assn. of Radio & Television Broadcasters, Radio-Television Manufacturers Assn. and U. S. Junior Chamber of Commerce.

Five Million Entries

Since the first contest was started in 1947, five million students in the 10th, 11th and 12th grades have written and voiced five-minute essays on the topic, "I Speak for Democracy." Fourteen boys and 10 girls have been national winners, surviving carefully organized eliminations that start at the classroom level. All 48 states plus Alaska, Hawaii and other territories are encompassed in the contest area.

This year's group of winners is typical. For the second time a 14-year-old student has won national honors, this of course being pretty Miss Nacamu, a native of Milan, Italy, who came to this country in infancy. She had acquired citizenship rights from her father, but has been an American citizen in her own right only three years. Her school is Peekskill High School, Peekskill, N. Y.

Robert Davis, who lives in the little town of Paia, on the Hawaiian island of Maui, is aged 17. He is the first national VOD winner to come from beyond continental boundaries of the United States.

Frank Lammedee, also 17, coming from South Pasadena High School, in the Los Angeles area, had the benefit of radio experience in voicing his winning essay. He is an announcer at KPPC South Pasadena.

Thomas J. Walsh, 17-year-old student at Gonzaga High School, Washington, D. C., has enjoyed school radio training and once won a newspaper writing contest. He aspires to a radio-TV career.

Like their million fellow students, these four studied basic material on the fundamentals of American democracy and prepared their scripts. They survived eliminations until only 12 finalists remained. A board of distinguished judges selected the national winners on a point basis—40% for content (organization and development

SPEAK FOR DEMOCRACY

By J. Frank Beatty

of ideas, presentation, writing); 40% for delivery (broadcast technique, voice quality, effectiveness, sincerity); 20% for originality.

The statistician doesn't live who would attempt to evaluate the cumulative impact of this eloquent voice of freedom. The spread of democracy's message starts with the first classroom assignment of listening to official broadcast discussions prepared by the contest committee. Reinforced by this instruction obtained via local radio and TV stations, the young folks start their individual research, combing books and publications in thousands of school libraries. Their essays completed, first audiences are family groups. Voice coaching is provided by teachers and friends. Then come the classroom competitions, with students hearing their classmates cite the blessings of democracy and inferentially the curses of its absence.

Next come school eliminations, community contests, county and state competitions. The 48 state winners are carefully screened on a "blind" basis by a judging committee, using transcriptions carrying code numbers. The official board of judges then selects four out of the remaining 12 finalists for national honors.

Two Near Misses

Everyone wins in this contest—participants, listeners, viewers, judges, classmates. All are winners because they learn, and take refresher courses, about democracy.

A dramatic episode of the contest just ended centers around a two-time finalist, Janet Clowers of St. John, Kan. She reached the finals but just missed top honors. A good sport, Miss Clowers sent this message to Robert K. Richards of NARTB, chairman of the Voice of Democracy Committee:

"For the second time in two years, I have placed as one of the 12 finalists in the contest. Although I did not receive the high honor of being one of the top four co-winners, I received something much more valuable.

"The thought and time spent on preparing the script was time well spent. This individual effort and thought has made me appreciate the U. S. A. even more than before. I would like to compliment the sponsors on their fine program for the young people of America."

The national welfare, too, has benefited from the contest, its backers sincerely believe. They cite evidence of a new awareness of the meanings of democracy, particularly among young people. The participations point to signs of improved relations with the American people as a whole and their government.

The story of the contest's conception and its execution is a story of free enterprise operating in the public interest. It is a

PAST WINNERS OF THE CONTEST

Of the five million youngsters who have entered the Voice of Democracy competition, these 20 plus the four on the opposite page have captured the top prize, a trip to Washington, introductions to the nation's governmental leaders, a scholarship and a radio-TV console.

story of a successful promotion that has attracted worldwide attention, particularly among non-democratic nations where its emulation would never be sanctioned.

In the confused post-war year of 1947, democracy, as Americans had understood it for nearly two centuries, was starting to waver a bit as a result of attacks from without—and from within, too.

Radio and its baby sister, television, were targets of those who wanted to take over these powerful mass communications media for their own ends and those who had been misled by pious pleas of interest in the public's welfare.

At that time the two business associations serving the electronics industries—broadcasters and manufacturers—had a faltering promotion project on their hands. The project was National Radio Week, which had done rather well as a feature of radio's 25th anniversary in 1945. Unfortunately the second version a year later had engendered only mild enthusiasm.

Right there existed a prime setting for a new undertaking that first could serve democracy and its front line of defense, freedom of speech, and second, could inject needed life into Radio Week.

The answer, as history often has recorded, had its beginning in the mind of a child. Sitting around the dinner table at the home of Mr. Richards, at that time the new public relations director of NARTB, his seven-year-old daughter, Susan Richards, asked the meaning of the word "Communism" and wondered if Americans were Communists.

Higher Authority

Mr. Richards performed his fatherly duties by hemming through an attempt to define the term—and then postponed his answer until he could consult a higher authority: Judge Justin Miller, NAB's president and famed for his battles on behalf of free speech.

This conversation produced the conviction that there should be some opportunity for young people to learn more about democracy, and that radio was the medium to handle the assignment.

An idea was starting to assume signs of definite form. A few days later a joint committee representing NAB and Radio Mfrs. Assn. held its first session of the year in the office of James D. Secrest, RMA's public relations director. The group faced the job of planning the 1947 National Radio Week.

Out of that meeting came a fully-conceived project—the first Voice of Democracy contest. Taking part in the discussion were Messrs. Secrest and Richards; W. B. McGill, advertising manager of Westinghouse Radio Stations; Ronald Loudermilk of the U. S. Office of Education, and James Dawson, assistant public relations director at NAB.

The group represented radio stations and networks, set manufacturers, government and education. It included specialists in public relations, manufacturing, broadcasting, teaching and advertising—all serving organizations dedicated to freedom.

The germ of an idea had emerged in a few hours as a project that became the high spot of 1947's National Radio Week. Within a year the tail was wagging the Radio Week dog, and it still dominates an event that otherwise might have been lost amid Starched Collar Week, Feed-Your-Dog-Horsemeat Week, and a thousand other more or less hackneyed promotions.

Time was short—much too short, it appeared, to organize a nationwide contest before school opened in September.

But Labor Day came and the Voice of Democracy Committee, with Mr. Richards as chairman (a post he still holds), was ready with a complement of literature, promotion and contest rules. The assignment was performed so ably that the original rules still stand. Only a few brief paragraphs, they offer a model for those who stage contests—and America is a land of many and varied contests.

The promotion had to be executed with care and tact to avoid the stigma of "commercialism," an evil word at that time. It had to be executed in thousands of schools and hundreds of communities if a goal of 15,000 entries were to be approached.

THESE simple rules governing the Voice of Democracy contest are often cited as a model for events of this type:

The contest is open to 10th, 11th and 12th grade students of all public, private and parochial high schools in the United States and its territories.

Broadcast scripts are to be original; source material may be used, if identified.

Voice script not to exceed delivery time of five minutes.

Students who have been national winners previously are not eligible to compete again. State and local winners are eligible.

Broadcast scripts should approach subject positively, speaking *for* democracy and not *against* other governmental processes.

Composition of the script must be by the student, although supervision (*i.e.*, in classroom exercises) is encouraged.

Judging deadlines at the school, community and state levels must be observed.

Basis of judging: Scripts will be judged as follows—Content 40 points; delivery 40 points; originality 20 points.

The delivery element of the weighting will depend upon suitability for broadcast, not for oratorical or ordinary public speaking purposes.

A ready-made organization with units everywhere was needed. The answer was found in the U. S. Junior Chamber of Commerce. Support of school officials was required. Here the answer came—and with enthusiasm—from the Assn. of Secondary School Principals.

There was the setup. The Jaycee's had the task of community organization and promotion, working with local broadcasters and radio dealers. Their role extended through the state level. NAB was assigned a multi-faceted role—publicizing the contest by radio and the then limited TV facilities; preparing model broadcast talks on the contest topic, "I Speak for Democracy"; having them broadcast; helping students with radio techniques; recording community winners' reading of their scripts for state and national judging.

RMA set about to provide school and community awards, with dealers and manufacturers supplying radio and TV sets as prizes for local winners and their schools. The Office of Education endorsed the contest as worthy of attention from school principals and teachers. The combined groups divided the work of promotion and publicity. A fund of $10,000 was set up by NAB and RMA to finance cost of recording, promotion, four $500 scholarships, trips to Washington for the winners and chaperons, and finally the awards luncheon.

Broadcasters, dealers and manufacturers bolstered this budget with services and products of incalculable value.

That year National Radio Week was observed with genuine interest in hundreds of cities and towns. It was observed in 20,000 homes as eager students enlisted Dad, Mom and the other kids as audiences for their spoken essays on the meaning of democracy. It was observed in hundreds of schools covering 38 states as classes, school assemblies and community groups listened—and learned. It was observed on hundreds of radio stations as the competitors used the most far-reaching of all communications devices, the radio microphone.

The culmination came Jan. 28, 1948 when four excited young winners came to Washington for their awards. They were no more excited than those who had conceived and fathered the event. By that time the nation, and its top officials, had become interested. Attorney General Tom C. Clark had taken judicial notice of the contest by agreeing to present the awards.

Female Sweep

Jan. 28, 1948 was Ladies Day in the South American Room of the Statler Hotel. The winners, much to the surprise of everybody involved, were four girls—and highly photogenic as well as oratorical.

Attorney General Clark handled the awards ceremonies, held before such distinguished personages as Gen. Omar N. Bradley; FCC Chairman Wayne Coy and Dr. John W. Studebaker, U. S. Commissioner of Education, to mention a few. The board of judges that picked the four finalists after the list of winners had been screened to a dozen, included Messrs. Clark and Bradley; Father Edward J. Flanagan, director of Boys Town; Mrs. Oveta Culp Hobby, operating KPRC Houston; Fleet Admiral Chester W. Nimitz and James Stewart, actor.

The first contest was a complete success. Scarcely a detail in the pattern has been changed in the intervening years. Last Friday the sixth contest ended, a freedom-promoting project described by the Office of Education as *"the* contest for high school students."

Six years of planning by businessmen and educators, plus the earnest literary and vocal efforts of five million students, have brought results which Mr. Richards describes in this way:

"I believe the unselfish sponsorship of this annual event by the broadcasters, manufacturers and the Jaycees reflects credit upon all of them—and certainly such credit extends to the nation's public, private and parochial schools which have supported it so enthusiastically."

BROADCASTING
The Newsweekly of Radio and Television
TELECASTING
February 23, 1953

Radio and television have always done a major job in the annual fund raising campaign for the National Foundation for Infantile Paralysis, but this year their contributions were bigger than ever. Here's how stations, networks and advertisers participated in the drive.

THE BIG PUSH

THE NATION'S radio-TV stations and networks surpassed their usual high public service quotas in behalf of the infantile paralysis fund this year, contributing a record amount of time, talent and facilities to the March of Dimes campaign. Basil O'Connor, president, National Foundation for Infantile Paralysis, told BROADCASTING • TELECASTING the industry's many contributions in the recently-completed fund drive were the greatest in the foundation's history.

National and regional networks, he said, cooperated 100% under the direction of Harold E. Fellows, NARTB president. Station managers and performers, along with big-name stars and unknown behind-the-scenes personnel, worked together in an all-out broadcast effort to collect pledges and donations.

On the national level, Marie Wilson, star of *My Friend Irma* on CBS-TV, offered her services as a secretary for one day to the person or company donating the most money to the March of Dimes. She decided to work a day overtime after getting two large bids, one for $26,000 by employes of Douglas Aircraft Corp. and another for $22,500 from the Resort Hotels Committee of Las Vegas, Nev.

Companies in fields closely allied to on-the-air broadcasting helped, too, with General Electric, for example, installing specially-constructed video sets for iron lung patients in polio wards of City Hospital, Syracuse, its headquarters city.

Among the many stations contributing to the cause was this group from the East:

Eastern Region

To help raise funds for the local March of Dimes campaign, WBUD Trenton staged an all-night benefit program from 9:30 p.m. to 6 a.m. T. J. Martin, WBUD disc jockey, served as m.c., introducing talent from Trenton and Philadelphia.

One hundred consecutive hours marathon was aired exclusively in Boston by WCOP, which fed the program to three New Hampshire stations. More than 100 local and national stage stars helped collect $15,000 during the show, which would have cost $45,000 if bought by an advertiser. During the marathon, 7,500 persons called a WCOP disc m.c., stationed in a window, and more than 1,000 waited in the rain to watch his final signoff.

WFIL-TV Philadelphia netted $14,700 in a telethon continuing from 11 p.m. until 2:30 a.m., increasing its pledges by $4,000 over last year. The event was telecast for the fourth year under direction of Roger W. Clipp, station general manager who was city chairman of the March of Dimes campaign.

WAGE joined WHEN-TV Syracuse in carrying a two and one-half hour simulcast in which more than 100 performers appeared. Station collected 73,864 dimes.

A month-long drive at WHOB Gardner, Mass. was climaxed by a 10-act stage show handled by Frank Mullen, m.c. High school students, interested in radio as a career and members of WHOB's *Radio Club*, distributed collection boxes throughout the city. Individual contributions were larger than in previous years, reports Al Maffie, station manager.

Hour-long remote telecast of the Ice Capades was the high spot of WJAR-TV Providence programming, which used a specially-constructed ramp for camera mobility at a local auditorium. Skaters were interviewed backstage. Station also preempted two commercial shows to aid the "Mothers' March," and aired station breaks, films and interviews on regularly-scheduled shows.

Record Requests

Record requests were aired by two WKNE Keene, N. H. disc m.c.'s for 14½ hours. They charged a minimum of $1 donation for each song played. Joseph K. Close, president of WKNE Corp., contributed a liberal amount in behalf of the 21 station employes.

Donations to WNBF-TV Binghamton, N. Y., totaled almost $25,000 after a 14-hour weekend telecast. Of this sum, more than $8,500 was collected by performers appearing before a studio audience at the station. Some 2,000 telephone pledges came from cities within the station's signal area.

Merchandise and services were auctioned off by WOND Pleasantville, N. J. staffers in 48 hours continuous broadcasting. It was the station's third annual marathon "auction-aire." Show originated during daytime hours from a shop window. John H. Strucknell, general manager, was radio chairman for the Atlantic County drive.

Merchandise, donated by local business was auctioned also by WOTW Nashua, N. H. which was sent $1,000 by listeners. At WPTF Raleigh, N. C., Bill Jackson, early-morning announcer, organized a county-by-county contest among listeners, with the county most heavily represented by donations getting $100 from the station. Total contributions: $1,967.18.

Disc m.c.'s from four radio outlets in Worcester, Mass., paraded in the city's first "Disc Jockey Motorcade" to promote the dimes drive. Planned by Helen L. Elias of WTAG, campaign's radio chairman, the motorcade was followed by record shows playing listeners' requests and airing campaign results every half-hour.

Combined radio and newspaper promotion in Hartford, Conn. brought a total of more than $105,000 to the dimes fund. WTIC and the Hartford *Courant*, for the 13th year, joined in publicizing the need for polio funds. The 13-year total collected by the twosome is nearly $900,000. Highest previous amount raised in any one year was $97,163.

WWNY Watertown, N. Y., raised $4,815 in pledges as a result of its sixth annual March of Dimes marathon broadcast, the station has reported. The appeal, aired from 8:45 p.m. to 1:45 a.m. in one day, brought in 1,182 pledges from Watertown and 34 surrounding communities.

Eight stations in the Albany-Troy-Schenectady area sponsored a one-night public service broadcast which netted $10,000. Originated in the ballroom of the Hotel Ten Eyck in Albany, the show included transcribed appeals by celebrities and a poll of the top tunes of 1952, which cost each voter calling in a $1 donation. Stations participating included WXKW WPTR WABY WOKO and WROW Albany, WTRY Troy and WGY and WSNY Schenectady.

Southeast Section

A nine hour "radio auction" broadcast by WDXI Jackson, Tenn. brought in more than $1,200. Articles donated by Jackson merchants were auctioned off by Jim Hoppers, WDXI program director, who stayed on the job throughout the nine-hour marathon.

The mayor of Easley, S. C., was arrested at the beginning of a three-hour campaign over WELP Easley and placed in jail. He would have been released if only $200 in contributions had been received by 5 p.m., but ended up spending the night in jail as donors paid to keep him there. Local talent appeared on the broadcast, which brought in more than $1,000.

WGH Norfolk assisted the local "Mothers' March" by scheduling a series of broadcasts urging listeners in the five city Tidewater area of Virginia to turn on porch

BEHIND THE MARCH OF DIMES

Two of a kind were Wess Carr, announcer at KLYN Amarillo, and his friend before the March of Dimes campaign. But only the goat has a beard today. Mr. Carr offered his in exchange for the highest donation from a listener. He shaved when a $100 contribution came in.

lights or to tie a white handerkerchief on the front door.

Three programs on WHAS-TV Louisville helped point up the plight of polio victims. Louisville, hard hit last summer by the disease, saw children of polio victims get a remote reunion with their hospitalized parents on Mary Snow Ethridge's special show. She later brought three polio victims before the cameras, each in a different stage of recovery. Technicians explained therapy to the audience, and direct appeals for funds were made. Third program, a drama called *Revenge,* was shown seven times throughout an eleven-day period.

WHAW Weston, W. Va., located in a small community, led its first drive in 1951, netting $2,273. This year the sum was more than $3,000—an average of 17 cents per person in the area.

WLOW Norfolk, Va. pushed promotion of Sheriff Tex Davis, hillbilly disc jockey, in its campaign.

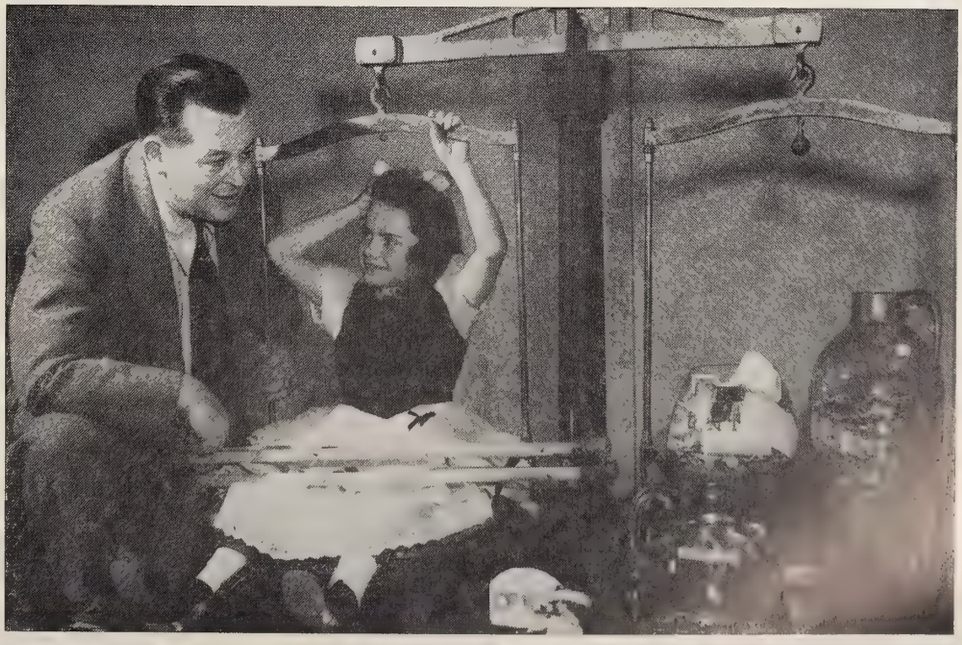
Radio performers Helen Farmer, Herb Johnson, Peggie Milton and Dick Ashby teamed up and competed for contributions at WMAZ Macon, Ga. The ladies went out on streets and painted traffic lane markers at $1 contribution per foot, accompanied by the Lanier High School Band. More than $2,000 was collected.

Every announcer on staff at WRBL Columbus, Ga., handled one and two-hour stints in the center of town, soliciting donations via a loud speaker. George Davis, announcer and production man, organized a dinner at a local country club, with proceeds going to the dimes drive.

Tobacco contributions were asked of farmers in the WROL Knoxville, Ky., area. The slogan "Give a Hand (of Tobacco)" raised a total of $8,576.34 and 303 spots and four special programs were presented during the drive.

Bill Hickey, announcer for WSGN Birmingham, Ala., auctioned goods donated by local merchants from 7:30 p.m. to 1 a.m. The entire station facilities were turned over to *Auction on the Air.* Listeners were asked to offer items for auction, and response was so great that sign-off time was extended an hour. Nearly $1,000 was raised.

Midwest Region



Denver viewers saw their first telethon when KBTV (TV) aired 6 hours, 10 minutes of programming to collect $10,000. Sum was implemented by appearance of a construction firm official at the origination site in the Broadway Theatre and his donation of a check for $1,100 to station newscaster Bill Michelsen.

Combination marathon and basketball game, sponsored by KELO Sioux Falls, S. D., resulted in a total contribution of $1,500 to the drive. All staff announcers and musicians took part in the 10:30 p.m.-2:45 a.m. broadcast. A marathon-auction was used by KFH Wichita to solicit donations, with a song, skit and merchandise auction continuing from 6:15 p.m. until 2:30 a.m., two and one-half hours past the station's usual signoff. Show incorporated on-the-spot recordings of interviews with local polio victims.

Three stations in Monroe, La.—KLIC, KMLB and KNOE — broadcast simultaneously an auction with each represented by a staff announcer. Auctioneering of prizes donated by merchants brought in $3,643 with much of the return credited to advance promotion by Irv Zeidman, KNOE program director.

KSTP-TV Minneapolis-St. Paul collected $10,000 worth of merchandise, including a 1953 Chevrolet, 17-inch Philco television set and $1,000 diamond ring, and launched a public service "giveaway" with "The Marching Man" contest. Viewers were shown a silhouette of a well-known American personality and asked to identify him, sending with their answers $1 donation to the drive and a letter stating their reasons for supporting the March of Dimes. Idea was a promotion co-sponsored with the station by Chevrolet Dealers of the Twin Cities.

The Alexandria (La.) *Daily Town Talk* sponsored a four-hour *Radio Rodeo for*

In response to a plea on *TV Sports Page* over WJAR-TV Providence, viewers contributed more than the weight of polio patient Marilyn Dixon in dimes. Marilyn appeared on the show with Warren Walden.

Polio on KSYL and KALB there. Broadcast, picked up from four remote locations, brought in $2,000 in donations during four hours of air time. One remote was originated in Polio Center wards.

Jay Roberts, chief staff announcer at KXAR Hope, Ark., admits the $73 he collected is no huge sum, but in consideration of the facts its gets bigger. Talking to listeners nightly for 45 minutes during the entire month of January, he asked only for dimes. He received 7,300, and there are only 8,603 residents of Hope.

Pounds of Pennies

Skip Maddox, disc jockey, WANE Fort Wayne, Ind., turned over 142 pounds of pennies or $206.50 to a local drive collection agency after competing with other Indiana deejays to see who could collect the most "Pounds of Pennies to Fight Polio." Idea was originated by Hal Roche, WAOV Vincennes.

An FM station—WCTW New Castle, Ind.—made an imposing record during the drive. In a single show (purchased by 80 local businesses, with the money donated later by the station), staffers took pledges for $5,000 in a town of less than 20,000. Station remained on the air three hours after sign-off. Highest return in previous years was $2,400.

WKBZ Muskegon, Mich. reports double the number of contributions to the polio fund this year as a result of its *Music Marathon.* Station staffers stayed on the air late one night to welcome townspeople to the studios, giving them coffee and doughnuts in exchange for donations.

WLEC Sandusky, Ohio, knows for a fact it has a loyal car radio audience. A man driving through town heard on the station that only $5 more was needed to reach the $500 mark, so he drove to WLEC and deposited that sum. Total donations exceeded $1,455.

Tait Cummins, sports director, WMT Cedar Rapids, got his largest March of Dimes contribution from Collins Radio Co., broadcast equipment manufacturer, where employes collected $3,360, a company record.

Telethon on WCCO

Theo. Hamm Brewing Co., St. Paul, raised $7,855 for the fund drive on a telethon included in its sponsorship of the Minneapolis Lakers and Fort Wayne Pistons professional basketball game on WCCO-TV Minneapolis. During the one and one-half hour show, St. Paul residents pledged $4,700 by phone; Minneapolis, $2,482.50, and out-of-state cities $672.50. WCCO conducted a *Polio Party Line,* on which volunteers in 11 towns and cities in Minnesota handled calls from 87 counties in that state as well as from

TELETHONS on WDTV (TV) Pittsburgh brought in more than $100,000 from viewers for Variety International, showman group interested in charitable work. Harold C. Lund (r), general manager of the station, is commended by William Finkel, president of the Pittsburgh chapter, for the station's service.

Wisconsin, North Dakota, South Dakota and Iowa.

Western Region

Fast collections were made by KGW Portland, Ore. staffers. One driver traveled 100 miles to get $100 from a father of three children with polio. More than 99% of the telephoned pledges had been translated into cash three days after the *Phil Irwin Polio Marathon,* conducted for the third year. Mayor Fred L. Peterson gave a special version of the 11 p.m. news, assisted by Sheriff Terry Shrunk on the commercials. The program honors the late Mr. Irwin, a KGW announcer, a polio victim. Contributions purchased two rocking beds and a resprometer.

KLYN Amarillo raised $1,900 after several hours of evening broadcasting, $100 of which was pledged by a listener who heard announcer Wess Carr's promise to shave his beard for the highest bidder. He appeared on the "treasure hunt" broadcast, on which the station offered several bonus prizes to listeners phoning in pledges.

Window Pains

Len Allen, disc m. c. at KLO Ogden, Utah, got more than he bargained for after a *Dawnbusters* show. Offering to work as window washer for the person donating the most money to the campaign, he was "sold" to an officer at Hill Air Force Base nearby. Mr. Allen, thinking he was to wash windows in the Officers' Club, learned to his dismay the officer had a different project in mind: Cleaning 800,000 square-feet of glass panes at one of the plane hangars. Mr. Allen estimates he would be 65 years old before completing the job, working at the rate of 25 square-feet per day.

Seattle businessmen and civic leaders paid $25 each for the privilege of interviewing any of 27 well-known Pacific Northwest sports personalities of KOL there. Interviews, ranging in length from three to six minutes, continued from 8 a.m. until midnight. Archie Taft Jr., station manager, was

SEWING UP SALES
on Sewing Machines

There's nothing new in the radio "mystery tune" idea; nothing new in offering prizes to listeners who name instrumental numbers played over the air. BUT WOC PUT SOMETHING NEW INTO THIS OLD IDEA WHEN $172.50 SPENT ON SUCH BROADCASTS PRODUCED *$7,370.00 In Sales* for Home Vacuum Store.

This Davenport appliance firm uses a daily 5-minute "Mystery Tune" format, six days a week, to promote the sales of a sewing machine it carries.

The week of November 17, one-hundred-and-fifty WOC listeners won gift certificates for correctly naming masked melodies played on Home Vacuum's broadcasts. This firm obtained appointments with 76 of these winners; *sold 44 of them sewing machines which retail for $167.50 each.*

WOC has a host of success stories proving its effectiveness as a low-cost advertising medium. Get further facts from your nearby Free & Peters office—or from WOC *direct.*

state radio chairman for the 1953 campaign.

Third annual dimes telethon sponsored by KOTV (TV) Tulsa netted $11,147 for the fund after a six hour show in which 100 entertainers performed and another $1,500 after an appeal made by newscaster Cy Tuma, bringing the total to almost $14,000. Mr. Tuma spoke from personal knowledge, as he was hospitalized for many months with polio and is partially paralyzed.

Items from turkeys to a Pontiac were auctioned at a local theatre for two nights by KPQ Wenatchee, Wash., which chalked up contributions of more than $4,300 after 12½ hours of radio programming. An additional $4,500 was raised by selling a carload of Wenatchee apples in New York. Station's total collection was $8,800.

Iron Lungs Donated

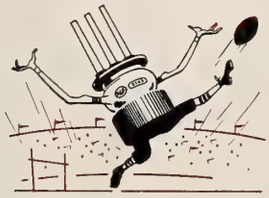
All-night "telethon" put on by KROD-TV El Paso, Tex., which had been on the air only four weeks, brought in contributions far exceeding its goal. Complete staff of KROD-TV and entertainers from El Paso and Juarez took part. Bernie Bracher was m.c. More than $24,000 was pledged, and two iron lungs were donated during the telethon.

KRON-TV San Francisco scheduled two special live programs, emceed by Ralph Edwards. The first program pushed the Mothers' March, and the second included a report from the city chapter of the Infantile Paralysis Foundation and a plea for pledges.

Five amateur auctioneers chanted for five and one-half hours on KRIO McAllen, Tex., all selling donated articles. More than 140 items, including a 485-pound live calf, $5 grocery coupons and dolls, were sold to net $4,500.

Cuffs on Curfman

A live talent variety show on KRPL Moscow, Ida., raised $1,500. Broadcast from the local Elk's Temple, the program featured the "arrest" of Raymond (Babe) Curfman, head football coach of the U. of Idaho, and Arthur (Buck) Bailey, baseball coach at Washington State College, Pullman. Listeners pledged more money to keep them in jail. Broadcast details were handled by Bert McAllister, KRPL general manager.



Disc jockey Dick Zook, KVVC Ventura, Calif., conducted his second "disc marathon" this year after chalking up a record of 85 consecutive hours of spinning for the 1951 campaign. Local restaurants donated food, and taxis offered free rides to contributors. Mr. Zook traveled with a mobile unit during the day to make local broadcasts.

WBAP-TV Fort Worth presented the superintendent and assistant superintendent of the polio division, City-County Hospital there, on *Sports Previews*. Host-m.c. Budd Watson signed over his weekly talent check at the end of the program to Mrs. James Leonard, campaign leader.

RCA 5762 forced-air-cooled grounded-grid POWER TRIODE

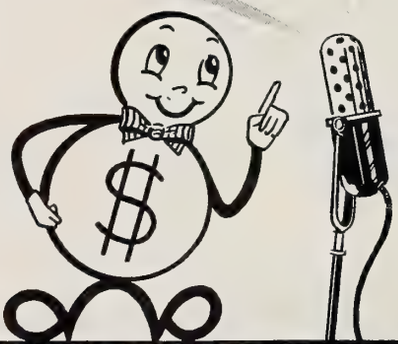
The "Triple-Threat" Performer

Originally designed for FM, the RCA 5762 has become a "triple-threat" performer throughout the broadcast field. It has won high scores for efficient operation in TV, FM, and AM transmitters.

Because of its improved, more efficient radiator, the 5762 runs cooler . . . lasts longer. More stable operation results from short, direct filament leads.

The use of a conical grid support makes possible extremely low grid-lead inductance, prevents electron bombardment of the bulb, and results in better over-all operating efficiency.

So play it safe in tube replacements. Buy RCA Tubes—the tubes built to give you maximum *Performance Security.*



Your RCA Tube Distributor has RCA Tubes in stock for immediate delivery. Call him for fast and friendly service.

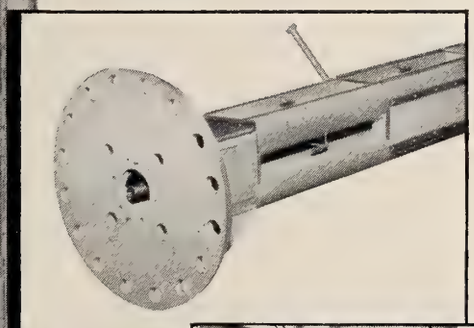
a new UHF antenna

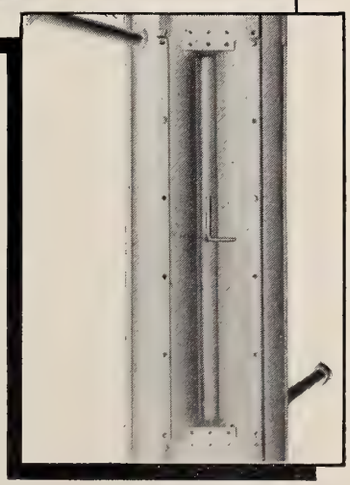
Custom-made for each channel, this all-new, all-metal antenna is formed by four vertical tubes subdivided into slotted sections. A single inner-conductor feed system simplifies construction and results in a more reliable and easier-to-maintain system.

The elimination of delicate connectors or insulators—*of any type*—gives ruggedness heretofore unobtainable and allows power inputs limited only by the capacity of the transmission line.

Specifications include:



- **HIGH GAIN of 14 (11 db) or 25 (14 db)**
- **VERTICAL BEAMWIDTH 2.1° to 4.2°**
- **VSWR less than 1.1**
- **CIRCULAR HORIZONTAL RADIATION PATTERN within 1 db**



... all contributing to unusually high performance and operating dependability.

For those installations requiring variations in vertical radiation pattern, null fill-in and beam tilt are available.

Check with your nearest Graybar sales office for details on Federal TV equipment ... the finest in UHF and VHF antennas, transmitters and studio equipment.

Simplified base plate for easy mounting.

Cut-away section of slot.

PACKAGED REMOTE CONTROL

for Commercial Broadcast Transmitters

AM — FM

THE RUST INDUSTRIAL COMPANY'S REMOTE CONTROL SYSTEM

The Rust System is the *only* transmitter remote control system *proven* in service in United States Commercial AM Broadcasting installations. *It meets all FCC requirements.*

STUDIO UNIT
(Type RI-1080)

REMOTE CONTROL
of transmitters means more effective station operation. Attending personnel may be utilized more efficiently. More convenient location of studio is made possible. Transmitter may be located where transmitting conditions are ideal and real estate costs low.

THE RUST SYSTEM
consists of a studio unit and transmitter unit connected by two telephone pairs. Up to nine meter readings can be made and up to nine operations can be controlled by simply dialing desired functions. Transmitter adjustment is made remotely while simultaneously observing readings of appropriate meter.

The transmitter unit is connected to any one of a number of tuning motors or contactors used for controlling transmitter tuning or other switching functions. Use of various shunts and multipliers permits the metering of several circuits at the remote control point. Any failure of the system immediately removes all power from the transmitter.

The complete system is sold on an installed basis with all components guaranteed for one year. Price includes any necessary modification of the transmitter. Savings can pay for entire cost in as little as ten weeks.

TRANSMITTER UNIT

PROGRAMS & PROMOTION

AGRICULTURE SERIES

ELEVEN of the nation's top agricultural authorities will be featured on series of five hour-long programs beginning today on WOW-TV Omaha. Show, called *TV Farm Short Course,* will offer farm audiences the opportunity of hearing practical talks by experts on new farming techniques that can be applied on the farm at the present time. Series was originated by Mal Hansen, station's farm service director.

WBMS LISTENERSHIP

MAIL coverage map highlights a promotion piece designed by WBMS Boston. Copy stresses that the station has the attractions that hold listeners. To back up that claim, pictures of leading station personalities are used in the promotion. Numbered among them is The Hon. James M. Curley, former governor of Massachusetts, who has a Sunday through Friday broadcast on WBMS.

KOA COVERAGE STORY

VIRTUES of KOA Denver and its coverage of the western market are told by Bob Hope, screen and radio-TV star, in a promotion piece recently released by the station. Mr. Hope, part owner of the outlet, claims "I think KOA's so good I put some of my hard-earned cash into it!" Coverage map of the station and statistics on the market it serves are included in the piece.

RADIO PROMOTES PREMIERE

PARAMOUNT Pictures has effected a deal with disc m.c.s Gene Norman, KLAC, and Ira Cook, KMPC, both Hollywood, whereby the m.c.s will present the Los Angeles premiere of the new feature film, " The Stars Are Singing," which stars recording artist Rosemary Clooney. Having run a daily contest based on "I'm glad Rosemary Clooney is now a movie star, because . . ." each disc m.c. has awarded 500 pairs of premiere tickets for tonight (Feb 23) to winning letter writers.

PARLIAMENTARY TELECAST

FIRST opening of a Canadian parliamentary session was filmed for telecast by Canadian Broadcasting Corp. on Feb. 12 at Toronto at opening of Ontario provincial legislature. Opening ceremonies, both outside and inside the Ontario legislature, were telecast on the *Newsmagazine* program on CBLT (TV) Toronto, on Feb. 15.

FOOTBALL COVERAGE FOLDER

PROMOTION piece of its 1952 football coverage of U. of Pennsylvania games is being mailed by WCAU Philadelphia to agencies and advertisers. The four-page folder shows an audience analysis breakdown, average quarter-hour ratings and total at-home listenership figures for all stations in Philadelphia, which carried the games. Station's schedule for 1953 broadcasts is also listed.

RELIGIOUS WORKSHOP

SOME 40 church leaders of east central Pennsylvania were briefed on problems and techniques of TV production at a religious television workshop conducted by WBRE-TV Wilkes-Barre on Feb. 4 in connection with The National Council of Churches of Christ and its local branch. The all-day session included talks by Franklin Coslett, WBRE-TV program manager, and council officials, and production of a sample program under the supervision of Robert Clement, WBRE-TV staff director.

SENATORIAL REPORT

WGN Inc. Chicago has made public service time available to Sens. Paul H. Douglas (D-Ill.) and Everett M. Dirksen (R-Ill.) for a weekly series of programs titled *Your Senators Report,* designed as a service for constituents. Program is aired each Saturday on WGN, 10-10:15 p.m. and WGN-TV 8-8:15 p.m. Reports are filmed for television and transcribed for radio in Washington, D. C., and will continue while Congress is in session. Senators share time on each program.

'ST. LOUIS STORY' HONORS

COPIES of KMOX's *St. Louis Story,* aired each Sunday at 12:30 p.m., have been requested by the Missouri Historical Society because of the "wealth of historical interest" contained in the program's scripts. Scripts in recent years have dealt with origin and history of various St. Louis industries, hospitals, colleges and service organizations. Series has been renewed by Boatmen's National Bank for another year.

LENTEN PROGRAMMING

LENT is being observed daily over WTIC Hartford, Conn., with a series of talks by representatives of the Catholic Church and Protestant faiths. *Lenten Messages* is being aired each day 12:25-30 p.m. and will continue through Good Friday, April 3.

AUDITIONS BEGIN AT WLW

CINCINNATI Summer Opera in cooperation with WLW Cincinnati has announced plans for the third annual "Aria Auditions" competition. Contest, which provides a contract to sing with the opera company, is open to singers between 18 and 28 who live in the WLW coverage area. Singers entering the competition will be featured on WLW broadcasts beginning March 21.

CHILDREN'S PANEL SHOW

PROGRAM series titled *Kid Critics* was resumed Feb. 7 on KOIN Portland, Ore. Weekly show, an extemporaneous panel discussion by children on the plot and characters in children's books, is designed to stimulate reading. Moderator on the show is Barbara Ewall, children's librarian at the Portland Public Library.

WSM'S MUSICAL INFLUENCE

TEAR-SHEETS of an article on Tin Pan Alley appearing in the February issue of *Esquire* magazine are being distributed by WSM Nashville. The station and its *Grand Ole Opry* program are mentioned in the article. Accompanying letter points out that the story is "evidence of further public recognition of the influence that WSM . . . has exerted upon the musical trends of this nation."

KATE SMITH PROMOTION

NEARLY 20,000 promotion kits for Kate Smith Week, beginning Feb. 26, have been mailed to chain and independent food stores throughout the country, according to NBC merchandising director Fred N. Dodge. Throughout the week Miss Smith will pay tribute to the grocers of America on the *Kate Smith Hour* on NBC-TV, Mon.-Fri., 4-5 p.m. EST.

CARE Gets Special Care from Radio-TV

ABILITY of radio and TV to evoke speedy and effective audience response to an appeal for help was demonstrated again this month when listeners and viewers contributed approximately $100,000 to victims of the flooded areas of England, Holland and Belgium.

Shortly after the floods occurred, the Advertising Council received an emergency request from CARE for broadcast appeals to the American public for funds for blankets, bedding, food, tools and knitting wool. The council passed this request along to the radio and TV networks on Feb. 6 (a Friday) and the following weekend hundreds of messages on behalf of CARE were presented to radio listeners and TV viewers.

By Feb. 13, just a week after the original request was made, CARE told the council that it had received more than enough money for blankets (the first vital need) and the council notified the networks that the emergency was over. Within the week, CARE had received more than $73,000 in cash, checks and money orders from the radio and TV public.

By the following Monday, (Feb. 16) the broadcast audience contribution total had reached $89,000, with CARE estimating that it would pass the $100,000 mark before the end of the week.

Most of the contributions were small ones, CARE reported, with accompanying letters expressing hope that the $1 to $5 enclosed would help swell the fund to the required total. One day's mail brought two checks for $20 each from the same man, leading CARE to assume that after he had mailed the first a subsequent broadcast appeal led him to send another.

Singled out for special thanks by CARE were Frank Edwards, AFL commentator on MBS, whose appeals were estimated as responsible for contributions totaling $6,000 to $7,000, and WABD (TV) New York, which not only gave scores of announcements to the CARE appeal, but displayed CARE posters on as many telecasts as possible and integrated special appeals into a number of local and network TV programs.

Canadians Prefer U. S. Radio Network Shows

AMERICAN radio network shows and transcribed programs continue to lead in popularity in Canada, according to the January national ratings report of Elliott-Haynes Ltd., Toronto. The report, made up of 2,000 telephone surveys in 23 Canadian cities with populations of more than 10,000, shows 6 of the top 10 network shows are of American origination.

CANADA

Leading are *Edgar Bergen Show*, rating 33.2; *Amos 'n' Andy*, 31.8; *Radio Theatre*, 30.1; *Our Miss Brooks*, 28.9; *Your Host*, 21 (Canadian); *Great Gildersleeve*, 20.8; *Ford Theatre*, 19.4 (Canadian); *Wayne & Shuster*, 18.8 (Canadian); *Suspense*, 18.5, and *NHL Hockey*, 18 (Canadian).

Leading transcribed shows were *Take A Chance*,, 19.6 (Canadian); *I Was A Communist for the FBI*, 18.7, and *Fun Parade*, 18.4 (Canadian).

Leading daytime shows were *Ma Perkins*, 17.8; *Pepper Young's Family*, 17; *Road of Life*, 15.5; *Happy Gang*, 15.2 (Canadian), and *Right to Happiness*, 14.8.

French-language evening shows, all of Canadian origination, were led by *Un Homme et Son Peche*, 35.1; *Radio Carabin*, 34.2; *Chanson de l'Escadrille*, 27.1; *Metropole*, 26.2, and *Jouez Double*, 25.5. Daytime leading French-language shows were *Jeunesse Doree*, 31.9; *Rue Principale*, 30.4; *Les Joyeux Troubadours*, 29.3; *Je Vous ai Tant Aime*, 26.2, and *Vies de Femmes* 26.2.

Ottawa Gets Third TV Outlet

SITE has been chosen for Canada's third TV station at Ottawa, which is expected to take the air in June. Ottawa City Council Feb. 13 approved a site just west of Island Park Dr. near Richmond Rd. in Ottawa's suburban Westboro district. It will take one year to build the entire station, but Canadian Broadcasting Corp. plans to have at least the transmitter room and tower ready for operation by June. Network shows only will be carried at first, with feeds by microwave link from Toronto and Montreal.

CANADA

Philco Relay for Mexico

PHILCO Corp. will supply Mexico's department of communications and public works with a microwave radio relay communications system which will operate between that government's overseas radio receiving station as Escalera and the communications control center in Mexico City. The system, to be installed this year, will provide 35 simplex and 4 duplex voice channels, 12 simplex teletype channels and 4 wideband channels which can receive and transmit fax or radio programs.

NEA Group Asks Extension Of FCC Reservation Limit

EXTENSION of the FCC deadline for reservation of educational TV channels for three years was advocated by the Assn. for Supervision & Curriculum Development, a branch of National Education Assn., at the NEA's annual meeting Feb. 12. The present deadline is June 3.

Originally the ASCD resolution called for a 10-year extension of the deadline. Carl E. Smith, vice president of United Broadcasting Co., Cleveland (WHK Cleveland, WHKC Columbus), participating as a resource delegate, proposed the time be limited to one year but the three-year compromise prevailed.

Mr. Smith told ASCD delegates the resolution is not consistent in that it states on the one hand that TV channels are an important natural resource of all the people while it also requests that many educational channels be held stagnant for a minimum period of 10 years.

Offers Challenge

"Of all people," Mr. Smith asked, "why should educational people request the government for such favoritism? Do you not have the stamina to pick up and develop this valuable claim in TV that has been offered to you on a silver platter by the FCC?

"I feel that ASCD members can do the most good by returning home to build a favorable record on which FCC can give individual consideration. If you have an interest in educational TV for your community you should express this fact to FCC with an application for one of the reserved channels or if this is not possible it would be advisable for you to report your progress to FCC before June 3, 1953, and request a minimum extension of time in which to prepare your application."

"Hey, Joe, which station do you always use in Altoona?" "Why, naturally, Moe,

WVAM"

"It reaches *more* people in central Pennsylvania with *more* power (1000 watts, day and night) with *more* of radio's best shows—CBS.

"That's why *more* local and national sponsors are putting their sales messages on WVAM."

ARE YOU?

Rates Shows for Students

SELECTED radio and TV network shows recommended for student listening, covering the winter quarter, have been listed by the Federal Radio Education Committee. Prepared by Mrs. Gertrude G. Broderick, radio-TV specialist for the committee's office of education, the list rates shows for educational significance, instructional adaptability and program quality. TV shows were included for the second time in the quarterly report.

Tuttle Tells Educators Only 21 Bids for Channels

ONLY 21 educational institutions in the country have applied for television channels, Edward M. Tuttle, executive secretary of the National School Board Assn., said Feb. 14 in Atlantic City.

He reminded more than 1,000 delegates at the association's annual convention at Haddon Hall that the FCC had set June 2 as a deadline for applications for the 242 channels reserved for educators.

Mr. Tuttle said he was certain the channels would be held open beyond the deadline if communities could show "bona fide interest" in education-by-television. He added, however, that it would be futile to ask for a blanket extension.

Frank H. Trotter, retiring president of the association, explained that high costs are deterring many school boards which want to use TV.

A TV station costs $250,000 to $500,000 with operating expenses in excess of $150,000 yearly, Mr. Trotter said. The latter figure, he said, doesn't include "talent costs" since it is assumed educators would appear on educational programs without additional salary.

National TV News Seminar Set April 28 by RTNDA, Medill

FIRST National Television News Seminar, with how-to-do-it sessions for newsmen as well as station managers, will be co-sponsored by the Radio-Television News Directors Assn. and the Medill School of Journalism, Northwestern U., April 28-May 2.

The five-day practical session in television news costs and coverage will take place at the Orrington Hotel in Evanston, Ill., near the N. U. campus. Enrollment is limited to 40 persons in an effort to personalize the seminars, which will be handled by guest experts working in the field.

Subjects to be discussed include how to make TV news pay its way, costs of a video news operation, methods of presentation, station processing of news film and pros and cons of keeping a staff photographer.

Speakers will also give their views on writing, editing and producing techniques, cost breakdowns for sponsors, program building, use of news associations and program services and television as affected by law.

Registration fee is $50, payable to Baskett Mosse, radio-TV journalism chairman at N. U. He is planning the seminar with Tom Eaton, president of RTNDA, WTIC Hartford, and other members of the association.

Upcoming Events

Feb. 23-24: NCAA TV Committee meets on controlled football video plan details, Chicago.

Feb. 27-28: Third annual Regional TV Seminar (for TV-minded college students), WAAM (TV) and Johns Hopkins U., Baltimore.
